"BT" STEEL STALLS & STANCHIONS

with cement floors reduce labor to a minimum, and make bright and sanitary stables. They are practically indestructible, while the old-fashioned stables are constantly in need of repair, and are always head quarters for vermin. Keep with the times and keep up to date stables.

Our new catalogue contains a lot of valuable information for you if you are building a new barn or remodelling your old one. It is free, and a post card with your name and address plainly written will bring it.

DO IT ALL

WITH THE

Modern Farm Horse

You can take a Hart-Parr Gas Tractor and do more and better plowing, seeding, harvesting and hauling with it than with all the teams you can profitably employ. Its deeper plowing, more thorough harrowing and even seeding assure an increased yield, and its enormous capacity enables you to get through each season's work ten days to two weeks earlier than is possible with horses.

It is especially adapted to the cultivation of summer fallow, also discing and seeding, because its drivers are supplied with a wave form of lug which enables it to travel easily over plowed ground without injurious packing of the soil; it can be used on almost any ground where horses can work.

Horses eat their heads off during the winter. Sell most of yours and buy a Tractor. Its a lot more economical in cost of keep and operation. Its daily "feed" is low-grade kerosene, costing only 11 cents net in Winnipeg. When idle the expense stops.

It is a money maker and a money saver from the moment it arrives on the farm. We build three sizes, suitable for farms from a quarter section, up.
