Much interest is felt over the Great Metropolitan, which is to be run at Epsom to-day, and the City and Suburban, which takes place to-morrow. The betting shows that the chances of American horses are looked upon as remote. Iroquois carries the top weight in the first, and Foxhali in the second race. If they fall a light-weighted American may salip in. This would give a fresh bound to turf matters.

In response to Harry Gilmour's challenge, George Fulljamee, who also claims the light-weight championship of Canada, has posted \$100 forfeit and challenged Gilmour to cove it. Mitchell's Style. From the New York Truth

Now that Mitchell has demonstrated that he is pounds over the middle-weight form, and fully able to cope with any sad all the purillists of America, perhaps with the exception of one man, and he John L. Sullivan, it may not be out of place to ascertain how he would fare with this Gollath of the magic circle. This as yet remains to be seen, but it is certain that he is not only a scientific boxer, but a regular hurricane fighter. He possesses a faculty of boxing which seems to have been overlooked by the modern aspirants for Jim Belcher's mantle, viz. that of fighting at the body and so reducing his antagonist to his own weight and thereafter having a comparatively easy job in resching his adversary's face. This was one of the great secrets of T. m. Sayers' success, and Yankee Sullivan is recorded as being a terrible body punisher, especially when at short range. Jem Mace and Joe Goss each paid more attention to the victualing department and the ribs than the frontispiece, and as a natural consequence the opposition invariably fell off wesk long before their faces were disfigured. One of the reasons why this style of fighting has been alrandoned is because the regular ring encounters have been tabooed, and in their place glove-fights and boxing bouts have come to be considered the proper thing. The first-named style of contest was necessarily productive of hard and straight hitting, while the latter linaugurated a system of slapping at the neck and shoulder, which, while the noise resounded loudly, did little or no damage beyond a slight reddening of the skin.

Here, then, is the key to the enigma why the latter-day school of boxers all aim for the face. It is effect, and the only way of making a telling blow—that is, one that will electrify the audience—is to flip the glove somewhere around the head. Anyone who has followed fistic sports during the past three or four years can readily call to mind that the most taking bexers are those that do the most flapping. Judging from Mitchell's attitude and general style Now that Mitchell has demonstrated that he is pounds over the middle-weight form, and fu'ly able

The reason why the surgeons of the International Throat and Lung institute, 173 Church street, Toronto, are making so many wonderful cures of catarrh, catarrhal deafness, bronchitis, asthma and consumption are: They have none but skilled and qualified medical men connected with the institute. They adhere strictly to their specialty and they use the spirometer invented by M. Souvielle, ex-aide surgeon of the French army, an instrument which conveys the medicines in the form of cold inhalations to the parts diseased, which is the only way these diseases can be cured. They are treating hundreds of patients every month, having twelve surgeons engaged in their work in Canada alone. Parents who have boys to clothe will be at our store. Some will buy School Suits for their boys. They will make selections from the large number of styles we are selling at \$1.50 \$2. and \$3. Others will decide that the suits their boys have been wearing for Sunday will be used for every day wear, and will make a selection from the elegant stock of fine Suits which we sell at \$4.\$5. and \$6. Some of the very finest suits made from imported goods at \$7.\$8, and \$10. Probably the busiest place in our store will be the department where we keep the short pant suits for boys, 4 to 11 years of age. We are always busy in this department. We do not know whether it is because our prices are so much lower than can be found elsewhere, or owing to the immense stock and large variety of styles we have for our customers to select from. Perhaps both reasons combined account for our immense trade.
