H. Chamberlain, manager of the Parkhill & Arkona Telephone Co., writes the Free Press as follows:—The item appearing in your issue of Feb. 22nd copied from an exchange showed that the telephone systems now comprising the Parkhill Arkona Telephone Co. made profits of \$2,980.28 on an expenditure of \$4,311.82 for the year 1921. The government report referred to does not mention profits at all. We wonder who did the figuring. If these companies formerly made 70% profit per year we wonder why they sold out. It looks like they owned a gold mine. The new rates allowed the Arkona company are not higher than those charged by the People's Company here.—Forest Free Press.

Papers were given on "Pauline Johnson" by Mrs. Rogers and on "The Home Beautiful" by Mrs. Frank Hull. Some of her ideas were: good surroundings inspire better living, they are an uplift to the soul and are a high water mark of civilization; the inside of the home should combine comfort, usefulness and beauty, and reflect the happiness of the makers, for home is a place in which to be happy; keep ever before you the idea of harmony in inside decorations and seek to bring out the individuality of the home makers. As a slight token of the esteem in which you are held by all, we ask you to accept this pen and trust that the memory of your friends will linger long with you and in after years when taking a backward glance over life, that the memory of our Institute meetings may stand out as a golden gem on memory's wall." Signed on behalf of the Institute—Mrs. Geo. Freer, Mrs. J. Johnson, Mrs. Kerr.

Mrs. John Johnson was appointed to fill Miss Barnes place as secretary for the Institute. The collection and sale of home-made cooking amounted to \$16.00. FROM OLD SUBSCRIBER

Wm. Collier, chief constable of Souris, Man., writes:—Please find enclosed the sum of two dollars as subscription for the Old Home Paper for another year.

As regular as Monday comes around the paper from the Old Home Town comes to hand with its gist of news. True there is a lot in it that those of us who have been away nearly a third of a century know but little about, but every paper seems to tell of the passing of one and another of the old acquaintance; just lately for instance the death of John White of Swift Current; T. Goodhand of Dauphin, and very lately of John and Mrs. Lovell. These things remind us that we are all as well here as time and tide permit. Wishing you and all old friends success.

Recently while Mr. John Hamilton was operating his machinery in stable his clothing got caught in the line shaft which rolled him up and almost stripped him. The shaft being too close to the joist to allow him to revolve with it consequently it stopped the machinery, except the engine which kept going with the result that the clutch kept slipping and held him in this position for nearly an hour. When found by his wife he was in an exhausted condition. Fortunately no bones were broken, although he was very badly squeezed and shaken up. He is improving rapidly. Mr. Hamilton is a resident of Cromarty.

THE MEANING OF THE BROKEN BODY OF OUR LORD JESUS CHRIST

The meaning of the Broken Body can be learned from a study of the doings of our Blessed Lord at the meeting in the Upper Room where He ate the last Passover Feast and ate the first Lord's Supper. This was the declaration of the coming of the Kingdom of Heaven into the life of the Church when Jesus declared that His Body was to be broken that His spirit might dwell with His Disciples. "Do this in remembrance of Me." Just as the lamb was eaten that God's chosen might have strength to go forth from Egypt so Christ was to be eaten that His chosen might go forth from the world into a life of fuller service for the conquest of the world.

So the meaning is that one body of our Lord was broken that another might be found. As Paul would say "Know ye not that ye are the body of Christ." Christ died for the church that is, He died to the world that He might live in the church.

TWO THINGS THAT HURT THE EYES

A person has been known to say, "I have ruined my eyes by reading too much." Not so—the eyes were made to use. One sure way to permanently injure the eyes is

READING BY INTENSE LIGHT

The light should come through ground glass to soften it. Never use clear glass for either gas or electricity. Oil lamps give out a soft light, therefore clear glass chimneys.

READING BY DIM LIGHT

Take our advice—do not read or sew by a dim light—it will be a direct strain upon the sight centres of the brain. On these two things hang the fundamental laws of sight economy. Never use cheap or pick-up glasses—come to us for advice about things optical. Everything needful here.

Take good care of your vision!
