LOCAL AND OTHER ITEMS

SUMMERSIDE is to have the electric light. Tenders have been called for the lighting of the town.

H. M. S. CANADA arrived here Sunday afternoon and will remain about ten days. She came here from Gaspe, P. Q.

E. COLMAN BOWSER, contractor and builder, of Dorchester, was drowned at Sackville, N. B., Saturday afternoon.

THE steamer Florida, arrived here from Boston Monday evening with a large number of passengers and a general cargo. She sailed on her return evening.

IT is reported that an insect which destroyed the potato bug has made its appearance in some sections of the province. It is to be hoped that the report is founded on fact.

THE collector of Customs at Port Hawkesbury, C. B., seized the American fishing schooner Henry L. Phillips at that place, on Monday for fishing with trawls inside the limits.

G. B. FRASER of Bradalbane, who about four years ago was a prisoner in the employ of Messrs. McLeod & McKenzie of this city, was drowned near St. John, N. B., on Dominion Day.

AT a meeting of the Branch held here Friday evening it was decided to send a parade team to the Friends's Tourney in St. John if a sufficient number could be got to go.

REV. R. S. Macdonald, of Rustico, delivered an interesting lecture in French at Fifteen Point on last Wednesday evening. His subject was "Early French History of the Island of St. John."

TUESDAY evening the lamp on the range light at Covehead was struck by lightning and broken. A horse belonging to the light-keeper, Mr. McMillan, was also struck by the fluid and killed.

THE Citizens Band played, for the first time this summer, on Queen Square Thursday evening. A large number of people promenaded the square and were delighted with the music and the beautiful appearance of the gardens.

THE annual gathering of the Clans under the auspices of the Caledonia Club of Prince Edward Island, will be held on the Driving Park at Georgetown on Wednesday, August 8th. A good programme of sports will be prepared for the occasion and there will be special fares along the line of railway.

U. S. CONSUL KANE officially visited the ship and paid his respects to Capt. Wilson and the officers of H. M. S. Canada yesterday afternoon, and was received with the usual salute of seven guns. His Honor Lieut.-Governor Howlan visited the ship this afternoon and the customary salute was also fired in his honor.

THE great eastern tea at Cardigan Bridge yesterday was a grand success from every point of view. The attendance was large and the various forms of amusements were well patronized. The weather was all that could be desired and all who attended very highly pleased with the good time afforded. The League of the Cross Band furnished music for the occasion. We have not heard the amount realized but it must have been large.

THE S.S. Stanley, was cruising at the mouth of the harbor on Thursday and Friday and on the latter day some of the officers came ashore in the boat. We are informed that they have some lobster traps set outside with the object of determining whether or not the lobsters are about spawning. This is with the view of a possible extension of the fishing season from 3rd Cow Head west.—*Pioneer.*

MR. Simon D. Fraser, for many years the proprietor of the Rochfin House, in this city, died suddenly early Thursday morning. He had been in failing health for some time previous yet was able to be out on Wednesday. When he awoke on Thursday he complained of feeling very ill and could be thought he was going to die. His daughter went into the bedroom to stay with him but having occasion to go out for a few minutes she was horrified to find shortly father had passed away during her absence.

SIDNEY Harper the 10 year old son of Mr. A. W. Harper of this city was drowned at our Kensington rifle range Thursday. On that day he went out berry picking with his sister and on getting near the creek left her and went swimming with some boys. He started to cross the creek on a raft but fell off and being unable to swim he sank to the bottom. The other boys were unable to save him. Dr. James Warburton was quickly brought to the scene, and began to dive for the body of the unfortunate boy. After about fifteen minutes of great exertions, the body was brought to the surface, and then conveyed to Mr. Harper's residence.

We need scarcely advise our readers in the eastern and central portions of the Province of the advantages the Great Western Excursion to Alberton on Wednesday next, the 18th inst. affords of seeing this fair Province from end to end at a trifling sum and at a time when everything is looking its very best. This Excursion and Tea will undoubtedly be the biggest affair of the kind ever held in the west and everybody knows that the west has the best manners worked down to a science. Should the weather prove favorable it is more than likely that 10,000 will assemble in Alberton to hear the Federal Ministers' addresses and participate in the Tea. See the time table and fares in another column.

One of the most successfully operated and best appointed cheese factories in the Province is that located at Vernon River Bridge. The factory is in full boom and making over one hundred cheese a week. Last week one hundred and fifteen were made and the week before one hundred and ten. During the month of June three hundred and eighteen cheese were made and the manager expects to make over four hundred during the present month. About fourteen thousand pounds of milk are received at the factory daily. On Monday the supply of milk became so great that it was impossible to make and a wagon load had to be refused. The factory is under the management of Mr. Venning, a centleman of Scottish extraction, who is at all times willing to show visitors through the establishment and answer the numerous questions of the curious. Mr. Venning has with him three assistants. The factory is scrupulously clean and all the appurtenances are in good condition. Mr. Venning expects to have 1700 or 1800 cheese made by the end of the season.

A Montreal boarding house keeper had a near neighbor of his summoned to court the other day for common nuisance. The alleged nuisance is a rooster, that, it is averred, has abnormal crowing powers. The Bonifacc declared that several of his boarders have left his house because of the noisy rooster.

FARMER'S COLUMN.

USE A THERMOMETER!

"I should like to know why my butter is so long in coming," said a neighbor to me the other day as she came in while I was churning. "The cows are not farrow; they are salted regularly, the cream is scorred just right, and still the butter will not come."

"Do you use a thermometer?" I asked. No; she hadn't one. I advised her to get one the first time she went to town, and she told me this morning that she had no more trouble since using it. As for me, I do not think I should try to make butter if obliged to do so without a thermometer. The cost is only twenty-five cents, and it may save a great deal of unnecessary labor in churning, and a great deal of vexation over soft butter also. If cream is too cold, it is longer in coming. That is why it sometimes swells in the churn, living to twice its original bulk. It is only after a long, tedious churning that the butter will come. A thermometer would have told at the outset that the cream needed warming, and there would have been no guess-work about it either.

Then in hot weather the thermometer shows how much ice or other cooling material is needed to make the butter come just right. How provoking to hear the announcement—"butter's come!" and on looking into the churn find a soft, white mass that ought to have been hard and yellow. All this can be avoided by the use of a thermometer.

The temperature at which the cream should be churned varies with different cows, and no set rule can be given. If the cows are Jerseys or Guernseys, 64° or even 66° can be safely tried in cool weather, but the former figure is high enough in warm weather. Care must always be used to stop the churning before the butter grains adhere, or it cannot be perfectly washed.

Cream from milk of common or native cows requires a lower temperature, as the butter melts at a point that would hardly affect the Jersey's or Guernsey's butter. A thermometer in the dairy room will pay for itself many times over, and any woman who is doing without one will find it indispensable when she uses it awhile. I have seen women who tried the cream with the finger to tell whether it was too warm or too cold! This is not a pure way, and it is not very neat either.

A person asked me once if I ever worked the butter with my hands. I replied "No," very emphatically. It is all very well to put the hands into bread and other cookery when necessary, but never, never put them into butter. Not only on account of the uncleanliness, but the hands being warm will spoil the grain of the butter quicker than anything else.

"But," say one, "when the butter is so very hard as it is in winter it cannot be broken up and worked with a knife." [illegible] If it is worked, as it should be, when it first comes from the churn. It is then in the best possible condition for working. One working is sufficient; more is only an injury to its grain. Work it just enough, so that it is not streaky, and then stop. Make into rolls, or pack in crocks, and your butter is of better quality than it will be with any subsequent working.

This is one of the old rules and one which is hard for some butter-makers to get out of. Their mothers worked their butter twice, and they think they must do the same. That may have been necessary when they had no ice and the butter was too soft to work nicely. The butter-makers of olden times did not wash their butter, consequently it had to be worked more to get the buttermilk out. Nowadays every one washes butter thoroughly, and once working is better than more.

ELLA ROCKWOOD, in *Country Gentleman.*

There is no joke about it; the hen is really one of the greatest sources of profit on the farm, and yet it is generally considered a rather small business to write or talk about poultry, or for the busy farmer to pay any attention to the hens and chickens except to club them out of his way occasionally. But when we stop to think of the food that they furnish for the table in the way of eggs, to say nothing of the delicious broils, fries, stews, and roasts, and add to all this the cash received for the surplus eggs and chickens sold each year, and all produced mainly from what would otherwise have gone to waste, it don't look so very small after all. The chickens are at home on the farm; they are natural scavengers and cleaners, and they never do so well under confinement, no matter how well and how intelligently they may be cared for, as where they have the free run about the barns and orchards which the farm affords. And many a thrifty farmer's wife takes advantage of her knowledge of this fact not only in providing for her table but in paying for a thousand little things that would otherwise have to be provided for out of the husband's bank account. There is one farmer's wife in Southern Iowa who two years ago, saved up enough from the eggs and chickens sold to pay off a balance of $180 due on a mortgage on the farm without her husband suspecting that anything whatever was being saved from that source. In fact the farm is the place to make money out of the chickens. It is an easy matter to fence them out of the garden and the door-yard, and as for everything else, they will much more than pay as insect destroyers for all the damage they do to the growing crops.

In modern times, if a fever or diphtheria attacks a family, the intelligent physician looks at once for a local cause, and often finds it in a drain, vault, cellar, or some contaminated spot near the house. I have known house slops to be thrown out from the kitchen-door on the same spot, day after day, until it reeked with foul odours. The question, how do you dispose of the house slops?—therefore becomes one of great importance to the family. I am afraid of drains as ordinarily constructed, both because of the danger of sewer gas finding its way into the house, and also of the ground becoming contaminated so as to effect the water supply. If a drain is used for a sink and house slops, it should be made of glazed sewer-pipe, with the joints cemented, should have a trap which would make it impossible for gas to get back into the house, should be extended to quite a distance from the house, and the outlet placed where it would be flushed by heavy rains.

I do not, however, advise the use of a sink-drain for a farm-house and would not have one under any conditions. The safest and best way to dispose of all the house slops, is to let the earth deodorize and and the plants utilize them. The earth is a perfect disinfectant, and in the wonderful laboratory of nature, growing plants can transmute that which is offensive and poisonous into wholesome fruits and vegetables. It is my practice to carry all slops to some distance from the house, and pour them down here and there, changing the place from day to day, where fruit trees, vines and grass can take them up and render them innocuous. All the slops made by a family during the growing season, if poured on a few square rods of grass, would be at once utilized and distributed. A row of gooseberries or a few fruit trees can absorb and utilize a large quantity. A woman afraid of well, cistern, or a catchy disease from the proximity of a stable manure heap, or house, can be made into excellent compost by receiving the slops, and if, as they are applied, a few shovelfuls of the earth is used to cover them, there will be no possible danger from the heap

About People Here and Everywhere.

Senator Glazier of Sunbury county, N. B., died at Ottawa Saturday. He was aged 66 years.

Miss Conman, of Harvey, N. B., who was injured in the recent railway accident is improving slowly.

Revd. J. Arsenault C. S. C., of St. Joseph's College, Memramcook, N. B., arrived on the 11th and Friday evening to spend portion of his vacation.

Thomas Hanrahan, Esq., was reappointed a member of the Charlottetown Board of School Trustees at Monday evening's meeting of the City Council.

Rev. Mr. Fischer, pastor of the American Methodist Episcopal church in Rome, has entered the Catholic church, and has been baptized.

Mr. E. B. Eddy, the well-known manufacturer of paper and wooden utensils of Hull, Que., was in the city Friday on his wedding tour, and gave us a friendly call.

Mr. Justice Harlan, of the U. S. Supreme Court, who represented that country in the Behring Sea arbitration, is in Halifax, where he intends spending the summer. His wife and daughters are also with him.

Mr. G. F. Beer, of Beer Bros., and Mrs. Beer, left Saturday morning on a two months holiday trip, which will include England, Ireland and Scotland. Mr. Beer also intends combining business with pleasure while absent.

His Lordship Bishop Cameron of Antigonish, accompanied by his Secretary, Rev. Dr. Thompson, and Very Rev. Canon O'Donnell of Quebec, arrived here Friday evening on a brief visit. They left again for home Monday morning.

Dr. A. A. McLellan, of Souris, was in the city Saturday on his way home from the western end of the province, where with Mrs. McLellan and family, he had been visiting friends and relatives. Mrs. McLellan will not return yet for some time.

Rev. Finlow Alexander and Professor Stockley, the New Brunswick gentlemen who are somewhat dubious about the stability of the religious platform upon which they stand have gone to Montreal to consult with a leading Anglican divine there before announcing their decision as between Anglicanism and Catholicism.

Summer School of Science.

The Summer School of Science began its labors in Upper Prince Street School Thursday morning. Classes have been organized in Botany, Zoology, Mineralogy, Physics, Chemistry, Psychology, Civics, Kindergarten, Physiology, Music, Elocution and Pedagogics, Students now in first class running order. The classes remain in session seven and a half hours a day, and the proceedings will last a fortnight. The greatest interest is being taken in the work by the members of the school. The faculty are nearly all specialists and very enthusiastic. Dr. J K Dorsey, of this city, delivers the lectures on physiology. The other lecturers all belong to the sister provinces

The faculty and members of the school were welcomed to the city in the Opera House on Wednesday evening. Supt. of Education McLeod presided. Addresses of welcome were delivered by Lieut-Governor Howlan, Mayor Dawson, Hon. D Laird, Dr. Anderson and Judge Fitzgerald. Prof. Andrews, of Mount Allison, President of the School, replied on behalf of his fellow members. During the course of the proceedings Mrs. Harrison of Sackville delighted the audience with two beautiful vocal solos. This lady's fame as a vocalist is not confined to the Maritime Provinces, and right well does she deserve the high encomiums heaped upon her. Mr. Raymond Archibald, a graduate of Mount Allison Conservatory, also gave two violin solos in a most pleasing manner.

The school began its work with an enrollment of fifty-five pupils. Now the registered number attending its classes is ninety-one, of which number 46 are P. E. Islanders. Saturday a large number of the school drove to Rustico on a botanical and geological expedition. Although the day was not as pleasant as it might otherwise have been, on account of the rain, the trip was a very enjoyable and profitable one. An excursion to Governor's Island for a similar purpose is also on the boards. On Friday evening in the Opera House a concert in connection with the school will be given. Mrs. Harrison will have the management of affairs, and will be assisted by some of our best local talent. A rich musical treat is surely in store for our concert goers.

Obituary.

It is with deep regret that we have this week to chronicle the death of Miss Annie Grant, daughter of William Grant, Esq., of this city, which occurred shortly after eight o'clock, Saturday evening. The deceased had been feeling poorly for some time past. Recently she took a trip to Boston to consult with specialists but the medical aid there afforded her proved of little, if any, avail. She returned home on Monday of last week accompanied by her brother, Patrick. After her return she gradually failed and it soon became apparent that the end was fast approaching. Her sister, Sister St. Mary of Good Counsel of the Notre Dame Convent in Arichat, C. B., was telegraphed for and arrived about eight o'clock Saturday night. About fifteen minutes after the arrival of the Reverend Lady, Annie calmly and peacefully expired, fortified by the last and rites of the church and surrounded by her father, sister, brothers and near friends. Her illness was borne throughout with almost incomprehensible patience; she never complained and was always apparently in the best of spirits. Her funeral took place to St. Dunstan's Cathedral where High Mass was celebrated Monday morning thence to Vernon River where the funeral services and interment took place. The funeral was very largely attended; the pall bearers were: Patrick Doyle, H. J. Maddigan, William J. O'Reilly, Daniel J. Riley, J M. Sullivan and D. A. Moran. The floral offerings were numerous and beautiful. Magnificent designs in crosses, wreaths and other appropriate emblems were given in profusion by her many kind and loving friends. The deceased was a very popular young lady and beloved by all who had the pleasure of her acquaintance. To her bereaved father, sisters and brothers we tender our most heartfelt sympathy in their sad loss.

In the great sister's stillness and seclusion,
By guardian angels led,
Safe from temptation, safe from sin's pollution,
She lives, whom we call dead.

A GOOD APPETITE.

Always accompanies good health, and an absence of appetite is an indication of something wrong. The universal testimony given by those who have used Hood's Sarsaparilla, as to its merit in restoring the appetite, and as a purifier of the blood, constitutes the strongest recommendation that can be urged for any medicine

Hood's Pills cure all liver ills, biliousness, jaundice, indigestion, 25c.

Kinkora Tea.

The tea party at Kinkora yesterday was attended by a very large number of people from all parts of the Island and was without doubt a very successful affair. The train from this city brought upwards of three hundred excursionists and the Western train had about the same number. A very large number from the surrounding country went by carriages, and it was estimated that nearly two thousand people were present. The tea tables were abundantly supplied with all the delicacies of the season and were highly creditable in every respect to the ladies of the parish. First class temperance refreshments were also supplied on a plentiful scale. The American tent, presided over by Mrs. Davis and Miss Gaul, of New York, who is at present on a visit to the Island, was a great attraction and added handsomely to the proceeds The sale of cakes by Mr. Manson, of Summerside, and the different lotteries also realized large sums St. Dunstan's College Band discoursed excellent music. We have not heard the amount realized, but it must be a very handsome sum. In the election contest for the most popular politician, Mr. R. Hunt, Summerside won "by a large majority."

DIED.

At New Haven, on the 31st of May, 1893, Sarah Ann, daughter of Elizabeth and Thomas Kickham, aged 9 years and 3 months.

Also, at the same place, on the 17th May, 1894, John Hector, son of Elizabeth and Thomas Kickham, aged 13 months and 9 days.

In this city, on the 7th inst., Annie, beloved daughter of William Grant, in the 28th year of her age. She leaves a father, two sisters and two brothers to mourn her loss. May her soul rest in peace.

Whatever may be the cause of blanching, the hair may be restored to its original color by the use of that potent remedy Hall's Vegetable Sicilian Hair Renewer.

It is important to keep the liver and kidneys in good condition. Hood's Sarsaparilla is the remedy for invigorating these organs.

SOURIS TEA.

The congregation of St. Mary's Church, will hold another of their celebrated Teas on

Wednesday, July 25th,

on the old grounds, adjoining Agricultural Hall, Souris East.

The committee hope to make this THE Tea and are negotiating with the railway for the best possible arrangements from Charlottetown and the West, of which due notice will be given. Come early and avoid being overcrowded.

Admission 25 cents; children half price.

G. B McEACHERN,
Secretary.

July 9th, 1894.

Mortgage Sale.

TO be sold by Public Auction, on Wednesday the Fifteenth day of August next, A. D. 1894, at the hour of 12 o'clock noon, at the Court House, in Charlottetown, under and by virtue of a power of sale contained in an Indenture of Mortgage, bearing date the Twenty-third day of November, A. D. 1888, and made between John L. McLellan, Ann McLellan his wife and John F. McLellan and Catherine McLellan his wife of the one part, and Joseph Hensley and Edward Griffith, Trustees of Mrs. Louisa Cook of the other part:

All that tract, piece or parcel of land situate lying and being on Lot Seventy in Prince County in Prince Edward Island, bounded as follows, that is to say: Commencing at a stake and stones on the eastern side of the road leading to Princetown and on the northern boundary of land formerly in the occupation and running from thence north forty-four degrees, east eighteen chains and forty-two links to the post at the northwest angle of the Mill land, from thence north eighty-six degrees east forty-nine chains to William Lockhart's land, thence south four degrees west sixty-one chains and forty-six links along said road to land occupied by the heirs of Donald McLellan, thence south forty degrees west, three chains and forty-five links to the Princetown road, thence southerly along said road twenty-nine chains and fifty links to the stake at the place of commencement, containing an area of eighty-two acres and three-quarters (82¾) of land at the more or less; reserving thereout sixty acres at the eastern end of said farm conveyed to one Lockhart, and half an acre at the southwestern end conveyed to Mr. Coles.

For the purchaser apply at the office of Bayfield & Blanchard, Solicitors, Charlottetown.

Dated this tenth day of July, A. D. 1894.

EDWARD BAYFIELD,
Surviving Mortgagee.

July11—2i

Children of Mr. and Mrs. M. M. Sutter Altoona, Pa.

Both Had Eczema in its Worst Form

After Physicians Failed, Hood's Sarsaparilla Perfectly Cured.

Great mental agony is endured by parents who see their children suffering from diseases caused by impure blood, and for which there seems no cure. This is proved to be true when Hood's Sarsaparilla is recommended, for it expels the foul humors from the blood, and restores the diseased skin to fresh, healthy brightness. Read the following from grateful parents:

"To C. I. Hood & Co., Lowell, Mass.:

"We think Hood's Sarsaparilla is the most valuable medicine on the market for blood and skin diseases. Our two children suffered from Eczema in its worst form for two years. We had three physicians in that time, but neither of them succeeded in curing them or even in giving them a little relief. At last we tried Hood's Sarsaparilla, and before they had taken half a bottle they showed marked signs of improvement. They now enjoy perfect health. We recommend Hood's Sarsaparilla to all troubled as our children were."

M. M. SUTTER,
Altoona, Pa.

Wm. Grant & Co

QUEEN STREET.

Charlottetown, P. E. I.

We are prepared to give you as good value for your money as any house in the trade.

We import direct and pay cash for every article in our store, and as our expenses are light we are in a position to do as we say.

Flour, choice brands, from $3.10 up.

Give us a call, and see if we do not mean what we say.

Cash or goods in exchange for Butter or Eggs.

W. GRANT & CO.'S,

June 27, 1894.

The Biggest & Best TEA OF THE SEASON

WILL BE HELD AT

Sacred Heart Church, Alberton,

—ON—

Wednesday, July 18th.

All the usual attractions which make Tea Party excursions enjoyable, and many novel ones will be provided, as the committee in charge are bound to make this Tea surpass anything of the kind ever attempted in the past.

Amusements of all kinds, and to the measure of string and wind music are being prepared.

Those residing in the Eastern or middle parts of the province, will have a grand opportunity of seeing the beautiful west. "The richest portion of Prince Edward Island," as a recent writer in one of the Charlottetown Daily Papers well remarks. The fares as given below insure a cheap and pleasant outing with everything possible provided by way of refreshment and entertainment at Alberton.

Should their legislative duties permit, several PROMINENT FEDERAL MINISTERS and leading Liberal Politicians will be present, and deliver addresses—make it a point then to be present and have it to say that you have participated in the grandest tea ever held in this province.

A special passenger train will leave Charlottetown for Alberton at five o'clock a. m. This train will run on the following Schedule, which is Standard time:

Leave Charlottetown	5.00	a. m.
" Royalty Junction	5.15	"
" North Wiltshire	5.51	"
" Hunter River	6.07	"
" Bradalbane	6.26	"
" Emerald	6.33	"
" Kensington	7.00	"
" Summerside	7.25	"
" Miscouche	7.40	"
" Wellington	8.05	"
" Port Hill	8.35	"
" O'Leary	9.30	"
" Bloomfield	9.46	"
Arrive Alberton	10.30	"

And will leave Alberton for return at 4 p. m.

Return tickets at the undermentioned rates will be issued by this train, good for return same day by same train only.

Ch'town to Winsloe inclusive		$1.25
Milton " Clyde	"	1.15
Fredericton to Blanchard	"	95
Kensington " St. Eleanors	"	85
Miscouche " Northam	"	75
Port Hill " Conway	"	65
Portage " Howlan	"	45
O'Leary		30
Bloomfield		20
Elmdale		10

And by all regular trains from Tignish at the following rates; Tignish 40 cents, Harper's 30 cents, Dalton 25 cents, St. Louis 20 cents, Alma 10 cents.

Return tickets will also be issued from all stations east of Royalty Junction to Alberton by afternoon trains on 17th good for return on the 19th to enable passengers from stations east to connect with special on the 18th.

Should the day prove unfavorable the tea will take place on the first fine day afterwards.

JOHN P. BRENNAN,
Sec'y.

Alberton, July 11—2i.

BEVER HANNAH, Nova Scotia.

CHAS. CLUTHE, Esq., Toronto.

With great pleasure I forward you the following testimonial: When three years old my son fell lame. It grew worse and worse, [illegible] weak, the ankle swollen, bending the sinews shrinking. After having applied one of your white oscillating instruments of the same for two years without in two years, and now can say he is as lame as the other. The cure brought you more profit than any other [illegible] of your advertisement. Yours truly,

J. M. PARKER,
Pastor of the River Hebert Baptist Church.

OLD CHELSEA, QUE.

CHAS. CLUTHE, Esq.

Dear Sir,—I recently took you for the miraculous cure you have performed on my foot. I was lame for over twenty years, and had to use a crutch or cane. I was told by doctors that which I was to never be cured. I saw your advertisement in the paper, and thought I would try your truss. I wore it for a short time, and it cured me as lame as I did use to be natural as mine.

We all thank you sincerely.

MAGGIE JANE YOUNG.

A BAD CASE CURED BY THE SCIENTIFIC TRUSS.

Could not get a Truss to hold Rupture for Eleven Years.

PRINCETOWN, QUE.

CHAS. CLUTHE, Toronto.

My Truss Sir,—About two years ago I got from you a truss, to hold my rupture. I was troubled for several years having tumors of almost every description on my person, and was so weakened that I was unfitted for work for several months. I was also troubled with a rupture, for which I could get no relief, until you put in my mind. I was very much pleased with your truss, and was able to work in a few days. The rupture stayed up, and I was able to do as much work as I did use to before I had the rupture. I am now as well as I did use to before I had the rupture. I am now as well as I did use to before I had the rupture. I am now as well
