THE WEATHER AND THE CROPS.—The Brantford *Courier* of the 22nd says:—From all that we have seen on the subject, the general crops on this part of our continent are, except fruit, far above an average yield. The cereals are in some quarters somewhat a break, in consequence of the extraordinary hot weather; but there is an immense growth of plants, and the kernels, even in such sections may make up in number what they are in plumpness. Roots are very likely to be diminutive from want of rain; and potatoes especially are, in many sections, badly off. The young tubers are sprouting to such an alarming extent that the stalks which they shoot out are nearly ready to burst into leaf; and this holds good in some fields with the smallest specimen in the hill; so that our fine rains that we now occasionally have can do the potatoe crop, thus situated, no good. It is to be hoped that this strange state of things is by no means universal. Never was there a finer harvest, however, but never was their a dryer time. The whole country seized as though the grass had been burnt out of it, and milk and butter were becoming very scarce and dear articles. The rains that we are now getting give us back our accustomed verdure. A rapid growth of grass from now till foddering time will be worth many millions of dollars to the country, and will prevent butter and meat from running up to almost famine prices.

FLAX.—The flax crop has been an average one in this section, large amounts of it have been delivered at the mills during the past two weeks. Messrs. Hanbery & Co., have taken in about 600 tons, at an average price of $12 per ton.—*Elora Times.*

GOOD PRICE FOR BARLEY.—The first load of barley offered on the Chatham market this season was disposed of to-day by Mr. John Dodman, of the township of Zone, to Mr. James Lamont, at the good price of $1 83 per one hundred pounds, in silver. At this rate farmers can afford to pay the extra per centage to dry goods merchants.—*Planet.*
