800,000 of these Tires Sold to date
Not one wrecked by Rim-Cutting

Buyers of tires are shrewd men. The merits of the tires alone influence them. There can, therefore, be only one reason for the big volume of sales of No-Rim-Cut Tires.

They have made good our claims that they save 48% in tire maintenance.

How do they do it?

FIRST—By preventing rim-cutting. 23 out of every 100 ordinary tires are wrecked that way.

SECOND—By providing for overloading. No-Rim-Cut Tires are 10% oversize—carry 10% more weight—save blowouts. With the average car this means an addition of 25% to the tire mileage.

THIRD—The extra size of No-Rim-Cut Tires gives them more resiliency—saves the mechanical parts of the car from excessive jolting.

Investigate No-Rim-Cut Tires. You will buy them too.
