## MOVEMENT AGAINST NE TEMERE DEGREE

Toronto, Oct. 7.—With the church courts of every Protestant body in Canada committed to a policy of opposition toward the Ne Temere decree, a new movement has been started by the evangelical alliance of Canada, at a meeting held in Toronto. Every leading church of Canadian Protestantism was represented. A public educational campaign by means of large mass meeting will be at once inaugurated. Finally a petition will be taken to the Government, and a demand made that the marriage laws of Canada will be placed beyond church interference.

Petitions will also be laid before every provincial government in the dominion. As British Columbia and N. B control their own marriage laws and retain the privilege of granting divorces, separate appeals will be made to them. The government of Ontario will be asked to take steps at the earliest possible moment to have the court of appeals determine the extent and jurisdiction of the province and of the parliament of Canada on the subject of marriage laws.

## PEPPER 40PER CENT. IMPURE

Ottawa, Oct. 4.—That the pepper used throughout Canada has been forty per cent. adulterated for the last thirty-three years, has been shown by a pamphlet issued by Mr. A. McGill, chief analyst of the Department of Inland Revenue. All kinds of adulterants have been used, including wheat husks, ground cocoanut shells, maize, and different kinds of foreign starches, but the commonest adulterant is ground olive stones.

## RAILWAY WILL CLOSE FOR THE WINTER

Announcement was made Saturday by Dr. D. B. Moore of Stanley that service on the York and Carleton Railway, the branch line running from Cross Creek to Stanley, will be discontinued on the 31st instant.

Know an Auto
From Hood to Tires

Expert knowledge of automobile construction is essential to car owners and drivers alike. To the owner it means certainty when judging a car, and a great saving in cost of up-keep. To the driver it means a greater demand for his services, a larger salary, and a permanency of position. To both it means knowing if a car is right, and, when not right, exactly what to do and how to do it.

All this valuable knowledge is set forth in the Automobile Course of the International Correspondence Schools—the most thorough and practical Automobile Course in the world. The subjects covered are: Gasoline Automobiles, Gasoline Automobile Engines, Automobile Engine Auxiliaries, Automobile Carbureters, Electric Ignition, Transmission and Control Mechanism, Bearings and Lubrication, Automobile Tires, Automobile Operation, Troubles and Remedies, Overhauling and Repairs—information that enables you to thoroughly understand any auto, from hood to tires, and how to handle it.

This Course has been prepared by recognised experts actually in the business. In other words, it is practical as well as theoretical.

To learn about it, and how you can most easily become an automobile expert, write today to

International Correspondence Schools
Box 829, SCRANTON, PA.
