CHARGE OF SHOT KILLS HUNTER

Mr. Samuel Hudson Meets Instantaneous Death at Union Bay Through Accidental Discharge of Gun

NANAIMO, Oct. 2.—News reached here today of a shooting accident which occurred at Union Bay yesterday, in which Samuel Hudson, an old-time and well known resident of that place, met instant death.

It appears that deceased along with some friends was preparing to go on a shooting trip when for some reason or other the gun of a companion standing by was accidentally discharged. The shot unfortunately struck Hudson in the neck and passed through the top of his head, completely shattering it. Death was instantaneous.

Hudson was about 36 years of age and formerly resided in Wellington. He was well known in this district. Deceased was the eldest son of the late Sam Hudson, who lost his life while assisting with a rescue party in the 1887 coal disaster here.

PIONEER ROAD IS PROSPEROUS

(Continued from Page 1.)

ern Canada that about 374 miles will be finished within the next couple of months and added to the mileage that is being operated. It will not only be desirable but necessary to continue to build year by year a good many miles of these branch lines to provide present and incoming settlers with transportation facilities—more miles, indeed, than you would have been called upon to provide had the Dominion and provincial governments, who have pledged their credit almost beyond the limit of prudence to assist other railway companies, insisted that these companies should open up new territory instead of building their lines through settled sections of the country where ample transportation facilities already existed.

Double Tracking.

"It is evident that on some portions of the system the time is almost at hand when a single track will not accommodate your growing traffic without congestion and increased expense, and, therefore, your directors are of opinion that the double track should be continued westward from Brandon to Medicine Hat, a distance of about 524 miles, as rapidly as the work can be done without undue interruption to the train service. With all that has been done during the past seven or eight years, we find that at points like Montreal, Toronto, Ottawa, Fort William, Winnipeg, Calgary, and Vancouver, we must still further enlarge our accommodation for passengers and freights. Nearly all of the requisite property has been acquired, and the various works will be carried to completion as soon as possible.

"It is important that modern and commodious shops should be provided for the maintenance and repair of the large number of cars and locomotives now in service on your lines in Alberta, and it has been decided that for present and future convenience and economy Calgary will be the best location for these shops, provided that suitable arrangements can be made with the city authorities.

"The outcome of the first season's work on the irrigation system in what is known as the Eastern block is very gratifying. The great dam at the Horseshoe bend of the Bow river south of Bassane is almost finished, and before the close of the season upwards of six million yards of material will have been removed in making ditches. This should ensure the completion of the work within the next two years, but, of course, some of the land can be served with water before that time.

"After more than twenty years of immunity from serious accident of any nature to our fleet on the Pacific ocean we were so unfortunate as to lose the steamship Empress of China, wrecked on the coast of Japan on July 27. Another steamship to take the place of the Empress of China, but twice as large and costly, will be provided at the expense of the steamship replacing fund.

Good Business Conditions.

"Very favorable business conditions exist throughout all the territory served by your lines in Canada, and there would appear to be ample justification for expecting their continuation. West of Lake Superior there is a universal spirit of confidence and buoyancy, and while there is some apprehension that real estate values are, in certain localities, on rather a speculative basis, there is room for serious error in this regard because of the business strides that are being made by almost every city and town of any importance. It will be disappointing if the immigration next year is not larger than ever before, and with our country's advantages now well known and recognized all over the world, there would appear to be no good reason why we should not have an increasing number of newcomers year by year for a long time to come. If this be the case, there will be no halt in the activity and progress of the west.

"The commerce and manufactures of Eastern Canada are in a thriving state, as indicated by the quantity of goods that are being shipped. The increase in the demand for a great many articles previously manufactured abroad or that have been made in Canada only in a small way, encouraged the establishment of new industrial works as well as the enlargement of existing ones, thus furnishing employment for thousands of additional workmen, so that in point of increased population, Eastern Canada has quite kept pace with the West. With the continuance of good times in the agricultural districts the commercial interests of the country will be proportionately benefited, and those who are engaged in enterprises should feel warranted in making such additions to their works and employing such additional workmen that large consumers of material in Canada will no longer be compelled to go abroad to get any percentage of their requirements.

"The shareholders, directors and executive are to be congratulated on having a most capable staff of officers and employes, to whose united efforts the signal success of the company's operations may be attributed. Since the close of the fiscal year the company and the board of directors met with another serious loss by the death on July 13 of Mr. Robert Meghen, who joined the board in 1908. Mr. Meghen was a good citizen, a capable and upright business man, and had been a warm friend and supporter of the company from its inception. Sir William Whyte who, as vice president, was for many years in specin charge of the company's interests west of Lake Superior, and who recently retired from active service, has been elected a member of the board to fill the vacancy causd by Mr. Meghen's death."

At the meeting of the board subsequently held Sir Thomas Shaughnessy was re-elected president.

The Canadian Pacific operations with its Place Viger station in this city are nearly completed. The operations, which include the building of a new station, the enlarging of the terminal yards, the construction of a big steel viaduct and the remodeling of the Place Viger hotel, has made necessary an expenditure of over a million dollars With the operations at this point completed, the Canadian Pacific will have one of the finest terminals in America. The yards cover forty-eight tracks and ten passenger tracks and an area of over seven hundred acres.

TRIPOLI FORTS ARE BOMBARDED

(Continued from Page 1.)

Early today the first division of the Italian fleet under Admiral Faravelli resumed the bombardment. The Turkish garrison occupied a position behind the forts and responded with a few shells, which fell short.

The Italian commander endeavored to avoid damaging private dwellings, but some of them were destroyed, and the governor's palace and the three forts at the entrance of the port are in ruins.

The consulates and churches have not been damaged.

The second division of the fleet, under Vice Admiral Thaon di Revel, has approached close to Kenhazi and Derna. A bombardment of these ports, it is understood, is to begin tomorrow. It is denied that the bluejackets will land soon. Such a landing may be decided upon after the arrival of the expeditionary corps.

Before commencing the bombardment of Tripoli, the Italian squadron removed all mines and made a careful revision of the hydrographic chart, to insure safety to the coming transports. This operation lasted several days, and practically was the real delay in the bombardment.

Four Italian officers have come to Djerba and are proceeding overland to Tripoli on a reconnoitering expedition, as the Arabs are expected to offer stubborn resistance to the occupation of the vilayet.

Reported to Rome

ROME, Oct. 4.—The dispatch to the government announcing the bombardment of Tripoli was timed at Tripoli at 7.45 o'clock last night, and is as follows:

"On board the battleship Bernedetto Brin, Tuesday.

"A bombardment was commenced at 3|30 o'clock this afternoon on the principal batteries of Tripoli and was continued until sunset. The batteries responded to the Italian fire, but without effect. The bombardment will be continued tomorrow until the destruction of the batteries has been completed. Great care was taken during the bombardment not to damage the city. Only a lighthouse on one of the batterfes was destroyed."

In cautioning the fleet commanders to limit their action to silencing the batteries and compelling the Turkish garrison to surrender or evacuate, the ministry of marine told the officers to remember that the provinces wer eabout to pass under Italian control, and the more damage done, the greater would be the expense of repairs later.

A message from Admiral Thaon Di Revel says the action appeared more like a shooting competition than a bombardment. Officers and sailors placed wagers on the results. In one instance an order was given to dismantle a particular battery. One gunner was heard to say: "I bet I can knock down the left turret at the first shot." When the smoke had cleared away the turret had disappeared. The same voice spoke again: "Now the right turret." In a flash the second mark was ruined.

Correspondents Pooled

Representatives of the foreign governments here admire the organization of the censor, which although strongly condemned by the press, permitted the government to make all its preparations for war in secrecy.

It appears now that the government executed a bit of strategy at the expense of the correspondents. They were permitted to go to the scene of war, some being accommodated on vessels of the fleet. This action was a surprise in view of the government's attitude toward the press. The correspondents, however, had not been long in Tripoli when upon the pretext that the bombardment was to begin and the desire of the Italian officers to secure their safety, they were taken aboard the warships, and, as the story goes, "bottled up" at sea, without being able to describe the subsequent events.

Turkish Indignation

LONDON, Oct. 4.—The Chronicle's Constantinople correspondent sends the following despatch:

"The antagonism against the committee of Union and Progress, the leaders of which are held responsible for the condition in which Turkey found herself at the outbreak of the war, is growing. Many influential people are refusing aid to the government so long as the "tyrannical sway" of the committee continues.

"A new committee, calling itself the National Defence committee, has been formed and is sending circulars throughout the country. The chief cause of complaint against the committee of Union and Progress is ignoring the warning of the governor of Tripoli concerning the condition of defence and the intentions of the Italians."

The Chronicle's Salonika correspondent says:

"General mobilization of the army has been ordered and the enrollment of volunteers is proceeding rapidly. The redifs, who are being summoned to return to the colors, are responding with enthusiasm."

The Chronicle's Constantinople correspondent says:

"The Turkish women are displaying great patriotism, and are offering their money, jewels and precious carpets to help their country's cause. A high Ottoman official informs me that never before has Islam presented such a united front, and that never before has England had such a magnificent opportunity to win by a judicious policy the sympathies, not only of the Ottoman people, but of the whole Islamic world.

"The startling report has reached the Osmanischer Lloyd that the Italian and Turkish fleets are engaged in a fierce battle north of Mitylene. Similar information has reached the Austrian officers here.

"A new cabinet has just been formed, but it has no stability and no programme, and therefore will be short-lived.

"The newspaper Ikdam reports that an Italian cruiser has been sunk by a Turkish torpedo boat off Tripoli.

Shots at Prevesa.

TARANTO, Italy, Oct. 4.—At Prevesa today Captain Biscaretti ordered his destroyers to open fire against the Turkish torpedo boats at five miles. The shots caused a panic among the Turkish crews, who threw themselves into the sea.

Meanwhile the Italian commander expected an attack from the fortifications of Prevesa, but they kept silent. He feared a trap and ordered the Atigliere to remain stationary while the Corazziere inspected the port.

Captain Biscaretti himself commanded the Corazziere, which cautiously approached under the batteries, but these gave no signs of life.

The Corazziere entered the harbor and captured a Turkish yacht. Sailors from the wrecked torpedo boats, having reached the docks by this time, gave the alarm. The destroyer took the yacht in tow and was starting out of the harbor when the sailors from shore rallied and fired a volley. The Corazziere returned the fire, shelling several houses and the docks, killing or wounding many of the attacking party and causing indescribable panic among the sailors.

The destroyer's operations within the harbor lasted forty minutes and she passed through the channel with the yacht in tow, without a shot being fired from the batteries or fortifications.

Capture of Mitylene.

LONDON, Oct. 4.—A news agency dispatch from Vienna says it is reported from Constantinople that an Italian squadron has bombarded and occupied Mitylene, capital of the island of Lesbos, in the Grecian archipelago, belonging to Turkey.

It is reported from Rome that negotiations for the surrender of Tripoli will be entered into tomorrow. It is uncertain whether any Italians landed following the bombardment, but the first contingent of the expeditionary force has left Italy, and according to Malta reports the occupation of Tripoli will begin Thursday or Friday by the landing of contingens from the warships.

The postoffice and the Italian consulate at Malta are accepting mails for Tripoli, and the consul has promised newspaper correspondents that they will be allowed to land in Tripoli on Friday.

The Turkish government is in a hopeless tangle. The machinery is virtually non-existent, dissension between the Young Turks and the men of the older regime rendering the adoption of any definite line of policy impossible.

All talk of mediation or peace negotiations has been relegated to the background.

More Bombardment.

ROME, Oct. 4.—A naval division under Admiral Thaon Di Revel has been ordered to bombard Derna and Benghazi on Thursday. The instructions are not to land sailors unless absolutely necessary; as the occupation of these places will be accomplished by soldiers.

Appeals to Britain

LONDON, Oct. 5.—The Daily Mail's Salonika correspondent says that as negotiations with Germany have proved fruitless the government is now turning to Great Britain in quest of a modus vivendi satisfactory to Turkey's honor. The committee of Union and Progress approves the new cabinet, but if negotiations with the British government fail and the ministry displays any sign of yielding to Italy, the committee will overturn the cabinet and the chamber.

It is reported from Mundua, in the extreme north of Albania, that Italian warships have seized two Turkish coasting vessels. A despatch to the Times from Rome says it is certain Italy will consent to no peace terms unless they include the surrender of Tripoli.

A Constantinople despatch to the Times explains the escape of the Turkish squadron.

When the warships left Beirut on September 28 the officers were unaware of the strained relations with Italy. Early on October 1 a government yacht warned the squadron that war would be declared. It steamed north at full speed arriving in the Dardanelles at 4.30 o'clock in the afternoon.

ALASKA COAL LANDS

U.S. Government Appeals from Court's Decision in Cases of Munday and Shields

WASHINGTON, Oct. 4.—The government's reasons why Charles F. Munday and Archie W. Shields should be tried in the state of Washington on indictments charging them with conspiracy to defraud the United States of Alaskan coal lands were outlined today in a brief filed in the federal supreme court.

The United States supreme court for western Washington had quashed the indictments on the ground that the coal land laws applicable to Alaska did not restrict persons or associations to a single exercise of the right to locate coal land claims.

Solicitor General Lehmann, in the government's brief, said if the Washington court is right one person or association may locate upon all the coal lands in Alaska.

It is claimed for the government that Congress, in extending the United States coal land laws to Alaska in 1904 intended no change in them except to extend them to survey regulations and to adapt mere matters of procedure in making locations and perfecting entries to the peculiar conditions in Alaska.

Favor American Shipping

SAN FRANCISCO, Oct. 2.—The initial move in what was announced as a nation-wide campaign for the upbuilding of the American merchant marine was made today when the San Francisco chamber of commerce adopted a resolution urging that vessels flying the American flag, be passed through the Panama canal without toll. Steps were taken at the meeting to arrange immediately for an exhaustive publicity campaign along the Pacific coast with a view of furthering the movement.
