CANCELLATION OF RESERVE.

Coast District.

NOTICE is hereby given that the reservation, notice of which was published in the B. C. Gazette, and dated 9th August, 1901, covering a belt of land extending back a distance of ten miles on each side of the Skeena River between Kitsilas Canyon and Hazelton, is cancelled.

Notice is also given that that portion of the reservation, notice of which was published in the B. C. Gazette and dated 27th December, 1899, covering a belt of land extending between the mouth of Kitimat River and Kitsilas Canyon, is rescinded in so far as it covers land lying between Kitsilas Canyon and a point in the Kitimat Valley, distant ten miles in a northerly direction from the mouth of Kitimat River, and that Crown lands thereon will be open to sale, pre-emption and other disposition under the provisions of the Land Act, on and after the eighth (8th) day of December next: Provided that the right of way of any railroad shall not be included in any lands so acquired.

HOW IT WORKS OUT.

St. John Sun.

The province of Alberta, which commenced business yesterday, was computed to have a population of 173,000 at the beginning of this year. But the financial basis of union assumes a population of 250,000. This is considerably less than the population of New Brunswick. Alberta starts out with an allowance from Ottawa of $1,092,825, which is fifty per cent. more than the total revenue of this province from all sources.

Devastating The Caucasus

Desperate Nature of Struggle Illustrated by Incident at Baku.

Cossacks Kill and Wound One Hundred Socialists at Tiflis.

Tiflis, Sept. 12.—Prince Tsitsianoff, a landed proprietor, was assassinated today at Gori, fifty miles from Tiflis.

The following incident, showing the desperate spirit displayed by the Tartars, is reported from Baku: A band of Tartar barricaded themselves in the house of a rich Mussulman and fired from the windows on a patrol officer, who summoned them to surrender. The Tartars replied to the summons with another volley and continued firing while artillery was brought up. The artillery laid the house in ruins. The Tartars perished to a man.

A hundred Social Democrats were killed or wounded today in a conflict with Cossacks at the town hall, and many were trampled to death in a subsequent panic.

Two thousand Social Democrats had forced an entrance into the town hall, which had been closed owing to the celebration of a religious holiday. Revolutionary speeches were made, and the chief of police ordered the meeting to be dispersed. Part obeyed, but the remainder refused, and some revolvers were fired. A large force of Cossacks drawn up outside the building then fired repeated volleys into the crowd, killing 30 and wounding upwards of 70.

In the ensuing panic many persons fell and were trampled to death by their comrades and the pursuing Cossacks.

According to official accounts the crowd was roughly handled by the commissary of police, whereupon the third company of the Pultava regiment was summoned. The commander of the company ordered the demonstrators to disperse, promising not to arrest them if they obeyed. Shots were then fired on the Cossacks, not only from the town hall, but from the courtyard and from the adjacent houses. A number of rioters assembled in a neighboring house, broke through a wall leading to the hall and opened fire with revolvers on the Cossacks, who thereupon fired on the rioters. Official figures give the casualties as 23 killed and 50 wounded.

St. Petersburg, Sept. 12.—The latest advices from Baku say that firing continues in the outskirts of the "Blacktown" quarter, and that the rioters are committing acts of incendiarism and plunder at Balakhan. Many factories in the Volga provinces have already been closed owing to lack of fuel. The workmen there are excited and disorders there are anticipated. A despatch to the Caucasus Oil Company from Baku says that the fires in the oil fields are practically exhausted and that the military authorities are stationing guards in the district.

During the night, the despatch says, incendiaries tried to land at Biebat from small boats, but were driven off by volleys from the Cossacks. They then attacked steamers in which two companies had taken refuge during the uprising, but the attack was repulsed.

The incendiaries succeeded in setting fire to three machine shops in the Ubolkin district, killing the proprietor of one. In the Blacktown district the patrol fired a volley into a crowd of Russian workmen from which a shot was supposed to have been fired, but the despatch to the Caucasus Coal Company expressly states that no one was killed. Throughout the Blacktown district the patrols are acting energetically in suppressing disorders.

After the conference of oil men here yesterday, at which despatches from the oil regions were compared, representatives of the various companies summarized the situation in the oil districts as follows: Born Company—Most of the tanks and pumps saved from destruction. A few wells belonging to other English companies have been saved. Society of Baku—A third of its properties destroyed. Caspian Company—Property completely destroyed. Other large companies lost small portions of property.

ARMY HEARS PEACE TERMS.

Speculation as to Point at Which Japan Takes Control.

Godzyadani, Manchuria, Sept. 9.—(Delayed)—The peace terms became known here today. The majority consider them inoffensive to Russian honor and dignity. It is not clear at what station the railroad is to be turned over to the Japanese, whether at Kwangchengtse or at Chantufu. This question is important. If the turnover occurs at Kwangchengtse, then Russia cedes to Japan a hundred miles of yet unoccupied line and otherwise the only coal mines south of Harbin. From Chantufu start all the trade routes to the very rich Kirin province, and should the road become the property of the Japanese to Kwangchengtse, the complete possession of Chantufu will place Kirin province entirely under Japanese influence. This would be very undesirable for Russia.

What Russia Would Like

Should the transfer occur at Chantufu or further south, Kirin province, which has supported the Russian army for six months, would remain Russian, which would be particularly advantageous, because the southern portion of the railroad has no natural outlet. This and many other questions, such as Russian right to maintain consular officials and commercial agents at Liaoyang, Mukden, Port Arthur and Port Dalny, should its claim here be settled before the armies withdraw from their strategic positions. A high officer declared today that it would be impolitic to permit the Japanese to settle in Kwangchengtse, for in case of another war they could reach Harbin in fifty hours, occupy Kirin and cut Russia off from the Amur regions.

A CANADIAN KNIGHT.

St. John Telegraph.

Sir Thomas Cleeve, formerly mayor of Belfast, Ireland, was in the city yesterday, accompanied by Lady Cleeve and Misses F. W. and C. E. King. The story of Sir Thomas Cleeve's eventful life reads like a romance. Born in Richmond county, Quebec, on a small farm, he left his native province when a young man and went to Ireland, where, by his industry and progressive habits, he has amassed a large fortune in the condensed milk trade. The product of the great firm which he founded is sold in all parts of the world, and is extensively used in the Imperial army. Sir Thomas received his knighthood some years ago in recognition of his great services in the interests of the people of Belfast, and his eminence in the world of commerce. Sir Thomas and party left in the afternoon for St. Andrews-by-the-Sea, where they will spend a few days.

FREIGHT HANDLERS' DEMANDS.

Railroad Managers at Chicago Meet to Consider Situation.

Chicago, Sept. 12.—The association of general managers of the railroads entering Chicago arranged a meeting today to consider the demand of the freight handlers for a 10 per cent. increase in wages. The conference, it was hoped, would result in a formal answer before tomorrow morning, which is the time limit fixed by the union's ultimatum.

CHOLERA IN GERMANY.

Eight New Cases and Three Deaths Reported Yesterday.

Berlin, Sept. 12.—The official bulletin issued today announced eight new cases of cholera and three deaths during the twenty-four hours ending at noon today, making a total of 166 cases and 61 deaths.

Graudenz, Prussia, Sept. 12.—A man belonging to the Fourth regiment of Ulhans died here today of cholera. This was the first appearance of the disease in the regiment. The regiment was promptly quarantined.

Bromberg, Prussia, Sept. 12.—Three deaths from cholera occurred in this administrative district today.

IT IS WHAT HAS HAPPENED.

The Montreal Star.

But Mr. Forget is apparently expected to do a rather similar thing. He has now as his chief adviser Mr. Haultain, in whom he has hitherto shown implicit confidence. Mr. Haultain, when he last appealed to the people, was sustained by a majority of the electors of Saskatchewan. The obviously right thing for the governor to do is to call upon Mr. Haultain to form a ministry representing Saskatchewan province. The appeal to the people would follow, and if Mr. Haultain were not sustained it would be the duty of Mr. Forget to call in the leader of the victorious party.

But it is reported that Mr. Forget will turn his back on Mr. Haultain and call to the premiership a member of the House of Commons who has had no connection with provincial affairs, and to the choice of a party caucus which Mr. Forget has no right to notice. If this course should be followed it would be obvious that the third appointment of Mr. Forget is part of a party bargain and that his obedi- caucus is another par of La-ob.dy ence to the demands of the local party caucus is another part of it.

SAKHALIEN A TRAGIC ISLAND.

Pall Mall Gazette.

Sakhalin, the island which Japan is now taking, or, rather, retaking, from Russia, is the place to which Russia sends her violent convicts. The convict at Siberia has some liberty to console him for his detention, but the convict in Sakhalin none. When a party of convicts (having been pronounced "violent" by the governor of the Siberian station) is landed at Sakhalin the procession to the jail is as follows: First among the prisoners come men with fetters on their legs and linked together in pairs, the clanking of their chains making a lugubrious noise. Next come half a dozen men, each without fetters, but secured by the hands to a long iron rod. Then follow female prisoners, and after them the most affecting part of the whole—the wives and children who have elected to accompany into exile their husbands and fathers. Behind them rumble "prison gas," or rough wagons, wherein are transported baggage and those children who are too young or infirm to walk. When on the march the prisoners are allowed three pounds of bread and one-half pound of meat each day, and they are not forbidden to receive alms. But when they arrive at their destination their lot is a pitiful one. Their cells are damp and fungus-covered, their food is less than the allowance during the journey, and their work in the mines is most exhausting. Many of the prisoners are very ignorant. Few of them can read except the Caucasians, but they are all put to the same laborious work, and in the event of their being physically unable to perform their allotted tasks their punishments are very cruel. The English "cat-o'-nine-tails" is nothing to the terrors of the "bodika." In this instrument of torture the prisoner is so fixed that he can neither move nor cry out and wire thongs bound at the end with pointed tin strikes his back at frequent intervals.

Other tortures to which prisoners are subject are too dreadful to write about, and during all these tortures the prisoner is prevented by gags from obtaining even the poor relief of a scream. Surely the horrors of the salt mines of Iletskaya are nothing compared with the abominations of Sakhalin.

That's the personal question a woman asks herself when she reads of the cures of womanly diseases by the use of Dr. Pierce's Favorite Prescription.

Why shouldn't it cure her?

Is it a complicated case? Thousands of such cases have been cured by "Favorite Prescription." Is it a condition which local doctors have declared incurable? Among the hundreds of thousands of sick women cured by the use of Dr. Pierce's Favorite Prescription there are a great many who were pronounced incurable by local doctors. Wonders have been worked by "Favorite Prescription" in the cure of irregularity, weakening drains, inflammation, ulceration and female weakness. It always helps. It almost always cures.

"I commenced taking your medicine, 'Favorite Prescription,' nearly a year ago for chronic inflammation of womb, and can truly say it is the only thing that ever did me any good," writes Mrs. L. C. Wagner, of 125 Edwin Street, Toronto, Ontario, Canada. "I could not walk any distance before using it. After taking six bottles of your 'Favorite Prescription' I find I can walk without difficulty and am greatly benefited in general health. Would advise all suffering women to use Dr. Pierce's medicine."

Pierce's Pellets. These are the Original Little Liver Pills, first put up over 40 years ago, by old Dr. R. V. Pierce. They've been much imitated but never equaled. Smallest, easiest to take and best. They're tiny, sugar-coated, anti-bilious granules, a compound of refined and concentrated vegetable extracts. Without disturbance or trouble, constipation, indigestion, bilious attacks, sick and bilious headaches, and all derangements of the liver, stomach, and bowels are prevented, relieved, and cured. Permanently cured, too. By their mild and natural action, these little Pellets gently lead the system into natural ways again. Their influence lasts.

Wedded 'Neath Smiling Skies

Nuptials at Christ Church of Rev. A. Beanlands and Miss Pemberton.

Lavish Floral Decorations Made Ceremony and Reception Notable.

(From Tuesday's Daily.)

THE celebration of the nuptials of Rev. Arthur Beanlands, canon of Christ Church Cathedral, and Miss Sophy Pemberton, second daughter of the late Mr. J. Despard Pemberton, which took place yesterday afternoon at 2.30 at the edifice mentioned, was a very notable event, charming in all its detail and witnessed by an assemblage representative at once of the best of friends of the contracting parties and the elite of the city.

The auditorium outside the chancel screen where the first part of the service was performed, was beautifully decorated with palms, white chrysanthemums grouped round with ferns. Attached to the chandelier in the chancel were long garlands of clematis carried in festoons to the choir pillars, forming a lovely canopy. The decorations were planned and carried out by the Mesdames Genge and Nelson, and the Misses Pitts, and they are to be congratulated on the lovely effect of their efforts.

At 2:30 the bride entered with her brother, Mr. F. B. Pemberton, and was met in the vestibule by her attendants. The bride looked beautiful in a gown of creamy colored liberty satin, demi train, perfectly plain, the bodice with deep Irish crochet lace collarette made in cream colored silk, and lace to match on the elbow sleeves, finished off with chiffon. The lace was a wedding gift from Lady Musgrave—a deep corslette of mother-of-pearl squares and silver thread—completed the costume. She wore a chaplet of orange blossoms in her hair. The bridal veil of Limerick lace, which had been worn by her great-grandmother, fell over her in graceful folds from head to foot.

Miss Susie Pemberton looked very sweet and pretty in charming gown of embroidered white chiffon, over white taffeta—the bodice made with transparent yoke and draped with a lovely lace fichu; elbow sleeves and long white suede gloves. White picture hat made of chiffon and white ostrich plumes, and a bouquet of aurateum lilies completed this charming costume.

The three little bridesmaids, the Misses Armine and Mab Pemberton, nieces of the bride, and Miss Peggy Burns, granddaughter of Senator Macdonald, were a most fascinating little group—dressed in white liberty satin frocks, with berthas of chiffon and lace, and wore narrow wreaths of forget-me-not in their hair. They carried wands instead of bouquets, and bore large white lilies tied with ribbon bows.

The page, a most enchanting little darling, Joequil Burns by name, a grandson of Hon. Senator Macdonald, wore a Charles I. cavalier costume of white satin, deep lace collar—his head a mass of pale golden curls. He also carried a wand, tipped with lilies and fern.

Mrs. Pemberton was dressed most becomingly in black satin, draped with black Spanish lace. The bodice was draped with lace and black chiffon and ruffles. She wore a Marie Stuart bonnet made of black chiffon, with a white feather algrette and a lovely Limerick lace scarf.

Mrs. Fred Pemberton looked very handsome. She wore black taffeta gown with Irish lace scarf and picture hat.

Mr. Lindley Crease supported the bridegroom as best man.

The service commenced with "Love Divine, All Love Excelling," sung as the bridal procession passed up the church.

The Bishop of Columbia performed the rites. The whole service was choral. At the conclusion of the ceremony the "Wedding March" was played, and the procession passed down the aisle and home to Gonzales.

Among the friends present were Sir Henri Joly de Lotbiniere and Mrs. Lotbiniere, Senator and Mrs. Macdonald, Mrs. Pemberton, Mrs. Hugo Beaven, Mrs. F. B. Pemberton, Mr. Charteris Pemberton, Mrs. and Miss Bell, Mrs. and Miss Baiss, Major and the Misses Dupont, Mrs. Dennis Harris, Bishop Cridge and Mrs. Laundy.

Mrs. Pemberton held a reception after the ceremony at her lovely home, Gonzales. The afternoon was perfect, full of sunshine, and lawns and gardens glowing with flowers. A photograph of the bridal party grouped on the south lawn was taken.

The house was a mass of flowers. The bride received her guests in the drawing room, which was decorated with pale pink geraniums and ferns. The hall, with its lovely carved furniture of black oak, had masses of scarlet geranium, gladiolas and dahlias and ferns placed about. The dining-room was a perfect bower of beauty, all in white and green. From the centre of the room there hung a large wedding bell, made of white chrysanthemums and edged with white clematis, and the bell filled with maiden hair fern, the clapper of lilies. Long wreaths of smilax were festooned from the bell to the four corners of the room.

Under the bell stood the wedding cake, decorated with swainsonia, ferns and long sprays of white fairy roses. The table was draped with white chiffon covered with pale green tulle, and small crystal bowls filled with white lilies were placed on this—giving a very dainty effect. The mantelpiece was hidden with immense quantities of maiden hair fern, white begonias and chrysanthemums. The carved oak sideboard was also a mass of beautiful flowers. The decoration of the dining room was done by Mrs. Hugo Beaven.

After the reception the newly married pair left for the honeymoon, the bridal went away in a gown of pastel blue Indian cashmere, the bodice trimmed with lace yoke, pointed velvet corslet, with hat made of silk and velvet of the same shade. A white ostrich feather boa completed the toilette. The bride and groom were showered with flowers as they ran down the steps to the carriage.

The bridegroom's gift to the bridesmaids consisted of gold pins, bearing the Macdonald crest and the boar's head of the Pembertons. A list of the wedding gifts is as follows:

Dubois-Phillips, R.N., F.R.G.S., of Great Crosby, Lancashire, and Mr. Seymour Hastings O'Dell, Ven. Archdeacon Ker officiating. Mr. William Prentice, president of the John L. Cassidy Co., Montreal, acted as best man. The bride, who wore a gown of white mousseline silk, trimmed with point d'alencon lace and white tulle, was given away by her brother, Bertram G. Dubois-Phillips, of Montreal. The bride carried a shower bouquet of white roses and asparagus ferns, the gift of the best man. Relatives and friends were present at the ceremony, after which Mr. and Mrs. O'Dell left for Lac Charlebois in the Laurentian mountains for their honeymoon.

VISIT OF GEOLOGIST.

Scientific Examination of Resources of Similkameen District Needed.

T. J. Smith, the well known mining broker of Vancouver, was in Princeton this week, having driven with S. B. Ellis, of the geological department, from Nicola, says the Similkameen Star. Mr. Smith is largely interested in coal in Nicola and the Similkameen and is exercising his influence in the direction of securing reliable information as to the mineral deposits of these two districts. He is introducing Mr. Ellis to this section, who will report to his department at Ottawa on the need of a scientific examination and mapping of the mineral areas here. With mineralogical maps of the district prospectors and others will have a ready guide as to the probable location of certain ores, with saving much valuable time and labor. The member for Yale-Cariboo will, no doubt, favor any reasonable means for the information of mining men which tend to the development of our vast mineral resources. Next year a staff of geologists and experts from the mines branch of the department of the interior should be sent here for the purposes indicated. Mr. Ellis took specimens of coal from the Princeton mines for analysis at the government laboratory. His visit here must result in endless benefit to this section. Mr. Smith and Mr. Ellis left on Tuesday for Hedley, Keremeos and Olalla.
