MALLORY'S SEED CORN

From the letter of a customer, Secretary of a Farmers' Club, Apr. 12, 1915: "Seed corn arrived O.K. Everybody was pleased with the corn, and I could have disposed of a lot more had I had it. Thanking you for your promptness," etc.

This shows what our customers think of us and of our Seed Corn. Our corn is harvested and sorted in the most careful way, placed in narrow wire cribs in the fall until perfectly dry, then closed in with storm doors to exclude snow and rain. Then shipped direct to the customer, sacks free, at a low price for its quality. White Cap Yellow Dent, on cob, $1.50 per bushel; shelled, $1.40. Know what kind of seed you plant. Mail your order now. This will not appear again. We ship very soon after getting your order. And you are sure to be well satisfied. If you are not we will pay return freight charges on the corn, and refund your money.

N. E. MALLORY - - R. R. NO. 2, BLENHEIM, ONT.

OUR FARMERS' CLUB

Correspondence Invited

PRINCE EDWARD ISLAND

PRINCE CO., P. E. I.

RICHMOND, April 13.—Fine weather prevails; indications are for an early spring. Stock has come through the winter in good shape. Quite a few horses are for sale. The demand is not so good as last year. All the cattle, old and young, fat and lean, as well as old horses, find a ready sale to fox ranchers. Feed is plentiful. Good timothy hay is worth $12 to $15 a ton; clover, $10 to 25c; eggs, 18c; butter, 25c; potatoes, 25c; hides, 12c to 14c. —J. D. McL.

NOVA SCOTIA

CAPE BRETON CO., N.S.

SALMON RIVER, April 14.—Excellent weather makes preparation for seeding an easy job. The ground is drying rapidly. Prices for hay and grain are high. Hay, $20; oats, 75c to 80c. Seed grain, etc., are higher now than at the same time last year. Beef is scarce and high. Veal is very plentiful.—J. H. MacD.

ONTARIO

WELLINGTON CO., ONT.

FERGUS, April 12.—The weather has been very cold and backward, so that there is still some snow along the fences although it has almost all gone off the roads since the rain of a few days ago. But this morning the ground was again frozen hard. The frost is coming out of the roads so that teaming of any kind is a laborious job. Turnips have reached the high price of 25c a bush. Feed of all kinds is none too plentiful. Prices are: Oats, 60c; barley, 65c; peas, $1.25; buckwheat, 70c; butter, 28c; eggs, 17c; hay, $17. —W. B.

DUFFERIN CO., ONT.

SHELBURNE, April 13.—The snow is gone and farmers will soon be on the land. Many are in the maple syrup making, some for the first time possibly owing to sugar being so high. Clover has come through the winter in excellent shape. Grain has been high in price this winter; consequently a lot of unfinished cattle were sold at a loss. Next winter the city people will be having another investigation on the "High Cost of Living," but wouldn't it be fine to have the commissioners make their report on H. C. of L. that was appointed about a year and a half ago. There has not been as many auction sales this winter as formerly. The horse market has not picked up, although quite a number of horses have left here for the war. One farmer was offered $65 for a horse from a middleman who was buying for the war, but the farmer sold the same horse to the military horse buyer for $110. This goes to show the gall some middlemen have. Not very many farmers attended the "Patriotic and Production" meetings held here some time ago, because, we believe, that farmers know their own business better than the easy-chair, kid-gloved former that does not know what is a good yield of oats and very little else pertaining to the farm.—L. E. D.

MIDDLESEX CO., ONT.

APPIN, April 12.—Seeding has begun on some well drained fields. On ordinary soil it will be a few days before seeding becomes general. Slightly more than the usual acreage will be sown. Notwithstanding unemployment in cities, farm labor still continues very scarce and wages high as ever. How can we increase production if our working force is not increased?—O. T.

ESSEX CO., ONT.

HARROW, April 7.—Farmers are busy plowing for spring grains and already some have sown. Soil is working in good condition. The acreage in tomatoes will be all this season, with tobacco reduced. The farmers have contracted for cucumbers and beans. Hogs, $8.25.—W. A. B.

BRITISH COLUMBIA

NEW WESTMINSTER DIST., B.C.

CHILLIWACK, April 6.—Seeding is going on quite nicely. Some of the early grain is now up. The fall wheat is doing splendid. Some of it is up to the second joint. The weather is very mild, with frequent showers. The milk cows, in the majority of cases, are now left out at nights. Seed grain is very scarce and expensive.—N. C.

ANOTHER FINDERNE ON TOP

EDITOR, Farm and Dairy.—I am pleased to be able to report that the Holstein-Friesian heifer Finderne Mutual Fayne, 183215, has broken the record for fat production in the junior two-year class of the semi-official yearly division, by producing to March 31st in 365 consecutive days 903.379 lbs. fat from 18,811.3 lbs. milk. She freshened at the age of two years three months 13 days. Her sire is King Hengerveld Aaggie Fayne, 56615; her dam is Finderne Hengerveld Mutual, 139868. She was bred by Mr. Bernhard Meyer, Finderne, New Jersey; and she is now owned by the Somerset Holstein Breeders' Company, Somerville, New Jersey. In the junior two-year class of that division she displaces Lady Paul Livardy 3rd, 146935, whose record for 365 days is 737.36 lbs. fat from 20,936.7 lbs. milk. Finderne Mutual Fayne has yet 63 days to run before completing her record. Six different supervisors have so far been employed in the conduct of this test.—Malcolm H. Gardner, Supt. A. R.
