MINES AND MINING STOCKS.

Trial Balance Sheet of a British Columbia Property.

The Cariboo of Camp McKinney Makes a Good Showing — Good Reports From the Fern—Mining in the Seine River Region of Ontario.

Inasmuch as considerable stock in the Cariboo gold mine of Camp McKinney, B. C., is held in Toronto, the following copy of the trial balance sheet of the property, made out on July 1, 1898, will prove of interest to many World readers:

	Dr.	Cr.
Capital stock		$ 800,000 00
Water rights and mines	$ 800,000 00	
Nine teen dividends paid since February, 1895	220,964 76	
Expense account	17,836 16	
Mill account	17,352 62	
Personal property	354 51	
Mineral tax	1,320 83	
Bullion account		437,402 93
Building account	575 73	
Amelia claim		26,230 20
Profit and loss	8,700 00	
Labor account	124,972 99	
Mine and mill supply account	51,868 55	
Bills receivable	518 40	
Rent account		3,781 81
Treasurer's account	22,950 39	
	$1,267,414 94	$1,267,414 94

What makes the above more interesting is the fact that several hundred thousand shares in the Minnehaha mine, which adjoins the Cariboo, are also held in Toronto and other parts of Eastern Canada. The Minnehaha Company, by the way, has recently added to its holdings by taking in property abutting its original claim.

The Fern Mine.

According to The British Columbia Mining Critic, the returns of the last concentrates and shipping ore from the Fern mine are of the most favorable description. The first carload of concentrates averaged $64.88 per ton. The shipment of shipping ore averaged $74.64 per ton. The reports now received by Secretary-Treasurer C. Bennett from the superintendent of the mine show better than ever. No. 3 tunnel is in 6 feet of ore, of which 2 feet on the foot wall is of very high grade. There is a large quantity of shipping ore now in sight on Nos. 2 and 3 tunnels.

SEINE RIVER DISTRICT.

New Plants Being Installed on Properties Near Mine Centre.

The main shaft on the Standard Mining Company's property near Mine Centre, Ont., is down 80 feet in good-looking ore. It is said to be the company's intention to at once put in an air compressor plant and erect a 20-stamp mill.

The Alice A. mine, owned by Superior capitalists, is looking well. The sinking on the main shaft still continues and shows up a large body of ore. Preparations are being made for the installing of a complete air compressor plant, and the erection of a 30-stamp mill.

The Olive mine people are installing their new compressor plant and putting in the foundation for the new samp mill, the machinery of which is now on the way from the Rand Drill Company, Montreal. The present stamp mill is busily pounding out the gold which keeps up its good record.

According to The New York Engineering and Mining Journal, "The Golden Star Mining Company of Mine Centre has just given an order to Fraser & Chalmers of Chicago for a 10-stamp mill, 1020 lb. stamps, Alaska pattern, with crusher and steam power for 30 stamps, Frue vanners and all other accessories complete. Wilbur J. Merritt is manager of this property, which is one of unusual promise."

Deer Park Meeting.

At yesterday's annual meeting of the Deer Park Gold Mining Company, Limited, held at 30 Jordan-street, Toronto, the old Board of Directors was re-elected, with Messrs. H. J. Scott, Q. C., and Melfort Boulton added. The report presented shows that $12,000 has been expended in developing the property, and that there remains $4000 in the treasury. The work done includes a shaft 214 feet deep, a shaft 122 feet deep, and drifts 270 feet in extent. The bottom of the main workings is in solid ore. The engineer, in his report to the directors, pronounces the Deer Park one of the most promising properties in Rossland, asserts that it has passed the prospect stage, and advises the installation of compressor plant, power drills, etc.

Mining Stocks.

War Eagle sold up to 263 at Montreal and to 262 here yesterday. On the Mining Exchange Hammond Reef advanced, closing at 19 bid. Cariboo (McKinney), 53 was bid for 1000 shares, and 57 was asked. Smuggler was active, closing at 14 bid and 15 asked. Dundee closed at 45 bid. In Trail Creek stocks, Deer Park was very active and advanced from 16½ to 17½, closing at 17½ bid and 18 asked. Evening Star was quiet at 6 bid. Iron Mask declined, selling at 75c. Monte Cristo was neglected at 29½ bid and 31 asked. Seven cents was bid for B. C. G. F. S.

Closing quotations Saturday were:

A Varsity Summer Colony.

The professors and graduates of Toronto University have formed a society to establish a summer colony at the mouth of the Muskoka River on the Georgian Bay, 15 miles northeast of Penetang.

The advance guard has been on the field for several weeks and already the society boasts of a completed club house with two or three cottages under construction. Anyone connected with the college is eligible for membership. A fee of $25 is charged for each member. This fee entitles the individual to a location on the site that has been secured from the Government. This site embraces a large tract of land and it is without doubt one of the best and most picturesque locations on Georgian Bay. Several professors are now at the camp, and others are going up shortly with the intention of passing their vacations there. There is admirable fishing and safe boating among the islands. The university are highly pleased with their new camp and they expect by next season that it will develop into a flourishing and popular summer resort.

Vintage.

Deutz & Geldermann's Gold Lack Sec Champagne, shipped to this country, is exactly the same quality and vintage as that at present used in England, Germany and Russia. It is a vintage wine, and every cork is stamped with the date—being a positive guarantee as to its true quality. A vintage wine is always good; it contains less carbonic gas, digests better, and, consequently, leaves no headache. Insist upon getting a vintage wine. 2

An Open Verdict.

Almonte, July 9.—The inquest on the murder of Henry Gray was resumed Friday afternoon by Coroner Burns, County Crown Attorney. A. G. Malloch conducted the case in behalf of the Crown. After examination of several witnesses, the case was given to the jury, who returned the verdict that Henry Gray came to his death on the 29th day of June, and that some person did wilfully murder the said Henry Gray by shooting him in the abdomen. The evidence did not divulge anything whatever to throw any light on the case towards the conviction of the perpetrator of the deed.

Railway Appointments.

Through the resignation of Superintendent A. B. Atwater of the Western Division of the G.T.R., three new appointments have been made. Mr. Atwater's place is taken by Mr. W. Cotter of London. Mr. J. M. Herbert of Montreal has been appointed Eastern Superintendent, with headquarters at Montreal, and Mr. R. P. Dalton gets the position of Superintendent of Terminals.

Economical Warm Weather Comfort.

Thirst and heat cause bad temper and ill-health these warm days. The more one drinks the thirstier one gets. A teaspoonful of

Abbey's Effervescent Salt

taken in a tumbler of water is unequalled for quenching the thirst, cooling the blood, and invigorating the system. It far surpasses any mineral or ærated water, being more healthful, and having the advantage of being cheaper in price.

Abbey's Effervescent Salt is recommended by physicians and medical journals, and is sold by all druggists at 60 cents a large bottle. Trial size 25 cents.

MONEY IN PEAT BOGS.

What is Being Done to Develop This Industry in Canada—Noteworthy Facts.

Science is constantly discovering means of utilizing the products of nature, which for ages have been deemed comparatively useless.

One of the latest discoveries is that peat bogs may be turned into money, by using the peat as fuel. It is well known that in Ireland, Wales, Holland and Bavaria peat has long been the sole fuel used by the very poor; but recently machinery has been invented by means of which vast areas of hitherto unused bogs can be converted into marketable peat, which as a fuel is said to rival coal itself.

The origin of peat bogs is well understood. They occur in low situations, or where some natural or artificial obstacle impedes the drainage. Abundant moisture favors the growth of a low order of plants, such as the sphagnum mosses. This plant is noted for its absorption and storing of water. Its whole structure is that of an aggregation of reservoirs in successive layers, which are kept filled by capillary attraction, even when the plant itself is above water level. These same properties of the moss tend also to its decay. It requires a constant supply of moisture, yet it is continually pumping up to the surface of its tufts the water in which it stands, thus promoting evaporation, while at the same time, by regularly decaying at the roots, it deposits the detritus which adds to the solid contents of the bog. This process goes on till the bog is raised above the level of the surface waters, when sphagnum vegetation ceases. Thus bogs of considerable depth are made.

Their Vast Extent.

The peat bogs in Canada, and particularly in Ontario, are of vast extent, and, by virtue of their immense stores of carbon, constitute a potential source of fuel supply. In the Townships of Wainfleet and Humberstone, in Welland County, about five miles from Welland, lies a peat bog of some 5000 acres, owned by the Canadian Peat Fuel Company of Toronto. While in the County of Essex, on the lake shore, just south of the town of Leamington, thousands of acres of bog have been purchased by a local company for fuel purposes. The dark, decomposed peat, which underlies the layer of moss, suitable for litter, is being manufactured into fuel. The depth of this peaty section varies from a foot or two at the edge of the bog to 20 feet in the centre. The peat is cut and air-dried, after which it is pulverized by being passed through a picker and automatically deposited in a hopper, which feeds a steel tube about two inches in diameter and 15 inches long. The pulverized peat is forced through this tube by pressure and formed into cylindrical blocks, about three inches in length, and almost equal in density to anthracite coal.

This novel article is manufactured in the form of a hard, dense block, containing all of the fibrous, carbonaceous, volatile and other materials and elements which are originally embodied in the raw peat, and an amount of moisture only corresponding approximately with that in the surrounding atmosphere.

Its Advantages.

The fuel is non-friable and weather proof by reason of its solidity, and the external glaze imparted to it by frictional contact with the forming dies. The inherent moisture of the peat is reduced to 12 per cent. of the moss. In weight it stands thus with coal, 83 lbs. per cubic foot of peat, equals 73 lbs. bituminous of 93 lbs. of anthracite coal. This peat is superior to coal in its absolute freedom from sulphur, and entire absence of smoke, soot, dust and clinkers during consumption.

In a great measure this fuel solves the problem of furnishing a cheap, clean, uniform and reliable fuel for all domestic purposes, as it is equally serviceable for grates, stoves, cooking ranges and furnaces, giving a long, bright flame and intense heat almost from the moment of ignition, and its durability compares favorably with that of coal in consumption, as the density and hardness of the blocks ensure the retention of their original form until the last atom of the inherent carbon and gas has been consumed.

This fuel has already been used in locomotive firing with excellent results. In steam-raising the pressed peat has been found to be equal to good anthracite coal. It has been shown that the thermal value of 100 lbs. of peat is equal to 91.15 lbs. of coal.

This fuel can be put on the cars ready for shipment for 60 cents a ton. At a slight advance on this it can be placed upon the market, and is bound to become a godsend to thousands of the struggling poor.

ORANGEMEN'S DAY.

Particulars of To-Day's Great Demonstration in Toronto—Route of the Procession.

Everything points to a most successful celebration of the Glorious Twelfth in this city. Complete arrangements have been made for the accommodation of the crowds that will go over to the Island to witness the day's sports, and the fireworks in the evening. The lodges of the Eastern District will assemble at St. George's Hall at 9.45 a.m., and, headed by W. Bro. Adam Reddock, D. of C., will march, by way of Queen, Parliament, Carlton and College-streets, to the Queen's Park, where they will fall in in their assigned place.

At 10.30 o'clock the procession will move off, with the junior associations leading and Western District, Eastern District, Northwestern District, Northern District and Centre District following.

The parade will be in charge of the chief marshal, W. Bro. Charles H. Noble, County D. of C. After the march by Bloor, Jarvis, King and York-streets, the Toronto Ferry Company's boats will be taken for the Island, where sports will be indulged in at both Hanlan's Point and Centre Island.

The collection taken up at the Sunday service in Bond-street Congregational Church amounted to over $75, which will be handed over to the True Blue Orphanage Fund.

Must Use the Proper Stamp.

The majority of people who patronize the new system of delivering letters persist in placing ten cents' worth of ordinary stamps on their correspondence, instead of the special stamp made for this occasion, and the postoffice authorities declare that if this mode continues the mail will not be delivered. Yesterday only a small number of letters were received at the local branch, and the bicycle postmen had an easy day.

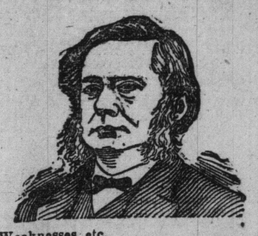
New Church for Mr. Madill.

The present church occupied by Rev. James C. Madill on Clinton-street has for a long time been inadequate for the large congregation, and it is proposed to erect a structure at the corner of College and Clinton-streets, which will accommodate 700 persons. Mr. Madill's recent trouble with the Congregational Union seems to have made more friends for him, and the movement for the new church is likely to go ahead forthwith.

S. Ackerman, commercial traveler, Belleville, writes: "Some years ago I used Dr. Thomas' Eclectric Oil for Inflammatory Rheumatism, and three bottles effected a complete cure. I was the whole of one summer unable to move without crutches, and every movement caused excruciating pains. I am now out on the road and exposed to all kinds of weather, but have never been troubled with rheumatism since. I, however, keep a bottle of Dr. Thomas' Oil on hand, and I always recommend it to others as it did so much for me." 26

SPECIAL TO WEAK MEN

Dr. Sanden Offers a Special Mode of Treatment Which Never Fails to Cure.



Special Treatment.

The use of Dr. Sanden's Electric Belt has become so general for all kinds of nervous and chronic weaknesses that it has urged Dr. Sanden to construct a belt adapted especially for this class of sufferers. He has perfected an appliance which permeates all the vital organs with a steady flow of vital strength, and is prepared to assure the complete cure of all cases of Weakness, Varicocele, Wasting Weaknesses, etc.

"THREE CLASSES OF MEN," Dr. Sanden's celebrated work, with full information, can be had free on application by mail or at office.

DR. C. T. SANDEN

140 Yonge St., TORONTO; 132 St. James St., MONTREAL.

RETURNING PROSPECTORS

From the Klondike Bring About $70,000 With Them—Dawson River Overflowing.

San Francisco, July 11.—Twenty miners from the Yukon placer and Manock, Circle City and Dawson arrived here to-day on the schooner Hattie Phillips from St. Michael's. The returning prospectors bring about $70,000 with them. The passengers from Dawson are confident that the output of Dawson will run over $25,000,000. Manock will produce not less than $300,000.

The Yukon River is said to be higher than has been known for years, and overflowed its banks at Manock, where a number of miners were washed away by the flood.

The Wabash Railroad Company

With its superb and magnificent new train service, is now acknowledged by all travelers to be the most perfect railway system in America. It now runs four trains each way daily, between Buffalo, Chicago, St. Louis and Kansas City, passing through Niagara Falls, Welland, Simcoe, Tilsonburg, St. Thomas, Chatham and Detroit. The "Continental Limited" is the most beautiful train ever seen in this country, all its cars have the new modern wide vestibule. All Wabash passengers trains have free reclining chair cars. Full particulars of this wonderful railroad from any R. R. Agent, or J. A. Richardson, District Passenger Agent, Northeast corner King and Yonge-streets, Toronto and St. Thomas, Ont. d

London or New York.

At the present time there is being held in London, Eng., a conference of the Salvation Army officials to decide whether the triennial convention will take place in Castle-square, London, or in New York City. Ever since the organization of the army this gathering has been held in London, but this year a determined effort is being made by the American delegates to have it on this side of the Atlantic. Heretofore very few members of the army stationed in America could attend and if the convention takes place in New York the city regiments intend sending large delegations. The outcome of the conference will be awaited with interest.

Prominent Toronto Man Married.

A very pretty wedding in high society took place on Thursday at New Hamburg, Ont., when Miss Nettie Merner, third daughter of Senator Merner, was united in marriage to William H. Seyler, a member of the well-known firm of import brokers, Toronto. The ceremony took place at the handsome family residence.

They Are Carefully Prepared.—Pills which dissipate themselves in the stomach cannot be expected to have much effect upon the intestines, and to overcome costiveness the medicine administered must influence the action of these canals. Parmelee's Vegetable Pills are so made, under the supervision of experts, that the substances in them intended to operate on the intestines are retarded in action until they pass through the stomach to the bowels.

Catalogue of Canadian Books.

Messrs. Williamson & Co., Toronto, have just issued a catalog of a valuable collection of Canadian books and rare pamphlets. The collection includes some items of rare value and great scarcity, among them being several choice, illustrated works of history, biography, travel, politics, geology, topography, agriculture, the Canadian tribes, etc.

CAN'T ENJOY LIFE

Because of nervousness, dyspepsia, heart trouble, etc. Lots of people just have to sit and look on while their healthy, vigorous friends have all the enjoyment of a strong and robust body. Dr. Ward's Pills will bring back health, strength, snap, vim and energy to even the weakest and weariest of suffering humankind.

A BAD INVESTMENT MADE GOOD.

I have half a gross of empty bottles upon my shelves. Everything my neighbors and friends would tell me to try I would go straight away to the drug store and purchase. I was in a terrible condition from dyspepsia and liver troubles and was getting worse all the time. I was so discouraged buying one medicine and the other and receiving no benefit that I was about giving up all hope of ever getting better, when my husband brought me home a box of Dr. Ward's Blood and Nerve Pills, which he said had been highly recommended to him. I began using them at once, when, to my great surprise, I felt better in a very short time and continued them for about two weeks more which cured me entirely. I have not the least sign of dyspepsia or liver troubles now, and have also gained several pounds in weight.

Signed, ANNIE E. GAUNTLEY,
King Street, Berlin, Ont.

Dr. Ward's Blood and Nerve Pills are sold at 50 cents per box, 5 boxes for $2.00, at druggists, or mailed on receipt of price by The Dr. Ward Co., 71 Victoria St., Toronto. Book of information free.

To the Champagne Trade:

We have just received a shipment of Deutz & Geldermann's Gold Lack Sec Champagne, 1889 Vintage. We are also informed by the shippers that this lot will be the last shipped of that celebrated Vintage, and that they will not be able to supply us again with the same quality. Our prices remain the same, viz.: Quarts, $26.00; Pints, $28.00.

Also please note a few of the recent important Banquets, Regimental Dinners, etc., for which Gold Lack Sec was specially selected:

The Royal Yacht's "Osborne" and "Victoria and Albert."
Royal Blind Pension Society. Chairman, H.R.H. Prince of Wales.
Grand Masonic Festival, Freemasons' Tavern.
Banquet of the Lord Mayors of London and Dublin.
London Chamber of Commerce.
