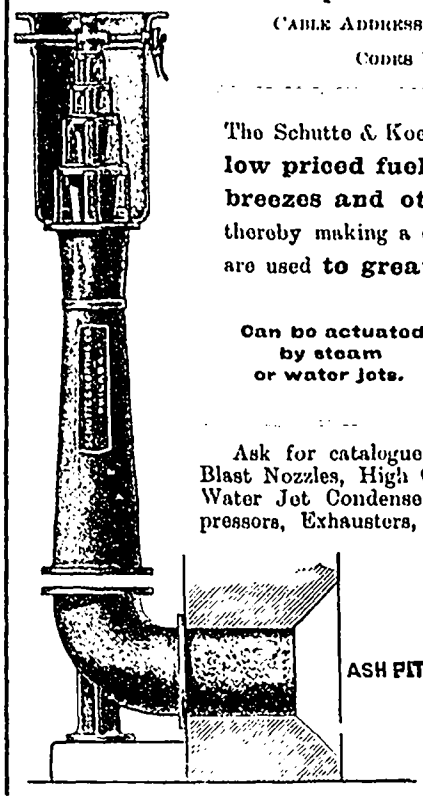
CODES USED { A. B. C CODE. WESTERN UNION TEL. CODE.



The Schutte & Koerting blowers offer a means of **burning low priced fuel, such as screenings, gas works breezes and other refuse** with perfect combustion, thereby making a direct reduction in cost of steam. They are used **to great advantage on:**

1. Heating or Forging Furnaces.
2. Heating and Gas Producing Furnaces in chemical and glass works.
3. Steam Boiler Furnaces.

Can be actuated by steam or water jets.

Ask for catalogues. Injectors, Blast Nozzles, High Grade Valves, Water Jet Condensers, Air Compressors, Exhausters, etc.

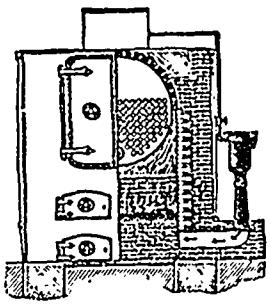
ASH PIT.

MANIPULATION

Regulate blast with side handle.

Start and stop by opening and closing a valve in steam pipe—full.

THE FURNACE BLOWER
Attached to a Tubular Boiler.



A FINE STEAM PLANT.

"I will say without qualification that it is as fine a boiler and engine plant as I have ever had the pleasure of seeing for its size. The engine was working without heating and absolutely without any noise. I wish to congratulate you on your success in building this class of engine and hope that we may have pleasure in dealing with you again."

The above refers to a 350-horse power Robb-Armstrong Corliss Engine and two 175-horse power Robb-Mumford Boilers installed by us.
