NOTICE OF SALE.

To RODERICK SMITH, of Chippewa Falls, in the State of Wisconsin, United States of America, formerly of the Parish of Addington, in the County of Restigouche and Province of New Brunswick, farmer, and Mary Smith, his wife, and to all others whom it may concern:—

NOTICE is hereby given that by virtue of a Power of Sale contained in a certain Indenture of Mortgage bearing date the twenty fifth day of August, in the year of our Lord one thousand eight hundred and eighty three, and made between the said Roderick Smith, of the Parish of Addington, in the County of Restigouche and Province of New Brunswick, farmer, and Mary Smith, his wife, of the first part, and William Glover, of Campbellton, in the said County and Province, merchant, of the second part, which Mortgage was duly recorded in the records of the County of Restigouche on the twenty ninth day of August, A. D. 1883, in Book G of the County Records, on pages 483, 494 and 495 as number 2715, there will in pursuance of the said Power of sale and for the purpose of satisfying the moneys secured by the said Indenture of Mortgage, default having been made in payment thereof, be sold at Public Auction, on SATURDAY, the thirteenth day of December next, in front of Jardine's Hotel, in the town of Campbellton, in said County, at twelve o'clock noon,

THE LANDS AND PREMISES

in said Indenture, mentioned and described as follows, namely:—All and singular that certain piece or parcel of Land situate, lying and being in the Parish of Addington, in the County of Restigouche and Province of New Brunswick, and described in the original grant to the said Roderick Smith under date the eighth day of November in the year of our Lord one thousand eight hundred and fifty nine as follows:—Beginning on the Southerly line of granted lands fronting on Restigouche River and at the North-westerly angle of lot number forty five in Cole Brook granted to Robert Ferguson, thence running by the magnet of the year one thousand eight hundred and fifty three South one degree West sixty seven chains along the Westerly line of said granted lot to a fir tree standing in the South-westerly angle thereof, thence North eighty seven degrees and thirty minutes West twelve chains and fifty links to a stake, thence North two degrees and thirty minutes East sixty seven chains to a birch tree standing on the Southerly line of granted lands above mentioned and thence along the same South eighty seven degrees and thirty minutes East ten chains to the place of beginning, containing seventy three acres more or less, distinguished as lot number forty six in Colebrook. Together with all and singular the building and improvements thereon and the rights, members, privileges and appurtenances to the same belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, rents, issues and profits thereof of the said Roderick Smith and Mary Smith, his wife, of, in, to or upon the said lands and premises and every part thereof.

Dated the 3rd day of September, A. D. 1884

Miscellaneous.

Scott's Emulsion of Pure Cod Liver Oil, with Hypophosphites,

Very Palatable and Efficacious in Wasting Diseases.

DR. C. T. BROMSER, Rochester, N. Y., says: "After having used Scott's Emulsion with decided benefit upon myself, I have taken great pleasure in recommending it since in the various conditions of wasting in which it is indicated."

A prima donna once held conversation with a mule, and, falling into a dispute, the mule viciously cried: "You cannot sing half so well as I." "That may be true," replied the prima donna, "but you can not kick as I can." Overcome by the truth of this argument, the mule lapsed into a harrowing silence.

Murray & Lanman's Florida Water is probably the simplest and purest perfume ever made, being absolutely nothing more than the delicious fragrance of rare flowers, preserved and made permanent, and it is doubtless to this purity of composition that its immense popularity is in a great measure to be ascribed.

A shrewd old lady cautioned her married daughter against worrying her husband too much, and concluded by saying:—"My child, a man is like an egg. Kept in hot water a little while, he may boil soft; but kept there too long and he hardens."

A gentleman writes: "I desire to place on record the cure of the Piles by using Minard's Family Pills and applying Minard's Liniment externally." Use equal parts of Liniment and sweet oil for applying; it reduces inflammation and gives comfort at once.

A certain oily philanthropist, who is noted for his pretentiousness and stinginess, was described the other day by a poor woman as "a man who feeds the sick with an empty spoon, and all the while talks nicely about gruel."

WORMS.—A young mother writes: "My little boy, 5 years of age, was very much troubled with worms. A few doses of Nelson's Cherokee Vermifuge brought away the worms and improved his general health. There is nothing like it as a worm expeller."

Mrs. ——away, while cleaning house asked her husband to nail up some []; he refused; she looked †† at him, told him his conduct was without ||, then beat him with her ☞ until he saw **. He now lies in a prone state and may soon be a subject for dis‡. A man must be an * his life and ‖ in such a way as that.

There is no pain, no matter how severe nor what the cause, that cannot be partly or wholly relieved by Johnson's Anodyne Liniment, used internally and externally. It is the most powerful remedy known to medical men.

George Bancroft, who recently celebrated his eighty-third birthday, attended the reception U. S. Senator Morrill gave to celebrate his seventieth year, and upon greeting his host said:—"Well, young fellow, I wish you many happy returns of this day."

There is nothing so essential to health and happiness as pure rich blood. It prevents exhausted vitality, premature decline, nervous and physical debility, besides untold other miseries. Parson's Purgative Pills purify and enrich the blood, and will change the blood in the entire system in three months.

Ah, well! for us all some sweet hope lies
Deeply buried from human eyes;
And, in the hereafter, angels may
Roll the stone from its grave away!

—*Whittier.*

The following is said to be a cure for lock-jaw: Take a small quantity of spirits of turpentine, warm it and pour it on the wound, and relief follows in one minute.

Do you know there are strange people in our community? We say strange because they seem to prefer to suffer and pass their days miserably, made so by Dyspepsia, Liver Complaint, Indigestion and General Debility when Davis' Quinine Iron and Wine will cure them. Sold by E. Lee Street, Newcastle, 50 cents per bottle, 6 bottles for $2.50, tf.

An Explanation of Hanlan's Defeat by Beach.

An English exchange says:—The surmise that further details would show the defeat of Hanlan in Australia to be of less importance than the few words that reached this country by cable would lead one to suppose, has proved correct. It now appears that Hanlan and Beach made a good even start on rough water. For the first quarter of a mile the competitors kept together. At a mile and a half Hanlan led by a length; then, in attempting to avoid a steamer, he fouled Beach. Believing that his adversary had taken his water, the Canadian lessened his speed, and Beach pulled over the remainder of the course alone, and was declared the winner. The umpire disallowed Hanlan's claim for a foul, and Beach declined his challenge for another trial forthwith, though the Australian was willing to enter into a fresh competition at the end of six months. These details place a different complexion on the whole affair, and should re-establish the faith of Canadians in the powers of their champion sculler. It is significant that Hanlan is already the favorite for the next contest.

The war department has forwarded £500,000 in gold to Lord Wolseley.

For the Little Folks.

PATTY'S COMPANY.

Patty Ellerson had very sweet, polite manners; everybody said so.

If there was a guest staying in the house, Patty slipped out before breakfast and cut a rose to lay on her plate; if a gentleman called to see her father on a hot day, Patty went off, without being told, and brought a glass of cool water; when her own little visitors came, she did everything to make them have a good time, without seeming to think about herself at all.

All this was very sweet in Patty; and, indeed, she was such an attractive little girl, that I hate to tell you any "drawbacks" about her.

Yet there was a drawback, and as Patty found it out herself, and tried to cure it, maybe she wouldn't mind my telling it.

And it was this:—Patty saved her best manners for company! She was not unkind to her little brothers and sisters, but I am obliged to say she did not concern herself much about their comfort and pleasure.

One summer, Mrs. Palmer, with a little daughter near Patty's age, came to board in the village, and Patty and Rose Palmer became great friends.

Mrs. Palmer wasn't very comfortable where she was staying, and one day she walked over to Mrs. Ellerson's to see if that lady would take her to board. She left Rose in the yard to play with the children, while she and Mrs. Ellerson sat on the little vine shaded porch, and talked it over.

When the arrangements had been made, and it was settled that Mrs. Palmer and Rose were to move over the next week, the children were called up that the little friends might enjoy the prospect of being together.

But, to everybody's surprise, impulsive little Rose cried out, "O mamma! I don't want to live here!"

Her mother was distressed that she should have made what seemed such a rude speech, but Mrs. Ellerson was very wise about little girls, and putting a gentle arm about Rose—who, at the sight of her mother's displeasure, began to cry—she asked her kindly, what was the reason she did not want to stay with them.

After a moment's hesitation, Rose said simply that Patty was always nice and kind when she came over to see her, but she noticed that she was sometimes cross with Ella, her little sister. "And I am 'fraid," continued Rose, "that if I come to live with her, she will treat me like she does Ella!"

And now it was poor Patty's time to cry, and the little girls would have had a sad day, it mamma hadn't proposed a doll's tea party, and given them some bread and preserves. That brought back the sunshine.

Rose and her mother did come to live at the Ellerson's, but not one cross word did Patty speak to the visitor all summer.

More than that, she tried hard not to be anything but polite to her own little home people; and I think she succeeded, for one day, when it was Ella's time to help mother wash the breakfast thing, she said joyously:

"Mamma, we do have such good times now; Patty treats me just like company all the time."

Farm and Household.

STUDY FARMING AS A BUSINESS.

The professional man spends years in fitting himself for his profession. Manufacturers and mechanics learn their trades, and merchants their business, by serving years of apprenticeship with good masters, but many farmers believe that agriculture, unlike all other occupations, can be successfully carried on by those who have had no special training for the business. Indeed, a large proportion of the farms of New England are carried on by untrained men. Many have remained on the old homestead out of regard to the wishes of father or mother, who thought the young folks could not be spared away from home long enough to learn a trade or profession, nor to acquire an education that would fit them for managing farms intelligently or successfully.

It is an open question how best to educate and fit a young man to become a farmer, whether to send him to the agricultural school or college or allow him to serve a few years with a practical farmer who is competent to make money at his business. Both methods have their advantages and their disadvantages. A little of both sorts of training would doubtless make a better farmer of a boy than would either method alone. It it certainly foolish to undertake to carry on any business, farming not excepted, without first learning all one can learn about it. If all the men now on farms had been trained and fitted for business, as men are trained in all other vocations, farming would be looked upon by the public in a very different light from what it is at the present time. We ought to so train our boys and girls whom we hope to see settled on farms of their own that they will be able to live by their business as other men live by theirs. It is not for us to say whether your boys shall learn the business of farming at college, or mainly in the field, but this we do say, give your boy the very best training in your power, so that when he finally does settle down on a farm he will become master of his affairs.

Farming is not a business that it is safe to undertake without the same fitting and preparation that men get who follow other callings in life.—When the public realize this, there will be fewer poor and unsuccessful farmers in this country then there are now.

BITING HORSES.

Some horses acquire the habit of biting. It is probable that at first they bite in a playful mood, but by harsh treatment soon learn to bite viciously. By abusive treatment they are urged on from bad to worse, and sometimes become so vicious that they are unmanageable. The former English racer Barcoldine thus became a most vicious biter, so that none of his attendants, on one occasion, dared approach him for two days. Finally Prof. Loffles, a celebrated tamer of vicious horses was sent for, and he gives the following account of how he tamed him:—

"My first step was to get a sort of boxing glove only much larger, at Boyce, the saddler's, something for Barcoldine to worry. With this on my hand I approached him, and he worried at it the first go off, and continued to worry it for six hours. I then managed to stroke him over the head and eyes, and let him smell my hand to show him I didn't mean to hurt him. My idea is—and I have incontestable proof of this—that most horses in their earlier days want to bite something in a friendly manner just as puppies do, without any intention to hurt. This disposition should most certainly be encouraged. If punished for so doing they misunderstand you, and in the course of time whenever they feel inclined to bite they will do so in a vicious manner. It is the stupidity, often brutality, of the attendant that ruin horses that are naturally vicious. It was quite three hours before I could place my hand on Barcoldine's chest, being in the box with him by myself, with the door shut. In two days he was quite amenable to handling."—This affords an illustration of what kindness, gentleness and intelligence will accomplish in overcoming the viciousness of an abused horse.—Gentleness in handling horses would reduce the number of vicious horses.

PRESERVING EGGS.

The following recipes for preserving eggs have all been practised with success:—

1st. LIMED EGGS.—Put one bushel of fresh slacked lime, two pounds salt and half a pound of cream of tartar, in an empty pork barrel, adding as much water as will give that consistency to the composition as will cause an egg to swim with its top just above the surface. Put the eggs into this carefully and keep them there until required for use.

2nd. PICKLED EGGS.—For every three gallons of water put one pint of fresh slacked lime and half a pint of common salt. Mix well and let the barrel be half full of the liquid, then with a dish let down your eggs into it, tipping the dish over after it fills, carefully avoiding breaking any of the eggs. Place a board on top of the pickle with lime and salt on it, to help keep the brine strong on top.—The eggs must always be kept covered until they are required for use.

3rd. VARNISHED EGGS.—Dissolve gum shellac in sufficient alcohol to make thin varnish, and give each egg a coat of it, and when dry pack in bran or sawdust. When the eggs are wanted for cooking the varnish can be readily washed off.

4th. GREASED EGGS.—Dip the eggs in melted parafine and afterwards pack in bran.

5th. PLASTERED EGGS.—Get a bag of land plaster (plaster of Paris) and pack each day's eggs, as they are laid, in a box in the cellar, or other cool place, carefully surrounding each egg with the plaster so that they will not touch each other or the side of the box. This latter mode will not be successful except when the box is kept in a cool place, as heat over 70° will damage the eggs.

APPLES AS DIET.

Children usually demand sugar in large quantities, and in some form it should be given them. There are few more agreeable or healthful forms in which to secure it than in fruit, and especially in good, sweet apples. An abundance of sweet apples, ripe and luscious, should be had in every household where there are children. Prepared in various ways they are important to the dietary of the family. They supply sugar in a pure form.—Baked with cream they are delicious. Few breakfast dishes are superior to sliced sweet apples fried in butter.—Cut the slices across the apple, leaving the skin on, and cutting out the core. This dish will take the place of meats for two or three days in the week. Few fruits have as many elements for sustaining of life and health, as the apples. In some countries an almost exclusive diet for weeks is made of apples prepared in various ways.—*American Cultivator.*

WHAT TO TEACH GIRLS.

Give your daughters a thorough education. Teach them to cook and prepare the food of the household. Teach them to wash, to iron, to darn stockings, to sew on buttons, to make their own dresses. Teach them to make bread, and that a good kitchen lessens the doctor's account. Teach them that he only lays up money whose expenses are less than his income, and that all grow poor who have to spend more than they receive. Teach them that a calico dress paid for fits better than a silken one unpaid for. Teach them that a fine healthy face displays greater lustre than fifty consumptive beauties. Teach them to purchase and to see that the account corresponds with the purchase. Teach them good common sense, self trust, self help and industry. Teach them that an honest mechanic in his working dress is a better object of esteem than a dozen haughty well dressed idlers. Teach them gardening and the pleasures of nature. Teach them, if you can afford it, music, painting, &c, but consider them as secondary objects only. Teach them that a walk is more salutary than a ride in a carriage. Teach them to reject with disdain all appearances, and to use only "Yes" or "No" in good earnest.—*Mgr. Capel.*

DON'T BEGIN IT, BOYS.

There is a young lad in this city who has a good place, and attends faithfully to his duties. He had one bad habit, and that was chewing tobacco, in which he indulged more freely than men who had chewed for fifty years. Last Saturday a gentleman offered the boy $5 if he would quit chewing for a year. Another followed suit, and a third all signing their names to a paper, all agreeing to give the same sum. The boy said he would win the money, washed his mouth out, and began right away.—Sunday he felt badly, and Monday he was worse. Tuesday he shook and trembled like a man with the *delirium tremens*, and yesterday he was confined to his bed, from which he has got up, and it will take some time before the effects of the poison in his system can be worked out.—*Hartford Times.*

PARSONS' PURGATIVE PILLS

MAKE NEW RICH BLOOD

And will completely change the blood in the entire system in three months. Any person who will take 1 Pill each night from 1 to 12 weeks, may be restored to sound health, if such a thing be possible. For Female Complaints these Pills have no equal. Physicians use them for the cure of LIVER and KIDNEY diseases. Sold everywhere, or sent by mail for 25c. in stamps. Circulars free. I. S. JOHNSON & CO., Boston, Mass.

DIPHTHERIA

Croup, Asthma, Bronchitis, Neuralgia, Rheumatism. JOHNSON'S ANODYNE LINIMENT (*for Internal and External Use*) will instantaneously relieve these terrible diseases, and will positively cure nine cases out of ten. Information that will save many lives sent free by mail. Don't delay a moment. Prevention is better than cure.

JOHNSON'S ANODYNE LINIMENT CURES Influenza, Bleeding at the Lungs, Hoarseness, Hacking Cough, Whooping Cough, Chronic Diarrhœa, Dysentery, Cholera Morbus, Kidney Troubles, and Diseases of the Spine. Sold everywhere. Circulars free. I. S. JOHNSON & CO., Boston, Mass.

MAKE HENS LAY

It is a well-known fact that most of the Horse and Cattle Powder sold in this country is worthless; that Sheridan's Condition Powder is absolutely pure and very valuable. Nothing on Earth will make hens lay like Sheridan's Condition Powder. Dose, one teaspoonful to each pint of food. It will also positively prevent and cure CHICKEN CHOLERA, Hog Cholera, &c. Sold everywhere, or sent by mail for 25c. in stamps. Furnished in large cans, price $1.00; by mail, $1.20. Circulars free. I. S. JOHNSON & CO., Boston, Mass.

FAILING.

This is what a great many people are doing. They don't know just what is the matter, but they have a combination of pains and aches and each month they grow worse.

The only sure remedy yet found is Davis Quinine Iron and Wine, and this by rapid thorough assimilation with the blood, purifies and enriches it, and rich, strong blood flowing to every part of the system repairs the wasted tissues, drives out disease and gives health and strength.

This is why Davis' Quinine Iron and Wine will cure Dyspepsia, Indigestion, Liver Complaint, Malaria, Intermittent Fevers, General Debility, etc.

BURTON, SUN. CO., July 17, 1883.

GEO. H. DAVIS:

Dear Sir,—I was a great sufferer from Dyspepsia, and for several weeks could eat nothing, and was grower weaker every day. I tried Davis' Quinine Iron and Wine, and am happy to say I now have a good appetite and am getting stronger. Yours.

JOSEPH McCAWLEY.

Davis' Quinine Iron and Wine is not a drink and does not contain whiskey. It is a simple preparation of Iron and Quinine that causes no injurious effects. Get the genuine. Ask for Davis' and take no other. Price 50 cents. Prepared only by

GEO. H. DAVIS,

COR. QUEEN AND REGENT STS, FREDERICTON.

THE STORE recently occupied by Mr Donald Morrison, situate in the ADVOCATE building. Possession given immediately. For particulars apply to

W. C. ANSLOW.

Newcastle, June 16, 1884.

NOTICE.

To the Harbour Master, Pilots, Owners, Masters and persons in charge of vessels on the Miramichi River, N. B., and all others whom it may concern;

THE Department of Public Works of Canada, being about to resume operations for the improvement of the Channel at the Horse Shoe Shoal, at the Lump or Outer Bar, and at the Grand Dune, near the entrance of the Miramichi River, will from this date have the

Dredge "St. Lawrence."

engaged in performing the dredging required and the said dredge will have a number of anchors, lines, and cables for mooring purposes deposited in the Channel and on the flats on either side of the Channel, at the Outer Bar and at the Grand Dune at the same time, all of which when put down will be buoyed.

All masters of Steamers, are cautioned to keep clear of said buoys, lines and cables, so as to prevent their being taken up and fouled in the paddles or propellors—as the above mentioned moorings will be in place whether the dredge is there or not.

As whilst working it is not possible to shift or remove the dredge, vessels will be required to give it a wide berth so as to avoid collision and damage.

By order,

HENRY F. PERLEY,
Chief Engineer.

Ottawa, June 25 1884.
