## NO CALL FOR FOREIGN RAILS

Continued From Page 1.

was at a concession in price necessary to meet the competition of English makers.

In reply to a question as to whether the C.P.R. had actually signed a contract for the 60,000 tons, Sir Thomas Shaughnessy said: "That is a domestic matter which I do not care to discuss."

Sir Thomas, however, takes issue with the report of the experts appointed by the government.

"While it is quite proper," he said this morning, "that the Canadian manufacturer should be sufficiently protected, there is not, in my opinion, one in Canada who is capable of producing a rail economically."

At al levents the officials of the company who have the matter in hand do not deny the truthfulness of the statement. If it be correct, obviously the company will have to pay duty upon almost the entire importation. Those who are in a position to know state that it is extremely unlikely delivery of anything but a small quantity can be made before Nov. 30.

But even if all the rails called for under the contract were to be laid down in Canada prior to the date stipulated the company would still be unable to avail itself of the exception made in the order-in-council just issued. Over the greater part of the C.P.R. lines it is impossible to lay rails in any quantities during the winter.

The new legislation, however, will not affect the G.T.R. for the present, because the rails contracted for by that system have been nearly all delivered, and the balance will be forthcoming within the next few weeks.

### Physical Weakness Aided.

The inquest on the body of Walter McAllen yesterday afternoon developed the fact of his continued sleeplessness.

The medical evidence was to the effect that death was due to an overdose of chloral, and that in the weak and rebilitated condition of deceased might have caused him to succumb to a dose that in a stronger state of health would only have acter as a soporific.

## MUNICIPAL FIRE INSURANCE.

### Suggestion is Revived and May Receive Official Attention.

Ald. Chisholm has suggested that if the board of underwriters determine to again increase the fire insurance rates, the city should start a municipal insurance system and carry its own risks, which he considers it would be able to do quite as easily as the companies. The suggestion has attracted considerable attention, as it is generally felt that the risks of the city are of the highest class.

Mayor Urquhart had not considered the matter of late, but had been very favorably impressed with such a proposition some years ago when it was brought up in council by ex-Ald. Lamb.

The insurance carried in the city buildings is now distributed among 48 companies and the premiums for a three-year period ending in 1906 amount to $39,913.01, according to City Treasurer Coady.

The total amount of the insurance in force is $1,773,913, on which there is paid a rate of 2¼ per cent., but in addition to this, risks are carried on new buildings and for special periods, such as during the time of the exhibition, which are paid at regular rates.

There is also the insurance effected on the schools of the city. The estimates for the present year contained appropriations amounting to $3650 for schools, the public library and the jail, so that the total amount paid by the city for insurance will closely approximate $20,000.

### PRO BONO PUBLICO.

The police yesterday put out the usual drag-net for the loafers and thugs that come to Toronto during the fair week.

About 20 of them were gathered in last night. Some were locals, some were got, and the police is doing good work in putting them under cover for a time.

### OTTAWA INDEPENDENT CANDIDATE

Ottawa, Aug. 29.—Ald. Sanderson of Ottawa has announced his intention of being an independent labor candidate at the next federal contest. He is a printer, employed at the printing bureau.

### Tomlinson Beats Meyer.

St. Louis, Aug. 29.—A telegram was received to-day at the World's Fair grounds, saying that George E. Tomlinson of Syracuse, N.Y., contesting with Carl E. Meyers of Frankfort, N.Y., in a balloon race to Washington, D.C., landed near Wyoming, Ills., last night, after being in the air 24 hours. Meyers had landed near St. Charles, Mo., after being in the air a little more than two hours. The contest will be continued until Nov. 1, when a cash prize of $5000 will be awarded. Tomlinson has a distance of 200 miles to his credit, which may be beaten by another aeronaut.

### Fire Caused $1,250,000 Loss.

Berlin, Aug. 29.—The largest sugar factory in Germany, named Kulmee, near Thorn, West Prussia, was burned last night, involving a loss of $1,250,000. The fire caused a rise in the sugar market at Hamburg of three cents a hundredweight.

## LABOR MEN INTO POLITICS WITH 16-PLANK PLATFORM

### Public Ownership, Abolition of Senate and Reform of Labor Laws the Three Leaders.

President John A. Flett of the Trades and Labor Congress of Canada was seen by The World yesterday, and spoke of the position of the labor party in its relation to the two great political parties.

"If the labor vote was united we would not need to talk in this way about it," he said. "As it is, we have a platform with sixteen planks, and we are going to support the candidates who will go the longest way with us. The most important plank probably is that of public ownership of all franchises, such as railways, telegraphs, water, lighting and such like. Telephones are, of course, implied in that. Next comes the abolition of the senate, and the reform of the labor laws. These would be our test questions.

"When the present government was in opposition they were going to reform the senate, but now Laurier says he has improved it. But the senate is composed of seemingly avowed and recognized opponents of the interests of the working people. We have been humbugged so long it is useless for us to go down there praying relief, and we must take means to force their recognition. After the disappointments we have met with this year from both houses we will linstitute some movement to that end.

**Lobor Ignored.**

"The labor party number 75 per cent. of all the producers of the country, and the greatest good of the greatest number would require some attention being paid to us, but they seem to devote all their time to the capitalists. They are bonusing industries like the steel works at Sydney with a bounty per ton, but what incentive to the working man is there in that when there is not a fair wage clause to protect him? That clause should apply to all bonused industries. We expect them at least to pay a living wage, but we are now told after interpellations in the house tha the clause does not apply.

"The alien labor law is also a great disappointment. If the principle of protection is to be applied it should logically be applied to labor, yet we have $800,000 spent in assisting emigrants, not of the best sort for the country, to come here and compete with home labor. Not only an alien labor but a strong emigration law is necessary to protect us. With the finest school system in the world and other advantages we are ignored for want of a policy of Canada for the Canadians. There are more Canadians in the United States than in Canada, and this is because of the unpatriotic policy of our governments.

**Senate a Danger.**

"Progress is slow with us, but it is steady. There is a great army to be educated. But look what labor has accomplished in Australia and New Zealand. The government claims to have reformed the senate, but if all interests are to be represented in that chamber, why is it that the preponderant influence of the country is excluded? Instead of a safety valve of the nation, the senate has become a danger and threatens the liberties of the people. Its members are bitterly hostile to the interests of labor.

"We should have a non-partisan organization for the labor vote, and pledge men in all close constituencies to our platform. The present Ontario government has lost every industrial centre but Brantford, and with men pledged to our measures, and in various ways, we can make ourselves felt."

### ALWAYS RESULTS FATALLY.

A leading pathologist, who is counted among the most able physicians on diseases of the blood in the country, said about pernicious anemia:

"Idiopathic, or progressive pernicious anemia, is a disease that has always puzzled the medical world. We never have been able to discover its cause. There are two forms of anemia, primary and secondary. The latter form can always be traced to some organic disease, such as typhoid or scarlet fever, brain troubles and other bodily diseases. Primary anemia, under which Dr. Pryse's illness figures, can never be traced to any direct cause.

"Pernicious anemia is a disease of the blood, in which the red corpuscles and haemagoblins rapidly diminish. The blood of a healthy man contains 5,000,000 red corpuscles and 100 per cent. of haemagoblins to one cubic millimetre, or, in plainer words, about one drop, whereas, with a man in the last stages of pernicious anemia, a drop of his blood contains 500,000 red corpuscles, barely a tenth of what he should have under normal conditions, and only 30 per cent. of haemagoblins. The direct cause of death of a person suffering from this disease may be ascribed to the non-action of any organ in his body. His heart may cease to work, his brain may stop pulsating, his lungs may refuse to fill with air, and all from the same cause—lack of oxygen, which the haemagoblins give to the flesh tissues."

The doctor said no man who has ever suffered from this disease has recovered, as no means have been discovered to create new red corpuscles. The treatment at present used consists of injections of arsenic and bone marrow, from which the red corpuscles come; massage of the limbs and inhalation of oxygen. These various treatments have been found merely to prolong a patient's life.

9.00 to 9.45—Grand Military Spectacle, relief of Lucknow and march past.

9-45 to 10.00—Concluding with Brilliant Fireworks Display.

God Save the King.

**The Water Lilies.**

Hear the whisper of the rushes
Bending o'er the meadow pool;
Idly wafting airy greetings
To the lilies white and cool.

Tall and debonair the rushes,
Gay and careless, light of mien:
Purest maidens are the lilies
Each a chaste, a snow-white queen.

Listen not! ye dainty maidens,
Hide your secret in your heart;
Cavaliers may whisper sweetly,
Sighing softly, "We must part."

Wanton breezes, sun's hot glances
Kiss and woo thee into life:
Heed no whisper of the rushes,
Stars of peace! Love bringest strife.

Calmly shine as proud white lilies,
Royal maids in robes of green;
Mirror'd on the silent river,
Hearts of gold in silver sheen.

**Another Good Indian.**

White Earth, Wyo., Aug. 29.—Shaw Ross Kung, chief oracle and one of the last grand medicine priests of the Ojibways, died here to-day, aged 80. A few years ago he became a Roman Catholic, in which faith he died.
