FILLING LETTER ORDERS A SPECIALTY

John Macdonald & Co.

Wellington and Front Streets E., TORONTO.

AT OSGOODE HALL.

The Q. B. Divisional Court has given judgment in Foley v. Township of Flamborough, a case of interest to all travelers upon the highway. Mr. Sullivan, having partaken of a little too much liquor, was driving his friend, the late Mr. Foley, along Centre-road, in the Township of East Flamborough. The horses were spirited and before Mr. Foley was aware of it got away from Mr. Sullivan, and, running at a mad gallop along the road, the wagon struck a stump at the side, but off the traveled road, and Mr. Foley was thrown out and killed, Mr. Sullivan being, of course, unhurt. This action is by the widow and child of Foley against the township for damages, the question on this motion by the plaintiffs against the judgment of the Chancellor dismissing the action, being whether, by reason of the stump the road was out of repair within the meaning of the Consolidated Municipal Act, 1892. Chief Justice Armour, delivering the judgment of the court, says that the term repair used in the act is relative, that is to say, if the stump was left standing on Kingstreet near Main-street, Hamilton, the street could not be said to be in "repair," but it is different when the stump is on Centre-road in the township. If such a stump is found in a township road the questions are whether the road is required to be used by many or by few, the length of time the township has been settled, the length of time the road has been opened, the number of roads the township has to keep in repair and the funds available for that purpose. All these matters must be considered, and from them it must be deduced by the court the quality of repair necessary to comply with the terms of the act; and if those requiring to use the road may by the exercise of reasonable care pass to and fro upon it, the statute is satisfied. Repair is not to be such as would be required to guard against runaway horses, and even if the driver had been sober but had lost control and found himself up against it, the stump did not constitute the road out of repair. This decision is still more important owing to the proximity of the local elections, because any traveler may at any time find himself on the stump in a city, town, village or township. The motion was dismissed, the stump remains and the township goes free.

Total clearances of wheat and flour today were 510,000 bushels and of corn 546,000 bushels.

The wheat market is inherently strong, without any strikingly new feature. It has been growing strong steadily for two weeks, and the incidents that develop from day to day have gradually forced the traders to realize it. The bulls are in control. The bears have not had a successful inning in over a month. They sell prices off a little, but fail to dislodge any large lines of long wheat, and when they have to cover they invariably pay higher prices. There is no leader to the bear element, and they are offering a feeble resistance to the upward movement. The majority of the best traders are bullish and long, and it is gradually becoming apparent that Leiter practically controls the trade in Chicago and at other points.

Chicago Gossip.

Henry A. King & Co., 12 King-street east, received the following despatch to-day from Chicago:

We have had another crazy market today. Cables rather disappointing this morning. They did not reflect our advance quite as much as the crowd expected and in consequence wheat opened off about 1 cent from last night's close. As soon as the local crowd got out a line of shorts the clique gave them another illustration of the danger in shorting this market, for they walked prices right up with little reaction to 98½c for May, causing them all to cover. After this was accomplished the market sold off to 96⅝c, closing at 97⅛c, a trifle under last night's figure.

January started at $1.05 and jumped to $1.10, closing at $1.08 bid. July closed ⅝c to ¾c under last night. We have had any amount of bull news to-day; big clearances, 790,000 bushels including wheat and flour. Minneapolis wires flour trade good at an advance of 25c per barrel over previous bids. Pittsburg reports sales of 30,000 and sales for the week 108,000 barrels. A Liverpool cable says: The United Kingdom will require from now to end of the season 490,000 qrs., or 5,280,000 bushels per week, of which 280,000 quarters must come from Atlantic America. The India merchants are reported to have bought back the wheat they sold recently. Primary receipts 354,000 bushels, against 204,000 last year. The Modern Miller says growing wheat is in splendid condition and the increase in acreage is very large, especially California. It is rather dry on the coast, but no damage as yet reported.

Corn closed at about last night's figures, notwithstanding the great amount of bull news. There was some selling by the country and the receiving houses had it for sale on bulges; around 30 cents for May. There will be plenty of corn for sale at about 29 cents; it will do to buy.

Provisions opened easier on large run of hogs. Receipts at the principal western points to-day were 83,000, against 55,700 same day last year. The scalpers and small holders were principal sellers. At the decline packers came in and took all offerings. They were better posted on the receipts of hogs and there was no more than expected after the snow blockade. Several big commission houses were free buyers. We are firm believers in provisions; buy them on any little reaction, especially pork and ribs.

There has been a big cash demand for oats to-day, one prominent house sold 300,000 bushels for direct export. The market closed at the opening price of last night, 24c for May, and advanced ½c. The strength in wheat had some little influence no doubt, but oats are worth almost all they are selling for and we expect to see them sell quite a little higher.

McIntyre & Wardwell (John J. Dixon) received the following despatch to-day from Chicago:

Wheat—Cable advices while firm and higher were not radical enough to suit the temper of the trading element this morning and there was considerable selling in consequence. The Argentine shipment of 848,000 bushels was another feature that had a depressing influence upon the market. There was no other selling early that we could see and when the continental cables were received, quoting additional advances (Antwerp 50 centimes higher), a rush to cover followed, which carried prices up nearly 2½c over the lowest record in the morning. The needs of the shorts being satisfied, the market appeared to be decidedly toppy and on selling by a private wire house, which was credited to an influential operator here, the market became weak and quickly declined 1½c, closing same at about the same as last night. The news was firm all around. Minneapolis continues to report a large demand for flour, one concern reporting sales of 70,000 bbls., the largest on record. Cables were firm and higher, but the export demand was practically nothing. The visible supply is expected to show about 1,250,000 bushels decrease. There was further talk of a reduction in the French import duty; later reports say there will be some discussion on Sunday over it. The syndicate houses continue to bid aggressively for January wheat and added 3c more to the price to-day. We cannot see that the situation has changed much. The shorts are timid however and will not venture with both feet into the market until it shows pronounced evidence of weakness.
