RESULTS IN THE HIGHER GRADE

Those Who Passed the Examinations in Forms 3 and 4,

And in the Commercial Courses—Western Ontario Places—Advice to Unsuccessful Pupils.

The reports of the boards of examiners in connection with the examinations for commercial specialists, commercial diplomas and for the high school and matriculation examinations—Forms III. and IV.—have been considered by the educational council, and below are given the names of the successful candidates at the different centers.

The marks of unsuccessful candidates will be sent within ten days to the principals of high schools or public school inspectors. No marks will be sent or given to candidates by the department. Certificates of successful candidates will be sent to principals and inspectors about the 1st of September.

Unsuccessful candidates should not appeal until they have consulted the high school principal after receiving their marks. Appeals to be entertained must be made to the deputy minister before the 20th of September.

"Passed" under either Form III. or IV. implies an examination in the subjects prescribed either under the present or former regulations. The certificates issued will indicate more definitely the character of the examination passed. Candidates awarded these certificates obtained 50 per cent on the total, besides passing in each subject.

"Matriculation" implies that the candidate has been awarded a certificate of Part II. of junior matriculation, or has obtained pass standing in some subjects of junior matriculation. This certificate has no value as qualifying for a teacher of non-professional standing.

"Part II." under Form IV. implies that the candidate passed in the required subjects, either under the present or the former regulations, 50 per cent on the total having been obtained. The certificates issued will indicate more definitely the character of the examination passed.

Honors in matriculation will be awarded to such candidates as submit proof of standing and forward their certificates to the department for indorsation. In the case of certain candidates whose names are reported in the following lists, it will be necessary before certificates can be awarded that evidence be furnished (date and center of previous examinations) to show that they were entitled to write under the provisions of the former regulations.

Lindsay In Line.

Many People in that Town Being Cured by Doan's Kidney Pills.

Word has been received from Lindsay that Doan's Kidney Pills are curing people in that town of backache, kidney disease, bladder weakness and urinary troubles.

Mr. Christopher Oryell 4 William street, Lindsay, Ont., the well-known proprietor of the handsome barber shop and bathrooms, and for twenty years a resident, says:

"For six years I have had serious kidney and urinary troubles with a great deal of pain over my hips, in the small of my back and in my shoulders. I was sometimes so sore I could hardly bear to touch myself, and felt tired and worn-out nealy all the time. My sleep was disturbed and did not rest me.

"Hearing Doan's Kidney Pills highly spoken of as a good medicine for kidney disease, I thought I would try them, and got a box. That box gave me so much relief that I bought two more, which I have taken, with the result that I now have no pain or urinary trouble of any kind. I sleep well and feel rested; the tired feeling is all gone and I am very much stronger. I recommend them, not only as a cure for all kidney troubles, but as an excellent tonic and invigorator."

GENERALLY ACTIVE

Bradstreet's Report of the State of Trade in Canada.

Toronto, Aug. 15.—Bradstreet's review says: The holiday season at Montreal has made little or no difference in trade this month. Buyers continue to visit the market, and travelers' orders are pouring in, calling for liberal supplies of fall goods. Nearly all departments of wholesale trade show unusual activity for this time of year.

Toronto wholesale trade has been fairly active this week, a large number of orders having been booked. The conditions of wholesale trade are very healthy just now, payments being very prompt and the percentage of purchases for cash by the country trade being large.

Business at the coast is active. The sawmills are now very busy on orders both for the home market and for export. The demand for funds for merchantile purposes as well as for mining enterprises, lumbering, etc., is very good, and rates are steady.

Jobbers at Winnipeg report a very good business for this season. Active preparations are being made for harvest operations, and much help will be needed from the east in the way of labor to get in the wheat. Prices of various staple lines continue firm.

The Nerve Fluid Is the Fountain of Life.

Without the nerve force which runs the machinery of the body, there could be no motion of the limbs, no action of the heart; in short, there could be no life.

The nerve fluid is the fountain of life, and so long as the nerves are healthy and well nourished, there are no aches or pains, the organs of the body perform their functions, and disease is warded off.

DR. CHASE'S NERVE FOOD

increases the nerve fluid, or nerve force in the body, as no preparation was ever known to do. It creates new nerve cells and adds new tone and vigor to the whole system. It cures all nerve disorders in nature's way, by building up and revitalizing the wasted tissues. Put up in pill form, 50 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.
