CONVOY SYSTEM BEATS U-BOATS

-water action, and compelling them to come up at night and lie idle on the surface while their oil engines are used to recharge the batteries.

The decision of the navy department to spend $36,000,000 on new destroyers and destroyer building facilities, approved yesterday by President Wilson, is based on the effectiveness of the swift fighting machines as proven by Admiral Sim's forces. Every effort to speed the new program as well as the old will be made and during the next year the American destroyer force in European waters probably can be more than doubled. Destroyers now under construction are being rushed to completion, and reports on progress are satisfactory.

Deadly Depth Bomb.

American experts have developed a depth bomb for use against submarines that is deadly at considerable range. The bomb, containing high explosive, is dropped from a destroyer over a spot where the presence of a submerged U-boat is indicated. It is timed to explode at a certain depth. If the explosion occurs below the U-boat and within reasonable distance, the hull of the underwater craft cannot withstand the pressure, but is crushed like an egg-shell.

Signs of the destruction in this way appear on the surface in the shape of oil from ruptured fuel tanks, bits of floating wreckage and the like. That is all that is ever heard of the lost boat. It is very difficult, therefore, to be certain of a hit, as the Germans on more than one occasion have released oil, purposely turned loose wreckage prepared in advance and done everything else possible to create the impression that a boat had been sunk.

The under-water radius of the average U-boat is less than 150 miles under most favorable conditions. To get that distance it would have to travel at a rate of very few miles an hour. It is argued, therefore, that if by means of aircraft, destroyers and all other agencies for the detection of submarines, a zone of 150 miles in width or less could be drawn about the base or the entrance of the North Sea in which a submarine could come to surface only at rare intervals, the Germans would not be able to operate to a scale greater than that radius.

However, the plans of the allied governments as to future warfare against the U-boat will be accelerated by the entrance of the United States into the war, and are now taking rapid shape.

ELGIN GRAIN MAN DEAD.

Special to The Toronto World.

St. Thomas, Aug. 30.—Samuel Shepard, one of the oldest and best known residents of St. Thomas and Elgin County, died at an early hour this morning, aged 82. Mr. Shepard for many years carried on an extensive business as a grain buyer and vessel owner at Port Stanley, and was the first man in Canada to export apples to Great Britain. He is survived by a widow, one son, John, of British Columbia, and one daughter, overseas, Mrs. Lemieux, wife of Capt. Victor A. Lemieux, paymaster at Wakingham, England.

ADVISORY BOARD ON CONSCRIPTION MEETS

Exemption Regulations Considered That Will Assist in Enforcing Compulsory Service.

Ottawa, Aug. 30.—The advisory board named to assist the minister of justice in connection with the measure for compulsory military service, held a meeting today. Deputy Minister of Justice E. L. Newcombe presided, and there were present John H. Moss, of Toronto, and Lieut.-Col. Machin. G. W. Biggar is on his way east to participate in the conferences of the board, and L. J. Loranger, of Montreal, is likely to be added to it. The board reviewed the draft of the regulations of exemption which Mr. Newcombe had prepared, and suggested a number of changes in them.

The work of locating the local exemption tribunals is proceeding rapidly, and in the case of some provinces the work had been completed. In cities there is to be a tribunal for each 7,500 of the population. The Province of Quebec will have about a thousand of the local exemption tribunals, and they will be provided in proportion for the rest of the provinces.
