PROSPECTUS

OF THE SCIENTIFIC AMERICAN.

Best Mechanical Paper in the world. Ninth Year! Volume VIII.—New Series.

The publishers of this popular and cheap illustrated newspaper beg to announce that on the third day of January, a new volume commenced. The journal is still issued in the same form and size as heretofore, and it is the aim of the publishers to render the contents of each successive number more attractive and useful than any of its predecessors. The SCIENTIFIC AMERICAN is devoted to the interests of Popular Science, the Mechanic Arts, Manufactures, Invention, Agriculture, Commerce, and the Industrial pursuits generally, and is valuable and instructive, not only to the Shop and Manufactory, but also in the Household, the City and the Reading Room.

The SCIENTIFIC AMERICAN has the reputation at home and abroad, as being the best weekly journal devoted to mechanical and industrial pursuits now published; and the Editors are determined to keep the reputation they have acquired during the eighteen years they have been connected with its publication.

To the Inventor!

The SCIENTIFIC AMERICAN is indispensable to every inventor, and it not only contains illustrated descriptions of all the best inventions as they come, but each number contains an Official List of the Claims of all the Patents granted from the United States Patent Office during the week ending; thus giving a correct history of the progress of inventions in this country. We are also receiving, every week, the best scientific journals of Great Britain, France, Germany; thus placing in our possession all that is going on in mechanical science and art in those old countries. We shall continue to transfer to our columns copious extracts from those journals of whatever we may deem most interesting to our readers.

To the Mechanic and Manufacturer!

Who are engaged in any of the mechanical pursuits should be doing without the SCIENTIFIC AMERICAN. It contains six cents per week; every number contains from ten to twenty engravings of new machines and inventions which can be found in any other publication. It is an establishment of the publishers to insert none but original en-

gravings, and those of the first class in the art, drawn and engraved by experienced artists, under their own supervision, expressly for this paper.

Chemists Architects, Millwrights, and Farmers!

The SCIENTIFIC AMERICAN will be found a most useful journal to them. All the new discoveries in the science of chemistry are given in its columns, and the interests of the architect and carpenter are not overlooked; all the new inventions and discoveries appertaining to those pursuits being published from week to week. Useful and practical information pertaining to the interests of Millwrights and mill-owners will be found published in the SCIENTIFIC AMERICAN, which information they cannot possibly obtain from any other source. Subjects in which planters and farmers are interested will be found discussed in the SCIENTIFIC AMERICAN; most of the improvements in agricultural implements being illustrated in its columns.

TERMS

To mail subscribers:—Three Dollars a Year, or One Dollar for four months. One Dollar and Fifty Cents pay for one complete volume of 416 pages; two volumes comprise one year. A new volume commenced on the third of January, 1863.
