The potato disease is beginning to show itself in South Lancashire to a serious extent, not only in gardens but in the open fields. Two extensive farmers with whom we are acquainted are carting their unripe potatoes to market in great quantities, to save something from the destruction which threatens their crops; and on many other farms in Flixton and other potato growing districts the disease is very prevalent. In gardens it is almost universal. All inquiries as to the origin of this strange disease have hitherto been in vain. We may mention, however, that the potato is not the only plant affected. On the Lancashire moors the greater part of the heath or heather has withered and dried up during the last few weeks; and within the last few days we have found great quantities of ferns blasted on the lower side of the leaves, as if they had been scorched over a hot fire.

LORD ELGIN, GOVERNOR OF CANADA.

We have the gratification of announcing the appointment of Lord Elgin as Governor-General of Canada; an appointment which affords the highest satisfaction in England. We know it will be a matter of serious regret to the people of Jamaica that his lordship does not return to resume his office in that colony, which he has filled in a way which has commanded the respect and esteem of all parties.—Jamaica will long bear traces of the benefits conferred upon it by Lord Elgin, by the encouragement and aid which his lordship gave to agricultural improvement and which, at the present moment, must prove of the most important service.—The nice discrimination and other high qualities which Lord Elgin has displayed for the duties of a colonial governor, especially recommend him to the important post of governing the North American colonies. This appointment reflects great credit on the Whig Government of this country, as it is well known that Lord Elgin is particularly opposed to the administration of Lord John Russell. The selection has been made solely in reference to his lordship's qualifications for the discharge of this distinguished post.

Timber.—The import from British America since the 21st ult. is comprised in 8 vessels from Quebec, 5 from St. John and St. Andrews, 2 from Miramichi, and 6 from other ports. The quantity of Pine logs brought by these vessels amounts to 3131 from Quebec, 2471 from St. John, and 1417 from Dalhousie and Picton, the remainder of the cargoes consisting of Hardwood, Deals, and Railway sleepers. This moderate supply of Pine timber, coupled with a fair rate of demand for consumption, has given a considerable degree of firmness to the market, especially for St. John's, two cargoes of which were sold yesterday, one of 20½ inches average at 19¾d per foot, and the other of 21 inches, at somewhere about the same rate. Quebec cargoes have realised 15¾d to 15¾d per foot for yellow Pine of fair quality, and an advance on 16d per foot of one large average and good quality, and 22d to 23d for red, 2s 4d to 2s 6d per foot for Oak, 20d to 21d per foot for Elm, 17d per foot for Ash, and £8 to £9 per standard for Pine Deals. A cargo of Miramichi, and one of Dalhousie Pine brought 15d per foot, and parcels of Picton and Prince Edward Island Hardwood 14d per foot. New Brunswick Deals have been disposed of to some extent at 22d per foot for Spruce, and 23d per foot for Pine, with ordinary descriptions of Nova Scotia and Prince Edward Island at 21 per foot. A lot of St. Stephen's Boards, well manufactured, and of good quality, has been sold at £12 per standard. The tonnage cleared for the North American colonies for the last two years, from the 1st February to the present time, appears to be—

	Quebec.	St. John.	Other ports.
1845 . . .	149,314 . . .	33,042 . . .	22,709
1846 . . .	122,120 . . .	33,702 . . .	28,091

Showing the decrease in the clearances still to be in Quebec. The tonnage arrived from the colonies in the like period in 1845, amounts to 87,913; 1846 62,632; decrease 25,281.

Ibrahim Pacha.—The territorial possessions of Ibrahim Pacha are immense. He has introduced into Egypt sugar cultivation on a large scale. Besides cotton—the benefit of which production Egypt owes to Mehemet Ali—the vine and the olive have been especial objects of his attention. The gardens of Ibrahim Pacha especially that of Rhoda, on the Nile, are eminently beautiful. They are under the care of Scotch gardeners; they are enriched with a boundless variety of fruits and flowers; and the Pacha has spared no expense in collecting from remote regions the rare, the magnificent, the useful, and the ornamental. There are no properties in Egypt so well administered, none so profitable, as those of Ibrahim Pacha. They afford an example of successful administration, and lead to a confident hope that the same spirit of order and enterprise may preside over the political future destinies of Egypt.—*People's Journal.*

His Excellency Sir John Harvey arrived at Halifax on Saturday morning last, in steamer *Unicorn* from Newfoundland. He landed shortly after the steamer's arrival in the harbour, and proceeded to the Council Chamber, where he took the oaths of office as Lieutenant Governor of the Province of Nova Scotia.

The Great Britain and the Cambria.—The last homeward passage of these steamers is the most extraordinary yet recorded. It may be recollected that they both left the same day, the former from New-York, and the latter from Boston. The Cambria arrived in Liverpool *in ten days sixteen hours*, including her run into Halifax to land and receive passengers and mails. The Great Britain reached Liverpool *in thirteen days eight hours*, including a detention at sea of eighteen hours in repairing the driving chain, which broke on the passage. These are both recorded as the quickest passages made between the respective ports; and if we deduct eighteen hours from the Great Britain's time, the performances are extraordinary.

Regatta.—It is proposed this season that the annual Regatta should take place about the 25th instant and on the Kennebeckasis River, instead of the Harbour as usual. Under all the circumstances, and considering the unusual excitement manifested at the last boat race, we think it better that the racing should be removed from the city for this season, and those who wish to witness the sport will likewise have the pleasure of a day's drive into the country.

Pursuant to notice, the new Episcopal Church at Musquawgonish, Parish of Lancaster, was opened for public worship on Sunday last, 23th ult. at 11 A. M. Notwithstanding the dense fog, the Church was literally filled to overflowing, and upwards of fifty persons could not gain admittance. Prayers and the Communion Service, by the Rev. T. W. Robertson, Incumbant of the parish; Sermon by the Rev. Mr. Harrison, from Acts x. 29: "I ask therefore, for what intent ye have sent for me?"—It would be superfluous to say one word respecting the sermon. Mr. Harrison's talents as a preacher, are already extensively known, and justly appreciated. At the conclusion of the service, a collection was taken, which amounted to the very handsome sum of £21 10s.—We have been requested by the Rev. Mr. Robertson to record his grateful thanks to those benevolent individuals, who so liberally contributed of their "Lords Money;" and at the same time he acknowledges the kindness of the editors of the different newspapers, who so cheerfully (unasked) copied the the notice respecting the opening of the Church.—[Obs.

Montreal has lately been the scene of several disgraceful riots in which a reckless regard of human life has been exhibited. A Mr. Leonard has been beaten to death on the race course, and some others are not expected to survive their wounds. It would appear that the city is infested with an ungracious murderous set of scoundrels; and whom, for the sake of peace and good order it behoves respectable people to root out, as the only means of safety for their lives and properties.

At the Parish of Blackville, on the 5th August, the Lord Bishop of Fredericton bestowed the rite of confirmation on about thirty persons and consecrated the ground set apart for the burial of the dead.—At Ludlow he consecrated the burial ground, and confirmed thirteen persons.—At Baie des Vents, 23 were confirmed.

At Shediac, on the 23d, his Lordship preached and confirmed 31 persons; and on the same day his Lordship held a confirmation at Cocaigne. Addresses were presented to the Bishop at nearly all the places he visited, to which his Lordship made suitable replies.

Want of Water.—In consequence of the long continuance of dry weather, the water in the river Saint John has become so low as to make it difficult for the steamers to cross Oromocto shoals, and some other places. Such an extreme scarcity of water we cannot recollect of previously having occurred.

A report is current that an extensive fire is raging in the woods, said to extend from the head of the Miramichi river, past the rear of the settlement of Stanley, and on to the head of the waters of the Nackiwick and Becaguimick. We know not how correct the rumor may be in regard to the extent of the fire, but it is evident that the devouring element is causing a vast destruction of property in the woods. A body of smoke, estimated by some to be twenty or thirty miles long has been observed for nearly a week on the eastern side of the river, distance back supposed to be from 6 to 10 miles.—Fears are entertained for the safety of several back settlements, particularly Newburgh. The season has for some time been remarkably dry, scarcely a shower for a long time, and of course the combustible materials with which the lumber woods abound, will afford facilities for the rapid progress of this dangerous element.—*Woodstock Telegraph.*

The University of Edinburgh has conferred the degree of M. D., upon Mr. Edwin Bayard, of this city.

Mr. Eaton.—By private advices from the Caledonia Springs, dated on the 23rd we learn that Eaton had, at 9 o'clock on Saturday, completed 900 miles of his undertaking. He had had a very bad morning on Friday, which fatigued him a good deal, but he rallied again in the afternoon, and was cracking jokes with the Indian chiefs as cheerfully as ever. The old man seems very fond of the notice of the fair sex. On the day after to morrow, if all goes well, the match will be completed; certainly the most wonderful feat of our time in the pedestrian way.—*Montreal Courier.*

Railway Survey.—We learn from Miramichi, that Lieut. Henderson, R. E., one of the Railway and Boundary Commissioners, left Newcastle for Fredericton last Tuesday morning, and that he intends returning there next week, for the purpose of exploring the country from thence to the head-waters of the Restiguouche, and through to the St. Lawrence by that route. Capt. Pipon is at Fredericton, making arrangements for despatching parties to different points between Boies Town and the Restiguouche.—We learn that the Governor-General, Earl Cathcart, has deputed Mr. Simpson of Montreal, to accompany the Commissioners, note the proceedings, and collect statistical and local information of all kinds along the various lines examined. Mr. Wightman appears to be performing a similar duty in Nova-Scotia; but we do not learn that any step has been taken for watching over the interests of this Province, either with respect to the Railway, or the Boundary, both of which are questions of the deepest importance to New-Brunswick. We trust to hear of some movement shortly, which will prevent our neighbours having it all their own way.—*Courier.*

A CARD.

THE BARON RUDOLPH DeFLEUR, on leaving this City, begs leave most respectfully to tender his acknowledgements to the Gentry and Citizens of St. John, for their polite and very numerous attendance at the two Concerts, at which he had the honour of appearing before them.

Baron Rudolph DeFleur feels highly gratified in perceiving the general taste for Musical science and accomplishment, which prevails in St. John; of which fact he has been convinced, as well as by the crowded and fashionable audiences with which he has been honoured, as by the numerous private acquaintances he has had the pleasure of making during his brief stay in this City.

These circumstances, therefore, induce him to hope, that on his return to St. John in the ensuing winter, with a view to organize a more systematic and general association for the cultivation of Musical taste and the promotion of mutual enjoyment, (after having effected a similar object in Halifax, where he has engaged for that purpose to spend the next three months,) his views will meet with ready appreciation, and that he will be enabled to establish in St. John, as he already has in other Cities, an Institution, which shall prove a source of rational enjoyment and permanent benefit to the whole community.

The Baron De Fleur also takes this opportunity of tendering his best respects to His Excellency the Lieutenant Governor of this Province, and the numerous gentry of Fredericton, who honoured him by their attendance at his Concert in that city, which took place under the especial patronage of his Excellency.
