CHIGNECTO POST AND BORDERER

SACKVILLE N. B., APRIL 27, 1893

THE REGISTRATION FEES.

This week the Post publishes a full text of a speech made by Mr. H. A Powell. M. P. P., in the House of Assembly in support of a bill, he introduced lessening the amount of fees paid to the county registrars for the recording of mortgages, bills, etc. As the provisions of the bill made a direct blow at several government supporters who held registrarships, Mr. Blair caused the bill to be killed before it went to the house for discussion. There is a strong feeling all over the province that in contending for reformation in the registry office Mr. Powell is in the right and the public endorses him when he promises that his bill will be reintroduced every session until the wrong is righted. There appears to be no sound argument the premier can bring forward against Mr. Powell's bill. With the figures before him of the money paid for the same work in Nova Scotia and elsewhere, analogy offers no avenue of escape and the only way in which the measure can be annihilated in by force of majority, a species of argument which Mr. Blair has before found very convenient. Were the law so arranged that the fees were turned into the county treasury, and local taxation lessened so much thereby, there would be little cause for complaint, but as it is, these large fees are charged the people and go into the registrar's pocket. Mr. Powell does not want the gentlemen who hold the offices to work for nothing. His bill provides a fair salary for each, a salary that is somewhere in proportion to the work done. Mr. Blair's future attitude upon this measure will be watched with interest. Messrs. Killam, Smith and Wells voted for the high salaries.

TARIFF REFORM.

At the annual dinner of the Sir John A. Macdonald club in Montreal on Saturday, the future action of the government on the trade question was stated by the Finance Minister. There is to be no change of policy. The policy of protection to home industries will be maintained as long as the government has the confidence of the people. The tariff, however, will be revised from time to time, as the changing condition of the times and the growth of the country demands. what these changes will be has not yet been decided. The government, however, has gone about securing reliable data in a most practical manner. The cabinet ministers will make a tour of the Dominion and place themselves in convention with boards of trade, manufacturers, and all classes of the business world who have ideas as to what is best for the country. By this method of personal representation many unnecessary and annoying customs details will be remedied or removed.

In speaking of Dalton McCarthy's late move Hon. Mr. Foster said that that gentleman's platform was too narrow to sustain a party. Two of the planks were founded on questions of race and creed and the third, tariff reform, would be met by the government at the next session.

A question which is very naturally interesting Canadians now is: What will President Cleveland's policy be? He was elected upon a straight free trade platform, and prominent democrats in his party are intent upon holding him to his pledges, given at Chicago convention last year. They claim that the government will be false to its pledges if they allow a single tax to be placed upon the people except to provide for revenue only. Should this be the policy, and some very strong Americans are among its champions, our government will be in a position to make a treaty which will give Canadians a wider market for some of their surplus products.

MR. E. V. TAIT.

In the death of Edward Valentine Tait, Westmorland loses one of its most widely beloved and respected citizens and Dorchester particularly sustains a loss which must for some time at least be irreparable. A great portion of the deceased gentleman's life was spent in teaching and not a few of the ablest men in the county owe their life long success to the early inspiration given them by Mr. Tait. As a jail official he has ever been most courageous and courteous. His duties in this capacity necessarily brought him in contact with the worst classes in the country, but he never for a moment lost sight of an opportunity to work a moral reform on the unfortunates whom fate placed in his care, and not a few men and women have left the prison walls with a firmer resolve to lead better lives, as a result of his kindly advice. Personally Mr. Tait was the soul of good nature and his younger friends in the sister town and Sackville will long remember many a pleasant hour spent in the company of the "Dominie".

The POST joins the many friends of the deceased in extending heartfelt sympathy to Mrs. Tait and sorrowing family in their hour of bereavement.

Mr Blair paid a poor compliment to his inventive genius when he discouraged the teaching of temperance in schools of the province the other day. The reason he gave the house was that a suitable text book was not available. On Sunday his friend, Hon. J. W. Ross, minister of Education for Ontario, at a meeting in Toronto, said that 150,000 school children were receiving instruction in temperance from a text book. In the separate schools of that province 30,000 children are taught from the same book.

John C. Lyons, of St. John, suffered severely from rheutism of years standing. He writes The Hawker Medicine Co. that their Dr. Manning's German Remedy cured him, after all others failed.

—Robert Lund, of Bethel, P. E. I., was butted by a ram recently, knocked down and his right leg broken.

Death of E. V. Tait.

The community was shocked on Monday last when it was announced that Mr. E. V. Tait, keeper of the county jail, at Dorchester, had succumbed to an attack of pneumonia at 5.30 o'clock that morning. The deceased gentleman was in Sackville only a few days before his death when he appeared to be in possession of his usual good health. On Saturday, however, he was taken with the fatal affection which became complicated with bilious fever and the worst fears of his family and friends were realized. Mr. Tait came of a highly respectable family in Aberdeen, Scotland. His father, Alexander Tait, who was a cousin of the late Archbishop Tait, was born at Lenabo in the Parish of Langayde in that county, on August 16, 1791. He removed in early life to Westcock in the Parish of Sackville, in this county, and in 1804 he married Elizabeth McAllen, of Westmorland Pt. N. B., and died at Westcock, November 14, 1859, his widow having survived him until about 1873. Mr. Tait was born Feb. 14, 1827, at Westcock. On On September 5, 1852, he married Chthariide, daughter of the late John Atkinson, who survives him. The family consists of four sons and five daughters, all of whom except Cora are living. The sons are: J. Fred, of North Sidney, C. B., W. Frank, of Dorchester, Albert B. of Boston, Mass., and Alex. P. of Gardiner, Maine. The daughters are: Lillia, Laura A., Mabel and Ella. Mr. Tait was one of the early students of Mt. Allison Academy and after taking a course there, he secured a licence to teach, which he had held for upwards of 50 years, teaching for a long period at Wood Point, and latterly at Dorchester. He received a musical education under the direction of Rev. John Black, for years rector of Dorchester, and has occupied the position of organist at Trinity church of that place for 50 years. He has resided at the shire town since 1851 and during the past 37 years has held the position of jailer of the county. Since 1878 he has been a Justice of the Peace and in addition to his professional duties he represented several of the best insurance companies.

On Wednesday evening, 12th inst., a fourteen year old son of William Weeks, carriage maker, Tidnish, was found on the roadside near his father's house, dead. It was thought at first that perhaps the boy was only unconscious, but every effort made to revive him proved fruitless. An inquest was held before coroner Stephen Oxley. From the evidence it appeared that the boy had been subject to epileptic fits. After hearing the evidence of Mrs Weeks (stepmother), George Brundage and Dr. Clay, the jury returned the following vertict: "That the deceased William Aliburton Weeks came to his death while in an epileptic fit." Much sympathy is felt for the father in his trouble, as he has been a kind of modern Job, in the affliction line, having a daughter now far advanced in fits and one dead a short time since.—Press.

F. W. Heath, of Toronto was cured of a cough that followed La Grippe, by using Hawker's Tolu. He wrote Mr. Hawker a grateful letter of acknowledgement.

The schooner *Hasty*, Capt. Fraser, owned by Mr. A. Mackinnon, Coleman, which was lying near Messrs. Jos. Read & Co.'s wharf all winter, was carried out to sea by the ice on Tuesday last, the Captain and two or three men being on board. She passed over the bar, between Indian Point and the lighthouse, and then drifted towards the New Brunswick shore. After some hours she got clear of the ice, and after lying at anchor for some time, sail was hoisted, and the schooner arrived at Charlottetown on Wednesday.

The Spring,

Of all seasons in the year, is the one for making radical changes in regard to health. During the winter, the system becomes to a certain extent clogged with waste, and the blood loaded with impurities, owing to lack of exercise, close confinement in poorly ventilated shops and homes, and other causes. This is the cause of the dull, sluggish tired feeling so general at this season, and which must be overcome, or the health may be entirely broken down. Hood's Sarsaparilla has attained the greatest popularity all over the country as the favorite Spring Medicine. It expels the accumulation of impurities through the bowels, kidney, liver, lungs and skin, gives to the blood the purity and quality necessary to good health and overcomes that tired feeling.

The trade returns for the nine months of the fiscal year show another upward bound, consequent upon the great increase in the exports of last month, amounting to over two millions and a half. The figures for the current year are $895,480.40, as against $854,874,39, or an increase of $40,606.01, as compared with the corresponding period last year.

The exports for the month totalled $6,545,336, as against $3,988,337 The imports for the nine months is as follows: 1893, $87,922,940; 1892, $81,900,946, or an increase of $6,021,994. The imports for the month of March show an augmentation of $381,953. The duty collected during the current year amounts to $15,898,343, as against $14,580,189, or an increase of $1,318,154 Of this increase $85,486 accrued last month.

Most people suppose that the manufacture of tobacco consists merely of taking the leaf and pressing it into plugs. The fact is, however, that the process is a very delicate one, and the least false step will injure the flavor. The leaf must be carefully attended to for month after it leaves the planter's hand. It must neither dry too quickly or too slowly. Even after it has reached the factory the utmost delicacy of manipulation is required. The weather must be carefully studied, for if there is too much moisture in the air when it is pressed it will mould, and the same will happen if too much moisture is sprinkled upon it for the purpose of opening the leaf. Again, if it is overdried in the oven it will turn crisp, and will nip the tongue in smoking. It is by careful attention to all these points that the "Myrtle Navy" has been brought to such perfection. The firm who manufacture it have their own storehouses in Virginia, and from the time the leaf leaves the planter's hands until it is turned out of the factory, months afterwards, in plugs, it is under the care of their skilled and trusted employees.

—The Sir John A. Macdonald Club of Montreal held its annual dinner on Saturday. Hon. Messrs. Foster, Ouimet, Curran and Ives attended together with several other prominent conservatives. The principal speech of the evening was made by Hon. Mr. Foster. The most significant portion of his speech was his reference to the protective policy of the government, with reference to the principle of protection. He expressed the opinion that whatever the future might have in store the time had not yet come to change the protective principle. But while there would be no changes in principle there would be changes in detail, and irregularities will be made to disappear. As regards the adjustment of the tarriff, Mr. Foster said that this would be amply met by the Liberal Conservative party. He asked the country to wait for a few months when it would be seen whether the Conservative party would not carry out its pledges. He believed that the people would then admit that on adequate effort had been made to remove the inequalities of the tarriff.
