"CARILLON, 18th Dec. 1837.

"I have the honour to report, for the information of His Excellency the Lieut. General Commanding, that overtures have been made to me from the District on the South side of the River Ottawa, stating that the people *en masse* were ready to lay down their arms on receiving a protecting certificate, similar to the one left with me at the Grand Brule.

"I have appointed to-morrow to commence with the Rigaud parish. Vaudreuil is also in like manner to come in. I have been the entire of this day, together with two other Officers, receiving arms, taking evidences and giving certificates to individuals who are hourly coming in from the surrounding country as far as St. Soholastiqe, and I have reason to suppose that the same feeling exists through every part of this Country.

MAP shewing the position of NAVY ISLAND.

The above sketch is designed to assist the reader in acquiring a correct idea of the position of *Navy Island* and the adjacent territories, now objects of great interest through the madness of the traitor Mackenzie, and the recklessness of numerous American citizens who have violated the neutrality which their country is bound to observe by joining his rebel army.

The great channel thro' which the waters of Lake Erie pass into lake Ontario is called the Niagara. In descending this river Upper Canada lies on the left and the State of New York on the right. At Fort Erie it is over a mile wide, and about 7 miles below is divided into two channels by *Grand Isle*, which contains 11,200 acres and belongs to the United States. This island is well wooded and has some settlements on its S. W. shore. To the Northwest of its lower end *Navy Island* is situated in the western channel, below which the whole waters unite and 3 miles further down, tumble over a slate and limestone rock 162 feet perpendicular, forming the most stupendous cataract in the world From the source of the Niagara for 13 miles down, the fall is only 15 feet; but in the next half mile (which reaches the falls) the descent is 51 feet.

Navy Island comprises over 600 acres, and is therefore a little larger than Chamcook island in this vicinity; it is half a mile from the Canadian shore. The branch of the river that separates it from Grand Isle, is nearly half a mile broad and is the division between the territory of the States and Upper Canada, Navy Island being the only one in the Niagara that belongs to Great Britain. The current on each side of it is very rapid and the only place of landing is at the upper end. The bank of the island opposite Canada is higher than the main shore, and the land descends towards the American side It is *said to be* a strong position, but strength is often relative, and we will close this notice by an extract from the last *New York Albion*, in which we most cordially agree in in opinion with the able Editor.

"Navy Island cannot long hold out. It has no resources within itself, having only a superficial extent of *300 acres. All supplies must be drawn from the United States, and if 800 persons are present, it will require an expenditure of $300 per diem to feed them. Who, we should like to be informed, will furnish $2000 per week, to maintain men assembled for such unlawful purposes? General *Famine* will desperse them immediately

* We think this an error; it contains over 600
