

THE people of any city become what they are and form their standards of right and wrong from the teachings of the Mother, the Teacher and the Press.

The London Advertiser

THE old newspaper definition of a good journalist was a man with a nose for news, but The London Advertiser's requirement is a man with a passion for the truth.

59TH YEAR. NO. 23433

LONDON, ONTARIO, TUESDAY EVENING, SEPTEMBER 5, 1922.

PRICE, THREE CENTS

SEARCH HOME OF CONSTABLE FOR STILL

BOARD WOULD ENFORCE WAGE CUTS IN SHOPS

Report of Conciliation Body Recommends Temporary Adoption of Reductions.

EFFECTIVE FROM JULY 16

Official Fears Co-operation With American Shopmen May Be Necessary.

Ottawa, Sept. 5.—The majority report of the board of conciliation investigating the differences between the Canadian National, the Canadian Pacific Railway, the Grand Trunk and other lines included in the railway association of Canada and their shop craft employees, recommends: 1. That the parties should confer as soon as conditions should permit with regard to permanent rates of pay. 2. That the reduction of 5, 7 and 9 cents an hour, of which the railway gave notice, be effective temporarily from Aug. 15, but when definite rates are agreed upon they be effective from July 16.

The award affects approximately 25,000 employees. It is signed by Alex. Smith of Ottawa, chairman of the board, and Isaac Pittblado, K.C., of Winnipeg, representing the employers. James Simpson of Toronto has presented a minority report.

Montreal, Sept. 5.—If the wage question for Canadian railwaymen has to be determined in the United States they will have to participate in the efforts exerted by the shopmen in that country, is the view expressed by Frank McKenna, vice-president of Division No. 4, railway employees' department, American Federation of Labor, in commenting on the findings of the conciliation board on the question of the wage cuts for railway shopmen.

The findings of the conciliation board, announced at Ottawa today, reached union headquarters this morning.

After a study of these reports, Mr. McKenna said, "it may well be that a way to a peaceful solution of these difficulties may be found. But if, on the other hand, there is nothing encouraging in both reports, the situation in the United States will then have a very profound effect on the Canadian situation."

"It has been our hope that the wage question would be settled in this country. But if events prove that the wage question for Canadian railwaymen has to be determined in the United States, then it is apparent that we should have to participate in the effort exerted in that country."

"However, I still have hopes that ordinary common sense will be displayed by the managements of Canadian roads, and that as a result this question will be peacefully settled, for the time being at any rate. No avenue will be left unexplored to attain the desired result."

Members of the schedule committee of the shopmen's union, which will decide on their action, were summoned to Montreal by wire this morning. They will sit in conference over the report on Thursday morning.

GRAIN IN ALL ELEVATORS DECREASE DURING WEEK

Ottawa, Sept. 5.—(By the Canadian Press).—According to returns received at the Dominion bureau of statistics for the week ending Aug. 25, 1922, the quantity of grain in store at the different elevators, has decreased in all grains except rye, which shows an increase of 157,370 bushels. Wheat shows a decrease of 623,510 bushels; oats, 975,755 bushels; barley, 32,517, and flax 81,243 bushels.

THE WEATHER

FORECASTS.

Today—Light to moderate winds; fine and warm.

Wednesday—Moderate winds and more unsettled, with showers in some localities.

Pressure continues relatively high from the Great Lakes southward to the Gulf of Mexico, and low over the Western Provinces.

Showers have occurred in Nova Scotia, while in other parts of the Dominion the weather has been fair and warm.

Daring British Fliers To Compete For Aerial Derby

LONDON, Sept. 4.—Britain's most daring fliers will compete Sept. 8 in a 900-mile aerial derby for the king's aviation cup.

The course of the race will be a giant circle drawn around the interior of the British Isles.

The derby is the climax of a series of races encouraged by the government with a view to keeping aviators in the game and testing to the fullest extent their endurance and the reliability and speed of various makes of machines.

The circuit will include Birmingham, Leeds, Newcastle, Edinburgh, Glasgow, Manchester, Liverpool and Bristol.

Competitors will be started from the big aerodrome at Croydon in accordance with the proportion of their handicap allotted for the first section and will be timed from the given signal to start.

At the end of the first section, the aeroplanes will be housed for the night. Landings between the controls are allowed.

Among those who are having machines built and who will enter them, just as wealthy men build yachts and enter them in races, are the Duke of Sutherland (left), president of the Air League; Lieut.-Col. Frank McClean (right, above), vice-chairman of the Royal Aero Club, and J. H. James (right, below), Britain's greatest air speedster.

TO DECIDE ON DISPOSAL OF INSANE PERSONS

City and County Police Will Bring Issue to Head.

AWAIT TORONTO RULING

Middlesex Authorities Claim Right to Refuse Admittance to Lunatics.

Middlesex County authorities are determined that there shall be a "showdown" with the city police authorities pertaining to the detention of insane persons at Middlesex County jail, and a final ruling upon the question is being sought this week from Provincial Inspector of Prisons Dunlop of Toronto.

At this moment a special roster of persons adjudged mentally unbalanced and believed so, who have been confined for varying lengths of time at the county jail, is being prepared for the consideration of the Toronto authorities.

While the county officials feel that there can be but one ruling upon the question, they are preparing, however, to seek the definite assurance of the department heads before they institute any action. Should they be advised, as they anticipate, they will immediately decline, they say, to accept prisoners of this class.

While this has, seemingly, been a point of contention for years past, between the county authorities and the city police, the former have always maintained that it is so provided in the regulations that they need not house insane persons for any unassessable length of time, or may if they choose, decline to accept them at all.

The list of those detained since December last, although only partially complete, reveals the fact that persons of this type, once lodged at the county jail, have remained there for two, three or even four weeks.

That these prisoners, in addition to all else, are a continual source of worry and are, in fact, more trouble than the usual prisoner, is the claim of the jail authorities, who cite as an instance, Harry Geer, who was held here for a considerable period awaiting deportation to the United States. Inmates of this description call for increased care and not infrequently precipitate fights and other disorders, breaking windows, throwing water and the like.

The claim is that these persons should be immediately examined, and if deemed of unbalanced mind should be forthwith removed to places provided for that purpose.

Since then he has lived on his estate at the reserve, about a mile west of the town. From the time Mr. Brant was old enough to work he had been hale and hearty and was able to work as well as any young man up to two years ago, when he met with an accident, falling from a horse, which resulted in his being confined to bed ever since. Prior to that time he was in almost perfect health for a man of 100 years, while his sight and hearing were good until the last.

He is survived by one daughter, five grandchildren, five great grandchildren and one great great grandchild. The funeral was held Monday morning at Christ Church on the reservation, and interment made in the Christ Church Cemetery.

In the early eighties his lands were ceded to government. Since then he has lived on his estate at the reserve, about a mile west of the town. Children of City Go Stoically On as Vacation Ends

ALL SCHOOLS OPEN.

YOUNG London, approximately eleven thousand strong, and in divers moods, trudged philosophically back to school Tuesday morning.

In spite of the eagerness with which summer holidays were welcomed, there was at the end no strenuous objection put forth to going back to school, either by children or mothers, who know that with the commencement of school even the most harum-scarum youngster is reasonably safe from accident at least five hours of the day.

During the summer holidays every school in the city was thoroughly cleaned and renovated, and every effort has been made to accommodate the increased school attendance.

The old Victoria school on Askin street has been brought into the highest prominence in the civic and ecclesiastical branches of the school. When the pope had pronounced the Latin formula of blessing he placed upon the statue a solid gold crown.

At the conclusion of the ceremony the statue was inclosed in a beautiful rosewood case with glass panels and taken to the papal automobile, which carried it in a procession to the basilica of the Church of Santa Maria Maggiore, where it will be exhibited to the faithful tomorrow.

The Central high school and the Central collegiate institute, opened with a large attendance. All available space in the Technical school has been converted into classrooms, and on opening day an increase of over 100 was shown over the attendance on the opening day last year.

The Central high school is filled to capacity. Extra tables and chairs have been brought into the Empress avenue school and at the Ealing school, a frame building, which was to be torn down, has been brought into use as an annex.

However, all the worry which the board of education has endured in its preparation is of but little concern to the youngsters, affected. School means the same to them, whether in the basement of a church, a frame shack, or in one of the splendid new schools.

They heard the school bells Tuesday morning, and either really happy or stoically content, they marched forth, some to church basements, some to annexes, some to improvised high schools and overcrowded public schools, but all resigned to ten long months of school and hard work.
