Cur tat Renferme

Lors de sa Sepulture en 1199

Richard Coeur de Leon

Troves en 1846

Dans le Sanctuaire de la Cathedral

de Rouen.

The inner case is in comparatively good

ondition, the inscription being perfectly

egible after all these hundreds of yeara.

The Latin is somewhat peculiar, and it is

cardous to find that at a period when the

art of working in metals was at an advanced

tage the engraver of the inscription on the

offer which was to contain the heart of such

a high and mighty potentate did not take the

trouble to ascertain what space he required

for the ling's name, so that he had to carry

were the terminal letter to the next line. It

a noteworthy, too, that Richard is styled

Regis Anglorium, "King of the English"—

oot of "England"—while no reference at all

made of Normandy or Aquitame. The box

h about a foot long, eight inches wide and

tive deep.—Philadelphia Ledger.

The Carcless Bagyage Smasher,

The Careless Baggage Smasher.

(Smart Set.)

"Here!" shouted the depot official, "what to you mean by throwing those trunks arcend like that?"

The baggageman gasped in astonishment and several travelers pinched themselves to make sure that it was real. Then the official speke again to the baggageman.
"Don't you see that you are making big tents in this concrete platform?"

## For 33 Years

Shiloh's Consumption Cure, the Lung Tonic, has been before the public, and this, together with the fact that its sales have steadily increased year by year, is the best proof of the merit of

## Shiloh

as a cure for Coughs, Colds, and all diseases of the lungs and air passages. Those who have used Shiloh would not be without it. Those who have never used it should know that every bottle is sold with a positive guarantee that, if it doesn't cure you, the dealer will refund what you paid for it. Shiloh

## Has Cured

thousands of the most obstinate cases of Couglis, Colds and Lung troubles. Let it

"Last winter I coughed for three months and hought I was going into Consumption. It look all serts of medicines, but nothing did me any good again! I used Shish's Consumption Cure. Four foodles cured me. This winter I had a very bed cold, was not able to speak, my lungs were sore on the side and bock. Six bottles of Shish made me well again. I have given it to several possels and every one of them have been cured.—D. Joseph, St. Hyacinhe, Que."

Question for College to Decide.

The is undoubtedly true that the public wants to see what it calls 'good football',' but it does not follow that the bear of this lost of the colleges and the seed that the public wants to see what it calls 'good football',' but it does not follow that the bear of the bear of the seed that the public wants to see what it calls 'good football',' but it does not follow that the bear of the football colleges,' The public wants the excellent and is willing to pay for a peak that the was cured of a existing the purchaser of this lot at once presented the wassess to a German salounkeeper, who had the been is the bear of the football colleges,' The public wants the excellent and is willing to pay for a year or more I had Kidney Pils, every way.

Lottery of a Big Auction Sale.

An auction sale of the unclaimed freight of a big railroad is an interesting sight, with the present improved methods of tracing both articles and the splendid machinery 'adopted by the up-to-date transportation companies in shipping freight, one might at first blush wonder how so many articles so castray. But when one takes into consideration the sreating of a trunk-line railway, the millions of pieces carried by it, of every conceivable variety and value, and the rush and bustle of the American people, it is rather astonishing that such a small percentage fails to reach its destination. The motley crowd that atthes at these sales is by no means the least interesting feature. The ubiquitous barrain-least interesting feature in the unclaimed of the packages, boxes, etc. On the whole, it is a good-natured lot, often vying with each other in the bidding, and in this way many things bring several times their real value.

Recently the Baltimore & Onlo Railroad, one of the largest carriers of freight in the United States, sold the unclaimed articles in its custody at its most spacious warehouse, at Locuts Point, Baltimore & Onlo Railroad, one of the things on sale had been refused to the packet of the space of that time they ware shipped to whom they were consigned, because they were either broken in transportation or did not suit the buyer. In the latter case the sender is notified, and in many interesting the packet of the space of the time br

Gray's Syrup or Red Spruce Gum

# STABLING THE IRON HORSE.

Anyone at all familiar with railroads has seen the engineer dismount from the cab, oil can in hand, as soon as the train has come to a stop at some way station; seen him walk slowly about the ponder-lous machine, feeling of each bearing with his free hand as he filled the cups with oil; seen him, perhaps, tap a valve gently with a wrench or examine critically some ill-working air pump.

To any man all this is interesting, but how many are there in all the vast crowd that enter the city daily at the great terminals who can tell offhand what becomes of the train when once the cars are emptied of the passengers? To be sure they have seen the cars on a siding out in the yard. They know, perhaps, that a roundhouse is a place where engines are kept when not in natural use. But beyond this the ideas of the ordinary man are a bit hazy.

As soon as the passengers have left a train that has just come in from a long dusty run it is backed off on a side track and men go upon them at once and begin to put them in readiness for the

and men go upon them at once and be-gin to put them in readiness for the next trip. The windows are washed, cars freed from filth and dirt, seats are cleaned, water tanks cared for and the

cars freed from filth and dirt, seats are cleaned, water tanks cared for and the lighting apparatus put in order.

The locomotive, after leaving the cars, proceeds at once to the roundhouse, where the ponderous machines also receives a proper overhauling. First of all the tanks are filled with water and the fuel supply is replemished. Then a few puffs bring the fire-box above the ushpit, where the fires are cleaned and dumped all together. The next thing is to stable the great iron horse.

The roundhouse itself is a most uninviting place, with its soot-begrimed walls and smoky interior. These buildings are all constructed on the same general lines, low, one-storey structures, generally are built of brick and semicircle in shape. The centre of the circle is the centre of the turntable. Arranged along the inner side of the building is a line of doors, each exactly like its neighbor. Under each runs a track of standard gauge, giving the whole an appearance not unlike a spider's web, the centre of which is the turntable.

The turntable itself consists of a pit walled with stone, across which is a bridge free at the ends but balanced at the centre on a spindle. Rails are laid across this, as if it were part of the roadbed.

When the fires of the locomotive mave been cared for the engineer runs his ma-

respected man in Welland Chan Born and brought up in the engine at process man or welland.

The standard over the fire of the locomotive nave been cared for the engineer runs his machine upon the table. With deft hand at the throttle he brings it to a stop at the precise point where the hundred tons of steel balarge of the spinlle that supports the bridge. Then the ponderous mass is slowly revolved until the required track is reached and the engine is backed into the roundhouse.

Once within the house the engineer's duty is done. He has but to go to the office and report in a book prepared for the purpose any repairs that are needed, and he can go home assured that his machine will be ready for him when he goes on the next run.

There is no better known or more highly respected man in Welland than Mr. J.

J. Yokom. Born and brought up in the neighboring township of Crowland, preserved on arrival at the round-house is about the same as one would expect to see bestewed upon a race

well again, when by good luck I changed to try Bodd's Kidney Pilks and from the first they seemed to suit my case. Five boxes cared me completely."

Recipes for Coeking Seaweed.

The Japanese have many curious recipes for coeking seaweed, which, with fern, is almost a staple article of diet in Okina, Japan and the Asiatic archipelago. A number of species of seaweed are eaten. Some are seaked. Others are dried. Many of the Japanese and Chinese sauces are made from seaweed. Under the name of Asakusa-nori, one variety is put up in neat the boxes and largely sold in the Tokio markets.

THOSE WORRYING PILES!— One application of Dr. Agnew's Ontment will give you comfort. Applied every night for three to eix nights, and a cure is effected in the most stubborn cases of Blind, Bleeding or Itehing Piles. Dr. Agnew's Ontment will give you comfort. Applied every night for three to eix nights, and a cure is effected in the most stubborn cases of Blind, Bleeding or Itehing Piles. Dr. Agnew's Ontment will ment cures eczema and all itehing and burning skin diseases. It acts like magic. The delicate mechanism is constantly becoming broken, and unceasing attention coming broken, and unceasing attention. One of the most interesting of all the requires that are made in the round-house is the tightening of the tires on the big drive wheels. Each wheel is surrounded with a heavy steel tire. These constantly work loose, and it becomes inceresing of the tires on the big drive wheels. Each wheel is surrounded with a heavy steel tire. These constantly work loose, and it becomes frequired without sending the target wheels. Each wheel is surrounded with a heavy steel tire. These constantly work loose, and it becomes inceresing of the tires on the big drive wheels. Each wheel is surrounded with a heavy steel tire. These constantly work loose, and it becomes necessary that they be tightened without sending the heavy steel tire. These constantly work loose, and it becomes in cecessary that they be tightened without end it the post in the pos

lathes, cranes and forges are to be had.
But all the minor troubles are remedied
at the "stables," and the foremen of the
round-house is responsible for the condition of the engines. He is the man to
whom all look in an emergency and it
is he who must look forward and plan
for the repairs in such a way as not to
interefere with the regular operation of
the trains. the trains.

NERVOUSNESS, DYSPEPSIA, INDI-GESTION, and kindred ailments, take wings before the qualities of South American Nervine. Thomas Hoskins, of Durham, Ont., took preacher's advice, followed directions, and was cured permanently of the worst form of Nervous Prostration and Dyspepsia. He has recommended it to others with grafifying results. It's a great nerve builder.—12

# Was in the Navy.

Was in the Navy.

Governor Herrick, of Ohio, is responsible for this story of a negro campmeeting in Southern Tennessee:

"A negro exhorter had just made a great speech," he said, "and when he got through he went down among the congregation and asked each one to come and 'jine de army of the Lord.'

"One of the congregation, when this question was put to him, replied:

"Tse done jined.'

"Whar'd you jine?' asked the exhorter.

LEVER BROTHERS LIMITED, TORONTO

Newspaper Cessor on the Bench.

(New York World.) (New York World.)

The trial of the persons charged with having committed the "suit case" merder in Boston will begin Monday, and Judge Stevens has directed that the newspapers shall not "publish any news or make any comment upon this case," The object of this judicial censorship is to make sure that the case "be tried by an honestly impartial and usprejudiced jury." It is an ancient but by no means venerable power under which Judge Stevens acts when he forbids the newspapers to print anything more about the case until the trial begins. It is a companion anachronism to the theory that the best qualifications for an impartial juror was hopeless ignorance combined with only a rudinentary intelligence.

JOHN AN UNLUCKY ROYAL NAME Many Monarch Bearing It Met With

Misfortune.

Many Monarch Bearing It Met With Misfortune.

It is strange how good or bad fortune seems to attend certain names; and this is the more marked in the persons of royalty, on aecount of their conspicuous position, than in the case of the ordinary individual. Among sovereigns it is doubtful which must be considered the most valucky name, but it is probable that John is the name of ill omen. For instance, John of England has always been branded as an infamous monarch, a character which he hardly deserved; still, it was his luck. John of Franca was captured by the Black Prince, who, by the way, was not the hero we have been taught to consider him, but a very unscrupulous ruffin, John Baliol of Scottland has been despised by his fellow countrymen because he pandered to much to the English.

Robert III. of Scotland changed himame from John, but the ill luck of the same name clung to him. During his lifetime he was worried to the verge of despair by his brother, the Duke of Albany He was himself a cripple, his eldest son was starved to death in prison, and his youngest, when on a voyage to Franceaptured by the English. Robert III. dig of a broken heart.

John I of Bohemia, was blind; John I, Pope, was imprisoned by Alaric, King of the Goths, and Pope John X. was driven from Rome by Guy, Duke of Tuscany, John XI, Pope, was supposed to have been poisoned by his brother, Alberic, who kept him a prisoner in the Lateran. John XIV. also died in prison from poison or starvation. John XV. alseenedd the papal throne after the mucder of Boniface, and was forced to flet to Tuscany, where he died of fever. Nowas John XVI. more fortunate, for he was John XVI. more fortunate, for he was John II. was killed while boar hunting; and John III. was dethrened, his eyes were put out and he was cast into prison, where he died. John I. of Castil, was killed by a fall from his horse. This is only a portion of the hong list of unincky Johns, but it will serve to show that there is good reason for claiming that monarchs should avoid the name, i

An Old Farmer's Philosophy. At the end of one of the meetings of the International Sanitary Congress in

the International Sanitary Congress in Washington a young layman asked Surgeon General Wyman a question about the construction of the throat.

"If the throat was constructed like that," said General Wyman, smiling, "there would be more truth in the flipperty-flap story than there really is."

"The (lipperty-flap story?" murmured the young man, dazed.

"Yes. Did you never hear it? Listen, then.

then.
"A quack medicine vendor stood in a carriage selling a cough cure. To explain the construction of the throat he

pian the construction of the throat he said:

"'Ladies and gents, in your throat is two little flaps, one closing when swallowing food and opening to receive drink, and the other closing when swallowing liquids and opening to receive food only. Now, if—"

"Eut here a hamorous old farmer interrupted, blurting out:
"'Gosh, mister, what a flipperty-flapperty there must be when yer eatin' bread and milk'"

Even Bears Have to Rest.

"Why do bears sleep through the winter?" sked the boy who is studying natural his-

asked the boy who is studying natural his-tory.
"Because," answered the father, "the pre-sident does not go hunting then. They've got to sleep sometime."

Orange Blossoms That precious remedy, is a positive cure for all female circular and free sample. R. S. McGILL, Simcoe, Out.
