THE WINNERS OF THE EASTERN LEAGUE

Rochester Baseball team, champions of the Eastern League. They defeated Toronto and Montreal teams in the series, and Toronto and Montreal are the only Canadian cities which go in for professional baseball.

STEEL INDUSTRY FOR VANCOUVER ISLAND

C. H. Cahan and Group of Eastern Capitalists Considering the Installation of a Plant on the Pacific Coast

(Victoria, B. C. Colonist, Sept. 20.).

The possibility of establishing an iron and steel industry on Vancouver Island is engaging the attention of eastern capitalists. It is understood that iron properties have already been acquired on the island and that when once the question of whether a wide enough market can be secured is ascertained, the development of these will be commenced. The capitalists interested in the projected development are among the most influential in the Dominion, numbering amongst them those most prominently identified with the Bank of Montreal.

C. H. Cahan, president of the Western Canada Power company, arrived in the city yesterday coming from Vancouver where he has just completed a trip of inspection over the Stave Lake Power plant. Mr. Cahan acts in an advisory capacity to a group of eastern capitalists. A year ago he stated he had an expert looking over the iron situation on Vancouver Island. The reports which he received were highly satisfactory. Iron undoubtedly exists in large quantities and of a character which would well repay exploiting. It was only a question of whether, if a steel industry were established, a sufficient market could be obtained. Mr. Cahan expressed the belief that this market could be found when three transcontinental railroads were running through the province, and when steel vessels were being constructed on the Canadian Pacific coast. While refusing to make any definite statement as to the plans of those capitalists whom he represents he intimated that the growing demand for steel in the province would lead to the establishment of that industry on Vancouver Island.

Work has now been in progress for ten months past at the Stave Lake Power plant, and by May 1st next the company will be in a position to supply 30,000 h. p. to the city of Vancouver. In the course of years, as the demand for power increases, with the growth of Vancouver, the company, through the water rights which it controls, will so develop its plant as to produce 100,000 h. p. Between $6,000,000 and $7,000,000 are being spent in this work. The amount expended to date is in the neighborhood of $3,000,000.

Mr. Cahan states that there is a great and growing field for power to Vancouver at present absolutely untouched. The lumber mills at present use about 8,000 h. p. These are all generating steam power from their waste material. The Fraser River lumber mills have put in an entire equipment of electric motors to drive their machinery, as they found that steam engines scattered all over the plant, with all their belting and shafting, are a very expensive method of producing power.

Big Field Here

On the Vancouver, waterfront steam cranes are at present used for unloading ships and handling materials out of barges. Mr. Cahan considers there is a big field here for the application of power especially as steam winches must be run by certified engineers, and it takes two men to run each of them.

The government is now running a number of pumping plants in connection with its scheme of dyking and reclaiming low lying lands. Twelve hundred horse-power is already used for about three months in the year for this purpose, and if power were cheap and easily available, it would be used more than three months, and there is little doubt that considerable extensions of dyking would be made.

The above few instances, according to Mr. Cahan, illustrate the present possibilities of the Vancouver power market. Vancouver he describes as a city which is growing wonderfully fast. In some fifteen years time he estimates that it will be the second city in Canada. To attain to that rank numerous industries will start up, all of them requiring power, and it is to meet the demands of these that the waters of Stave Lake are being harnessed.

The capitalists who are interested in the Stave Lake Power plant, have already developed a number of similar enterprises in eastern Canada and other parts of the continent, all of which have proved notable successes. Perhaps the best illustration of the successful manner in which power schemes have been installed through the agency of this group of capitalists is to be found in the operation of the Mexican Power and Light company which supplies Mexico City. Power there was developed from a fall 97 miles from Mexico City, and carried 77 miles beyond the capital of the Republic. Eighteen months ago, when Mr. Cahan, who was superintending operations, left, 80,000 h. p. was being developed, the amount of money spent in the enterprise reaching a total of $35,000,000, all of which was Canadian capital.

The Stave Lake Power plant is the first scheme of its kind in which this group of capitalists have embarked in western Canada, and is an earnest of future projects which they will undertake in this portion of the Dominion. The men in charge of the Stave Lake operations are drawn from those who were instrumental in so successfully installing the plant of the Mexican Light and Power company. R. F. Hayward is the general manager and W. McNeil, the assistant general manager.

Mr. Cahan, who is a guest at the Empress hotel, leaves for Vancouver tomorrow on his return journey east.

SPORT NEWS OF A DAY; HOME AND ABROAD

St. Peter's Defeated.

At St. Stephen, yesterday afternoon, the St. Peters baseball team was defeated by St. Stephen by a score of 8 to 4. McGovern pitched for the locals, while McCormick of New Bedford, pitched for St. Stephen. The local team returned home last night.

Stallings Out.

New York, Sept. 27—George T. Stallings, is no longer manager of the New York American league team. Mr. Stallings has authorized the anouncement that he was through as the team's manager. He has received a check in full for his services for the year, he said, and had severed his connection with the club.

Mr. Stallings did not care to say at this time just what the circumstances were which led to the severing of his relations with the club. His announcement, however, confirmed anticipations which arose following the investigation by President Frank Farrell in Cleveland of Stallings' charges that Hal Chase, the team's first baseman, had not given the club his best services.

President Farrell has made no public statement of the results of that investigation, but it was learned from a statement by President Ban Johnson of the American league, made in Cleveland after the Highlander players had been questioned on the matter, that the charges had not been sustained.

Who will succeed Mr. Stallings as manager has not been announced. Further light on the matter was looked for in a statement from President Farrell. Mr. Stallings also intimated that he might have something further to say shortly.

National League.

At Brooklyn—Pittsburg, 3; Brooklyn, 4 (10 inings.)

At Philadelphia—St. Louis, 6; Philadelphia, 5.

At Boston—Chicago-Boston, rain.

At New York—First game, Cincinnati, 4; New York, 2. Second game, Cincinnati 2; New York 4.

American League.

At Chicago—First game, Washington, 0; Chicago, 2. Second game, Washington, 3; Chicago, 2.

At Detroit—New Yok, 10; Detroit, 2.

At St. Louis—First game, Philadelphia, 6; St. Louis, 0. Second game, Philadelphia, 5; St. Louis, 4.

Can Cy Young Last to Pitch in 1,000 Games?

Can Cy Young pitch 1,000 games in his big league career? This is the question, since Cy has won his five hundredth game and bids fair to continue winning as frequently as do the majority of good pitchers in the American League.

In his twenty-two years Cy has pitched 800 games, or about that number. To pitch in 1,000, to use round figures, Cy must work in 200 more contests. Give him an average of 50 games a season, which the old boy can stand, and stand well, and it will take four years to finish the mark.

When one says four years' more work for Cy, hammers come out and the chorus comes out, "He can't do it," and every time they yell Cy can't come back he blooms into fame, shutting out a team without a hit or run.

Once he did not allow the Athletics to toe the canvas which holds the sand at first base. With his habits, Cy may be able to squeeze through 200 more games. He has lived a clean life and his big, husky frame is quite right to stand the strain.

By the time Young has pitched 1,000 games, if he can average 25 games a season, he will have performed a feat unequalled in the annals of baseball.

The Turf

Horse Notes.

Although General H., winner of the Charter Oak $10,000 stake, is owned in Calgary, Canada, he is a product of the United States, having been bred at Maleern, Iowa. He has been raced for five years, and altogether has started in 41 races, of which he has won 29. His sire is Combineer, a son of Commoner, by Electioneer. Combineer's dam is Queen Bess, by Allandorf, and his second dam is Bessie Huntington, the dam of Charley Herr, 2.07. The dam of General H. is Jessie Wallace, by Midvale Prince, son of Red Wilkes; second dam, Lizzie Wallace, by Jay Bird; third dam, Nutbush, by Nutwood Hacke, son of Nutwood, 2.18 3-4; fourth dam Duchess May, by Hambletonian 10; fifth dam Sunbeam, by Jupiter, son of Vermont Black Hawk.

Lou Dillon, 1.58 1-2, the world's champion trotting mare, and The Harvester, 2.01, the world's champion trotting stallion, are to be mated next season. Considering the blood inheritance, the conformation, the temperament, the gait and speed ability of Lou Dillon and The Harvester, Mr. Billings, the owner of the mare, has a right to expect that the produce will prove a world's record-breaking trotter. While both The Harvester and Lou Dillon hold the world's record, neither of them have ever been raced enough to affect the offspring unfavorably. Lou Dillon has already produced three very promising foals by John A. McKerron, 2.04 1-2, one of which has made a record of 2.11 1-4 this season as a three-year-old.

At Indianapolis, Sept. 16, Minor Heir established a new world's record for pacers without the aid of a wind shield by doing a mile in 1.58 1-2. Minor Heir, by, pacing in 1.59 the previous Monday, had apparently set an impossible mark to shoot at on the last day of the fair. A mile right at two minutes would have been considered phenomenal under the circumstances, for it was the third time inside of five days that he had been asked to pace to his limit. On Monday, he paced in 1.59; on Wednesday, under favorable weather conditions, he won a race in 2.00 1-4, and Friday he capped the climax by pacing the fastest mile in the history of the light-harness horse, Dan Patch's record time with a wind shield was 1.55 1-4, made in 1906. Minor Heir went the first quarter in 29 3-4, the half in 59 1-2, three-quarters in 1. 28 1-2, and he came home the last quarter in 30 seconds. His third quarter in 29 seconds, was the fastest of the mile.

When Colorado E. reduced the 3-year-old trotting record to 2.06 1-4 at Readville, Col., John E. Thayer recalled the day that he paid $25,000 for Baron Wilkes, sire of The Bondman, sire of the champion colt. That was 15 years ago, writes Hamilton Bushey in The American Horse Breeder, and the high-priced era for trotters was on the wane. The act of Colonel Thayer checked the decline. Confidence was restored and there was a new and healthy expansion of the trotting horse breeding industry. At the bottom of the pedigree of Colorado E. are stallions which came under my personal notice, such as Rysdyk's Hambletonian, Mambrino Patchen, George Wilkes, Kentucky Prince, Strathmore, Edward Everett, Ethan Allen, Mambrino Pilot and Sentinel, the brother of Volunteer, and recollections of the long ago were recalled when I looked from the judges' stand upon the whirlwind of speed. It is worth something to have lived through the various stages of development and to retain impressions of the individuals largely responsible for that development.

The Ring

"Kid McCoy" Had Narrow Escape

Norman Selby, known as Kid McCoy, the prize fighter, narrowly escaped death by fire and water in North river, New York, Monday morning, when there was an explosion on a naptha launch known as the Kid McCoy on which the prize fighter and Frank George of New York were spending the night. The boat accidentally caught fire and a few minutes after Selby had been taken off in a rowboat, the gasoline tank exploded.

Motor Cycling

St. Yves Masters Motor.

Henri St. Yves, the French marathon runner, won his first as a professional motor cycle rider at the Clifton Stadium last week, when he beat Carl Ruden at two miles in two minutes and five seconds.

The feature of the races proved to be the motor paced match race between Elmer Collins and Jimmy Moran. Collins took the first heat of ten miles by two feet, after a half mile sprint. Moran started at a desperate clip in the second heat and won by exactly a lap. Collins came back strong in the final, however, and rode Moran off his pace, winning by nearly a lap.

George Wiley defeated Freddie Jones, the New York sprinting crack, in two heats at a mile and one-half mile.

Merle Small, an 11-year-old boy of Limington, Me., has just finished reading the Bible through in seven months and 21 days.

AMUSEMENTS FOR OURSELVES AND OTHERS

NICKEL.

The Nickel did capacity business again yesterday afternoon and evening with the fine programme of pictures in which was included the magnificent film record of the International Eucharastic Congress at Montreal. This famous picture is to be shown again today for the last time. It will not be repeated at the Nickel as it is in great demand throughout the length and breadth of the continent. The new pictures for today include the late Biograph release, Wilful Peggy, and the Selig paririe story, Jim The Ranchman. There will be comedy numbers as well. J. W. Myers will conclude singing In The City Where Nobody Cares, and the MacBrady children will also finish their dainty numbers, Playing Hookey, and Down In Colon Town. Tomorrow there will be new vocal numbers.

THE GEM.

Another big drama of life on the western prairie among the red and white settlers there, is told today at the Gem Theatre, in the Yalem picture subject, "White Man's Money,—The Red Man's Curse," which is a story of life in the Canadian west dealing with the adventures of a group of Indians who have been drawn under the influence of the whites. "The Moonstone," another picture on the bill, is an interesting melodrama, while "Chew-Chew land," is a big Vitagraph fairy story which will appeal to young and old people alike, in its pleasing and novel nature. "A Rough Weather Courtship" is a delightful comedy taken on board ship, and showing how an old salt won a bride.

Miss Doris Dean has captivated audiences at the Gem this week, and is a valuable addition to the programme. Tonight she will sing "Take Me With You, in Your Dreams," and Mr. McGregor will also be heard in a pleasing number.

THEATRE CECIL.

The crowds that daily attend the performance in the Cecil on Union street are more than pleased. Nothing has been left undone to make the Cecil one of the best amusement houses in the city.

Today there is a new and up-to-date programme of pictures of the dramatic and comic type. Mr. Wallace will be heard in a new song, and a visit to this theatre is sure to be one of pleasure.

MORNING LOCALS

The recommendation of Mayor Frink in favor of a new ferry boat, will be taken up at a meeting of the ferry boat committee on Friday. Supt. Waring has received a communication from the Philadelphia Railway offering to sell the city one of its ferry boats, but it would be necessary to enlarge the floats to accommodate such a large boat. It may be that a new boat will be built in this city.

Police Sergt. Hipwell is lying at his home, Exmouth street, in an unconscious condition with faint hope of his recovery. The sergeant is eighty-seven years old and has for the past couple of years been granted leave of absence on full pay. The veteran blue-coat has been a member of the police force for fifty-eight years. He has worked under three chiefs, George H. Schoullar, John R. Marshall, and W. Walker Clark.

A successful fair was conducted yesterday by Johnson lodge, L. O. B. A. in Orange hall, Germain street, and a good number of people were present.

Barney Devine, who escaped from the jail gang here a few days ago, was caught at Fredericton, yesterday and will be brought back.

A lunatic who escaped from the Provincial Hospital a few days ago, was caught yesterday at St. George, and will be brought back to the institution today.

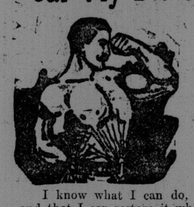
When Eve told Adam just what she really thought of him that was the original rib roast.

IMPERIAL MERCHANT SERVICE GUILD HAS A SERIOUS GRIEVANCE

Liverpool, Sept. 27—For a number of years past the Imperial Merchant Service Guild have urged upon the government, both in parliament and through the medium of the board of trade, the serious grievance to which, in certain cases, merchant captains and officers are subjected in being compelled to give up their positions in order to give evidence at marine or other inquiries ashore, which are fixed to take place after the date on which their ships were due for sailing. The Guild contend that where captains and officers are not in any way involved in such inquiries it is highly unjust that they should be forced to throw up their position without redress or compensation of any kind, beyond payment of a daily subsistence allowance up to the time of the case being heard. The Guild are of opinion that seafarers, being under particular disabilities, should receive differential treatment in such cases, which to the knowledge of the Guild, and also, it may be said, to the marine engineers, who are co-operating in this matter, have resulted in considerable hardship in individual cases. The latest phase is that, as a result of a conference held at the board of trade, at which representatives of the captains' and officers' and engineers' organizations attended, the Guild have now received a communication from the board of trade furnishing a number of interesting statistics as to inquiries held in recent years, and the approximate number of masters, officers, and engineers, who have given evidence thereat. Particulars of a suggested scheme of insurance are also forwarded, but it is stated that the subject of compensation out of public funds was not one which the board intended to raise at the conference, and that the matter the representatives attending thereat were invited to consider was a scheme of self insurance by the officers concerned. The board state that they will be glad to receive any observations which the Guild may have to offer on the scheme, the carrying out of the details of which they state would naturally rest with the representative associations concerned.

Optimism is sometimes due to lack of experience.

NO NEED TO BE WEAK
Wear My Electric Belt Until I Cure You and Then Pay Me



You've doctored and doped till you are sick of it all.

You would pay for anything that would give you back your old vim.

You don't want to pay out any more money till you are sure.

I will cure you first and you can pay me afterwards. Is that fair? Then get in line.

I know what I can do, because I've done it and am doing it every day. I'm sure that electricity is the life, and that I can restore it where it's lost. So if you need what I offer, and don't want to risk anything, wear my Belt free until you are cured, then you can pay me.

And when you do pay me the cost is less than a short season of drugging. Life is more pleasant! You put my Belt on when you go to bed; you feel the soothing, exhilarating vitality flowing into your weak body, and while you sleep peacefully it fills you full of the fire of life. You wake up feeling like a giant.

Now, I can't cure everything. I don't claim to, and I won't take your case if I don't feel sure of it, but all these troubles which come from an early waste of vitality, from dissipation of any kind, from exhaustion of nerve power, or from any organic stomach, liver or kidney weakness, I can cure, and those are the cases I am willing to tackle and take the chances on. I am curing them every day.

All I ask is reasonable security for my Belt while you are cured of it.

It will make you strong. It will send the life blood dancing through your veins, you will feel the exhilarating spark warm your frame, the bright flash will come to your eye, a firm grip to your hand, and you will be able to grasp your fellow-man and feel that what others are capable of doing is not impossible to you. This grand appliance has brought strength, ambition and happiness to thousands of men in the past year.

Dear Sir,—I am pleased to say that I have improved wonderfully by the use of your Belt.
Yours truly, DOUGLAS BAIRD, Perth, N. B.

Dear Sir,—I wish to say that your Belt has given me good satisfaction. I might say further that I think mine was a hard case to help, being troubled with sick headache and very severe pains in my head and not able to sleep more than half the night. I am pleased to say that after wearing your Belt for awhile, I slept better and my sick spells grew longer between. The current generated by the battery was fine and soothing, and gave me good satisfaction in a great many ways. I remain, as ever.
A. S. MACE, J.P., Newton, Kings Co., N. B.

N. S. CLERGYMAN IS CALLED TO CORNWALL

Cornwall, Ont., Sept. 27—The congregation of St. John's Presbyterian church at a meeting decided to extend a call to the Rev. A. B. McLeod, of Truro, N. S., to become their pastor in succession to Rev. N. H. McGillivray who left St. Johns to become pastor of Taylor Church, Montreal. The stipend is $1,800, free manse, and four weeks' holidays.

The call will come before the Presbytery of Glengarry at Farrans Point, in a couple of weeks, and will then be forwarded to the Nova Scotia Presbytery and afterwards presented to the minister.

Rev. Mr. McLeod has a brother in this section, Rev. J. B. McLeod, of Martintown.

ONE MAN WHO CAME BACK.

Two fight fans were discussing the Jeffries-Johnson fight.

"It's the old story; they never come back."

"Except Enoch Arden," replied the other, "and he had to go away again."—Everybody's Magazine.

she discovers that she didn't.

OBITUARY

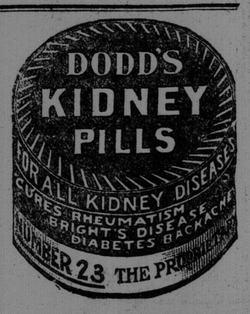
William Crozier

William Crozier, aged 38, and for many years an employe in the I. C. R. round house, died yesterday. He leaves two brothers, John and Hugh. The funeral has been arranged for 2.30 tomorrow afternoon.

Mrs. Ira Mosher

The death of Mary, wife of Ira Mosher, occurred at the General Public Hospital yesterday afternoon. Besides her husband she is survived by her mother, two brothers, one sister and seven children.

Arthur Vincent

Chester Vincent, of Fair Vale, has received word that his son Arthur, who lately enlisted in the Northwest Mounted police, was drowned near Battleford (Sask), yesterday, while duck shooting. The telegram came as a great shock. The deceased leaves a brother Frank, in M. R. A's and three brothers and one sister at home. The body has not been recovered.


While in the city yesterday, M. J. Butler said that he believed it would not be long before legislation is made to govern the use of explosives in factories, mines, and similar places of employment.
