KINGS CO., P. E. I.

HERMANVILLE, Aug. 28.—The protracted drought and hot sunshine of the past three weeks has prematurely ripened the grain crops. Oats are the greatest sufferer. There was prospect of one of the best oat crops in years until the drought set in. Farmers are cutting them as they have all the appearance of ripening though they are not ripe, but turned yellow and breaking down. Roots are doing splendidly. Potatoes will be a record crop. Pastures are poor, and will not support the cows since about July 27, since when they have had to be hand-fed to get a full flow of milk. Pigs were never so troublesome as they are this summer. We cannot depend on pasture and immense quantities of green feed are needed. Horses have had to be fed grain to supplement the poor pasture. Oats and corn are very high in price. It is pretty expensive to keep animals this summer, with the exception of sheep. We shall have to all go more into sheep raising around here, as this appears to be the most suitable animal for our environment.—J. A. M.

CAPE BRETON CO., N. S.

SALMON RIVER, Sept. 7.—We have had a long continued period of very dry weather. This enabled the farmers to get their hay up in first class condition. The crop was the heaviest in years. Oats are very heavy and ripening fast although very badly rusted. Potatoes may be a good crop unless something unforeseen happens. The potato beetle did comparatively little damage. Pastures are very dry and dairy cattle have fallen back slightly in milk. Prices are high and all produce is in good demand.—J. H. Moll.

RICHMOND CO., QUE.

DANVILLE, Sept. 11.—Haying is finished, with a very good crop and harvesting is pretty well along. Straw is short, owing to the hot, dry weather. Pastures are good for the season and cows are milking well. Potatoes will be a small crop this year; other roots are fairly good. Butter is 35c.; eggs, 30c.—M. D. B.

HASTINGS CO., ONT.

TRENTON, Sept. 11.—Grain crops are pretty light on some farms, but fairly good on others. Hay was abundant, but the second crop of clover is very light generally, though there are some very good pieces following early cutting. The weather is very dry. Not much plowing has been done, as the ground is very hard and dry. The corn crop is light and potatoes a failure.—J. K.

WELLINGTON CO., ONT.

GUELPH, Sept. 12.—At present we are in need of rain in this district to moisten the soil for fall plowing and cultivation. Very little fall wheat has been sown, except on summer fallow, as the ground has been too hard to plow. Summer fallows which have been well cultivated during the summer have sufficient moisture to ensure good germination. Threshing operations are in full swing. Fall wheat and rye are yielding well. Oats are rather light, but are turning out fairly well. Mixed grain (oats and barley) are good but peas have given a poor yield. A few corn fields have already been touched with frost.—C. S. N.

OXFORD CO., ONT.

WOODSTOCK, Sept. 5.—It is very dry yet with no rain to speak of since the heavy rains in the summer. Harvest is all gathered in and a number of the farmers have threshed. The grain is not turning out well. Oats are very light and a number of the farmers are not going to thresh them. They were late in getting them sown in spring and the grain is so poor it would not pay to thresh it. Cows are not doing so well. The pastures are all burned up. Silage is the only remedy for burned up pastures. We have to feed a certain amount of grain as well as ensilage. All kinds of feed are very expensive this year.—A. M. M. D.

ELGIN CO., ONT.

PORT BURWELL, Aug. 31.—Weather conditions are all that could be desired. Hot, dry weather has left us and cool weather has come. Farmers are doing their fall ploughing. Buckwheat bids fair for a good crop. Dairy cows in good condition and giving a good flow of milk. Hogs selling at $11.50; eggs, 35c.; butter, 32c.; potatoes, $2 a bushel; blackberries, 5c. a lb. Corn bids fair for a good crop where it has been cultivated and the weeds have been kept down. Picnics are the order of the day.—P. B. F.

COMPLETE DISPERSION SALE OF **Maple Hill View Holsteins**

40 HEAD at **40 HEAD**

LACHUTE, QUE., Sept. 28, 1916

Through our sixteen years in breeding registered Holsteins only the finest of individuals have been used. Practically every animal offered has been bred at our stock farm—the type and blood that has given big returns both at the pail and under the hammer. The offering includes

10 Daughters of

DORA DOT CORNUCOPIA JOHANNA LAD

A Brother to

LUTSCKE VALE CORNUCOPIA (31,229 lbs. milk)

THE

WORLD CHAMPION YEARLY MILK PRODUCER.

Well-veined, well-bodied breeding such as this is what we offer on Sept. 28—only a few sires among them—practically all the females in their prime and in calf to the herd sires. We have a catalogue for the breeder who desires to add to his herd. On day of sale all C.P.R. trains stop at Wilson's Station, 15 minutes from farm. Lachute is 5 miles from farm on C.P.R. and C.N.R.—40 miles west of Montreal.

ANDREW BOA & SON Maple Hill View Stock Farm **LACHUTE, Que.**

Fairmount Holsteins

Young bulls for sale, all sons of the great King Segis Alcartra Calamity, whose ten nearest dams average over 30 lbs. butter and nearly 4.50 per cent. fat. All from good record dams; one from a 22,000-lb. granddaughter of Colantha Johanna Lad, at prices that will sell them. Also cows and heifers bred to King.

PETER S. ARBOGAST
R.R. No. 2, Mitchell, Ont.

Holstein Cows Excel All Others

Proof is Found in 100,000 Official Test. For Profitable Yield of Milk, Butter and Cheese, No Other Breed Can Equal Them For the Production of High Class Veal. When Age or Accident Ends Their Usefulness Holsteins Make a Large Amount of Good Beef.

W. A. Clemens, Sec'y., H.-F. Assn., St. George, Ont.

CLARUM-BRAE FARMS FOR SALE

286 acres, 40 miles east of Toronto. C. N. R. station Solina on farm. Large barns, three silos, two good houses, trout stream, 10 acres orchard. Farms can be divided. Easy terms. Write for diagram.

GEO. J. NORTHCOTT, - - "Clarum-Brae," HAMPTON, ONT.
