ST. LAWRENCE AND PRODUCE MARKETS

Trade in Most All Lines Is Generally Quiet.

Trading at the St. Lawrence Market yesterday was extremely light in all lines, as might naturally have been expected over the post-holiday season. Receipts of country stuff of all kinds is nominal and there is no outstanding change in any line. In a few days business will again become normal. We quote:

WINNIPEG CATTLE RECEIPTS.

Winnipeg, Jan. 3.—(Dominion Live Stock Branch.)—Receipts, 115 cattle, 35 hogs and 180 sheep. The cattle market opened with a firmer tone and trading was brisk for the limited offerings. All classes of butcher cattle sold at prices fully 25 cents above Friday's close, while the few stockers and feeders on offer were absorbed at steady prices.

Trading on the sheep and lamb market was quiet, with no sales made up till noon.

Bidding on the hog market opened from $15 to $15.25 for selects.

STOCKS CLOSE STRONG AFTER IRREGULARITY

General Asphalt Leads With Net Gain of More Than Seven Points—Atlantic Gulf, With Drop of Seven Points Is Exception to Generally Buoyant Trend.

New York, Jan. 3.—The year on the stock exchange began with a tentative extension of last week's rally, followed by irregular heaviness at midday and a vigorous recoil in the last hour, with many substantial gains at the active close.

Almost the sole exception was Atlantic Gulf, which fell seven points, to the new low record of 69, recovering only the smallest fraction. Oils, steels, coppers, tobaccos and motor specialties led the rebound, together with General Asphalt, which overshadowed the list, at a net gain of 7½ points. Sales amounted to 800,000 shares.

Forecasts of the new year were partly hopeful, but in responsible quarters there was no effort to minimize the belief that further economic readjustment must inevitably precede a clearing of the financial skies.

More Bad News.

Adverse happenings over the holiday recess included the announcement of more bank failures and dividend suspensions, an increase of unemployment, reduced exports and the further decline of railway tonnage from western to eastern points.

President Wilson's veto of the war finance resolution, promptly followed by its adoption by the senate, was in keeping with expectations in high financial circles, and exerted no influence in the securities market, the probably helping to stabilize quotations in grains and cotton.

The money market was almost stagnant, demand loans holding firm at 7 per cent. Release of January interest and dividend payments was without visible effect, and failed to bring about more than a casual investment inquiry.

Foreign exchange was very mixed, sterling improving, while French, Spanish and Greek remittances weakened. Material accessions to last year's heavy gold imports were announced.

Bonds were dull, but firm in the main, most Liberty issues making substantial advances. Total sales (par value) aggregated $13,250,000. Old United States bonds were unchanged on call.

SOME SPECIALTIES SOLD BUT BONDS WERE FIRM

The New York stock market held strong yesterday and enabled local stooks to maintain the position of recovery made last week. Some money is available on call in this market now, but the speculative demand is light and the money factor is, therefore, not the all-important element of a further advance.

Several pools, mainly in Montreal, are still wanting to distribute stocks and any present buying will be filled by them if not supplied by speculative holders. This is a deterrent to a buoyant market and speculative operators will be afforded little chance to make turns.

Papers were sold after the opening and these were off for the day a couple of points. Brazil was raised over a point, but a good deal of room trading in this issue makes any advance slow. The stock is now said to be about free of short contracts. Steamships was off on free selling and the steels were only steady. Toronto Rails sold higher at $1 1-4, but closed at 60 1-2.

Investments were irregular outside the war bonds, which closed the day in most instances at top prices.

PAPER STOCKS WEAKER IN MONTREAL TRADING

Montreal, Jan. 3.—The trading in listed securities on the local market today showed general retrogression in the morning and had a rally in the afternoon, but at the close of trading losses were shown on most issues.

Spanish common took the lead and was weak, as was also the preferred, showing losses of three points and two points respectively. Brompton, also active, moved as Spanish did, and after a small rally at the close, showed a net loss of 1¾ points at 55¾.

Abitibi lost a point at 56¾. Laurentide two points at 92, Power a fraction at 87½, and Steamship Common closed unchanged at 47½. Wayagamack lost two points at 88.

Among the day's largest gains were Toronto Railway up 1½ points at 61½; Tuckett's, recently inactive, up a point to 41, ex-dividend 1 per cent.; Canada Cement, which gained 2½ at 58; Bell Telephone up 1, at 100; and Atlantic Sugar up 1, to 21.

The bond list was more active with prices holding steady. Total sales, listed, 13,714; bonds, $362,650.

PAST MARKETS' RECORDS BASIS FOR FORECAST

J. S. Bache & Co. in their year end review venture one following opinions:

Anything like stock market predictions for the coming year, when conditions are filled with so much uncertainty, are, to say the least, unwise, and in view of the failures in forecasting financial developments each year since 1914, would undoubtedly prove to be only guesses. However, from the point of view of comparison with other periods of depression and what followed, the year 1903 was, in some respects, similar to 1920—and 1903 might also serve as an interesting comparison. 1914 was a year of business uneasiness, the first half because of the ominous effects of the new tariff law, and the latter half because of the war. 1917, which was the year of our entrance into the war, was also a year of business depression in most lines, except those of companies which were making goods on order for the United States government. Even then, with so many restrictions on production, transportation, and the consumption of fuel, profits for that year were considerably disturbed, and the stock market, with few interruptions, showed a continuous decline from the beginning to the end of the year.

As to what came after these, perhaps imperfectly similar years; in 1903, the period of depression was followed by two years of rising prices; 1908 and 1909 were also years of rising prices, as were 1915 and 1916; the same was true of 1918 and 1919. It would be presumptuous to conclude, however, that we are now to have two years of rising prices. A more precise comparison of conditions would be with those of 1866, after the Civil War. At that time the great break was followed by marked recoveries, but in turn there were other declines, and a long period following was marked by great irregularity.

The conditions of wealth and power in this country today are so radically different from those of the Civil War period that a far quicker recovery may be looked for. The peak of danger in the credit situation has been passed. The country is in a sound banking and industrial condition. Wealth accumulated in the last five years, is vast in amount and widely distributed. The energy and intelligence of a great business and industrial population is at work in carrying through the process of readjustment successfully, and confidence and courage should be the prevailing sentiment.

C. P. R. EARNINGS.

Montreal, Jan. 3.—Canadian Pacific Railway earnings for week ending December 31, 1920, $5,540,000; increase, $137,000.

U. S. AFFECTS EGG MARKET.

Ottawa, Jan. 3.—(Dominion Live Stock Branch.)—There are no new developments in the egg situation. Some increases in production is noted at country points and Ontario country shippers report paying stores and producers 70c to 75c and making sales at 75c to 80c f.o.b. The state of the market depends largely upon the trend of the States' markets and the exchange rates.

Toronto receipts increasing; fresh, slightly easier; specials, jobbing, 95c to $1.05. Storage, firm at a slight advance; extras, jobbing, 78c to 80c; firsts, 70c to 72c. Montreal quiet, fresh specials, jobbing, $1 to $1.10. Storage extras are easier at 75c and firsts 70c.

Chicago current firsts, 55c to 66c; refrigerator firsts, 57 1-2c to 58c; extras, 58 1-2c to 59c. New York current extra firsts, 75c to 76c; firsts, 73c to 74c; refrigerator firsts, 60c to 61c.

POOL BUYING WEST DOME MAKES PRICE STRONG

The mining market gained no new inspiration over the holiday and prices yesterday were about where they closed on Friday last. West Dome was the only speculative feature with an advance of half a point to 9. There is no development at the company's property and the only explanation of the buying of the shares is that a pool is operating in the stock. Whether this is purely a market movement or an effort to collect stock does not appear, but in the meantime the buyers are prepared to take all the stock offering, at the bid price.

Dividend-paying issues are entirely subject to what may be called investment buying and the latter is about sufficient to take care of the actual sales. The power shortage at the mines has frightened some holders and scared would-be buyers off. Hollinger was in some demand and sold up to $5.55. Some was wanted, but with the shares in demand on Wall street, there was none to be had here, altho it was apparently in abundant supply a few days ago. The closing down of McKinley and Beaver had no adverse effect on these or other Cobalt shares, showing that the fact had been previously discounted. Silver was higher at 65 3-4c and the belief is that the low price for the white metal has been seen for a long time to come.

HIGH PRICES FOR SILVER FORECASTED BY ONE FIRM

Coleman & Reitze of New York in a review of the silver markets make the following statement with statistics:

Evidence that silver production of the world continues to decline appears to reflect the apprehension of leading European countries, with the possible single exception of Spain, that silver prices are likely to repeat the high record figures of $1.37 recorded early this year and in November, 1919. Great Britain is resorting to the somewhat dangerous expedient of placing in circulation silver coins of 500 fineness compared with the older coins, 925 fine.

NEW YORK CURB.

New York, Jan. 3.—There was a broader market on the curb today than there has been for a considerable time and especially good buying was evident in some of the more important oil issues, of which Simms was the steadier, advancing from 6⅝ to 7⅝ under heavy buying. It is understood that powerful interests which disposed of a large portion of their Simms Petroleum during the latter part of 1920 in order to establish losses for taxation purposes are repurchasing their stock. Ryan Consolidated was also in good demand and moved up a point while buying of a strong character was apparent in Anglo-American, which sold up to 18. Practically all of the active oil issues scored advances. Parrell Coal was the feature of the industrial division, advancing from 18 to 20, while United Retail Candy moved up to 38 on light transactions. In the mining division United Eastern gave a good account of itself by advancing from 2⅝ to 3 9-16 under comparatively light buying. This company made a splendid showing during 1920 when its operating income exceeded current dividend requirements of 15 cents quarterly by nearly 5 per cent. Eureka-Croesus was active, with sales from 48c to 49c.
