General News.

— Last Tuesday was the one hundredth anniversary of the death of Admiral Kempenfeit of the British Navy, who went down with 1200 others with his ship, the Royal George, as she lay at anchor at Spithead.

— In the swimming race at Detroit on Wednesday, a boy named Adolph Rune swam nearly twenty-two miles in less than eight and a half hours. This was a remarkable fete for a fourteen-year-old youth.

— The barque "Richard McLaughlan," which sailed from Richibucto on the 31st ult., for London, had the largest cargo of canned lobsters ever shipped from the Dominion, amounting to $65,061 worth.

— Winnipeg's population has increased one hundred and fifty per cent. in one year. Last year the population footed up ten thousand. This year at the corresponding date the figures stood at twenty-five thousand. The assessment has increased in the same period from $9,000,000 to $30,000,000.

— Mr. John Wanamaker has selected for the four stain-glass windows in the library of his stately new mansion at Chelten Hills, Pa., portraits of four famous Johns—Knox, Calvin, Bunyan and Wesley.

— The egg traffic in this country, says the "Baltimore Market Journal," has risen to an importance which few comprehend. The aggregate transactions in New York city alone must amount to fully $18,000,000 per annum, and in the United States to $75,000,000.

— The Prince of Wales' sons have just been confirmed at Isle of Wight, the ceremony being performed by the Archbishop of Canterbury. They wore their midshipmen's uniforms.

*** "Figures are not always facts," but the incontrovertible facts concerning Kidney-Wort are better than most figures. For instance: "It is curing everybody" writes a druggist. "Kidney-Wort is the most popular medicine we sell." It should be by right, for no other medicine has such specific action on the liver, bowels and kidneys. Do not fail to try it.

THE DUBLIN TRAGEDY.—Westgate, alias O'Brine, one of the alleged murderers of Cavendish and Burke, is in jail at Spanishtown. He adheres to his confession and several times threatened suicide. When asleep he is troubled with fearful dreams and raves excitedly. He has revealed the names of his alleged accomplices to the authorities, but they are kept secret. The general belief is that he had something to do with the tragedy. No one is permitted to see him in prison.

— The richest man in Mexico is an Irishman named Petricio Milmo, who owns a 400,000 acre farm, and is reputed to be worth $10,000,000. When he went to Mexico he had not a dollar, but got a start by a fortunate marriage. He has been several times captured by brigands and compelled to pay a heavy ransom, so that now he lives in a kind of fortress of his own.

— The difference between the cost of iron to the people of England and the people of the United States is an astoundingly large sum. As iron enters into so many manufactured articles, as well as so many factories, it is needless to remark on the bearing of this fact on the industries of the two countries. In fact the people of the United States, using only half the quantity of iron used in England, pay about as much for half as the English people do for twice the quantity.—*Ex.*

— The effects of the recent disastrous northeast gale at Newfoundland are disclosing themselves. American fishing vessels cruising on the French banks must have suffered severely beyond any precedent, the details of which however, are yet to be heard. Fearful ruin has been wrought in the Newfoundland fishing fleet from Cape St Francis to St. John's. At Perth cove, out of 57 fishing vessels, one solitary skiff remains to her moorings while the strand is strewn with wrecks. Gloucester, St Pierre and Newfoundland, have suffered severely from the destructive storm.—*Ex.*

NEW YORK'S POTATO CROP.—The western New York potato crop is reported a failure. Last year the entire yield of the country was about 115,000,000 bushels, of which New York furnished 25,000,000 bushels, or a little over one-fifth. The total yield of the country was fully 20,000,000 below the average for ten years past, including the bad potato year of 1879, when nearly one and a half million dollars' worth of potatoes were imported. Last year, ending June 30th, 1882, the imported potatoes amounted in value to over four and a half million dollars. The present crop in New York is reported as 3,000,000 bushels less than that of last year, and the remainder of the country must produce considerably more than its average crop to prevent another influx of potatoes to meet the high prices which scarcity here will maintain. Not even a bountiful grain harvest seems to have much effect upon the potato market, such a staple of food has it become among all classes.—*New York paper.*

— According to a high authority, quoted in the despatches to-day, the estimates of the harvests all over the world are decidedly favorable. An enormous crop of wheat has been raised in the United States. Bradstreet's *Journal* gives the total yield as 426,400,000 bushels. The yield in the New England states is placed at 1,100,000 bushels, which is 100,000 bushels less than last year. The southern states are estimated at 48,000,000 bushels against 40,000,000, and the middle states at 39,400,000 bushels, against 34,500,000 bushels last year. The West reports first quality grain, except in portions of Michigan and northern Ohio, where rain injured the berry while in the shock. The out-turn of bushels by states is given as follows: Ohio, 40,500,000; Michigan, 20,000,000; Indiana, 4,600,000; Kentucky, 16,000,000; Illinois, 51,500,000; Wisconsin, 23,800,000; Minnesota, 41,500,000; Dakota, 12,000,000; Nebraska, 18,000,000; Kansas, 33,000,000; Iowa, 32,000,000; Missouri, 30,000,000; California, 49,000,000, Oregon and Washington Territory, 10,000,000; Southern states 48,500,000; Middle states, 39,500,000; New England states, 1,100,000; Colorado and territories, 5,000,000. These figures are subject to revision, after returns from threshing are received.

SENTENCED FOR LIFE.—The negro stevedore, who shot Capt. Penery, of the bark "Arcola" at Rio Janeiro, has been sentenced to imprisonment for life with hard labor.

— Sixteen years ago there were 40 Chistians among the Telugus in India, now they number 20,000. There are among them 80 native preachers, 150 schoolteachers, and ten Bible readers. The Theological Seminary established by Mr. Clough has 175 students. This Mission is the marvel of the age.

— About fifteen years ago there arrived in Montreal from the States a very wealthy American who took up his residence there, and it was supposed, shortly married. He moved in the highest circles, and was renowned for his virtues and religious spirit. Three months ago he died, and on his will being read it was found that he had left all his estate to his alleged wife. To the great astonishment of this lady, however, a lawyer arrived from the States and laid claim to the deceased's property, on behalf of his true and lawful wife, who it is alleged, he deserted before his arrival in Montreal. Of course the Montreal lady refuses to yield one inch until the claimant proves her better right to the property in the law courts of Montreal. The case will shortly come up before the Supreme Court, but until this is done the names of all the parties are to be withheld.

—A desperate attempt was made recently to release a political prisoner confined in prison at Saratoff. During the hour allowed the prisoners for exercise a cart containing two men drove up to the jail and made a signal to the prisoner, who was walking within the prison enclosure guarded by a jailer. The prisoner threw sand in the eyes of the jailer and ran to the wall, while the men in the cart fired revolvers and mortally wounded the jailer. The liberated prisoner and rescuers drove off, but were stopped by persons who witnessed the occurence, and after a desperate struggle, in which one of the liberators was killed, the other two men were captured. The crowd tried to lynch them, but were prevented. The captured liberator states that he is the son of a landed proprietor.

A Power in the House of Parliament.

Conspicuous among the influential men of the Dominion is Mr. J. H. Metcalf, Member of Parliament from the city of Kingston. Commencing life as a school teacher, he has steadfastly worked his way upward to the honored position in business and politics he now holds. Coming to a personal matter we would mention that, Mr. Metcalf was formerly subject to extreme soreness of the chest, for which, as he himself says "I could find no remedy but St Jacobs Oil, the Great German Remedy." In the following letter Mr. Metcalf gives evidence of his appreciation. "I take great pleasure in stating that I used St. Jacobs Oil for extreme soreness of the chest, and found it to be an excellent remedy. I would not be without it for ten times its selling price, as a family remedy it certainly has no equal."

— The Canada Pacific Railway Company are pushing work briskly on the line across the prairie. The rails have now been laid to Qu' Appelle, and before snow comes the trains will run a long distance beyond. The other day a number of railway magnates and others went over the line, and when they returned Mr. C. J. Brydges, one of the party, gave a newspaper reporter this description of rapid railway construction:

"I witnessed the operation of tracklaying, and never saw in any part of the world so perfect a system and so complete and thorough an organization. At least four and frequently five trains a day are despatched from Winnipeg, each train containing everything necessary to lay one mile of track. The cars have a mile of rails, a mile of joint fastenings, a mile of bolt and nuts, a mile of spikes, and a mile of ties. For every ninth or tenth mile the train contains in addition the material necessary to lay a long siding, comprising rails, ties, spikes, fish plates, etc., and two switches. With some of these trains are also sent a supply of piles and lumber for waterways, and also poles and wire and insulators for a telegraph line. At the front, at the extreme end of the track, is a boarding train containing everything necessary for the feeding and lodging of the 250 men engaged tracklaying. About 40 teams are at the front, engaged in hauling the ties from each train as it arrives. This enables the men distributing and spacing the ties, to keep about half a mile ahead of the tracklayers. The actual tracklaying is done with marvellous rapidity, and under the most perfect system of well organized labor brings out the most remarkable results ever seen upon railway construction. In sixteen days, 50¾ miles of track were laid, being an average of 3.10 miles a day. The greatest length laid in one day has hitherto been 3.90, and the foreman assurred me that he would not be satisfied till he had succeeded in laying five miles in one day, and that he had no doubt of doing so.

"The extent of average daily tracklaying done has never yet been equalled on any railway in the world, and could only have been done by the most complete and perfect organization, under which every man employed does the maximum amount of work with the least possible apparent expenditure of force or effort.

— The Russian hangman is a convict who was sentenced to death for robbery and murder, but the penalty was commuted to imprisonment for life upon the condition that he should perform the duties of executioner whenever called upon. He has been confined in Moscow during the past fifteen years, and is sent from there, under a strong guard, to Kieff, Odessa, and St. Petersburg, as his services may be required in one or the other of those cities. A visit to this man is described by Victor Tissot, a French author, in a work on Russia and the Russians, recently published in Paris. He found the executioner reposing after the exertion of hanging the two Nihilists, Pressniakoff and Kiviathowski. A young woman of attractive appearance, with a child in her arms, was with him. She was his wife. The comforts of matrimony had not been denied him, and he seems to have had no difficulty, notwithstanding his condition and work, in finding a woman to marry him. The hangman's face is described as stolid rather than terrible or repulsive. He has abnormally long arms, and is said to be possessed of herculean strength. He was spoken of as having "the strength of twenty men." One day there was a revolt in the prison, and he was summoned to help subdue the prisoners. He rushed in among them, and killed three with his bare hands.

Skinny Men.

"Wells' Health Renewer" restores health and vigor, cures Dypepsia, Impotence, Sexual Debility. $1.

Foreign Letter.

(Regular Correspondence.)

PORT SAID, EGYPT, Aug. 23rd, 1882.

This morning at three the "Monarch" swung round to shore. The men fell in silently and landed.

They took the town in different directions. The Governor is favorable to the Khedive and came on board. He soon after returned on shore and was installed, while Arabi's nominee was made a prisoner, and is now on board the "Iris."

The military party next went to the barracks and brought a gatling gun to bear on the gateway. The Egyptian soldiers came out in parties and laid down their arms. The officers were sent on board the "Iris;" the soldiers numbered in all 137.

The "Penelope" goes through the Suez canal immediately. The "Thalia" and "Tourmaline" have gone up the canal with gatling guns in their tops.

All the arrangements for siezing the town were made and carried out by Captain Fairfax. The "Catalonia," "Nevada," and "Orient" have just entered and were loudly cheered.

This morning the fleet and troop ships hove in sight of Port Said.

A party of blue jackets, 150 strong, under commander Kane, left the "Northumberland" and proceeded for Ismailia. They were there joined by a equal number from the "Carysfort," and effected a landing.

They made a reconnoisance. The enemy, who was there in some force, opened fire, and the result was that commander Kane and three sailors were wounded. The enemy's loss is unknown.

The "Cygnet" and "Condor" had a busy time this morning in carrying detachments to pioneer the way up the canal.

Meanwhile the marines seized and occupied Port Said without loss, and no accidents marred the success of the operations at this end of the canal, except the stranding of the "Catalonia" a few miles up.

Nearly all the transports are now inside the canal, moving steadily, but cannot hope to reach Ismailia until sundown to-morrow.

The "Calabria," with the Household Cavalry, moves into the canal at daybreak to-morrow. The scene on board this ship was very lively. The troopers were paraded for inspection of saddles. All were ready packed with kit and provender for landing immediately. In fact all the forces are under the impression that a dashing stroke is about to be made, and are prepared to land, march and fight at a moment's notice.

The waste land and salt lakes on each side of the canal, give the country a wild, unhospitable appearance. The glaring white sand along the right bank for some way inland, shines like crystal and renders it painful to the eyes to look at. It resembles salt brine.

I learn from a private source that Arabi, informed of the recent arrival of the English reinforcements, feels unable to offer an effective resistence to the troops already assembled. He thinks only of making a pretence at defence, and of then declaring his readiness to surrender to a delegate of the Porte. The Sultan would then be led to interpose his suzerainty between his rebel subjects and the foreign troops.

ALEXANDRIA, EGYPT, Aug. 24th, '82.

A deserter from Arabi's camp was caught yesterday. He was in plain clothes and says he threw his uniform away. His story is that he left camp because dissatisfied with the state of things there. He asserts that there were large numbers of wounded in the bombardment and the reconnoissance of the 5th. There was, he added, a scarcity of doctors in the enemy's camp, which is in a bad sanitary condition. His description of the wounded crawling about in the scorching sun, is a sad picture of misery. Many of the Egpptians are reported to be fighting under compulsion, while it is said that some of the wounded were shot by their comrades in the excitement. The man also stated that provisions are plentiful in Arabi's camp, and trains run regularly to Cairo.

Although he is suspected of being a spy, there is reason to believe that the statement ot this professing deserter is true.

A Mounted Infantry picket has discovered some stores of looted property, brought from Alexandria to Ramleh. The culprit was at once arrested, and will be tried and punished.

The wounded Arab who tried to break through our lines is rapidly sinking. He thanks the soldiers of the hospital for their kind sreatment of him.

As yet the Commissariat finds no difficulty in supplying the troops. Bread, meat, vegetables and other stores are purchased from local dealers at reasonable rates. The daily consumption of meat in Alexandria is 9,000 lbs. A good many cattle have arrived from Odessa.

There are twenty-five iron clads and troop ships anchored here at present. Iced Australian mutton was served out among the rations to-day, and the experiment was well appreciated.

A sudden change came over the scene here to-day. The regiments had mostly settled down comfortably, expecting an easy time of it pending the arrival of the forces now on the way, when a sudden notice, issued this morning, changed the whole aspect of affairs.

The streets and roads were once more flooded with traffic. The guards enscouced on the beach at Ramleh, hurriedly packed up, and will bivouac to-night without tents, having been ordered to go on ship early to-morrow morning.

Important events are about to take place, and the men to be engaged will be embarked by Saturday morning. They will then repair to Aboukir Bay, whither the iron-clads preceed them, and anchor off the forts on Sunday morning.

The attack from the sea will then be made by the fleet, and the first safe opportunity for landing the troops will be seized. As soon as this landing has been effected, General Wolseley will commence his attack on Arabi's position.

It is conjectured that the forts will give a good deal of trouble, but there is this eventuality to be considered, that Arabi may evacuate his position on seeing two forces prepared to cooperate on land, one of which can assail his right flank. The country between Ramleh and the enemy's first position, will be rather difficult to get over. The canal banks will afford considerable cover for the enemy in the first advance, and the uneven bed of Lake Aboukir, though nearly dry will be trying to both horses and men. Arabi's first earth-works look formidable. Their height is about 36 feet with scarped embrasures and ditches. They are reported to be well mounted with guns of heavy calibre and of good make.

TELEGRAPH NOTES FOR THE WEEK

Constantinople, Sept. 5th, (Midnight).—The Sultan's proclamation to the Egyptians has been issued. It declares Arabi Pasha a rebel for disobeyidg the orders of the Khedive and of Dervisch Pasha thereby provoking the intervention of England. It states that the decoration conferred upon Arabi Pasha was bestowed upon Dervisch Pasha in consequence of Arabi Pasha's protestations of fidelity. In conclusion the proclamation expects all Egyptians to obey the Khedive.

Athens, Sept. 6.—An armstice has been concluded between Greeks and Turks on the Italian frontier, based on the *status quo ante*. Negotiations for a definite settlement of the dispute in regard to the frontier are progressing satisfactorily.

Constantinople, Sept. 6.—The Persian Minister here has sent a fresh note to the Porte demanding the arrest of Keerdish Chief Obeidullah, whose tribe is committing hostilities on the Tario, Persia, frontier declining on behalf of Persia all responsibility if he is not arrested. M. Nelldoff, Russian Ambassador, supports the note. Persia is resolved to act energetically against Obeidullahr

Constantinople, Sept. 6.—A despatch to the *Central News* from Constantinople reports that the Anglo-Turkish convention is now being signed.

London, Sept. 6.—A despatch from Constantinople states that after a conference of three hours between Lord Dufferin and Said Pasha to-day, the Anglo-Turkish military convention was informally signed.

Panama, Sept. 7.—At 3.24 o'clock this morning there occurred here one of the severest earthquakes ever known on the isthmus. Many buildings were damaged, but no lives were lost.

Chicago, Sept. 7.—At nine o'clock this morning the Marquis of Lorne and Princess Louise and party left Chicago via Rock Island road by special train for San Francisco and British Columbia.

London, Sept. 7.—The *Daily News'* Kassassin despatch says: "Egyptian loss in the outpost affair yesterday was heavy considering the brief duration of the skirmish I counted six bodies close together. This was by far the most determined demonstration made by the enemy since the battle of Kassassin, and indicates the near approach of a decisive conflict. All our cavalry with Gen. Lowers Wilkinson are now here."

London, Sept. 10.—The *Telegraph's* correspondent at Kassassin views Saturday's repulse of Arabi Pasha as a complete success for the English, who never calculated upon his attacking them in such a manner. The enemy did not retire until the English infantry advanced. Arabi left about two hundred dead and wounded on the field. The wounded state the English are in the right. They were attacked by five battalions, of infanrry, with five guns and five hundred cavalry, under command of Mahmoud Pasha Sami, from Salihiyeb. The enemy had altogether 15,000 men. Saturday night was passed quietly, the enemy having disappeared behind their entrenchments. At daybreak Sunday morning the English began to throw up rifle pits around Kassassin, in order to prevent Arabi Pasha from approaching near enough to shell their camp. The picket charged the regiment of the enemy's cavalry, rode through them and killed ten men, losing one of their own. The enemy threw many of their own wounded alive into the canal. The Foot Guards have arrived at the front canal. Stores are coming up fast. The English loss during the engagement are fifty wounded; none were killed.

Pensacola, Fla., Sept. 11.—The storm last night was the severest over experienced here. The quarantine despatch boat Governor Bickham capsized last evening, on route from the quarantine station, and two men were drowned. The British barque Rhoda was also capsized by the gale, but the captain and crew clung to the boom of the vessel until rescued. Several vessels are ashore near the quarantine station and on Santa Rosa Island.

Yarmouth, Sept. 11.—The sad news was received here to-day of the death of Capt. David Hilton, of the ship John Bunyan, on the voyage to Japan, he having been lost overboard. The ship is in charge of the mate, having put into Anjier, Java.

(Special despatch to Morning Chronicle.)

Nictaux via Middleton, Sept. 9.—The work was recommenced on the Nictaux and Atlantic Railway this morning, near Smith's Bluff.

The United States Wheat Crop.

Current estimates of the wheat crop now harvesting vary from 490,000,000 bushels to 570,000,000 and 600,000,000. The first is the estimate of those who reduce slightly the estimate of the Agricultural Department, the last is the estimate of the New York Commercial *Bulletin*. In any crop this varation of one bushel in six would be a serious matter. In the one product on which the trade balances turn and the financial out-look next fall pivots, doubt on this matter is vital. It is true that in one view of the case uncertainty is not to be wondered at. It is barely ten years since the surplus wheat of the United States began to fill the granaries of Europe, barely twenty since our exports began to be serious, and a little over a century ago our seaports imported grain in bad years. Before 1860 the United States did not export an average of over 5,500,000 bushels a year; in the next ten years our exports was quadrupled, and in the next had risen twenty-fold. In 1871 the wheat product of the country was 230,000,000 bushels and the acreage 19,943,893. The acreage is now unquestionably twice this, and, if the larger figures are reached, the product has nearly trebled.

*If you are a woman and want both health and beauty, remember that all superficial efforts to increase your personal charms are in vain. Freshness and beauty accompany *health*, and to secure this Mrs. Lydia E. Pinkham's remedies for all female weaknesses offer the surest means of renovation. The highest intelligence loses its lustre when it must find expression through a bilious complexion. Good for either sex.

PERKINS' ANTI-BILIOUS MIXTURE—is prepared with great care from rare and expensive roots and barks, which are known to operate most satisfactorily upon the organs of digestion. It furnishes a permanent and speedy cure for billiousness, Constipation, Indigestion, Dyspepsia, Loss of Appetite, Headache, Jaundice, Diarrhœa, Dysentery, and all disorders of the Liver. This mixture contains every property desirable in an anti-bilious medicine. It contains no mineral substance, and may be administered with safety to patients of every age and condition. 25 cents a bottle.

MRS. QUINLAN'S GOLDEN OINTMENT—has for many years been manufactured and sold. During which time by its merits alone it has acquired a high reputation as a curative agent. By experience thousands can now testify to its virtue when used for piles, for which it is positive cure. Twenty-five cents a box.

WHOOPING COUGH, WHOOPING COUGH.—If you would save your children much suffering and yourself months of anxiety, use Perkins' Balsam of Horehound and Aniseed, never failing.

B. F. PERKINS, PROPRIETOR, ST. JOHN N. B.

For sale by all Druggists and general dealers throughout the Dominion.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it: there is no mistake about it. There is not a mother on earth who ever used it who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere. 25 cents a bottle.

— Iceland, of all Lutheran countries is the best provided with pastoral, oversight. For every two hundred of the inhabitants there is a pastor, and there are some parishes where the number of souls is still smaller.

"Buchupaiba."

Quick, complete cure, all annoying Kidney, Bladder and Urinary Diseases. $1. Druggists.

OXFORD RAILWAY.—The Oxford and Pugwash branch of the Great American & Short Line Railway has been let out at contract in three sections; first, from Oxford Village, where this line joins the Intercolonial branch to station 241, or four miles, to Joseph Hamilton; second, from 241 to 695, or about nine miles, to Thos. Cook; third, from 695 to Pugwash, to Donald Sutherland. The contractors intend to go right on with the work and to have it finished before winter sets in. The G. A. & E. S. L. R. have their offices fixed at this place (Pugwash) for the winter and expect in the spring to move them to Pictou, where they are going to erect workshops, etc.—*Correspondence Moncton Transcript.*

"Rough on Rats."

Clears out rats, mice, roaches, flies, ants bed-bugs, skunks, chipmunks, gophers. 15c. Druggists.

☞ A gentleman in a neighboring town who had suffered two years with chronic diarrhœa and was so reduced that he could not walk, was cured and restored to sound health by *Johnson's Anodyne Liniment*. This Liniment is worth its weight in gold.

— A number of shoals of mackerel came into St. Mary's Bay last week. Most of them escaped alive, as there was not a mackerel hook on sale in the place. It is bad to have your dish upside-down when it rains porridge.

Consignments of fruits solicited.

A frost-proof Brick Warehouse is now being erected at Annapolis, and will be ready to receive fruit about the 20th of October.

Apples received from the cars, (the train running through the building) warehoused and shipped via direct steamers or via Halifax or Boston as shippers may desire.

Fruit may be inspected or re-packed at any time.

Railway freights can be paid by the warehouse if not prepaid by the shipper.

Orders for dried fruits filled,

For further information apply to

J. P. RICE. A. E. SULIS

ANNAPOLIS SS.,

In the Supreme Court, 1882,

IN EQUITY.

CAUSE:

EMILY JACOBS, Plaintiff.

vs.

JOSEPA C. KEIZER and CHARLES MILLETT, Administrators of the goods and estate which were of Francis Millett, deceased, Defendants.

ON hearing read the affidavit of J. M. Owen, the attorney of the Plaintiff, herein made on the twenty-first day of August, inst., the return of the Sheriff of the county of Lunenburg endorsed on the original writ, and on motion I do order that unless Charles Millett, one of the above named Defendants, do appear and plead in this suit within four weeks after the first publication hereinafter mentioned, default may be marked against him. And it is further ordered that publication of this order in the Bridgetown "Monitor" newspaper, published at Bridgetown, for four weeks, shall be sufficient service upon the said Charles Millett.

Dated at Annapolis, this 21st day of August, A. D., 1882.

Signed,

RICHD. J. UNIACKE, Probty.

On montion of MR. OWEN, of Council with Pltff.

SUMMER STOCK!

NOW COMPLETE!

IN DRY GOODS AND GROCERIES.

and have just received a nice assortment of

American and Canadian

HATS,

in Felt and Straw. Also a nice assortment of

ACADIA SEAMLESS HOSIERY

which took the first prize at the Dominion Exhibition in 1881.

I have now on hand a stock of

ALABASTINE!

in white and all shades.

Alabastine is a valuable discovery, and constitutes a permanent Finish for Walls and Ceilings, assimilating with the plaster and producing a durable and beautiful Finish superior to Kalsomine. Can be used with a white wash brush the same as whitening.

N. B.—Parties bringing EGGS and BUTTER to market may always depend upon the highest possible price.
