BOTH SIDES OF THE QUESTION

"YOU PAYS YOUR MONEY AND TAKES YOUR CHOICE."

Bonner Predicts More Hard Times and a Further Decline in Prices of Wheat—Miller Thinks This the Opportune Time for Farmers—Let the Short Sellers Raise the Next Crop.

The prospects of wheat are being discussed on 'Change with considerable interest. With prices around 70c, the outlook for growers is not very bright, but enormous supplies confront the sellers. Opinions on the situation will be interesting to readers at this juncture:

For a number of years past Samuel Bonner has issued annually a prophecy in regard to various markets during the ensuing year. His prophecies have been right in a sufficient number of cases to create curiosity as to what he would say. His forecast for 1894 declared that there would be "continued embarrassed business, bankrupted manufacturers, unemployed labor and ruined farmers."

For 1895 he says:

"There is no promise or sign of better times for the coming year. We may look in vain for permanent improvement in general business. Wheat at 54 cts. a bushel at Chicago; cotton at 5 1-2 cents per pound at Cincinnati, and pig iron at $10 a ton at Pittsburgh, denote impoverishment for farmers, cotton planters and furnace men. The increase last year of $100,000,000 in the bonded debt of the Government does not signify that the people are contented, keeping out of debt and making money.

"Ever since 1873 values have been shrinking in consequence of the establishment of the single gold standard, and no one can fathom the depths to which prices will fall.

"There is no evidence that we are at the lowest point of depression. There is no property, except gold, which is not depreciating.

"An average crop of grain in this country this year, with fair crops abroad, will send the price of wheat at Chicago, after the next harvest, down to 40 cents per bushel. Fat hogs will be $3 100 lbs. gross, for next winter's packing season. Prices for wool, cotton, iron, cattle and horses will be on the down grade during the present year. Common sheep, after the wool is taken off, next year, will sell for what the pelt will then bring, 25 cents.

"To the anxious inquirer: 'The year 1895 will not be the proper time to make investments in property or to engage extensively in building enterprises.'"

One of the most keen and pointed satires yet written on the wheat situation from a bull standpoint has been published by C. W. Miller of the Chicago Board of Trade in pamphlet form, for distribution among the trade and the farmers of the Northwest, under the title of "Financial Pyramids—Enduring as the Eternal Architecture of Egypt;" built upon a $1000 foundation. Invested in wheat, Christmas, 1894, to be completed with a cornucopia as an apex, containing $65,000 profit by Christmas, 1895." The first part of this little speculative tract is devoted to solid argument to prove the opportunity now exists to build a pyramidal fortune in wheat on such a small foundation. But the last part of this bull proclamation is occupied with advice to the Northwestern farmers, which is too rich to abridge. The following is the pith of the argument: "Farmers of the Northwest, this coming bull movement is a good thing for you. Push it along. You can do it in this way: Figure the value of your seed and cost of putting in your spring crop. Take that amount of money and buy in Chicago all the wheat for July delivery that it will margin safely. Be quick about it. Men of talent are selling July wheat around 60 cents per bushel. When you have bought your allowance rest easy; put in no crop, but summer-fallow and improve your farms. Live one season without work, and enjoy a golden year in your iron age. Let our short sellers raise your next crop. Do it, and you will get more profit on your Chicago purchase than your whole crop sold for this year. Concert of action among you will, in this way, make farming in your country popular and profitable. You will turn the tide of immigration your way, and again, boom the Dakotas. Try it. All try it. Better than wearing out your machinery, horses and old lives growing wheat for Chicago at 50 cents per bushel. It will give those who delight in selling your wheat a chance to deliver it also. Healthful change all round. Good management will make your Minnesota and Dakota farms an arcadia and dolce far niente mean farm life in the Northwest. Russian thistles will not pester you, and under the shelter of a shade tree you will heartily greet and welcome 'hot northers.' No repairs, no new machinery, no binding twine, no threshing, no help to expend money for next year, and no work to do. Wheat growing will be otium cum dignitate. You will find no lack of innocent diversion for the imagination of the senses. Your summer will be a continual round of picnics, camp meetings, horse races, cocking mains, bicycle meets and chicken and duck shooting. The sporting contingent of the Chicago Board of Trade will be wrestling for margins in Chicago instead of overrunning your farms with dogs and guns. The sewing circles, spelling bees, tea fights and monnie musk and Virginia reel will enliven your winter evenings; and, when the blizzards come, you will have 'money to burn.' Will you let the Chicago short seller raise your next crop of wheat? This is just the year to try it. It's a 'cinch.' Think it over, Mr. Dalrymple. Mingle a little thought with your labor."

Waterworks for Mimico.

A public meeting will be held at the school house, Mimico, on Thursday evening next, to discuss the advisability of establishing a waterworks system for New Toronto and Mimico.

The fact that most mineral waters introduced into Toronto very soon disappear from the market, and that "St. Leon" still holds the fort in good proof of its excellent qualities. 36

BOARD OF TRADE.

The Members of the Lumber Section Appoint Their Officers for 1895.

The Lumber Section met yesterday afternoon, when the following gentlemen were elected officers for 1895: Executive Committee, A. D. Scott, George Gall, John Firstbrook, Ald. James Scott and Joseph Oliver. At a meeting of the Executive afterwards Ald. Oliver was elected chairman and Ald. Scott deputy-chairman. Arbitration Committee, Messrs. John Donogh, Robb, Laidlaw and C. Beck of Penetanguishene.

It was decided to get up a report of the trade for insertion in the annual report of the board.

The section also decided to nominate Mr. John Donogh to represent the Lumber Section on the council for 1895.

The Marine Section met yesterday morning, when the chairman was authorized to make a report for publication in the annual review.

The Jewelers and Silversmiths will meet this morning at 10.30 o'clock.

On Thursday morning at 11 o'clock the Wholesale Booksellers and Stationers will meet.

The Appendicitis Bugaboo.

Latter-day medicine has been responsible for two prevalent public scares—the germ fright and the appendicitis apprehension. It is consoling to remember at times in this bacteriological age that the vast majority of bacilli are not harmful; and it is with a new sense of solace that one at last learns from the physicians that appendicitis is not such a dread curse of mankind. The fact is that appendicitis occurs very rarely, and that the percentage of people who eat grapes, berries and fruit with seeds in them and are caught is insignificantly small. Nor, when caught, is it necessary—it now seems—to resort to a serious operation. Salvation appears to be contained in such a simple remedy as sweet oil—one or two ounces administered internally every three hours. The doctors are evidently not going to succeed in killing us all off, after all.

Indescribably Beautiful.

"The scenery along the line is indescribably beautiful, and it traverses a country not only delightful but full of historical associations, while its equipment and through train service have no parallel," says a distinguished editorial writer, in speaking of the New York Central Railroad.

St. Leon Water is no fake medicinal water. Every prominent physician recommends it. Every well-regulated family drinks it. 36

If you must draw the line at ~~Lard~~

and have, like thousands of other people, to avoid all food prepared with it, this is to remind you that there is a clean, delicate and healthful vegetable shortening, which can be used in its place. If you will

USE COTTOLENE

instead of lard, you can eat pie, pastry and the other "good things" which other folks enjoy, without fear of dyspeptic consequences. Deliverance from lard has come.

Buy a pail, try it in your own kitchen, and be convinced.

Cottolene is sold in 3 and 5 pound pails, by all grocers.

Tips From Wall-street.

The market closed heavy, with St. Paul and Jersey Central the weakest.

Earnings of Omaha for December show a decrease of $206,000.

Atchison earnings for second week of January increased $16,000.

Some L. and N. stock has lately gone to London.

It is rumored that there is a new bear pool in the Grangers.

The most active stocks to-day were: Sugar 15,400 shares, C. Gas 9800, St. Paul 21,200, N. W. 6200, J. C. 5200, Reading 15,900, L. and N. 3100, B. and Q. 6300, Manhattan 1600.

Henry A. King & Co.'s special wire from Eadenburg, Thalman & Co., New York: Uncertainty about the outcome on the Pooling Bill in the Senate, with the uncertain position of the Treasury, and the continued outflow of gold to Europe have combined to suppress speculative activity, and to make a very inactive market. The gold shipments announced for to-morrow amount to $2,500,000, but more than double is expected to go, and it is certain that the withdrawals from the Treasury will be heavy. Grave as the Treasury position is and the state of the currency are, nevertheless the street's attention was to-day concentrated on the Pooling Bill entirely. The market waited for the Inter-state Commerce Committee's action on the bill, and when it was announced that it had reported the bill without amendment there was a short upward rise in their share list. The rise, however, was checked by the news that consideration of the bill will be delayed, and that the prospects of its passing the Senate are not brilliant. In the afternoon Reading and Southern Railway were very weak, and had a bearish effect on the tone of the whole market.

Henry A. King & Co.'s special wire from G. Logan & Co., Chicago: There has been another day of liquidation in wheat. The best support our market had was by our local traders. The market may do better, but there is nothing in sight to warrant any permanent or substantial advance. The price in low is about all that can be said about it. Any improvement in foreign demand or damage to growing crop would help an advance. There is no change to the market since yesterday, and the weak holders have pretty well sold out. In corn the liquidation has been relatively quite as heavy as in wheat. May sold as low as 45c. Around this price we would call the character of the buying good. Weather and receipts will have much to do with the price in the near future. We believe it will be good to buy on weak spots. Provisions—The buying of provisions to-day, the writer thinks, means higher prices, and he recommends buying around this price.

McIntyre & Wardwell (J. J. Dixon) received the following despatch from Schwartz, Dupee & Co., Chicago: The buying all day seemed mostly against privileges and to cover shorts and the selling in liquidation of long stuff. The volume of business was much smaller than yesterday, the amount of long wheat that came out being decidedly less. There was nothing new to encourage the long side, and in absence of any change in the situation the market will sell still lower. There was slight improvement in the cash demand for corn, and reports from this State indicated a decrease in receipts here. The bulk of the selling to-day seemed to be for country account. A further decline in wheat will carry corn with it. Provisions opened active and higher on the lighter receipts of hogs. There was more outside buying than selling, and local shorts covered. The demand was gradually filled up by the selling of the packers, and after the market became dull, and fluctuated with wheat within narrow limits. Packers seemed more inclined to sell lard and pork than ribs. The close was steady at medium figures.
