Canada.—By an Act to make provision for a Geological Survey of the Province, (8th Victoria, chap. 16.) two thousand pounds is to be annually applied for five years, to the above purpose. The Railroad from Kingston to Spanishtown and Angels is very soon to be opened. It is laid down on the most solid and magnificent style, and large prices are offered for shares. The Engineers have arrived to commence the northern Railroad, and the ground is also being surveyed for the Jamaica South Midland Railway connecting Wortey's Bay, a distance of about 150 miles. There are two more Railways to be undertaken. The capital of the five in England is about £2,500,000 stg.

From the Pacific.—Gen. Castilla, President of Peru, has convened the general Congress, which is now in session, and it is understood that full satisfaction has been made to Admiral Seymour, for outrage committed upon British property by the revolutionary Peruvians lately in arms against Gen. Castilla.

A British fleet is said to be on his way to Oregon, to protect British property and settlers at Astoria, and from the language used by the officers of the British Squadron here, we are led to believe that the report is correct.

We have had intelligence from Tahiti to the 1st ult. The French retain the Islands, and there is not the most remote prospect that they will ever give them up. The loss to our whaling interests is very serious, as the French authorities prohibit traffic with the natives, and there is no other port for obtaining supplies in that vicinity. An American merchant vessel has been despatched to the Fejee Islands with arms and ammunition for the natives, to enable them to fortify themselves and maintain their independance against an expected attack from the French or English.—[Cor. N. Y. Sun.

Washington, August 21.

" I am enabled from a conversation of a member of the Cabinet, to state to you the views of the Government on our present relations with Mexico.

" *There will be no war with Mexico.* The loan of $15,000,000, asked for by that government of their Congress will be a failure. That failure will be made the ground of not declaring war.

" Thus far the Mexican government has exhibited no preparation or ability to carry on a war, but has only manifested itself desirous to declare war.—Without discussing the probability of such a step on the part of the Mexican government, I will at once state the policy and result, as understood by Mr. Polk. The interest of France and England would immediately bring them forward as mediators—Mexico and this country would be brought into negociation—Mexico will claim Texas—this country will deny the claim, but admit the rights of Mexico to territory on this side of the Rio del Norte, and negocieate for and purchase this territory, in order that the Rio del Norte shall be the boundary line of the two nations; and this country will agree to pay to Mexico a sum of money for this territory, sufficient to cover the value of all Texas."

The refusal by the authorities of Yucatan to join the Mexican Government in a war against the United States, is an important fact, that cannot fail to exercise a political influence on current events. It shows at least that the feeling of hostility, which is so clamorous against this country at the capital, does not extend to the remote Departments. The province of Yucatan has ever been distinguished for its liberal notions. It fought against Santa Ana, and resisted the establishment of Centralism successfully. And for some time past, its position has been one of almost entire independance of the General Government. The event is no doubt within the recollection of our readers, that during the revolution which broke out there several years ago, Yucatan formed an alliance with Texas, and cooperated with the Texan fleet, under Commodore Moore, in waging war upon Mexico. The population, we are told, are superior as a great mass to the rest of the Mexicans.—[N. Or. paper.

Miraculous Escape.—Bulbigh Salterton has been the scene of a most thrilling incident. Six infant children, on Wednesday morning, got into a boat on the beach, and a mischievous boy shoved it off. The boat drifted away to sea before the children were missed. Terrible was the agony of the mothers when they knew it. Daylight returned, and still no tidings of the helpless children. A Plymouth trawler, fishing yesterday morning, saw something floating at a distance; he bore down to it, and discovered it to be a boat, and in the bottom the six children, all cuddled in like a nest o birds, fast asleep. Five of these children were under five years of age, the sixth is but nine years old.—*Western (England) Times.*

Letters from Nimeguen and Heusden state that a singular phenomenon has been observed for some days past, which gives the farmers some uneasiness; the *potatoes* die in the course of one night, without their being able to discover the cause. When the field is once infected all the plants wither and are dried up in a few hours.—*English paper.*

The *Medical Times* describes the case of a farmer, who died after several days extreme suffering from hemorrhage, vomiting, &c., occasioned by his accidentally getting a small quantity of guano dust into his throat.

Mars, Saturn, and Venus.—The planet Mars will attain its nearest approach to the earth on the 21st of August, at which time it will be little less than fifty millions of miles distant. So near an approach of Mars to our planet, the Courier and Enquirer says, occurs but once in seventeen years, and its appearance is now more brilliant than it has been since 1828. It now rises in the south-east, about 8 o'clock in the evening, and may be distinguished by its remarkably bright and deep red colour. About fifteen degrees westward, is seen the planet Saturn, while in the opposite quarter of the heavens, over the horizon yet glowing with the fires of the expiring Sun, hangs suspended, brilliant with soft and silvery light, the Star of Evening, Venus.—*New York paper.*

Lowell.—This town is not quite twenty-five years old, and already ninety one mill powers have been sold there, and about all the mill powers are exhausted. Steam, however, is to be used for more extensive manufacturing purposes. A great deal of the present water power, it is said, will also be saved by what is called mule spinning. It is not easy to imagine what may be the ultimate growth of a town like this.—*Boston paper.*

Pirates.—Mr. Saunders, of the St. Vincent, arrived at Bristol from Jamaica, reports having been spoken by a brig and a schooner, under Spanish colours, in lat. 40 38, on the 24th July, and from every appearance, corroborated by a man sent into the foretop for observation, they were pirates, and would, no doubt have attacked the St. Vincent, had not a large American ship hove in sight at the time, when they hauled their wind, and were soon lost sight of.—*London Shipping Gazette.*

Tuesday, September 9, 1845.

Mr. Cameron.—I have just observed an Editorial in Mr. Gillies's "Colonial Advocate" of yesterday, on the subject of my Accounts with the City and County, and altho' I had determined not to notice any observations that might appear in print touching the differences existing between the Public Authorities and myself, while the Arbitration agreed upon was pending, I cannot but express my surprise that Mr. Gillies had not more correctly informed himself, before he would put a paragraph like the following afloat, *as a fact.* He says—" The Law passed at the last session " to enable this matter to be settled, *frittered away as it* " *was by the collision of parties*, is found just good for no- " thing, as it gives no power to coerce witnesses, and none " are likely to attend voluntarily, and thus the whole matter " is paralized, *which there is no doubt whatever, was the ob-* " *ject and intention of the parties in the Assembly who* CON- " COCTED THIS BILL."

This is altogether untrue. On the contrary, the Bill was prepared by the Sessions themselves—was read in the presence of the Grand Jury—was carried to Fredericton by James Peters, Jun. Esq., the Clerk of the Peace—was handed by him to W. H. Street, Esq., one of the City Members, who delivered it to me to bring forward in the House, and it passed the House *without one word of alteration*, and without a dissentient voice. It was sent to the Council and became a law of the land, subject to no alteration there also, save and except that a provision was introduced naming the party, the Clerk of the Peace, to whom the Bond should be given.

Thus it will be seen, that no person in either Branch of the Legislature was concerned in drafting the Bill, but that it is an exparte Act of the Sessions, to which I cordially assented without asking for the slightest amendment.

I write these remarks to avoid an impression that the Editorial might otherwise make, that the Act was worded by me to occasion delay. Your most obdt. servt.
