disasters, and for the examination of the captains and other officers having responsible positions on board passenger vessels. The suggestion is one of importance and magnitude, and cannot too soon receive the attention of the authorities.

It is reported that the Board of Underwriters have opened negociations with the Boston Submarine Armor Company, having for their object the raising of the hull of the Central America. It is supposed to lie in twenty eight fathoms of water. If the position of the wreck can be clearly fixed, the specie which was on board would afford a rich reward to the operators.

☞ The usual Annual Agricultural Fair, for the Parish of Simonds, is to be held at Loch Lomond, on Friday, the 13th instant, after which the Society's Annual Dinner will take place. The products of this parish are not exceeded by any in the Province, and the Fair is generally made the focus of a large gathering to inspect the specimens offered, and which we are inclined to think, will, this year, exceed considerably those for many previous ones.

☞ The Physician of the House of Correction at Lawrence, Mass., reports it almost impossible to treat delirium tremens successfully now, in consequence of the utter prostration of the nervous system of drunkards, by the strychnine so generally used in the manufacture of various liquors.

STOUT AHEAD.—We perceive that Mr. James McKay, the builder of the boat that was taken to Halifax by the Union Boat Club, and of the New York boat which was defeated in Boston harbour last year by the Neptune, has accepted the challenge from Carleton; preliminaries to be settled this evening. This will be a trial of skill between old Carleton and the victorious Union Boat crew who has won laurels abroad. Indian Town crew should have a boat in and thus settle the championship between three rival crews.

We regret to have to record that a fire broke out in the barns attached to the residence of R. Jardine, Esq., on Tuesday morning last, causing the destruction of a quantity of very valuable live stock, farming implements, upwards of eighty tons of hay, &c., and it was with great difficulty that the fire was prevented from spreading to the house. The was no insurance, and there is every reason to suppose that it was the work of an incendiary, for the discovery of whom a reward of £50 has been offered. Loss estimated at £700.

TO CORRESPONDENTS.—Want of time to place them in type prevents the insertion in this issue, of the Communications of an "Old Settler," and a "Mechanic."

☞ AMERICAN HOUSE, BOSTON.—It will be seen by the advertisement in another column, that this popular Hotel has adopted the old plan of management, under which it has gained so favorable a reputation, and the gentlemanly proprietor will still continue to afford every comfort and convenience to the travelling public.

INQUESTS.—On Wednesday, an Inquest was held on the body of Denis O'Leary, a laboring man, who was found dead in the yard of the house in which he lived. His leg was broken immediately below the knee, and was scraped, and there were other marks on the body. From the evidence of the inmates of the house, it appeared that he and his wife lived in a room three stories high. All the parties in the house went to bed before ten. In a room off that in which deceased slept, four persons lay, and they heard no noise of any kind. The wife stated that before day she woke, and he was then in bed, and she thinks that he must have fallen out of the window, which he was in the habit of opening in the morning. He was subject to epileptic fits, and might have been seized with one as he stood at the window, and the scrape on the leg seemed as if caused by the falling of the window on it as he went out. She knew nothing of what had occurred until a woman living in the lower part of the house came to tell her that her husband was dead. Verdict—"Accidental Death by falling from a Window."

On the same day an Inquest was held on the body of the old constable, Robert M'Kelvey.—The statement of his wife and daughter, is that on Monday about 12 o'clock, he went home from the Court House and went to bed; that they called him at 2 o'clock to return to Court and he got up. He appeared very feeble, tottered and fell where a child was playing with some old irons. They took him up, put him to bed and sent for Dr. Miller, who attended him until he died on Tuesday. The old man's skull is fractured on the top for some two inches, and it seemed strange that such an injury should be caused by such a fall as was described. The Inquest was adjourned.—*Freeman.*

The Coroner's Jury have not yet returned their verdict.

SICKNESS IN MONCTON.—It would be useless to deny that a good deal of sickness exists in Town at present, but thank Providence it is neither deadly nor dangerous, its worst form is that of Influenza, in most cases light, in others more severe.—*Westmorland Times.*

COMMERCIAL CRISIS.—The United States has been passing through a great commercial crisis. Large number of banks have suspended payment, and a great many failures have taken place. The Boston *Courier* thinks the crisis is over.

Our young townsman Mr. Fraser, son of the late Dr. Fraser, and grandson of Mr. Needham, is in the very midst of the turmoil in India, and holding as he does, the honorable position of commanding Gen. Havelock's personal escort, must already have borne a distinguished part in the most important actions of the war.—*Fredericton Reporter.*

MR. WM. HENRY TODD, of St. Andrews, and MR. GEORGE ALBERT HAMILTON of Sheffield, in this Province, have had the degree of Doctor of Medicine conferred upon them, at the examination in the University of Edinburgh on the 1st of August.

CANADIAN PROGRESS.—Total population of lower Canada in 1857, 890,261; Do. do. upper Canada, 952,004; total, 1,842,265.

Total estimated population of lower Canada up to 1st of January 1857, 1,220,574; Do. do. Upper Canada, 1,350,923; total, 2,561,436. Increase in 5 years, 729,162.

☞ Sir Edmund Head, the Governor-General has been made a Privy Councillor, and is now the "Right Honorable." He has taken his passage in the *Indian* on her next voyage out to Canada.

NOVA SCOTIA is not without her representatives in the strife now raging in the East.—We understand that Lieut. Col. Inglis, (son of the late Bishop) is with his regiment (the 32d) at Lucknow, of which place our last accounts say nothing better than "it still holds out." A son of the late Judge R. Uniacke, is in the Cavalry before Delhi, a son of Col. Bazalgette, we believe is at the same dangerous post, a son of A. M. Uniacke, Esq., also is on his way to India, with his regiment—and we dare say there are others from our little Province, of whom we know not. That when they have the opportunity, they will do their duty, and reflect credit on their native land, we have no doubt.—*Halifax Journal.*

THE "ARABIA" AT NEW YORK.

NEW YORK, Oct. 2.

The Arabia arrived this morning. The papers are mostly occupied with details of the India news.

Advices from Delhi to July 29th, state that English had been largely reinforced, and that a general assault in a few days was contemplated.

Several desperate sorties by the mutineeers, were repulsed, the British loss being over 500.

Reports through a French source, give reason to fear that Agra had been captured, and the garrison and all Europeans destroyed.

A mutiny had broken out in the Bombay presidency, but was promptly suppressed.

The European news is unimportant.

The Bank of England had declared a dividend of 5 1-2 per cent. on the year.

MARKETS.

Liverpool Cotton, ½d. dearer; sales of week 75,000 bales.

Breadstuffs slightly declined, except Indian Corn, which was firm.

Another despatch says that circulars quote flour 6d. to 1s. dearer, and scarce.

Sugar steady at former rates.

Tea in active demand at slight advance.

Consols 90⅞.

SHIP NEWS.

Arrived from St John—Dumfries, Empress, Martha, North Atlantic, Rockaway, at Liverpool; Edgar F. Shinger, Tornado, Addison, Gilbert, at Gravesend; Artonus, at Dundalk; Claude, at Warren Point; Grandee, at Wexford; John Lovett, at Galway; Louise Jewett, at Clyde; Staghound, at Queenstown; Sumpter, at Cork; Thomas Killam, at Troon; Victress, at Dublin.

The barque Sarah Dorothy, bound to Saint John, rescued the passengers of the ship Harkaway, from Charleston, bound to Liverpool and burnt at sea. She transferred a portion of the rescued to the steamer Atrato, arrived at Liverpool.

DECLINE IN SUGAR AND MOLASSES.—Within a few weeks there has been a great fall in the U. States in the value of sugar and molasses, that must result in the loss of millions of dollars to holders. The decline in sugar has already reached three cents a pound and is still rapidly going down. When the fall had reached only one-half the amount, a few weeks since, the New York *Independent* estimated that on the stock of 85,000 tons of Sugar and four million gallons of Molasses, held in that port alone, the loss was then fully three and a half million dollars. Of course it must be double that now. At the present time, the Boston *Traveller* thinks the loss on the quantity in the United States, Europe, and afloat, cannot be less than fifty millions of dollars, and as the tendency is steadily downward, it will probably reach a hundred millions before the dealer will be able to touch the next crop.

A CORPS FOR INDIA.—The *Deutsche Allgemeinne Zeitung* publishes a letter from Damascus, dated August 5th, in which it is stated that the son of an English merchant there, named Whyte, whose fortune is estimated at £2,000,000, had at his own expense raised and equipped a corps of thirty Europeans with whom he had the day before set off to join the British forces in the East Indies, as a volunteer, together with his "following." The course they had taken was in the first instance to Beyrout, to embark there for Egypt, and to proceed thence to the East Indies. With the exception of the above, the force has been raised exclusively from the working classes, and consists of 31 Britons, six Italians, two Frenchmen, and two Greeks; and these modern Paladins trust to reach the seat of action early in this month.

STOPPAGE OF MILLS.—Nearly all the cotton and woollen mills of Philadelphia have stopped already and the remainder are only working up the limited supply of material on hand. These stoppings have thrown out of employment over four thousand males and females, whose weekly wages amounted to $25,000 or 100,000 a month. If the other mills stop, as many more operatives will lose their employment, and the public will have to sustain them.

The Connecticut mills are also running on short time. The Pacific Co's knitting mill at Manchester, is now running short time, and a still further contraction is contemplated. The Merry Company at Mansfield, knitting factory, contemplate a stoppage of work next week, unless the screws of the money market are loosened. One or two paper mills in Tolland County have stopped business.—*Boston Journal.*

CANADIAN VOLUNTEERS FOR INDIA.—The Brockville Volunteer Rifles have tendered their services, to go to India. Col. de Rottenburg, in replying to Major Smythe's offer, says that it has given the Administrator of the Government much satisfaction, and that his application has been transmitted to the proper authorities in England.

THE INNER MISSION.

"Preserve and Regulate, not Destroy."—There is in Germany a vast organization, known by the designation of "Inner Mission," which is without parallel in the variety and extent of its religious objects. What this organization is to the spiritual darkness of mankind, Professor Holloway's world-embracing system of medical agencies is to their bodily infirmities. As the German institution disseminates through its innumerable *colporteurs* religious instruction and consolation among the people of every land; so the agents and representatives of this indefatigable philanthropist offer the means of cure to the sick of all regions. His remedies are as potent to control disease and preserve and prolong life, as their tracts and homilies are to check vice and promote virtue. His, too, is an *Inner Mission*, for there is no internal disorder which does not yield to that most powerful and infallible, yet safest of all antidotes Holloway's Pills. Probably half the mortality which annually occurs among civilized nations, might be traced to neglected derangements of the stomach. This delicate and important organ is fearfully abused. Luxury on the one hand and privation on the other, disorder its functions and destroy its vigor. It is surfeited, starved, stimulated, paralysed—in every way misused, and from the chronic dyspepsia and other forms of indigestion engendered by this maltreatment, hundreds of terrible maladies, affecting every portion of the system, inevitably spring. Doctors are called in, and what is their prescription? Calomel! The mischief done by the disease is consumated by the so-called remedy! Corrosive poison forms no part of Professor Holloway's irresistible curatives. His Pills composed of hygean vegetable substances, reach and neutralize the destructive elements of disease in the animal fluids with as much celerity as light banishes darkness. That they should fail to produce this effect is a chemical impossibility. Nor is this all. They act as an invigorant, restoring to the stomach its normal activity, strengthening the constitution, and infusing fresh vitality into every torpid organ. Equally salutary is the effect of Holloway's Ointment in all external affections, and those who rely upon his two great remedies, to the exclusion of all other medical preparations, will never find that their confidence has been misplaced.—*Plymouth "Journal."*
