Leave of absence was granted to Mr. Purdy, he being seriously ill.

In the Council, the bill to tax Wild Lands was thrown out.

The bill authorizing an assessment to pay off the Penitentiary Debentures passed.

Several appropriations, including the grant to the Pictou steamer, passed.

SATURDAY, March 6.

By mistake, the opinions of the Attorney General on the School Bill were ascribed to Mr. Barberie, who is in favor of County Inspectors.

The objections to the Judges' Fees Bill was not that all fees should be repealed, but that the Bill would have that effect.

MONDAY, March 8.

In the House the bill to extend the Charter of the Suspension Bridge passed.

The Railway Bill was re-committed, and about thirty speeches made—the arguments nearly the same as before.

Mr. Earle declared himself against the bill, his chief objection was to the five-twelfths.—This it was explained was a consistent and necessary arrangement, the work being a joint undertaking, joint expense and profit.

The Speaker and Mr. Wilmot asserted there were less difficulties in Nova Scotia than here.

Mr. Needham made a thorough speech in support of the bill, replying to the objections urged against it—supported the sections as providing sufficient guards, placing the responsibility as far as possible where it ought to be, and asked, who grumble after the last Despatch?

Mr. Johnson said Mr. Needham's speech proved him to be now a supporter of the Government.

There were some contradictions between Messrs. McPherson and Pickard—nearly all are in favour of the bill.

Mr. Barberie proposed an amendment to the first section that the route should be fixed by commissioners—Lost, 27 to 8.

Mr. Johnson proposed an amendment to the second section, that the Province should build 5-12ths of the distance, Only Messrs. Barberie, Read, Harding, Gordon, Montgomery, Cutler, Pickard, English, Earle, and Gilbert supported—both sections passed without amendment. Progress reported.

Mr. Hannington said the Despatch had altered the appearance of things, that the railroad was no longer in the clouds, a new era had dawned, but he would still prefer the work being done by a company.

Report says, Mr. Chandler is positively going to England.

TUESDAY, March 9, Two o'clock.

Debate on Railway Bills resumed. The House is still in consideration of the third section.—Mr. Scoullar proposed an amendment that the proceeds of the lands should be applied to the purposes of the Province, alleging that there were more crown lands in the Province along this line than in any of the other Provinces.—This was denied.—Speeches were made by nearly every member in the House.—The section will be carried.

The Government members stated yesterday and repeated to-day, that they would agree to expunge the provision for the sinking fund in the third section of the Loan Bill, and make the land applicable to this.

IMPORTANT RAILWAY DESPATCH.

The following Railway Despatch in answer to a letter sent from Halifax on the 5th ult., after the Railway Delegates had decided upon their scheme, was received in town on Saturday.

DOWNING STREET, 20th Feb., 1852.

To Hon. F. Hincks.

SIR—I am directed by Earl Grey to acknowledge the receipt of your letter of the 5th inst., addressed to him from Halifax upon the subject of the contemplated Railway from that City to Quebec. His Lordship directs me to state that he much regrets to find from the contents of your letter and from the correspondence between the members of the three Governments, interested in this question, assembled at Halifax, that in the opinion of the members of the Executive Councils of Canada and New Brunswick, so decided an objection would be entertained to the construction of a line of Railway proposed by the officers who conducted the survey through the three Provinces in British North America, in 1846. His lordship feels that the views of gentlemen possessing great local knowledge, and well acquainted with the opinions of the most influential classes of society in British North America on this subject, are justly entitled to great weight. He is, therefore, disposed to consider in the most favourable light the plan submitted in the printed correspondence, emanating as it does from parties intimately conversant with the subject. The establishment of the means of rapid and easy communication between the different British Provinces, and from Canada to this Country through Halifax, is an object of such extreme importance that it is the earliest desire of H. M. Government to promote, if possible, the construction of a Railroad by which a communication could be maintained, even though it should not follow the line which appears to H. M. Government to be the most advisable.

His Lordship directs me to state that he is not insensible to the force of the reasons advanced in your letter for affording the assistance which is desired to the Railroad, notwithstanding its passing through a different line of country from that originally proposed, and that he is even prepared to admit that in some respects the line now suggested would possess an advantage over the other, though on the whole it may be less desirable.

But the proposals contained in your memorandum of 29th January, concurred in by Mr. Chandler on the part of New Brunswick, involves so important a deviation from the plan which H. M. Government had signified their readiness to submit to Parliament, that until it has undergone further consideration, it is out of his Lordship's power to say whether it may be judged expedient to recommend that assistance should be given to the project as now proposed.

His Lordship directs me to state that the question shall be taken into consideration as soon as possible, and with a view to its satisfactory decision.

His Lordship has learned with pleasure that it has been suggested, and he hopes it may be determined to send a deputation to this country, from the Executive Councils of the three Provinces, for the purpose of personally conferring with Her Majesty's Government on this important subject.

Lord Grey directs me to add that no proposal for obtaining assistance of Parliament towards the construction of the proposed Railway, could be entertained by H. M. Government, unless it can be shown that it would establish a complete line wholly on British territory.

Your's, &c. F. PEEL.

IMMENSE CAPITAL.—The capital of the British Cunard Steamship Company is $7,500,000, more than double that of any company concern in the United States, and yet this is all owned by a few individuals, probably not more than ten or twelve, who make of it a partnership concern. This company own nine steamboats, but the two largest, which have just been completed, the Arabia and the Persia, of 2500 tons and 250 horse power, have been sold to the West India Mail Steamship Company, which has 15 or 16 first class steamers, and probably twice the capital of the Cunard Company.

Self-Preservation:

A MEDICAL TREATISE ON THE PHYSIOLOGY OF MARRIAGE, and *Disorders of Youth and Maturity* usually acquired at an early period of life, which enervate the physical and mental powers, diminish and enfeeble the natural feelings, and exhaust the energies of Manhood. With practical observations on the Treatment of Nervous Debility and Indigestion, whether arising from those causes, close study, or the influence of Tropical climates; Local and Constitutional Weakness, Syphilis, Stricture, and all Diseases and Derangements resulting from Indiscretion. With FIFTY *Coloured Engravings*, illustrating the *Anatomy, Physiology, and Diseases of the Reproductive Organs*, explaining their structures, uses and functions, and the various injuries that are produced in them, by solitary habits, excesses and infection."

BY SAMUEL LA'MERT, M. D.

No. 37, BEDFORD-SQUARE, LONDON,

Doctor of Medicine, Matriculated Member of the University of Edinburgh, Licentiate of Apothecaries' Hall, London, Honorary Member of the London Hospital, Medical Society, &c.

CONTENTS OF THE TREATISE.

CHAPTER I.—On the Philosophy of Marriage, with its Hindrances and Obligations; and on Infelicitous and Unproductive Unions.

CHAPTER II.—On the Anatomy and Physiology of the Generative Organs, their functions, structures and secretions, proving that great Mental and Physical power are dependent on their healthy action.

CHAPTER III.—On Solitary Habits; their various effects on the Animal Economy; the concealed cause of Debility of the functions of the Stomach, Lungs, and Brain, and general weakness of the Mental Faculties.

CHAPTER IV.—On the Secret Disorders of Youth and Maturity, and the Treatment of Nervous and Local Weakness, Mental Debility and Premature Decay.

CHAPTER V. and VI.—On the Disorders arising from indiscriminate Excess, Gonorrhœa, Gleet, Strictures, and other Diseases of the Urethra.

REVIEW OF THE WORK.

Marriage requires the fulfilment of several conditions, in order that it may be really the cause of mutual happiness. Could the veil, which covers the origin of domestic wretchedness, be raised, and its true source in every instance be disclosed in how many could it be traced to physical disqualifications and their attendant disappointments. Excesses are always injurious; the gift, which when used in moderation is fraught with advantage, becomes, when abused, the prolific source of morbid, and of greater or less injury to the constitution and vital powers. The particular excesses, on the nature and consequences of which this Treatise professes to dilate, are productive of greater misery to the human frame than any other to which it is subject.

This work contains an accurate and complete account of the Anatomy and Physiology of the Reproductive Organs, and of their relative conditions in health and disease. Nor are these the sole contents of the work, the mean-of-science, as well as the nature of the danger, are pointed out in clear and intelligible language. It deservedly requires the closest attention and study, for what subject can be of more importance than the preservation of health, and of the physical capabilities of which every man should be possessed. It unfortunately happens, that the unhappy victim of excessive indulgence and vicious habits, whether acquired in early life, or from the follies of advanced age, while suffering from their inevitable consequences, unwise y entertains a fear of applying to a qualified physician for relief. Shame and the dread so frequently but erroneously entertained that these complaints are beyond the reach of art alike restrict him and prevent his seeking for assistance where alone it can be procured. In acting thus, he forgets that accurate discrimination in ascertaining the causes of disease, sympathy with the sufferer, and above all, secrecy, invariably characterize the intelligent and practical physician, and to the medical man, who can show by his possession of the requisite legal qualifications that he is entitled to esteem and confidence in his professional pursuits, the utmost confidence should be extended. DR. LA'MERT has obtained the highest medical honours, as his diplomas testify, and the great extent of his practice for many years, is a guarantee for his professional experience which has reference almost solely to the treatment of these diseases.
