TORONTO.

Suburban Notes.

Mrs. Johnston, widow of the late postmaster at Weston, has been appointed to her late husband's position.

A good deal of discussion is being indulged in through West York as to who will be appointed license commissioner, which office has been vacant for some time, the appointment having been delayed, it was generally believed, until the elections took place, as there were several prominent applicants. But there is no excuse now for further delay and it is believed the appointment will soon be made. Andrew Russell of Vaughan, ex-warden of York, is spoken of as the most likely man to get the plum.

The marriage of Miss Lizzie, daughter of Mr. Joseph Green, to Mr. N. Stafford of Toronto was celebrated at Newmarket on Wednesday. Rev. W. J. Barkwell, Toronto, officiated.

A special service to Orangemen will be given at St. John's Church, Norway, tomorrow at 3 p.m. Lodges York Pioneer, No. 4; L.O.L. 215, East Toronto Village; L.O.L. 164, Highland Creek, will be among those present. The sermon will be preached by Rev. Prof. Clark, Trinity College. Special music by the choir.

A special meeting of the East Toronto Village council was held on Thursday evening to consider an application by the Toronto & Scarboro Electric Railway for permission to change the route from Walter and Mary-streets to Main-street. After full discussion the members of the council were unanimous in refusing to make the desired change. As the rails and ties are piled up in the village it is to be hoped that no further delay will take place in getting to work. Aug. 1 is the time limited for completion and will soon be here.

To save trouble of transferring the large number of children who attended Victoria Park on Thursday, the excursion cars of the Toronto Street Railway Company were run through over the line of the Scarboro road, direct to the park. The time and trouble saved by this system is considerable, and this arrangement should make Victoria Park more in demand than ever in which to hold picnics.

There is likely to be a lawsuit between the Toronto Street Railway Company and the G.T.R. by the recent action of the G.T.R. in extending the spur line that runs from Mimico across the Lake Shore-road, thus preventing the Street Railway Company from building its line along the Lake Shore-road and across the Etobicoke River to Oakville. It is not yet clear whether the G.T.R. have the right to possession of the road where they recently extended the track. Nevertheless, the action of the railway company will delay the extension of the railway system to Oakville and cost a lot of money.

IN AN ARSENIC MINE.

By Observing Ordinary Caution the Miners Are Not Injured by the Poison.

Many points of interest are brought out in a description in a technical journal of the way in which arsenic is obtained from one of the most famous mines in England, the Devon Great Consuls. The mine was originally worked for copper alone, and would have been abandoned but for the discovery that the waste thrown out as worthless when copper was sought proved rich in arsenic. Although copper is still raised, it is in small quantities, and the mine has been resolved into an arsenic works. The arsenical, pyrites consists of 25 to 30 per cent. of iron, 12½ to 14 per cent. of arsenic, and the rest of earthly matter. After being crushed this is sorted by girls of from 13 to 16 years of age. It is then washed and "jigged," or sifted, and passed on to the first calciner, where it is burned with low-class cool, and produces "arsenic soot"—that is, arsenic so mixed with smoke from the coal as to be of a gray color.

The arsenic and soot, deposited in combination in the chimney or condenser, are scraped out and taken to the second calciner for purification. The calciners consist of revolving iron drums, through which a fire of anthracite coal is carried on rotating iron furnaces kept red hot. As the arsenical soot is subjected to the influence of this heat the arsenic is sublimed and condensed. This operation has to be carefully watched, and if the workmen burn the arsenic badly they have to pay for it.

The arsenic is liable to produce sores if permitted to lodge in wrinkles and folds of the flesh, or about the mouth and nostrils. As a rule, however, this only happens while there is carelessness as to personal cleanliness, and the arsenic workers simply have to wash themselves thoroughly every day on returning from work. Otherwise the work is considered healthy. It prevents all eczema, and the fumes of sulphuric acid as well as the arsenical dust are fatal to germs of disease. Most workmen remain at the works for a number of years without suffering, but occasionally the symptoms of arsenical poisoning, loss of appetite, nausea, frontal headache, and anæmia, declare themselves. When this takes place the work has to be given up entirely.

The greatest danger to which the workmen are exposed is met when it is necessary for any purpose to enter the upright shaft. The effect on the eyes is most painful, and a further curious evidence of the virulence of the pervading atmosphere becomes manifest. The men wear linen garments, lined with flannel, and the sulphuric acid fumes completely destroy the linen in a few moments, leaving the flannel intact, so that the men go into the shaft in linen and come out clad in wool. Fortunately it is seldom necessary to enter the shaft, or great loss of sight would ensue.

CHOOSING A HUSBAND.

WHAT PARTICULAR QUALITIES SHOULD A GIRL LOOK FOR?

Consensus of Opinions—Noted Women Writers Express Themselves on a Subject of Feminine Interest—The Manly Man in Highest Favor.

Under the heading, "What Constitutes a Model Husband?" The Ladies' Home Journal prints a number of letters from several women writers who seek to answer the question. Extracts from some of the letters follow:

Five Rules for Girls.

Amelia E. Barr writes:

First—Choose a man of genuine piety—not so much a "sitter in pews" as one who has a natural religiosity; who loves truth and mercy and justice.

Second—Choose an unselfish man. A girl had far better remain unmarried than tie herself to a creature who considers himself to be everybody, for when a man is everybody his wife is necessarily nobody.

Third—Choose an industrious man—one that has a motive in life, or he will make himself and everyone around him miserable.

Fourth—Do not choose a poor, struggling man. A man in this age has no right to talk of love in a cottage, and roses and honeysuckles to pay the rent. No man who really loves a woman will ask her to share with him the ugly wretchedness and limitations of poverty. Marrying is easy; housekeeping is hard.

Fifth—Choose a patient and affectionate man.

Choose a Manly Man.

Mary Hallock Foote writes: When I asked our wise doctor at home what sort of a physician I should choose in the West (meaning to what school he should belong, since some schools are so much better represented than others in the West), he answered briefly, as if the question made him "tired:" "First, get a man."

So I think we mothers might say to the girls, if it were at all supposable that any girl would ever ask the question of what are the best masculine qualities conducive to a wife's happiness: "First, get a man." Manliness in the highest sense of the word is surely the natural, and therefore must be the lasting bond in marriage.

The Essential Quality.

Harriet Prescott Spofford writes; The woman who really loves her husband will so gild his faults with her tenderness that we are led to believe that absolutely the one thing necessary for lasting happiness in marriage is love. This is the essential quality.

Good Temper.

"The Duchess" writes; "What is the most lasting quality in a husband?" is a large question, undoubtedly, so many wives will think differently on the subject.

For myself I should at once give precedence to good temper! There is nothing like it where home life is concerned. A bright, sunny disposition, cheerful air, a capacity for meeting the daily frets and worries of this troublous life, without an angry frown—all these help to clear the air and draw sunshine from the thunderstorm. And surely a genial laugh is the best music of all with which to march along the highroads of the world.

ROARING WELLS.

Is Their Remarkable Action Caused by Subterranean Tidal Force.

There is a peculiar district or rather a district over a peculiar subterranean formation in the Platte River Valley, in Nebraska, involving more particularly the counties of Colfax, Butler and Polk. This is the region of the singular roaring wells whose waters also rise and fall with a clearly defined tidal action. Of the three counties mentioned Polk leads, having sixteen or eighteen of the curiosities. There are hours when the water will gradually rise, and during this time the wells exhale such a quantity of air as to make a strong current, which is accompanied by a roaring sound which can be heard to a considerable distance. After a short interval of quiescence the ebb sets in, the water slowly falls, and the inhalation that is as if the air at the mouth of the well were in a mad rush to follow the receding tide.

From these facts an impression prevails in many minds that Nebraska, Kansas, and a portion of the Indian Territory rest on an immense subterranean sea. In support of this position, it is alleged that square miles of land have disappeared Northern are reported at Gray's Stock, 65 and 68¾; Toronto Electric Light Co., 180 asked; Incandescent Light Co., 115 asked; General Electric, 95 asked; Commercial Cable Co., 140 and 139; Bell Telephone Co., 144 and 142½; new, 143½ and 141; Montreal Street Railway Company, 150 and 148; do., new, 145 and 143½; Duluth, pref., 15 asked.

Tips From Wall-street.

Henry A. King & Co.'s special wire from Hubbard, Price & Co., New York: Sugar met with some support. The interests that are at the back of sugar are masters of manipulations and may be ranged among the best gamblers that ever came into Wall-street. There is no doubt that the sugar-people will make the most of the uncertainty that is likely to take place while the tariff bill is in the Conference Committee, and the fluctuations in sugar promise to be rapid. A position taken on the long side and maintained may require 15 points margin, but it is safe to say that some time or other this year sugar will sell at higher prices than any that were reached on the recent bull campaign. The future of the railroad stock market depends entirely upon the news from the west. When the strikes are officially declared off we may expect a rally of from 1 to 2 points in stocks.

PLANNING YOUR WELFARE

Our thoughts are of the homes of this city and country. How can we add to their comfort?

For one thing, we carry a stock of Furniture and Housefurnishings that excels all other stocks near and far.

This is a gain to the housewife, who likes a good choice.

Then we meet the situation of all by making terms cash or credit, whilst prices are kept the lowest. Well to know all this.

C. F. ADAMS CO. 175, 177, 179 Yonge-street, TORONTO.

Toronto Live Stock Market.

There was a much better demand for cattle at the Western yards to-day, and all offerings were sold before noon. Firmer cables are owing to a curtailed movement in the West, supplies at British markets decreasing. Twenty loads were received here yesterday and 48 to-day, making 68. There was a good demand for export cattle, and they sold at $4.50 to $4.80 per hundred. Butchers' cattle also firmer, with sales of the best at 3¾c to 4c per lb., good to medium at 3¼c to 3½c and inferior at 2¾c to 3c. Milch cows dull and weaker at $25 to $45 and springers $35 to $40. Calves steady at $3 to $6 per head, according to quality.

Sheep and lambs weaker, with receipts of 1100 head. The former sold at 3c to 3½c per lb. for butchers' and at 3½c to 3¾c for exporters. Spring lambs sold at $3 to $3.50 each. A number were left over. Hogs continue firm, with offerings of only 650 head. Prime bacon lots, longs, sold at $5.40 to $5.50 per hundred, half fats and stores at $4.65 to $4.85, sows at $4.50 and stags at $2.50 to $3.

G. W. YARKER
19 Wellington-st. West.

Breadstuffs.

Flour—Trade is quiet and prices unchanged. Straight roller is quoted at $2.65 to $2.80, according to quality.

Bran—The market is quiet. Small lots sell here at $14.50 and carlots quiet at $12.50 to $13, Toronto freight. Shorts firm at $16 on spot.

Wheat—There is a quiet trade with the prices steady. Sales of white and red on the present unsettled condition of affairs there. There was practically nothing doing at the yards. The liquidation of long wheat which commenced yesterday was renewed to-day and carried the market a cent lower. The depressing influences to-day were principally fears of what might be the outcome of the strike in this city, together with lower cables and absence of cash demand. While we admit the situation looks discouraging to holders, we believe the price has about discounted the news and advise buying on these weak spots.

MONEY TO LOAN

N.B.—There are Branch Postoffices in every part of the city. Residents of each district should transact their Savings Bank and Money Order business at the Local Office nearest to their residence, taking care to notify their correspondents to make orders payable at such Branch Postoffice.

T. C. PATTESON, P.M.

LOSS OF POWER
and Manly Vigor, Nervous Debility, Paralysis, or Palsy, Organic Weakness and wasting Drains upon the system, resulting in dullness of mental Faculties, Impaired Memory, Low Spirits, Morose or Irritable Temper, fear of impending calamity, and a thousand and one derangements of both body and mind result from pernicious secret practices, often indulged in by the young, through ignorance of their ruinous consequences. To reach, re-claim and restore such unfortunates to health and happiness, is the aim of an association of medical gentlemen who have prepared a book, written in plain but chaste language, treating of the nature, symptoms and curability, by home treatment, of such diseases. The World's Dispensary Medical Association, Proprietors of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., will, on receipt of this notice, with 10 cents (in stamps for postage) mail, sealed in plain envelope, a copy of this useful book. It should be read by every young man, parent and guardian in the land.

"THE TRIUMPH OF LOVE
IS HAPPY FRUITFUL MARRIAGE.

Every Man Who Would Know the Grand Truths: the Plain Facts: the New Discoveries of Medical Science as Applied to Married Life, Who Would Atone for Past Errors and Avoid Future Pitfalls, Should Secure the Wonderful Little Book Called "Complete Manhood, and How to Attain It."
"Here at last is information from a high medical source that must *work wonders* with this generation of men."
The book fully describes a method by which to attain full vigor and manly power.
A method by which to end all unnatural drains on the system.
To cure nervousness, lack of self-control, despondency, etc.
To exchange a jaded and worn nature for one of brightness, buoyancy and power.
To cure forever effects of excesses, overwork, worry, etc.
To give full strength, development and tone to every portion and organ of the body.
Age no barrier. Failure impossible. 2000 references.
The book is *purely medical and scientific*, useless to curiosity seekers, invaluable to *men only who need it.*
A despairing man, who had applied to us, soon after wrote:
"Well, I tell you that first day is one I'll never forget. I just bubbled with joy. I wanted to hug everybody and tell them my old self had died yesterday and my new self was born to-day. Why didn't you tell me when I first wrote that I would find it this way?"
And another thus:
"If you had dumped a cartload of gold at my feet it would not bring such gladness into my life as your method has done."
Write to the ERIE MEDICAL COMPANY, Buffalo, N.Y., and ask for the little book called "COMPLETE MANHOOD." Refer to this paper, and the company promises to send the book, in sealed envelope, without any marks, and entirely free, until it is well introduced.

Deep Waterways Committee.
The Deep Waterways Committee met at 34 Victoria-street yesterday afternoon. Present, Chairman Blain and Messrs. Redway, Faulkner, Pears, Hood, Finch, Mackenzie, Trounce, Murdock, Steele, Beales, Roaf, Boyle and McIntyre. Mr. Blain gave a report of his visit to Ottawa and interview with the Minister of Public Works. Messrs. Brown and Beales were appointed a subcommittee to wait upon the Patrons of Industry with a view of getting them to take part in the proposed September convention.

Like Magic. "It always acted like magic. I had scarcely ever need to give the second dose of Dr. Fowler's Extract of Wild Strawberry for summer complaints." Mrs. Walter Govenlock, Ethel, Ont.
