CHANCELLOR OF GERMANY MAKES PACIFIC SPEECH

Declares That Friendly Relations With Great Britain Will Not Be Disturbed.

Berlin, March 7. — Chancellor Von Bethmann-Hollweg made a strictly pacific speech on international relations, during the course of a debate on the naval estimates in the Reichstag Saturday. Replying to the arguments of Herr Sudekums, the Socialist member, that Germany's fleet was not called for by commerce or the colonies, and that Great Britain was justified in the belief that it was directed against her, the chancellor spoke shortly, but vigorously, saying:

"Our relations with Great Britain lie clear and open before everybody's eyes. It is not necessary to repeat that our fleet is not for aggressive purposes, but for the protection of our coasts and commerce. The limits of our naval programme are known to everyone, with the dates for the completion of our ships. Nothing is secret about the programme, and nothing is done in such a way as to arouse suspicion or belief that a threat is intended against anybody.

"Finally, it is our wish to cultivate unprejudiced, straightforward, and friendly relations with Great Britain. (Cries of "Hear! Hear!") I do not see why the existing friendly relations should be disturbed between Germany and Great Britain, with whom we are so closely connected, both economically and in culture. No nation on earth can divert or suppress free competition of other nations. We must all proceed on the same lines as an honest merchant, and on this foundation I am convinced that the relation of confidence existing between Germany and Great Britain will develop favorably, and that public opinion of both countries will be influenced in the same way."

KING OFF FOR BIARRITZ

Will Relieve Monotony of Long Journey by Rubbers of Bridge.

London, March 7. — The King will leave London Thursday for Biarritz. The tedium of his long journey to the south of France will be relieved by many rubbers of bridge, as he has just had a special card table installed in his private car, which is so perfectly balanced that no vibration is felt. It has been noticed lately that the King's interests in his favorite game is waning somewhat. He no longer sits at a card table for the whole evening, but during the journed to Biarritz he certainly intends to revive his interest in bridge.

Mason Had Salt Rheum

ON HANDS FOR YEARS—COMPLETELY CURED FIVE YEARS AGO BY

Dr. Chase's Ointment

There is nothing worse for eczema and salt rheum than cold water. For this reason many people are afflicted in cold weather only.

No class of men suffer more from such ailments than bricklayers and stone masons, and this fact makes the accompanying letter particularly interesting.

Mr. John W. Naas, stone mason, of Lunenburg, N. S., writes: "I was a great sufferer from eczema and salt rheum for years and could get nothing which seemed to be of any real benefit. Five years ago I got a box of Dr. Chase's Ointment and three boxes of Dr. Chase's Kidney and Liver Pills and this treatment cured me so that the old trouble never returned. My skin became as soft and smooth as a child's after using Dr. Chase's Ointment, and I shall always say a good word for it."

Very many people suffer from skin affections in the cold weather, and try one thing after another without obtaining the marked and lasting benefit which comes with the use of Dr. Chase's Ointment.

Chilblains and frost bites are quickly relieved and cured by the wonderfully soothing, healing influence of this Ointment. Chapped and irritated skin becomes soft and smooth. Each and every form of itching skin disease is thoroughly cured.

Dr. Chase's Ointment, 60 cents a box. All dealers; or Edmanson, Bates & Co., Toronto. Write for a free copy of Dr. Chase's Recipes.

TEN PERSONS PERISH IN FACTORY EXPLOSION

Overheated Starch Cause of a Holocaust at Roby, Indiana.

Chicago, Ill., March 7.—Eight or ten persons are reported killed and 17 injured, many of them probably fatally, in a terrific explosion at the works of the American Maize Products Company, at Roby, Ind. The explosion occurred in a detached building of the plant, and was preceded by a fire, which soon enveloped a large three-story frame warehouse. Starch in an overheated kiln is supposed to have been the cause.

At midnight the fire was so intense it was impossible to enter the place, and to definitely determine the number of dead. It was known that 29 workmen were in the building at the time. Seventeen of these were rescued, badly burned, and taken to the hospital. Of the 12 unaccounted for, several are believed to have escaped unhurt. The rest were burned in the ruins of the warehouse.

HOG PRICES HIGHEST SINCE CIVIL WAR

Washington, March 8. — Civil war prices for live hogs were surpassed in many cities of the Union yesterday, according to advices received by the department of agriculture this afternoon. Some of the figures were:

		Previous High Mark.
Cincinnati	$10 25	$10 20
Columbus	10 50	10 40
Pittsburg	10 55	10 40
Indianapolis	10 15	10 10
Chicago	10 20	10 15

NEW ORGANIST IN CHRIST CHURCH

Mr. Fred FitzGerald, of this city, **the Organ on Sunday.**

Mr. Fred FitzGerald, of this city, who was recently appointed organist at Christ Church, took charge of the musical service yesterday for the first time. Large congregations were in attendance both morning and evening, and thoroughly enjoyed the very excellent programme arranged and carried out by Mr. FitzGerald. His playing was most pleasing, and the manner in which he directed the choir was most satisfactory. During the services solos were rendered most acceptably by Miss Gidley and Mr. Albert Riddell, and they also sang a duet which was greatly appreciated.

ABLEBODIED MEN IN COUNTY JAIL

Might Be Induced to Work If Their Fines Were Paid.

Now is the time when labor is becoming scarce upon the farms, and it might be of interest to know that there are five able-bodied and more or less willing men at present hibernating at the jail for a vacation of four months, whose freedom could be procured at an aggregate cost of five dollars.

The gentlemen in question either could not obtain the necessary dollar to secure their liberty, or else found themselves too comfortable to desire it. In any event, they are there.

There are at present 20 prisoners in the jail, four of whom are women, thus leaving only sixteen male prisoners, about the lowest average of the year.

ROBERTSON ARRAIGNED

And Is Jailed, Being Unable to Furnish the $20,000 Bail.

Toronto, March 7.—Joseph A. Gurofsky, of Montreal, surrendered to the police today, and later pleaded not guilty to a charge laid against him in the police court on conspiracy to defraud. He was admitted to bail of $1,000, given by his brothers, resident here. Athol George Robertson, a company promoter, who was arraigned at the same time, pleaded not guilty, and was remanded to jail, not being able to furnish the $20,000 bail demanded. The charges against both men arose out of the flotation of the Canadian Eatables Company. Lehorbe, the president of the company, who was arrested on Manitoulin Island on a charge similar to that laid against the others, has not reached here yet.

DOMINION FINANCES

Total Expenditure for February Was About $7,000,000.

Ottawa, March 7.—The financial statement for the month of February, which has just been published by the finance department, shows that the total expenditures for the month were $6,928,432; on consolidated account, $4,198,112, and on capital account, $1,730,320. The revenue for the month amounted to $8,173,937. The total expenditures for the eleven months of the fiscal year ending Feb. 28 were 98,866,119, and the revenues $89,684,460. During February the net debt of Canada decreased by $1,211,090.

A BANK SUSPENDS

A St. Stephens, N. B., Institution Founded in 1836, Is in Difficulties.

St. John, N. B., March 8.—St Stephens Bank at St. Stephens, N. B., just across the border from Calais, Me., has suspended payment. The affairs are now in charge of R. B. Kerren, manager of the Bank of New Brunswick, of this city.

At the Bank of New Brunswick it was given out that Col. J. D. Chipman and J. T. Whitlock, both of St. Stephens, and vice-president and cashier respectively of the St. Stephens Bank, had gone to Montreal to report to Sir Edward Clouston, president of the Bankers' Association of Canada, that the St. Stephens Bank would have to suspend payment.

The St. Stephens Bank was founded in 1836. The president is Frank Todd. The capital stock is $200,000, with a reserve of about $50,000. The present directors are Frank Todd, president; John D. Chipman, vice-president; Julius Whitlock, secretary and cashier; Philip Breen and John G. Murchie.

The bank's correspondents are, in Canada, the Bank of Montreal and branches; in New York, the Royal Bank of Canada; in London, England, Glyn, Mills, Currie & Co.; in Boston, Shawmut Bank. James Murchie, Sons, Company, of Calais, are the largest stockholders in the bank. They hold $8,500, while other members of the Murchie family had $6,400.

Most Remarkable Cures

EVER MADE BY ANY REMEDY

Are Daily Credited to the Wonderful Powers of "Fruit-a-tives."

Bancroft Man Thinks This Fruit Medicine Will Work Miracles.

It is the old chronic case, the stubborn case, the case that will not yield to the ordinary remedies of the physician, that "Fruit-a-tives" never fails to cure. Many of the cures made by "Fruit-a-tives" are the wonder and admiration of the doctors, who cannot understand how "Fruit-a-tives" can do what they cannot.

"I have been troubled for years with Indigestion—have tried every kind of medicine, and found only temporary relief. Then I used "Fruit-a-tives," and now I am no longer troubled with Indigestion. I think it is a splendid remedy." JOHN REDMUND.

Fifty cents a box, six for $2 50, or trial size 25 cents. At dealers, or from Fruit-a-tives, Limited, Ottawa. 8 29

GREAT VICTORY FOR THE U. S. RAILWAYS

Washington, March 8.—Affirming the contentions of the railroads, the supreme court of the United States yesterday held that the Northern Pacific, Chicago and Northwestern, Union Pacific, Oregon Short Line, and other western railroads, need only obey the order of the interstate commerce commission and establish joint through passenger rates westward.

ANTI-PROFANITY CLUB FOR RAILROADMEN

G. T. R. Official Agrees That There Is Too Much Swearing.

Kingston, March 8.—R. S. Logan, assistant to the second vice-president of the Grand Trunk Railway, has written George Buskin, who had entered a complaint, that he agrees that there is entirely too much bad language used, and especially about railway premises, and that an anti-profanity organization might be of some service in limiting the habit.

"If you will undertake to organize such a society, I am sure the majority of right-thinking railwaymen, as well as other people, would be glad to support any reasonable steps taken by such a society to restrict this foolish and growing habit," wrote Mr. Logan.

CEILING COLLAPSED ON WORSHIPERS

Excitement in a Niagara Falls Church When Lightning Ran Into the Building.

Niagara Falls, Ont., March 8. — The congregation of the Drummond Hill Presbyterian Church was thrown into a panic during the anniversary services Sunday night, when the edifice was struck by a bolt of lightning. The electric flash first struck the carriage shed, and then ran into the church, along the electric light wires.

The interior of the building was plunged into darkness, and at the same moment a large section of the ceiling, loosened by the shock, fell down among the worshipers, causing great excitement.

The Rev. Professor Robertson, of Knox College, Toronto, who was conducting the services, was slightly affected by the shock, but later was able to continue the direction of the meeting. No others were injured.

SCHWAB REFUSES.

Bethlehem, Pa., March 7. — Charles M. Schwab, of the Bethlehem Steel Company, has refused all the demands of the striking steel workers. Instead of sending a reply to the executive committee of the strikers, he had his decision published in a special edition of a local paper.

DAINTY FOOD

TURNS PALE CHEEKS TO PINK.

Our best physicians of the present day seek to cure patients by the use of food, rather than heavy drugs, and this is the true method, for all physicians agree that only from food can the body be rebuilt.

Many people fail to give their physicians credit, for after living on poorly selected or badly cooked food for a long time, perhaps, and when their ailments become chronic, they expect the Doctor, with some magic potency, to instantly rebuild them.

This is not possible. The only true method is to turn as quickly as can be, from poor food to good. A young lady over in Ohio says:

"I was variously treated for my nerves, muscles, lungs, etc., but none of the treatments gave me relief.

"About a year ago my appetite failed completely and I began to have sinking spells similar to fainting, then I took all manner of tonics and stimulants, but they were of no effect. I had been brought to quit drinking coffee and taking Postum in its place, and gradually began to get a little better.

"Someone suggested that if I found Postum so beneficial I had better use Grape-Nuts food, as they were both the children of one brain. I commenced on Grape-Nuts food for breakfast, having Postum with it. I found the food so dainty, delicious, and appetizing that I always looked forward to breakfast with pleasure.

"Shortly after commencing this diet, the wretched pain in my side was greatly relieved, and now, a year later, it has gone entirely, also the sinking spells; in fact, my pale cheeks have changed to pink, I have gained back more than the twenty pounds I lost, and am thoroughly well in every way."

Read the little book, "The Road to Wellville," in packages. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

CORRESPONDENCE.

A Plea For the Dog.

To the Editor of The Advertiser:

I think it is time something was written on this dog question. It is really a disgrace to the country the way in which dogs are being treated at present by a good many people. We hear of hanging, shooting and running dogs down. There is no need for treating the poor but faithful dog in such a cruel way. If dogs have to be destroyed, why cannot this be done in a painless manner? We hear very bad tales, both in the press and out of it, about the way dogs are done to death. The other day I heard a well-known man in this city tell a friend that he had seen two or three dead dogs lying beside the G. T. R. track. He said that the dogs had been placed there, so that the first train that passed would kill them. It is a disgrace to a city like London that such inhuman conduct should be allowed. Again, the way that the dogs are treated in the pound is bad. Is it not a cruel act to put a large number of dogs of all kinds into one place, and allow them to fight and tear each other? We are told the heads of many dogs have shown signs of rabies. Well, that may be so. Is it not the case that many of the dogs whose heads have been said to show madness were run down in a cruel manner, and in such a way to cause disorder of the brain. In my opinion it is the want of proper treatment that is to blame for the trouble among dogs. This has been a long and cold winter, and dogs in many cases have been left out in the cold at night with very little to eat and no water to drink. This is enough of itself to make trouble.

When this dog question is up the Government ought to make a law in favor of better treatment of dogs as a whole. The chief of police should see that the dogs are treated right by all who keep them. If this was done there would be little fear of so many sungry, snapping dogs about.

In your issue of Thursday, March 3, you try very hard to prove a case of hydrophobia. The word hydrophobia means dread of water. Now, this Hamilton boy showed no fear of water, therefore it could not be called hydrophobia. The above-mentioned boy could not swallow anything, and any attempt to do so brought on a fit; also a change of air by opening a door or window had the same effect. You also show that the froth at the boy's mouth was, you say, viscid matter, and not peculiar to hydrophobia, and in trying to expel it and clear his throat, the boy made sounds that give rise to the report that he barked like a dog. The trouble in the throat was partly the cause and partly the effect of the inability to swallow liquids. You also say that few physicians have seen a victim of hydrophobia, and that there is little testimony in medical literature. Thus you so far have failed to prove that the Hamilton case was a real case of hydrophobia.

In your issue of March 4 you give a statement by Mr. I. Ewart Brown, M.D., 501 Markham street, Toronto, in which he tries, but fails, to prove a case of hydrophobia. This dog was not snapping at people, nor was it foaming at the mouth. In fact, the dog gave no sign of being mad. The boy struck this dog, and the dog bit him in the face. Three weeks later this dog took sick, a veterinary surgeon was called in, but couldn't detect any symptoms that might lead to a correct diagnosis. The dog was not very irritable, and allowed his master to handle him, and give him medicine. He did not froth at the mouth, but seemed to be chilled, and shook at short intervals. A couple of days later his hind legs became paralyzed, and he died the following day. There is nothing in the dog's case to prove that it was mad. The doctor goes on to describe the case of the boy. The doctor says that when he was called in, the boy, in his opinion, was suffering from the grippe. He goes on to say that he asked the boy to take a swallow of water. This is a little strange—to ask anyone with the grippe to try a swallow of water. He also tells you that he had two consultations over the above case. He has not stated what was the result of the above consultations. We are not told that the dog was unable to swallow a little water. It took the medicine its master gave it. The dog shook at short intervals. Now, we all know that when any person has the grippe he will shake at short intervals. I fear the dog had the grippe. Now, this boy had, as the doctor thought, the grippe, and when asked to drink water, the boy would shudder with aversion at the water. I fail to see proof of hydrophobia in either of the above cases.

What Next?

To the Editor of The Advertiser:

Perhaps no single event in the first decade of this twentieth century is better calculated to impress our minds with the idea of the marvellous achievements in science and invention than the recent opening of the Royal Edward Institute in Montreal for the cure of tuberculosis, by King Edward in person. In a recent issue, the Canadian Electrical News lets it readers into the secret of how this marvellous feat was accomplished. The through cable connections between Chichester, England, and Montreal, for the carrying out of this project, were arranged for by Lieut.-Col. Burland, the donor of the hospital. On the land lines in Canada automatic telegraphic repeaters were placed at St. John, N. B., and in the main offices at Montreal. When King Edward VII., at Chichester, England, pressed the button, the electrical impulse, arriving at St. John, N. B., was automatically repeated from point to point, until it reached the main offices in Montreal, where it closed a motor circuit, releasing a weighted lever, which, in turn, threw the doors of the new institute wide open, and hoisted the flag to the top of the building, and the trick was done. The return message, advising the King of the success of his initial act, was sent by another route, and was handled by operators in Canso, N. S., and Waterville, Ireland. The King kept his finger on the key until the return message was received at Chichester, the whole time being, as was afterwards learned, less than one minute! What next? Truly in this age of cablegrams, wireless, electricity, aeroplanes, high explosives and bifurcated garments, we hardly know where we are at or what to expect next. LAYMAN.

London, March 7, 1910.

OKA INDIANS LOSE.

Sherbrooke, March 8.—Mr. Justice Hutchinson rendered judgment this morning in the case of the Oka Indians against the Ecclesiastics of the Seminary of St. Sulpice, of Montreal, whereby the Indians lose their case against the priests, subject to certain obligations on the part of the seminary to teach them.

The plaintiffs represented the Algonquin and Iroquois Indians at Oka, and claimed that the seigniory of the Lake of Two Mountains belonged to them, or, if that did not belong to them, they asked to have it declared that a common in the neighborhood did.

The priests claimed that the land in question had been conceded to them by the King of France to propagate the Roman Catholic faith among the natives.

Scott's Emulsion

IS THE ONLY EMULSION IMITATED

If there was any other Emulsion as good as *Scott's*—*Scott's* would not be the one imitated.

As it is, there are hundreds and thousands of imitations, their makers claiming great things for them; but the fact remains that *Scott's* is far and away the best, as is proven by a world-wide record and test of 35 years.

Doctors have tested it, millions of people have tested it, and more of it is sold to-day than any and all other Emulsions combined; that's evidence of superiority, isn't it?

***Scott's Emulsion* will do more for you per dollar spent than any other preparation at half its cost.**

Be sure to get SCOTT'S. We guarantee every bottle of it. It has the experience of 35 years and the backing of a world-wide reputation behind it. No other Emulsion equals it.

FOR SALE BY ALL DRUGGISTS

FOR *Coughs Colds Loss of Flesh Anemia Bronchitis Consumption*

SCOTT & BOWNE, 126 Wellington St., W., TORONTO

HAVE SENT SAMPLE OF THE ROSS RIFLE

But Government Protests One Used Was Near Enough to Pass Muster.

Ottawa, Ont., March 8.—The definite statement is made this morning that the sample of the Ross rifle, which, under the new rule of the National Rifle Association, must be deposited with the association three months previous to the opening of the Bisley meet, was sent to England some time ago. While objecting to the new rule, neither the D. R. A. nor the Government desired to precipitate trouble and possibly place themselves in a wrong right by declining to comply with it. It was altogether likely, however, that strong representations will be made to the National Rifle Association and the Government on the ground that the long barrel Ross rifle used at Bisley conforms as closely to the Canadian service rifle as do the highly specialized long barrel Lee-Medford and Lee-Enfield rifles used by British shots at Bisley, and which are sold at a high figure by firms which offer special inducements in the way of prize money to riflemen who use them successfully at Bisley.

BISLEY COMMANDER.

Ottawa, March 8. — Major J. E. Hutcheson, of Ottawa, is spoken of as likely commandant of the Canadian Bisley team this year.

Deadly Consumption Starts From Catarrh

THOUSANDS THINK CATARRH IS COLD, NEGLECT IT AND DIE.

Last year forty per cent of all deaths were from consumption. These people all had catarrh in the first place, but neglected it.

Can't you realize the awful, horrible mistake of not curing catarrh now?

To thoroughly root out all taints of Catarrh, nothing can act so beneficially as "Catarrhozone," which is acknowledged by all doctors to be a specific for all forms of Catarrh, Asthma, Bronchitis, throat, nose and chest ailments.

The reasons why Catarrhozone cures when other treatments fail are very simple. In the first place Catarrhozone reaches the true source of the disease. Very few, if any, of the ordinary cures can do this. Catarrhozone is carried along with the air you breathe through the mouth, throat and bronchial tubes. Its antiseptic vapor at once kills any germs that may be lurking in these air passages. No matter how remote these germs may be they can't possibly escape Catarrhozone; it goes everywhere the air you breathe goes, and no air cell or air passage can escape its healing influence. The strong point about Catarrhozone is its ability to go direct to the spot where the catarrh germ is working. Every breath through the inhaler means instant death to the microbes, and gives the sufferer relief from the gnawing, destructive action of these parasites. It must be remembered, also, that Catarrhozone is a marvellous healer. It soothes the inflamed membranes, patches up the little sore spots, and removes the sensitive, tender feeling from the nose and throat. Of course, the discharge of mucus stops at once, Catarrhozone prevents this entirely.

Another nasty symptom that quickly disappears is the dropping of vile discharge from the throat into the stomach. Catarrhozone clears out the nostrils so that you don't have to breathe through the mouth. Hawking and spitting stop, because the discharge is cleared up. The blinding headache that is caused by nothing else than catarrh is also lifted from your burden, and life begins to look happy once more.

Complete treatment, including beautifully polished hard rubber inhaler and extra supply of liquid, costs $1, and is guaranteed to cure, or your money back. Smaller sizes, 25 and 50 cents, at all druggists, or by mail from The Catarrhozone Company, Kingston, Ont.

Mrs. Winslow's Soothing Syrup has been used for over THIRTY YEARS by MILLIONS OF MOTHERS for their CHILDREN WHILE TEETHING, with PERFECT SUCCESS. IT SOOTHES THE CHILD, SOFTENS THE GUMS, ALLAYS ALL PAIN, CURES WIND COLIC and is the best remedy for diarrhoea. Sold all over the world.
