### GRAIN AND PRODUCE.

The decline in the Chicago wheat market the last few days has had its influence on the cash prices thruout the States and Canada. ### Chicago Gossip.

J. P. Bickell & Co. say at the close: Wheat—Lower—General rains where most needed and continued dryness in cash, which channels were the factors in recording a new low for recent decline. Short interest is growing, while bull leaders apparently inactive. Cash demand dull, and crop prospects more favorable. Liquidation may extend some further, but September future at present level appears to us as very attractive.

Erickson Perkins & Co. had the following:

Wheat—The chief weakness was in the near futures, and there was considerable changing of both May and July over to September. The Atchison Railway late yesterday issued a report estimating Kansas wheat crop at 50,000,000 bushels. The feature of the weakness to-day has been the evident awakening of holders of May and July wheat to the dull and apathetic condition of the cash position and a consequent liquidation in those futures.

Corn—Market sold off early on the weakness in wheat, but offerings were well absorbed and for the greater part of the session, the market was very firm in tone.

Oats—Market ruled very steady with light pressure. Commission houses bought while local professionals sold.
