The Money Market.

Commercial paper is discounted in the local money market at from 5 to 7 per cent.; call loans are effected at 4 and 5 per cent.; and loans on mortgages and debentures are effected at from 5½ to 7.

The Bank of England rate is 2½ per cent.

Money in New York is so low that it cannot well become cheaper. Call loans are made at 1 per cent., and time loans at 2 to 2½ per cent. Financial people look on the market as at its lowest ebb. Within a short time money will be required to move the Western wool, and the crops also will soon begin to move in Southern wheat districts.

The engagements at the banks to-day were fairly well met, and where there was inability to pay renewals were granted, since money is plentiful at present. No embarrassments are talked of.

Dry Goods.

There do not appear to be any discouraging features in the dry goods trade. Indications point to their being lighter importation of fall goods, the trade having profited by the experience of last year through over importation. Business to date is steady but there is no boom. A good flow of orders is going to Canadian manufacturers, who in their turn are cautious in regard to their output, keeping beat, mainly, with current orders.

U. S. Iron Trade.

From The Wall-street News.

During the past week the feeling in the iron trade does not seem to have undergone much change for the better. The volume of business has been slow and the offerings have not been such as to encourage much confidence of improvement in the near future of the market. The prospects are not indicative of much increase of orders in the near future, and the shut-down is not calculated to augment confidence in the possibility of better prices. The labor difficulty is a feature that cannot be overlooked.
