British Columbia.

LANGEVIN'S REPORT ON ITS CLIMATE AND CHARACTERISTICS.

OTTAWA, April 26.

Hon. Mr. Langevin has submitted a report of his visit to British Columbia, whither he had gone at the express desire of the Privy Council, with a view of acquiring a knowledge of the new Province in relation to the Pacific R. R. and its westerly terminus, and study the requirement of that country. The report opens with an elaborate description of the climate and territorial characteristics of British Columbia, its advantages for settlements, extent of its forest land and timber, which are described as being very rich. The report then goes on to give a description of aurferious regions, and the cause of their tardy developement. The first requisite in that region, he says, is a geological survey. That survey is now being made, and gives promise of the happiest results. In the meantime, it is established that from the United States frontier to the 53rd degree north latitude, and from the width of from 100 to 200 miles, gold is found nearly everywhere, exports in gold dust in 1869 being nearly three million and a half dollars. The report, which is interesting all through, gives valuable information on almost every subject in connection with that country. Esquimault, he says, is the best harbor on the Pacific coast north of San Francisco; is well-lighted, and may be entered with facility either by day or night, in fine or in stormy weather. With respect to the proposed graving dock, he says the site chosen would appear to have been made especially for the purpose. It is called a long, or convance grave. The dock for which the Local Government has invited tenders is to be 450 feet long, 90 feet broad at the top, and 50 feet at the bottom, affording a depth of water, at ordinary high tide, of not less than 24 feet on the sill. He refrains from entering into any details on the Pacific Railway survey in anticipation of the report of the Chief Engineer.

WE have heard recently of several severe cases of spinal disease cured by *Johnston's Anodyne Liniment;* one case of a man forty-five years old, who had not done a day's work for four years. The back should first be washed, then rubbed with a coarse towel. Apply the Liniment *cold*, and rub in well with the hand.

"HORSE-MEN," and others who pretend to know, say that the following directions had better be observed in using *Sheridan's Cavalry Condition Powders*: Give a horse a tablespoonful every night for a week; the same every other night for 4 or 6 nights; the same for a milch cow, and twice as much for an ox. The addition of a little fine salt will be an advantage.

BREAKFAST—EPPS'S COCOA—GRATEFUL and COMFORTING.—By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately favored beverage which may save us many heavy doctor bills.—*Civil Service Gazette.* Made simply with boiling water or milk. Each packet is labelled "James Epps & Co., Homœopathic Chemists, London." Also, makers of Epps's Milky Cocoa (Cocoa and Condensed Milk.)

RAILWAY TIME TABLE.

Grand Trunk Railway
