MESSAGES OF HEALTH

FROM SOME WHO HAVE BEEN CURED BY THE USE OF

Dr. Williams' Pink Pills

BUILDER AND RESTORER IN EXISTENCE. GREATEST BLOOD

Dr. Williams' Pink Pills Make the Weak Strong.

EXCRUCIATING PAINS.

From the Patriot, Charlottetown, P. E. I. Mr. and Mrs. Thomas Blackmore are well-known resi-

dents of Hamilton, P. E. I., and both are very warm in their praise of Dr. Williams' Pink Pills, as they believe this mediine saved the life of their daughter after other means had failed. Mr. Blackmore gave the facts as follows: "Early in the summer of 1896 my daughter Rachael began to complain of severe pains in her head and down her spine, these would last for several

days, causing great agony, and would then relax for a week or so. They were often accompanied by fits of vomiting and dizziness. These symptoms were no sooner oticed than I procured medical aid, but the case was so peculiar as to baffle doctors' skill. The pains which at first were severe had become

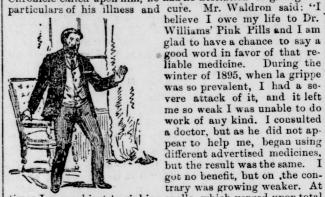

almost unbearable, and the dizziness was so constant that if she attempted to cross the room unaided she would fall pros-trate on the floor. Her appetite had forsaken her entirely. The only nourishment she took for two months was a little beef tea and a small quantity of lactated food. I had heard of the cures effected by the use of Dr. Williams' Pink Pills, and I sent for a few boxes. After pink Pills, and resolved as a last resource to give them a trial, and was very grateful to find that almost from the outset they helped her. She kept on using Dr. Williams' Pink Pills for three months, will as any man, and can do as good a day's work as ever I did. I know that my cure is due to the use of Dr. Williams' Pink Pills and I am always glad to recommend will as a proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommend the proposed to the use of Dr. Williams' Pink Pills and I am always glad to recommen The only nourishment she took for two months was a little and her recovery was very rapid, so rapid indeed that at the end of that period she was able to engage in light housework and to walk a mile or two at a time. Never in her life did she enjoy better health than at present, and I am ever thankful to the discoverer of this most effective medicine, Dr. Wi'liams' Pink Pills."

Dr. Williams' Pink Pills CURE when other medicines

THE RESULT OF LA GRIPFE.

From the Cookshire, Que., Chronicle.

Mr. Newel Waldron, is a well-known farmer living near East Clifton, Que. As his friends and neighbors know, he passed through a very trying illness as the result of a severe attack of la grippe, and when a correspondnt of the Chronicle called upon him, he had no hesitation in giving the particulars of his illness and cure. Mr. Waldron said: "I believe I owe my life to Dr. Williams' Pink Pills and I am

winter of 1895, when la grippe was so prevalent, I had a se-vere attack of it, and it left me so weak I was unable to do work of any kind. I consulted a doctor, but as he did not appear to help me, began using different advertised medicines, but the result was the same. got no benefit, but on .the contrary was growing weaker. At times I was subject to sinking spells, which verged upon total unconsciousness. I was failing day by day and was becoming hopeless. A neighbor who called to see me urged me to try after the first symptoms of relief, I began to gain steadily. I am now as well as any man, and can do as good a day's work as ever I did. I know that my cure is due to the use of Dr.

Conference of Lay Workers and Sunday School Teachers.

Provost Watkins on "Motives and Methods of Lay Work."

Interesting Discussions by the Delegates-Powerful Sermon by the Bishop of Huron-The Mission of the Laity.

Bishop Cronyn Hall was well filled yesterday afternoon, when the opening ence of the Huron Anglican lay workers and Sunday school teachers was the diocese and promises to be of more for lay workers. Many would respond, than ordinary interest and importance. he said. The Bishop of Huron presided, and after the opening hymn, prayer was

offered by the Dean of Huron. Messrs. Dr. Harrison and C. H. Ar-

DELEGATES WELCOMED. The Bishop of Huron cordially welits organization seven years ago, had presented in the public schools. met with rich experiences. They were the work. Speaking of the origin from which the church sprang, the reverend gentleman gave a description of the Jewish synagogue, and showed the similarity with the church government of today. In the primitive church it was the object of every man and woman to do all in his or her power to advance Christ's cause. Sacerdotalism was foreign to the principles of the Christian Church and the New Testament. There was a need, he said, of lay men and lay women for both for-

PROVOST WATKINS' PAPER. "Motives and Methods of Lay Work" was the subject of a paper read by Provost Watkins, of Western Univer-city. One of the first principles of the Society of lay workers, he said, was to bring the clergy and laity more inti-mately together, and thus lay a foundation for a richer and more exten-sive work. Their motives were the same. The first was to serve God. The second to co-operate, and supplement the work of the ordained minister of the parish. The speaker briefly refer-red to the several methods of the ordinary work of the laity, but dwelt at length upon the duty of the laity to study the Scriptures, and set right mistakes in the interpretation of them. He would discourage the indiscrimin-te dipping into books. Devotional nost a snare, because of the number be them. As a means of checking the growth of materialism and indifference to religious things, he advocated the holding of public meetings regularly, at which Christian scientists would lefter addresses upon scientific subjects. In conclusion, he said the lay work should be within the Trinity, Other creatures he saw man—man broken by the fall, seared by vice and with all his failures resulted in the destruction of that town, has been committed for trial in the supreme court.

A Chicago man has married his place up so as to stenographer. Now watch who does credit to the city.

THE PAPER DISCUSSED.

mitage were appointed secretaries of should be presented by the church

IN THE EVENING.

Judge McDonald, of Brockville, op-ened the discussion on the paper. The As the far-off planet derives its glory ened the discussion on the paper. The clergymen, he said, were perhaps to from an unseen sun, the glory of man blame for the leity being inactive becomes from the unseen God by whose cause they did not seem to welcome lay power he was created. It was asked blame for the laity being inactive, before scholars in the public schools as it a teacher who told his class the origin of the church was in the reign of Henry VIII. Care should be taken to properly instruct the Sunday school scholars on these matters. In con-clusion, he said the principal method fore men, and it was only as they had

Mr. James Woods, of Galt, spoke particularly of the Sunday school work, Admitting the value of teaching church istory, he urged that they teach Christ first and the history afterwards.
Principal Dymond held that truth workers along strictly prayer-book lines. He deprecated irregularity in

Rev. W. J. Taylor, of St. Marys, tomed the delegates to the conven-tion. The association, he said, since light in which the church history is The bishop said they wanted people to come forward and volunteer for the ests of the diocese, and especially the work. A great many depreciated them-

part the laity would take in extending selves, and consequently held back, but Divine service was held in St. Paul's Cathedral last evening, when a large congregation assembled in the magnificent edifice. The Right Rev. Bishop dral, Toronto, who was announced to o the serious illness of his son at Rat Portage. His coming was considered certain until a short time before the service, when word to the contrary was did not treat of slavery, the price of received. In this absence the pulpit was occupied by the Bishop of Huron, bread, nor the thousand and one probwho delivered a sermon of great ear-nestness and power. The Dean of Huron assisted in the service. Princi-pal A. H. Dymond, of Brantford, read the Psalms, and Judge McDonald, of Brockville, the lessons. The music was led by the church choir.
The text chosen by the bishop was: "O, Lord, what is man, that thou art mindful of him, or the son of man, that thou visitest him?" (Psalms viii., 4.) He referred to Bishop Butler's wellknown analogy: "If a man while walk-ing through a field were to came upon a watch and had never seen one before, his inference would be that there had been a design. He would have proof of three facts: proof that there had been a designer; that the designer had possessed great intellectual ability, and books and literature were becoming al- wise, if a visitor from another planet them. As a means of checking the he saw man-man broken by the fall.

created in an infinite variety of forms, man in his own image. The lower creation was made to serve-man was made to command. fit of Greengrocers. why was not man the imperial mon-

why was not man the imperial mon-help. The laity, he believed, would up-hold the arms of the clergy if per-mitted to do so. One method of ser-vice, he said, was to pray with and for others, and another was to showld be whiter than snow? Because man, created originally by the wisdom tical way by giving help when neces-sary. He said the history of the church in the awful crash of sin. The bishop pictured some ruined abbeys he had seen in England this summer. He was mpressed with their exquisite beauty and wished to see them restored to of their right to sell space on the martheir original form, but this, he learned, would be impossible. But such, he said, was not the case with any individual man on earth. There was By beautifully drawn pic tures the speaker impressed several truths along this line. As mountain life of Switzerland, so the disciples labored to reach the shore secret of success today, in the church or in private life, was having Christ ship. Having gold in the coffers or power in their arms would not make church successful. Different definitions were given of power. The united nation. The soldier would say

t was the army; the financier, money; the scientist, knowledge. The true definition is that it is that which will contain the three infinities—omnipo-tence, universal and eternal. Why does night follow day? Because it is ause it is his will. To know this and to apply it to all the walks of life is like the unshorn locks of Samson t is the secret of immense power. The orging propulsion power by which the come from old saws, maxims and tenets of human philosophy, but from a living vital union with the Saviour.

The relationship of the individual to the masses was then spoken of by the bishop. The world was very corrupt when the apostles started out to spread Christianity, but they attempted no great organized reform. Society had to be regenerated through the individal and not the individual through the reaction of society. The apostles

> the day, but taught Christ and made It a personal matter.
>
> The bishop warned his hearers against the many forms of evil which assail the church today. One was the increasing respect paid, particularly by the young men, to the dogmatic ut-terances of those who attack the Bible. They should hold tenaciously to the Bible, and under no amount of pressure compromise with the haughty demands of imperious criticism and tiating influences, he said, of a great deal of the literature of the day, and make the Bible the mighty counseld

EDISON'S LATEST.

New York, Oct. 28 .- The Electric Engineer publishes the first authoritative account of Thomas A. Edison's success in recovering by electrical means the iron contained in low grade ore. The inventor's experiments have been carried on during the past six years at Large Increase in Canadian Railway from Dover, N. J., where he has built up a plant covering several acres of ground, and which, after many experiments, is now capable of producing daily from 1,000 to 1,500 tons of almost chemically pure iron. The ore worked contains on the average about 25 per ance a very poor quality of gray rock. The railway companies are rigidly of blasting the ore from the mountain of intoxicating liquors by employes on shovels and miniature cars, conveying broken up and passed on to other mills then allowed to fall in close proximity gine, and orders have been given by to electric magnets, which deflect the both companies to enforce the rules iron to one side, and the non-metallic matter falls to the other side by gravity. The process is entirely automatic.
