LABOR TROUBLES BULLISH ON CORN

Highest Prices Since Last July Reached — Record Price for Spot Oats.

Chicago, April 3.—Corn kited today to the topmost prices since last July. The switchmen's strike here made shorts increasingly anxious, and final quotations were buoyant at 2⅝c to 4⅝c net higher, with May $1.63⅞ to $1.64, and July $1.57⅞ to $1.58½. Oats gained ⅝c to 1⅝c, and provisions 15c to 65c.

Possibilities that the railroad labor troubles in Chicago might assume much larger proportions were chiefly responsible for the growing strain today in the corn market. It was admitted on all sides that with transportation further handicapped, the accumulation of any adequate stock of corn here to fill current contracts would be virtually impossible. Lifting of war-time restrictions on flour business counted also as a bullish factor. Besides, offerings were scarcer even than has been the rule of late, and they quickly found their way into strong hands. Predictions were also current that spring wheat acreage this year would be reduced instead of augmented. Under such circumstances, it was no surprise to witness prices at the last jump with something of a flurry.

Oats ascended with corn and brought the highest prices on record for immediate delivery, $1.01½ a bushel for No. 1 white.

Provisions were lifted by the strength of grain and hogs, despite the big stocks on hand.

TREND SLIGHTLY HIGHER IN COMMODITY PRICES

New York, April 3.—Altho not very strongly defined, the upward tendency of commodity prices continues, there being 58 advances this week in the list of quotations received by Dun's Review, as against 34 recessions. There has been no perceptible lessening of the strong position of iron and steel, and no material changes have occurred in the miscellaneous metals. Lead seems to be easier, but tin and copper show some recovery. Raw cotton remains at an abnormally high point, and prices of all kinds of manufactured goods are very strongly held. Hides are fairly steady.

MONTREAL PRODUCE MARKET.

Montreal, April 4.—The tone of Saturday's market for cash oats was strong, and prices were marked up. Business in flour in all grades is very quiet. Owing to the scarcity of milfeed, a much stronger feeling prevails in the market, and wholesale jobbing prices have scored a further advance, altho millers' prices are still unchanged.

The rolled oats market is firm, with a fair business passing.

Despite the fact that supplies of eggs have been plentiful all last week, a fairly steady feeling prevails, owing to the heavy consumptive demand. A weaker feeling prevails in the butter market, and prices are down.

The cheese market is quiet.

Oats—Canadian western, No. 2, $1.17; do., No. 3, $1.12½.

Flour—New standard grade, $11.35 to $11.50.

Rolled oats—Bag, 90 lbs., $5.50 to $5.60.

Bran—$45.25.

Shorts—$42.25.

Cheese—Finest easterns, 26c to 26½c.

Butter—Choicest creamery, 62c to 63c.

Eggs—Fresh, 52c to 53c.

Lard—Pure, wood pails, 20 lbs. net, 30c to 30½c.

WINNIPEG GRAIN MARKET.

Winnipeg, April 3.—Oats closed 1⅜c higher for May and 1½c up for July.

Barley 4c higher for May and 3½c higher for July. Flax 7c up for May and July.

Rye 8⅜c higher for May. Quotations:

Oats: May—Open, 99⅛c; close, $1.00⅝. July—Open, 94½c; close, 95⅞c bid.

Barley: May—Open, $1.64½; close, $1.67½. July—Close, $1.52⅝ bid.

Flax: May—Open, $5.17; close, $5.22½ bid. July—Open, $6.03; close, $5 bid.

Rye: May—Open, $1.94¼; close, $1.47¼.

Cash Prices.

Oats: No. 2 C.W., $1.01⅝; No. 3 C.W., 97⅝c; extra No. 1 feed, 97⅝; No. 1 feed, 96⅝c; No. 2 feed, 95⅝c; track, $1.00⅝.

Barley: No. 3 C.W., $1.71½; No. 4 C.W., $1.51; feed, $1.39½; track, $1.57½; malt, No. 1 N.W.C., $5.19½; No. 2 C.W., $5.12½; No. 3 C.W., $4.52½; track, $5.19½; rye, No. 2 C.W., $1.97¾.

WINNIPEG CATTLE MARKET.

Winnipeg, April 3.—(Dominion Live Stock Branch.)—Receipts this morning amounted to only 30 head of cattle and 105 hogs.

There was only a handful of stock in the yards this morning, and not sufficient to constitute a market.

Quotations on the few head weighed up were generally steady with Thursday's close, bulk being purchased by local butchers.

The hog market was weak, buyers bidding $20 for selects fed and watered, this being a decline of 50 cents from the previous close, and prospects are lower prices during the coming week.

LONDON RELEASES VOLUME OF GOLD

The British pound is showing remarkable resiliency, and those who quaked for the solvency of the old country are beginning to reverse their predictions. Some $22,000,000 in gold was delivered in New York within two weeks from London, and exchange has gone up from $3.18 to $3.95.

The London banker has never had much use for gold except as a balance. Gold in itself is only an encumbrance, whereas interest-bearing documents are producers. The American has a very high appreciation of gold, but the United States treasury may become so congested with the yellow metal as to make it an annoyance and a burden, and London may be expected to continue to ship the gold it receives as fast as necessity and prudence warrants.

LOOK FOR BIG YEAR IN NORTHERN CAMPS

Howard Graham & Co. in their weekly market letter say:

Operating at less than half the total milling capacity of the various mines of the Kirkland Lake and Porcupine camps during 1919, the total gold production amounted to $10,408,712.58. All that is required to double this capacity is sufficient men to operate the mines at capacity. This is promised during the next few months, due to the increases in wages in the various camps, and the promise of great immigration from Europe, which is sure to find its way to the gold camps, where work is steady and the rate of pay is good, as compared with the same class of labor in other parts of the Dominion.

The year 1920 promises to be one of the best, if not the best, in the whole history of the Cobalt camp. Production for the first three months of the current year has greatly exceeded that of 1919.

MINES OF ONTARIO IMPRESS VISITORS

English Capitalists, Accompanied by Hugh Sutherland, Returning to London.

Hugh Sutherland, of the firm of F. C. Sutherland and Company, and party of English capitalists, who recently spent a week in Porcupine, Kirkland Lake and Cobalt, returned to the city last week, and expressed themselves as being greatly impressed with the mineral possibilities of Northern Ontario.

They were particularly struck with the magnitude of operations at Porcupine. The party included two well-known engineers. As a result of their visit it would not be surprising to learn of a considerable volume of new capital coming into the camp in the immediate future.

The party, accompanied by Mr. Sutherland, is returning to London via C. P. R. liner S.S. Corsican, sailing from St. John, N.B. Mr. Sutherland expects to be in England about two months.

INJUNCTION IN WAY OF BLACK LAKE DEAL

That the directors of the Black Lake Asbestos Co. cannot legally make an agreement to do what they could legally do without any agreement is the effect of a decision by Justice Kelly. He grants an injunction restraining them from carrying out an agreement with J. A. Jacobs of Montreal whereby they were to resign one by one and to elect a new board of directors upon his purchasing a certain amount of stock in the company. The action was brought by McDougall and Cowan on behalf of themselves and all other shareholders of the Blake Lake Co.

STRIKE ON TRIANGLE

Word has just been received from the Triangle Silver Mine in regard to a very rich strike on the 182-foot level. A vein from one to two inches wide shows almost solid silver with heavy silver in the wall rock. All faces in the various drifts are looking well. The easterly drift on the 132-foot level will soon reach the big north and south vein or major fracture on the property.

Anticipations are running high as to very gratifying results when this fracture is reached.

The report adds that the snow is going fast and an early spring appears probable.

McKINLEY'S POSITION

Shareholders of the McKinley-Darragh-Savage Mines have received with their dividend cheques for the quarter a brief statement of the company's financial statement as of March 20. It compares as follows with the condition on December 15 last:

	Mar. 20	Dec. 15.
Cash in bank	$203,594	$231,409
Victory bonds	100,000	100,000

FOREIGN VS. CANADIAN BONDS

Money is a pretty elusive quantity. Embargoes and restrictions may have some effect in restricting financial transactions, domestic or international, but new developments create new situations. A short time ago Canadians were prevented from buying their own bonds at a heavy discount on the English market, and now it is proposed to sell $10,000,000 City of Paris bonds in Canada. The proposition has caused friction among Toronto bond dealers and made another spirit of unrest. But in the meantime many thousands of good Canadian dollars are going to Germany by the purchase of marks and these produce no dividends. As yet the government has taken no cognizance of this.

GREATER WINNIPEG BONDS.

The Dominion Securities Corporation which is offering six per cent. gold bonds of the greater Winnipeg water district, has issued a folder setting forth the numerous attractive features of the securities. The bonds which are offered at par have behind them the resources of the city of Winnipeg, and its more important suburbs with a total area of 91.79 square miles, and a combined population of about 221,000. The taxable land upon which the bonds are a direct charge has an assessed valuation in excess of $180,000,000.

U. S. BANK CLEARINGS.

New York, April 3.—The maintenance of record bank clearings for this period continues to be a conspicuous feature of the returns from almost all the principal centres of the United States, the aggregate this week at twenty cities, according to Dun's Review amounting to $4,067,599,910, which represents increases of 24.5 and 48.0 per cent., respectively, over the figures of the same weeks in 1919 and 1918.

NEED MORE LIGHT ON ORE DEPOSITS

Lack of Skill Costly in Ontario as Elsewhere — How Areas Compare.

In 1918 Porcupine produced 91 per cent. of the gold of Ontario, and Kirkland Lake 7 per cent., or in the ratio of one to thirteen dollars. The marked difference in results must be sought, not in relative ages of development, but in geological conditions. The Tough-Oakes produced 101 tons of ore, having average values of $4.40 per ton, but when work stopped the run of mine was about $18. The Lake Shore has handled between 30,000 and 35,000 tons of $25 ore, but there is no considerable quantity now in sight in either of these mines.

The Teck-Hughes and Kirkland Lake gold have not as yet been very successful. In fact, in a survey of the field, doubts arise as to whether there is payable ore in quantity. Apparently, the younger porphyries and diabases are absent, and the conditions are somewhat analagous to those in the older sections of Ontario.

In the Lake of the Woods district, there has never been any trouble in finding high-grade ore. It has not, however, gone to depth or occurred in quantity.

The younger igneous rocks occur in the township of Skead, and there we find a number of properties of considerable promise. The Manley-Reilly Skead gold, Crawford Skead and others are showing up very well. So, in the township of McElroy, there is the Mondeau and Hughes-McElroy. The Mondeau has high values in gold, also 19 per cent. of bismuth, and about 75 ounces in silver. It may be that the best portions of the district have not yet been fully explored.

At Boston Creek.

There are altogether about nine townships in the whole district. In considerable portions of the area, however, the rocks look "dry." They are very hard and tough. This, of course, adds to the costs of mining, but a more important consideration is that the ore is likely to be "patchy." Some of the richest ore ever seen outside of the Croesus has come from the Boston Creek portion of the camp. Telluides also occur thruout the Kirkland Lake district, but the limited results so far call for very careful scrutiny.

At the Miller-Independence, the rocks are unusually hard, and some exceedingly high-grade ore has been found, but very little headway has been made as yet.

In all our producing areas we have igneous intrusions of recent geological times—norite at Sudbury and diabase at Cobalt, both of the Keweenawan epoch. The Algoman or that of gold deposition is older than the Keweenawan, but younger than the Timiskaming fragmental series. The granites and porphyries of the Algoman are not sufficiently numerous in parts of the Kirkland Lake area, and the diabasic flows are not nearly as common as at Shining Tree or Matachewan.

The great want of northern Ontario is a fuller knowledge of ore deposits. This science is one of the most difficult to master, while, at the same time, it is one that every layman thinks he fully understands.

Cobalt succeeded with very few well-trained experts, but then, Cobalt is a freak. Values outcropped on the immediate surface, and the ore was so rich that a considerable amount of success was unavoidable. But gold and silver do not occur together in Ontario in paying quantities. The conditions under which the metals occur are quite different. Besides, no two mines are alike. For want of skill, much money has been wasted in Ontario, and the end is not yet.

POUND RISES AGAIN

New York, April 3.—Dealers in exchange reported an active market for London remittances today. The rate for demand bills rose to $3.97, with cables at $3.98.

These are the highest quotations in this market since last December, and show a recovery of almost 50 per cent. from the low of February, when demand fell to $3.18.

French and Italian quotations were only nominally better today and remittances to other continental European centres were light.

NEW YORK BANKS

New York, April 3.—The actual condition of clearing house banks and trust companies for the week shows that they hold $21,819,700 reserve in excess of legal requirements.

This is a decrease of $10,010,240 from last week.

The statement follows: Actual condition—Loans, discounts, etc., increase, $67,646,000; cash in own vaults—Members Federal Reserve Bank, decrease, $3,155,000; reserve in Federal Reserve Bank of member banks, increase, $4,891,000; reserve in own vaults, state banks and trust companies, decrease, $43,000; reserve in depositaries, state banks and trust companies, increase, $394,000; net demand deposits, increase, $119,144,000; time deposits, decrease, $6,995,000; circulation, increase, $405,000; U.S. deducted, $70,631,000; aggregate reserve, $584,700,000; excess reserve, $21,819,700; decrease, $10,010,240.

LOOK FOR LOWER PRICES.

New York, April 3.—R. G. Dun & Co. say in their weekly review: With the prospect that goods will later be more readily obtainable, and probably at lower prices, hesitation is now developing in some directions where demands had been conspicuously active, altho business continues large in the aggregate, and bank clearings maintain sizable increases over those of earlier years.

BUSINESS FAILURES.

New York, April 3.—Commercial failures this week in the United States, as reported by R. G. Dun & Co., are 128 against 195 last week, 124 in the preceding week, and 146 the corresponding week last year. Failures in Canada number 9 against 16 last week, 16 the preceding week, and 15 last year. Of failures this week in the United States, 39 were in the east, 37 south, 27 west, and 25 in the Pacific states and 57 reported liabilities of $5,000 or more, against 33 last week.

NEW STERLING BANK BRANCH.

The healthy condition of Canadian finances is shown by the number of branch banks being opened all over the country. The Sterling Bank of Canada has recently added to their already large number by opening a branch at Lansing, Ontario, under the temporarp management of W. A. Young.

SATURDAY MARKET HOLIDAY.

The New York stock exchange, as well as the Canadian stock markets, was closed on Saturday. The Chicago market was, however, open.

NO COBALT SHIPMENTS.

There were no ore shipments from Cobalt for the week ended April 2.

C. P. R. EARNINGS.

Montreal, April 3.—Canadian Pacific Railway earnings for week ending March 31, 1920, $5,332,000, increase $1,587,000.
