William McDonald referred to all Christian Scientists as infidels, and said that "persons who went to them for treatment were fools—yes, worse than fools." He referred to the alleged readiness of newspapers to publish columns regarding trouble in any church, and declared that the very same papers begrudged a report of a few inches for a sermon.

—On Saturday evening a young lady, Miss Margaret Lowry, was knocked down by a buggy on the corner of King and Wellington streets. Joe Ross.
The Hamilton correspondent of the Globe says: "Joe Ross, the temperance reformer, broke good-bye to his Hamilton friends Friday at a meeting in the Palace Rink. He had received a message from Buffalo stating that his mother was alarmingly ill. He has addressed very large meetings during his short stay here and made himself a favorite with his hearers. Six hundred pledges were signed during the week's meetings, and the ladies of the W. C. T. U.

believe that much good was accomplished by the cheery, good-natured evangelist."

Services of Thanksgiving.

The annual thanksgiving service was held on Sunday at the Church of the Hosanna, Hyde Park, Rev. Canon Richardson, of the Memorial Church, this city, officiating, assisted by the pastor, Rev. Mr. Diehl. The church was beautifully decorated with fruit, flowers, grain and the various products of the land, the contrasting colors forming a beautiful picture and demonstration for the taste of the congregations. The sermon was taken from Genesis viii, 22: "While the earth remaineth seed time and harvest and cold and heat and summer and winter and day and night shall not cease." The congregation taxed the capacity of the church to the utmost. After an eloquent sermon a liberal offering was taken, amounting to \$46, which will be applied to the building fund.

WHAT A FAMILY COSTS.

Extract From the Diary of a Practical Statesman.

What does it cost to bring up a family? A gentleman, whose experience will be recognized as having points in common with other householders, has preserved an account of the expense to which he has been in rearing a family of four children. To-day he has entered the following statement in his diary. It might be a valuable fact for the census takers:

"To-day I close my diary. Twenty-six years ago to-day I undertook to keep an accurate statement of all my earnings and expenses, so that I might know actually how much it costs to live in a married household. I have now reached the end of my young life counted our resources and our expectations. I received \$15 a week, with the promise of more. I owned a house comfortable enough for frugal young people to begin life in. We were spared house rent, therefore, and our expenses have never included this item. Retrospectively, I see that we have brought to our wealth except in an increased amount of furniture. I have little more money than I had when first married. Perhaps, all told, I have \$3,500 now of assets, then I had perhaps \$2,500. We have never wanted for bread. Sometimes we have felt in need of more money. Three of the children are now making their own way. Next week the fourth graduates at the high school, having received the same schooling that the others have had, and will begin to look out for himself.

"I shall not necessarily be at any more expense on account of my children, and the diary properly ends now. World I be able to go through the same experience again of raising a family? I asked my companion, who had borne the greater part, this question, and I know that she spoke with a heart full of love, but was compelled to say: 'Not for all that money could buy would I go through again what has been necessary to rear a family.'

"Expressed in dollars the totals are these: In 26 years we have received from my wages and incidental moneys that came through my wife and children, \$40,900—or, say \$40,000—besides the rapid increase in the permanent assets. Given a plant of about \$3,000 and two employees, a man and wife, it has taken, therefore, about \$10,000 to each man produced. This, of course, included all employer's expenses. The plant is slightly enhanced in value, but the employees have seen their best days. The quality of the goods is yet to be demonstrated. Prospects are bright to continuation of labor and an increase of receipts, but there is no certainty about this. The employees are proud of their work, but don't want another job.

"Some of the items of expense have been these: Doctor's bills (27 years), \$2,100 (and all paid, probably the only instance on record); groceries, average per week first five years, \$7; next three, \$7; remainder of the 26 years, \$43 a week. For ten years it has taken on an average one pair of shoes per week for the family, including myself and wife. The most annoying thing I have ever known is the rapidity with which children wear out shoes. Only one thing approaches it—the high price of children's shoes. I never could understand how, with all the titillation of the age and the demand for cheaper results, children's shoes have not been reduced in price. The human shoe is a failure. No man not rich can afford to buy shoes for a family, and if I had it to do I would go to Timbuctoo, where neither horses, mules, camels nor men are shod."

Not Loaded, by Any Means.
Miss Terriut—When mother and I were in Yurup, oh, the awful thing happened! There was a prince—and a count—and they fought a duel—about poor me—with pistols.

Katie—Ah! were they loaded?

Miss Terriut—No, they weren't! They were just as sober as could be.
