May be consulted either at home or at the Institute.

A BOMBASTIC INFERNAL.

SOME TALL TALK FROM CROWE, THE ALLEGED MACHINE MAKER.

He is Going to Raise an Army, and Blow the British Navy Off the Seas—Some Vaporings About a Fenian Organization in the United States and Canada.

CHICAGO, Aug. 2.—A Peoria despatch says Patrick Crowe, the maker of the infernal machines, arrested yesterday by a United States marshal on the order of Attorney-General McVeagh, will be brought to Chicago for preliminary examination. $10,000 bail was offered, but refused. Crowe takes matters easy, and says he intended going through the country raising an army. It is understood that he is arrested on a charge of violation of the navigation laws.

PEORIA, Aug. 2.—Crowe confesses the knowledge of a plot to blow up British vessels and boats. After September 1st no English vessel will be safe.

Crowe has not been arrested. He is doing duty as a city lamplighter.

Crowe states that the executive committee of the United Irishmen rejected the offer of an inventor to furnish for $40,000 a torpedo boat to destroy English vessels. It was decided that better and cheaper work could be done by a depository of torpedoes in British vessels. Later the United Irishmen and Fenians joined hands. They are 6000 strong, and have branches in all the important cities of the United States and Canada. Infernal machines are being made in every city where there is a branch of the order. Crowe claims that the makers are no more liable to prosecution than are the makers of revolvers and cannon. With these weapons they could drive from the seas their enemy, destroy her trade and make progress impossible. The dynamite contained in one machine would destroy the largest block of buildings in the world. Crowe says that any warfare is good for England, who does not conduct honorable war. If she doesn't do justice to Ireland, every English ship will be sent to the bottom, until the people no longer dare embark in them. Every government building will be torn down, and a system of terrorism will be begun. He claims that there are many of these machines completed—some in France in charge of trustworthy patriots, who would use them freely. They have already greatly worried the British. They destroyed the Manchester post-office and the Victoria docks at a loss of $5,000,000. Exploded machines at Glasgow and Liverpool inflicted an aggregate loss of £5000.

THE FAIR TRADE LEAGUE.

The Trade Movement in England Assuming Shape—What the National League Demands—Fair Trade, Not Free Trade.

LONDON, Aug. 2.—The programme of the National Fair Trade League, which will shortly commence an active campaign against free trade in England, has been issued. The league demands that there be no renewal of commercial treaties unless terminable at a year's notice; that imports of raw materials for home industries be free from every quarter; that adequate duties be levied on manufactures from foreign states refusing to receive British manufactures in fair exchange, and that the same be removed in case any nation agrees to take British manufactures free of duty; that a very moderate duty be levied on all articles of food from foreign countries, the same being admitted free from the colonies and dependencies, which are prepared to take British manufactures in reasonably free interchange. The last paragraph further explains the object to be attained by the league, and is principally aimed against America. The protection movement already receives encouragement from the Conservative leaders.

THIS VILE BODY.

The Disgusting Condition of Pittsburg Cemeteries—Fields of Carrion—An Argument for Cremation.

PITTSBURG, Aug. 2.—Small-pox and typhoid fever are very prevalent here. It is feared that this winter the former will be epidemic. A horrible stench arises from the graveyards here used by the colored people. This is due to the interments of bodies one on top of another, in some instances the body filling the grave to within six inches of the top. During hot days the graves crack open, and foul steam escapes almost every night. Twenty or thirty dogs prowl through the grounds, and the sexton is frequently obliged to cover the boxes which they have laid bare.

CHAUTAUQUA MEETINGS.

What the Ladies Are Doing for Missionary Work—A State Temperance Convention—Organizing for a Great Campaign.

CHAUTAUQUA, Aug. 2.—At a missionary conference to-day, it was stated that women thus far have raised four and a-half millions of dollars for missionary work, of which $800,000 was raised this year.

A joint meeting of the New York state and Chautauqua county temperance societies was held to-day. 3000 people were present. W. C. Hall of Jamestown presided. A letter was read from Governor St. John, reporting great opposition to, but predicting the final triumph of prohibition in Kansas. It was reported that measures are being taken to organize every county and town in this state for the purpose of agitating and vitalizing Christian temperance work, and securing anti-liquor legislation.

THE NEW YORK HARTMANN.

Is He a Fraud?—Not so Sanguinary as He Pretends—In Danger of Being Extradited.

NEW YORK, Aug. 2.—The Graphic's Washington special says: It is reasonably certain that if the Russian government produced proof that Hartmann committed the crime alleged against him he would be given up by this government for trial, notwithstanding that we have no extradition treaty with Russia. It is suspected, however, at the state department that the man who claims to be Hartmann, now in New York, is not as sanguinary as he pretends.

No Gentile Need Apply.

FORT WAYNE, Ind., Aug. 2.—There is a sensation here over the attempt of the widow of the late Rabbi Rubin to shoot Dr. Bruebach, a prominent physician. Dr. Bruebach was engaged to marry Mrs. Rubin's daughter, who recently committed suicide. Mrs. Rubin opposed the marriage because the doctor is a Gentile.

A Petroleum Fever in Germany.

BERLIN, Aug. 2.—There have been several recent discoveries of petroleum in this neighborhood. A bore near the village of Peine yields in twenty-four hours 20,000 gallons. This has given rise to a speculation fever. Ground in the neighborhood is selling at from $150 to $1000 an acre.

THE WEATHER BULLETIN.

METEOROLOGICAL OFFICE, Toronto, Aug. 3, 1 a. m.—Probabilities for the lakes: Light to moderate winds, and fine warm weather.

TORONTONIANS ABROAD.

A Large Number of Them Now in New York—A Visit to Albany—The New Capitol—Down the Hudson to the Metropolis.

EARL'S HOTEL, N. Y., July 30.—The party which left Toronto per Chicora on Tuesday afternoon last arrived here on Wednesday, some by train but the majority by steamer from Albany. The trip across the lake was rather rough, yet comparatively few were sick. At nine o'clock exactly (all trains leave on time) we left Buffalo on the New York Central for New York. The train consisted of seven first-class coaches and five Wagners, all crowded. The first stop we made was at Rochester. After leaving Rochester the party prepared to retire—those in the sleepers to enjoy a comfortable night, while those in the coaches were making things as comfortable as possible for themselves.

We arrived in Albany at 5.50 a.m.; about 150 who were going by boat left the train and wended their way to the wharf. Here they found that the boat did not leave until half-past eight, thus giving us over two and a half hours to see the capitol of New York state. Although it was early in the morning people were astir, and things looked more like eight o'clock than six. Albany is a city of about 80,000 inhabitants, situated on a hill at the head of navigation on the Hudson. It contains some very handsome buildings, the most notable being the state capitol.

This is a large building, covering over ten acres of ground, built entirely of white stone and granite. It has been eleven years in course of construction, and it is expected will take over four years more to complete. It has already cost over fifteen millions of dollars, and before it is finished will cost five millions more. The main entrance is into a large corridor about 200 feet square, with halls leading off in all directions; the floors are all inlaid tile work, and the ceilings beautifully frescoed in the highest state of art. The furnishings in the senate chamber, where the late deadlock took place, are of the most costly character—velvet carpets, Turkish curtains, damask drapes, all the desks of carved walnut, the seats cushioned with silk plush. The four support pillars in this room are about 4 feet in diameter and over 25 feet high. Committee rooms off this are most elegant and spacious; the library contains the largest collection of books in the country. The stairs are all of solid marble, and when the building is completed will be the handsomest structure of its kind on the continent.

A person to do this building justice should spend at least a whole day with a guide, and then he would have a heavy day's task to see it thoroughly.

The steamer "Albany," one of the finest river boats in the world, left the wharf at 8.35 a.m., with about 700 passengers for New York.

This boat is about 300 feet long and 60 feet beam, has a carrying capacity of from 3000 to 4000 persons—her three engines together represent about 2500 horse power. She can travel at the rate of twenty-five miles an hour at her full head of steam.

SANCHO PANZA.

THE PRESIDENT'S PROGRESS.

A Very Comfortable Day—His Probable Early Removal From the White House—Talk of a Sea Voyage.

WASHINGTON, August 2, 8:30 a. m. (official)—The president passed a very pleasant night; he slept sweetly the greater part of the time. This morning he awoke refreshed, and appears comfortable and cheerful. Pulse 94, temperature 98.4, respiration 18.

12:30 (official)—The president is passing the day comfortably, with head and shoulders raised in the same manner as yesterday. At the morning dressing the wound was found to be doing admirably. Pulse now 99, temperature 98.4, respiration 19.

7 p. m.—The president has continued to progress favorably during the day, and appears perceptibly better in his general condition than yesterday, a more natural tone of voice being especially perceptible. The appearance of the wounds at the evening dressing was exceedingly good. That made by the ball is rapidly granulating, while the discharge from the deeper wound was abundant and healthy through the counter opening made by the operation. The rise of temperature this afternoon was moderate, and was attended by no inconvenience to the patient. At present his pulse is 104, temperature 100, and respiration 20.

Dr. Bliss expects to be able to remove the president from the white house in two or three weeks. It is thought that when he becomes well he will be taken on a sea voyage.

Mrs. Garfield reads to the president parts of letters concerning him, and also the daily papers. It is generally the editorials that the president wants to hear.

Dr. Bliss believes that the president will be able to sit up inside of three weeks at the furthest, possibly within a fortnight, and be competent to sign urgent papers within ten days, without detriment. Dr. Hamilton is also reported as saying that it looks as if the president, in a week or two, would be able to give some attention to his executive duties.

Dr. Bliss believes the bullet lies an inch to an inch an a half below the surface.

PERSONAL CHIT CHAT.

Mr. Wm. B. Sullivan, of the Chicago Inter-Ocean, and wife, are among the guests at the Rossin house.

Isaac Levan, B. A. (Toronto), has been appointed assistant classical master of Brantford collegiate institute.

Rear-admiral Halligon, of the French navy, spent yesterday in the city very quietly. He goes to the Falls to-day.

Mr. John Page, chief engineer of canals, arrived at St. Catharines yesterday. He and Mr. Munro will accompany Sir A. T. Galt on a tour of inspection along the canal.

Retirement of a Bonapartist Leader.

PARIS, Aug. 2.—M. Rouhers, who has been the director of the Bonapartist cause, announces his retirement from political life. Rouhers action is caused by Prince Napoleon placing himself at the head of the party.

The World's Y. M. C. A. Conference.

LONDON, Aug. 2.—At the conference of the Young Men's Christian associations, Samuel Morley, M. P., presided this morning, and Earl of Aberdeen this afternoon. The international committee of New York presented a paper on finances. Russell Sturgis of Boston presided at the evening session. A. C. Morse of Cleveland presented a paper on social agencies.

—In the hot months of July and August the blood should be kept pure and cool with an occasional dose of Dr. Carson's Stomach and Constipation Bitters, a worthy family medicine. In large 8-ounce bottles, 50 cents, at all drug stores. Smith & McGlashan special agents, 135 Yonge street.

UNIVERSITY OF TORONTO.

RESULTS OF THE JUNE MATRICULATION EXAMINATIONS.

The Scholarship Men—The Honor Men—The Successful Pass Men in Medicine and Arts.

A HANDSOME DONATION.

A Toronto Lady Endows a Scholarship in the University of Toronto.

At the meeting of the senate of the university of Toronto last night, the following letter was read from Mrs. Mary Mulock, mother of the vice-chancellor:

88 ST. ALBANS STREET, Toronto, Aug. 2, 1881.

DEAR SIR,—I have much pleasure in enclosing my cheque for $2000, with which to enable the senate to found a scholarship in the university of Toronto, to be awarded in the faculty of arts on such terms and conditions as the senate may determine. Without intending to direct the application of the proposed scholarship, I take the liberty of suggesting whether it can be advantageously awarded in the department of Greek and Latin classics, and either in addition to or in lieu of any existing scholarships in that department. I am yours very truly,

MARY MULOCK.

Alfred Baker, M. A.,
Registrar of the University.

Punishing the Constituencies.

LONDON, August 2.—In the house of commons to-day, the attorney-general said the government would bring in a bill suspending until next session the writs for new elections in Canterbury, Chester, Gloucester, the city of Oxford, the town of Boston, Macclesfield and Sandwich, where returned candidates were unseated on petition.
