Safest Medicine for Women's Complaints

Women certainly do neglect themselves. They work too hard—over-tax their strength—and then wonder why they suffer with diseases peculiar to their sex.

Most cases of female trouble start when the bowels become inactive—the kidneys strained—and the skin not cared for. Poisons, which should leave the system by these organs, are taken up by the blood and inflame the delicate female organs.

Fruit-a-tives

OR (FRUIT LIVER TABLETS.)

remove the CAUSE of these diseases. "Fruit-a-tives" sweeten the stomach—make the bowels move regularly every day—strengthen the kidneys—improve the action of the skin—and *thus purify the blood.*

"Fruit-a-tives" take away those distressing headaches, backaches and bearing-down pains, and make women well and strong. "Fruit-a-tives" are fruit juices, intensified, with tonics and antiseptics added. 50c. a box—6 for $2.50. At all druggists—or from Fruit-a-tives Limited, Ottawa. 116

CHAIRMAN OF SCHOOL BOARD GIVES POLICY

Alfred Huggett Tells What He Would Do if Re-elected to Office

Ladies and Gentlemen,—In seeking your support and influence at the forthcoming election for School Trustee, I beg to thank you for the honor conferred on three previous occasions, and to say how much I appreciate your confidence, and, at the same time, to give an account of my stewardship. It is now six years since I had the honor to be elected a member of the Victoria School Board upon a policy looking toward the introduction of

Practical Education

into our schools, which policy I have strenuously adhered to during the three terms of service. It will be remembered that I advocated the creation of three distinct courses in our High School in order to provide special work for three classes of pupils, and in order to make possible the continuance at school of a large number (particularly boys) who otherwise would drop out at the expiration of their Public School career, and believing as I did and still strongly believe, that our educational system should provide the best possible for the greatest number, I was convinced that the curriculum was not arranged to the best interests of the large majority of the students. My purpose, therefore, was toward the change already mentioned, and I am glad to say that notwithstanding much opposition from those who held to the old "academic" idea, there is established in our schools today,

A Commercial Course,

which is doing excellent work and offers an excellent training for those pupils who, inall probability, will enter upon a business career.

It is only fair to say that I have been well supported by members of the Board, and it is owing to a united effort that the Commercial Course is a fact. And it is gratifying to learn that the business men of the city have already shown their appreciation by applying for such help as is needed in their offices.

Science Course

This course of study appeals to the student of a mechanical turn of mind, and while we cannot boast of much advance along this line, owing to limited equipment for practical demonstration, yet decided advances have been made, and I have been informed upon very good authority indeed, that we may be in a position soon to offer the first year's work in "Applied Science."

This province offers immense possibilities for every branch, and especially the higher branches of mechanics, and it certainly should be the purpose of the people of this city to afford every facility to our students for preparation along these lines.

Arts Course

It is known very generally that our students have taken the first year's work in arts, and that in the summer of this present year the second year's work is promised by McGill University. There are not a few of our young men and women who are doing very creditable work in the universities of the East, and it is not too much to say that a still larger number will avail themselves of higher education, and more particularly in the realm of science.

The Sub-High School Class

This is a class of boys and girls who enjoy certain advantages of the High School, who, however, have passed no test (departmental examination) but exists as an experiment in order to show whether one whole year's work can be saved the pupils. I am not in sympathy with the idea; do not believe in crowding work upon the pupils, and do not believe that upon its present basis either pupils or school can receive any advantage.

I am heartily in accord, however, with the promotion of all such pupils who have stood well in their classes during the year, and who may have passed in all subjects save one or two, of the departmental examination; and to pupils who may have failed to secure the pass marks, even in three subjects, I am in favor of giving a supplemental test. In one case, provision should be made to provide accommodation elsewhere than in the High School building for the Sub-Class, as the growth of the number of pupils who are actually High School students require more room; and I am not in favor, at the present time, of spending money for the

Enlargement of High School

unless it be to provide certain rooms in the roof of the present building, and which, I am well informed, can be constructed at no very great expense, and which at least will meet the requirements until the whole building shall be used for Public School purposes, and a new building for Higher Education is required.

New Buildings

Are urgently needed in Victoria West, and a section of North Ward, and the requirements of these two sections should first receive attention and be fully met before any large expenditure is made for new buildings in the centre of school population.

The Public Schools

so designated in order to make them distinct from the High School and Victoria College, are doing good work indeed, although there is room for improvement. But, taking into consideration the fact that not only the pupils but the teachers are suffering to some extent from the over-crowding of subjects, the work accomplished is most creditable to the principles and teachers throughout the city. I believe that it is possible to spread the same amount of work over a longer period, and, as a result, the work done will be of a better quality, and not so exacting upon the boys and girls.

Drawing

Realizing the necessity of having a proper system of Drawing introduced, and under control of an expert in the art, the Board appointed Miss Mills (a lady thoroughly well qualified) to the position. Miss Mills will have general supervision of the work throughout the city, and will arrange classes for the teachers themselves. The value of such a step can be readily seen, for if the teachers themselves are taught the principles of drawing, they certainly will be of increased value as instructors to the children.

In view of the work that the Applied Science Course embraces, the introduction of a better system of drawing is well timed, for civil, electrical, mechanical, and every branch of engineering requires drawing; and besides which, the Architectural Section of the Engineering Course, offers splendid opportunities to minds of constructional ability.

Our Girls

have not been overlooked, for Domestic Science is provided for them, and under the guiding hand of Miss Mackeand excellent progress is being made. But this is not all, for Mrs. Trustee Jenkins, realizing that another branch was necessary in order to provide further practical instruction for the girls, introduced a motion which was unanimously carried, that an instructor in needlework be appointed, and Miss Boorman will immediately take charge of the work.

It will be easily seen, therefore, that very much along practical lines has been undertaken, and I am sure that the people of this city have only words of praise for the Manual Training Work which introduces our boys to the rudiments of mechanics.

Education of this sort, together with a sane curriculum, will turn our boys and girls to habits of thinking rather than making them mere machines, and over-tasking their intellectual powers.

Music

It has been strongly urged upon the Board the necessity of having singing taught in the schools, and I am glad to report that there is a strong disposition at an early date, to make a suitable appointment, and I believe it can be done without adding to the present staff. The value of song to the home and life of the world's toilers cannot be over-estimated, for it is in itself a great intellectual force.

In closing, let me say that, should you honor me by re-election, I shall endeavor to do as heretofore, my conscientious duty in the best interests of education, and shall leave no stone unturned toward making our own institutions thoroughly up-to-date consistent with a wise expenditure of the people's money.

ALFRED HUGGETT,
Chairman.

The following is a comparative statement of attendance:

	1905.	1906.	Inc.	Dec.
January	2787	2807	20	..
February	2777	2798	21	..
March	2761	2782	21	..
April	2714	2777	63	..
May	2691	2704	13	..
June	2619	2592	..	17
August	2693	2639	..	54
September	2777	2771	..	6
October	2774	2772	..	2
November	2761	2775	14	..
December	2657	2691	34	..

This represents the total attendance of all the schools in the city, and shows an increase over the previous year.

AMERICANS IN CORNWALL

London, Jan. 12.—The great tin centres of Cornwall are agitated over a report that an American syndicate is buying up a number of the richest tin mines there. A representative of this syndicate has been in Penzance for some weeks past, negotiating with mine owners. The report, however has not been confirmed.

A Real Comfort

to know you always have

Hirst's Pain Exterminator

in the house. Tried and tested for over thirty years and admitted to be the sovereign remedy for all **Toothache, Bruises, Wrenches and Lame Back.** 25c. at all dealers.

Try **Hirst's Little Liver Pills.** They remove pimples from the face. They cure sallow skin. Ask your dealer or send us 25c. direct. A handsome souvenir water color sketch free.

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

COCOA

Sold by Grocers and Storekeepers in ½-lb. and ¼-lb Tins.

LETTERS TO THE EDITOR

THE PEOPLE'S PRESS

Sir,—At a meeting held at Victoria West last evening, Mr. Paterson charged Mayor Morley with the publication of the People's Press. Permit me to say that this paper is the expression of the Canada Labor Party and the Victoria Economic Educational League; that it is edited by a joint committee of the above organization, Mayor Morley having nothing whatever to do with the paper. Full responsibility is assumed by the above mentioned bodies for any matter contained in its columns.

PHIL. R. SMITH,
Publisher.

THE MAYOR EXPLAINS

Sir,—As you have made an unwarranted attack on my character, evidently without consulting your reporter's account of the meeting at Victoria West, or seeking information from disinterested parties, I trust you will do me the justice to give publicity to my statement, and having made yourself conversant with the facts, you will do me the justice to make amends for such misrepresentation of my character.

You state in your editorial that I sat in a rear seat of the hall "constantly shouting 'liar.'"

I can bring all the witnesses necessary that I did not once use the word "liar."

What actually occurred was that Alderman Stewart, as the report rightly states, "plunged into a scathing indictment of the Mayor." I did not interrupt him until he made an untrue statement, when I arose and said: "Mr. Chairman, that statement is absolutely untrue and Alderman Stewart knows it; now, I give him fair warning that as long as he sticks to the truth I will not interrupt him, but will not sit here and allow him to make false statements concerning me."

Three or four times I again had occasion to rise to my feet and say: "Mr. Chairman, that is another of the same kind."

Now, Mr. Editor, the next time disappointed and disgruntled campaigners come whining to you for assistance against that ungentlemanly lad man the Mayor, kindly make it your business to hear both sides before making any such attack upon, your truly,

A. J. MORLEY,
Mayor.

TO CHECK THE COLORADO

Washington, Jan. 12.—The President today sent to congress a message urging action by congress toward remedying the situation caused by the break in the Colorado river, four miles below the international boundary line in Mexico, and which threatens property interests in the vicinity in California. An expenditure of $2,000,000, the president says, will put the river in its former channel.

KIDNEY DISEASE COMES ON QUIETLY

Perhaps no other organs work harder than the kidneys to preserve the general health of the body and most people are troubled with some form of Kidney Complaint, but do not suspect it. It may have been in the system for some time. There may have been backaches, swelling of the feet and ankles, disturbances of the urinary organs, such as, brick dust deposit in the urine, highly colored scanty or cloudy urine, bladder pains, frequent or supressed urination, burning sensation when urinating, etc.

Do not neglect any of these symptoms, for, if neglected they will eventually lead to Bright's Disease, Dropsy and Diabetes.

On the first sign of anything wrong

Doan's Kidney Pills SHOULD BE TAKEN.

They go to the seat of trouble, strengthen the kidneys and help them to filter the blood properly and flush off all the impurities which cause kidney trouble. Mr. Thomas Petty, Massey, Ont., writes: "After I arrived in Canada from New Zealand, a couple of years ago, I suffered very much from kidney trouble. I tried several remedies, but they did me no good. Finally my back became so lame I could scarcely work. I was advised to try Doan's Kidney Pills and after taking them I felt like a new man.

Price 50 cents per box or 3 boxes for $1.25 at all dealers or mailed direct on receipt of price by The Doan Kidney Pill Co., Toronto, Ont.

NOTICE is hereby given that 60 days after date I intend to make application to the Hon. the Chief Commissioner of Lands and Works for a special license to cut and carry away timber from the following described lands on Saturna Island:

No. 1. Beginning at a post marked L. S. Higgs, approximately and by intention, the northwest corner of Section 9, thence east 20 chains, thence south 10 chains, thence east 20 chains, thence south 30 chains, thence east 40 chains, thence south 40 chains, thence west 80 chains, thence north 40 chains, thence west 40 chains, thence north 20 chains, thence east 40 chains, thence north 20 chains to point of commencement.

No. 2. Beginning at a post marked L. S. Higgs, approximately and by intention, the northwest corner of Section 10, thence east 40 chains, thence south 40 chains, thence east 40 chains, thence south 40 chains, thence west 80 chains, thence north 40 chains, thence west 40 chains, thence north 20 chains, thence east 40 chains, thence north 20 chains to point of commencement.

L. S. HIGGS,
Agent for A. J. Garesche.

Dated Jan. 12th, 1907.

ASTONISHING RESULTS.

The great strides that medical science has made in the last few years is due to the germ theory. When the germ of a disease has been discovered, the doctors have not been slow in finding a drug to kill it. In a few years, it will be rare to find a bald-headed man or woman. The falling out of hair is due to a dandruff germ, and now it has been discovered how to kill this germ. The remedy used is called Newbro's Herpicide. Its success has been marvelous. Not a failure has been so far reported. It is also a delightful hair dressing free from oil or sticky substances. Try it and be convinced of its actual merit. Sold by leading druggists. Send 10c. in stamps for Sample to The Herpicide Co., Detroit, Mich.

C. H. Bowes & Co., 98 Government St., Special Agents.

PILOT CHARGES ARE AGAIN CONDEMNED

Board of Trade Urges Ottawa Government to Take Action

ENDORSE COMMISSIONERS REPORT

Suggested That Public Meetings Be Called in Effort to Settle the Songhees Question

At the regular quarterly meeting of the Board of Trade held yesterday afternoon, the Songhees reserve question came in for considerable discussion. Mr. Pedley's report was presented, and after the matter had been considered, the members arrived at the conclusion that no headway had been made by his presence in the city. Compulsory pilotage fees also came in for considerable discussion, and the opinion was freely expressed that some vigorous steps should be taken to have this tax removed in accordance with the recommendations of the royal commission. In this connection it was pointed out that the trade and commerce of the city were being seriously affected, and unless something was done to have the tax removed the result would be very disastrous to Victoria. The coasting regulations, and the loss of mail in transit from the Old Country, were among other topics of discussion. W. J. Tendray called attention to the necessity of having the C. P. R. run their cars over the electric railway company's tracks to the business houses, pointing out that it was absolutely necessary that something should be done to reduce the shipping expenses between Victoria and the Mainland, if the business was to be retained in this city. Among those present at the meeting were R. P. Rithet, H. B. Thomson, S. Leiser, W. E. Laird, A. W. Knight, Jas. Foreman, R. H. Swinerton, A. Wright, Anton Henderson, W. J. Pendray, A. G. Sargison, J. W. Ambery, Thos. A. Davis, L. A. Genge, D. R. Ker, C. F. Todd, H. G. Wilson, H. A. Munn, Col. Prior, and S. J. Pitts. Mr. Ackland of the Toronto Globe was also an interested visitor.

Vice-President Pauline occupied the chair, and before taking up the business of the meeting, took occasion to extend a welcome to the first president of the Board of Trade, R. P. Rithet.

Mr. Rithet made a short reply, stating that he was pleased to be present, and was sorry that he could not attend more regularly.

The minutes of the previous meeting were read and, on motion, adopted.

The chairman reported regarding the Sound service, which had been taken up at the last meeting, and as a result the Princess Beatrice had been placed on the route.

Coasting Regulations

The coasting regulations were then referred to, the chairman pointing out that a communication had been received from the, Vancouver Board of Trade, asking the local board's support in securing the revocat of an order-in-council passed during the Klondike rush, permitting American vessels to carry freight in bond between Canadian ports. The Vancouver board considered this a detriment to business, and wished to have it altered.

Mr. Ambery, as chairman of the committee on this question, said the committee had gone thoroughly into the matter, and after a careful search, he could find no record of any order-in-council referring to the question. The committee could not ascertain from the Vancouver board as to when the supposed order-in-council was passed, and after calling on several of the local business men, they decided to recommend that the question be left in abeyance till further information was received regarding the order-in-council.

Mr. Thomson's Views

H. B. Thomson was of opinion that the Vancouver Board of Trade were looking toward Prince Rupert for the Grand Trunk Pacific railway. He pointed out that it would be possible for all freight to be carried across the continent by the Great Northern, and carried from Seattle to the North by American vessels, thus sidetracking Vancouver. He thought it was advisable for the Victoria board to fall in line with Vancouver's attitude.

Mr. Ambery pointed out that at present American vessels could not carry freight between two Canadian ports.

Mr. Rithet explained that the privilege had been granted at the time of the Klondike rush, when it was impossible to secure sufficient Canadian vessels to carry the freight. He could not see where Canadian bottoms were suffering, and thought that the present conditions should be maintained.

S. Leiser thought it would be unwise to support the Vancouver board, as conditions in the two cities were very different.

H. A. Munn pointed out that the opinion of the residents of the North was that the coasting laws of Canada should be made the same as those of the United States. He did not think it was very good business to encourage the Americans to control the coasting trades.

Mr. Pitts suggested that the committee inquire from the C. P. R., Union Steamship company and other companies regarding the question. He moved, seconded by Mr. Ambery, that the Vancouver Board of Trade be informed that this board could not see sufficient reason to ask for any change in the present coasting regulations.

A copy of the resolution will be sent to the collector of customs at Ottawa.

Pilotage Dues

Regarding the pilotage regulation, Mr. Thomson, of the committee, stated that they had been working steadily for some time, and had already submitted a report. He pointed out that from their investigations the pilots had collected $72,500 for services rendered, and $79,200 for services not rendered. Several communications had been sent to the pilotage officials, but no reply had been received. He referred to the fact that the royal commission had accepted the recommendations made by the committee, but nothing had been done. Some of the pilots were in favor of cancelling some of the charges, but would not act. The result of these charges would be that the Oriental liners would shortly discontinue calling at Victoria. Already some had stopped making Victoria a port of call; and all gave their reason, the pilotage dues.

Mr. Rithet said it was a pity that trade was being diverted on account of the pilotage fees. He pointed out that there had been many changes since the rules were put in force. When the rates were fixed there were practically no steamships, the majority being sailing vessels. He thought that some vigorous attempt should be made to have the taxes withdrawn, which at present were working so detrimentally to the city.

Conference Suggested

Mr. Wilson, as a member of the committee, suggested that an effort be made to have a meeting of the pilots and the special committee. He pointed out that he had taken the matter up with Capt. Cox, who was strongly in favor of retaining the dues, pointing out that the rates had been levied by R. P. Rithet, Robert Ward and Gardner Johnson, and he (Capt. Cox) thought that they should be allowed to stand. He was very pleased to have Mr. Rithet make the statement he did, which would assist the committee very much in their work.

Mr. Pitts moved, seconded by Mr. Ker, that the secretary be instructed to telegraph to the minister of marine and fisheries, stating that it was the unanimous opinion of the board that the recommendations of the royal commission be enforced.

ANOTHER RUSSIAN MURDER

St. Petersburg, Jan. 12.—Information was received here tonight that the chief of Police of Daghestan, on the Caspian sea, was murdered today. The assassin escaped.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding or blind piles disappear like magic by its use. Try it and see. C. H. Bowes.

HAD THIRTY-TWO BOILS AT ONE TIME

Two Bottles of Burdock Blood Bitters Cured Him.

Imperfect organic action makes bad blood, so, too, bad blood, in turn, makes imperfect action of every bodily organ. If the blood becomes impure, poisoned or contaminated in any way from constipation, biliousness or any other cause, some especially weak organ must soon become diseased thereby, or the whole system may suffer in consequence.

Pimples, boils, blotches, ulcers, festering sores, abscesses, tumors, rashes or some serious and perhaps incurable blood disease may result. There is no medicine on the market to-day to equal the old and well-known remedy,

BURDOCK BLOOD BITTERS

for all cases of bad blood.

Mr. Ernest B. Tupper, Round Hill, N.S., says: "I think Burdock Blood Bitters a great medicine for boils. I had them so bad I could not work. I had thirty-two on my back at one time. I used only two bottles of B.B.B. and they completely cured me. I cannot recommend it too highly." Price $1.00 per bottle or 6 bottles for $5.00.

OUR FIRST SERIES OF JOB LOTS
