Doctor Said She Had Bright's Disease.

DOAN'S KIDNEY PILLS CURED HER.

Bright's disease is a term applied to one of the most serious of all diseases of the kidneys, the symptoms of which are often of a severe character.

Severe pains in the back appear at first and are followed by disturbances of the urinary organs which show that the urine contains a large amount of albumen. Dropsy is also another forerunner of the dreaded Bright's disease. On the first sign of any kidney trouble you should at once put the kidneys right by the use of Doan's Kidney Pills. The pill that cures kidney troubles only.

Mrs. C. A. Heistand, Mooswa, Alta., writes: "Last May I was taken down sick. The doctor told me I had Bright's disease. My kidneys got so bad I could not rest day or night. The doctor's medicine did not give me any relief. I used four boxes of Doan's Kidney Pills, and they put me in good shape again."

Doan's Kidney Pills are the original kidney pill, so when you ask for "Doan's" do not accept any others with similar names.

Price, 50c per box, or 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

KEEPING WARM IN THE ARCTIC

The Antarctic Explorer Tells How to Keep Warm in Frozen Region.

Sir Douglas Mawson, the Antarctic explorer, tells a thrilling story of tragic adventures on the expedition of his "Aurora," which started from Hobart, Tasmania, in 1911, and encountered so many difficulties that members of the party perished.

"Did you expect to survive the last trip, when your two companions, Dr. Mertz and Lieutenant Ninnis, died?" he was asked.

"I felt there was no chance at all," calmly remarked Sir Douglas. "But it was a case of plug along and do the best work possible. With food nobody in the Arctic or Antarctic freezes to death. Food is like a fire to the human system. Food is a great strengthener, and when one is strong and full of fight the desire is for fat. Hunger in the tropics or in a warm clime is bad enough, but hunger with cold is cruel torture. Beef suet is the most nutritious foods, rice the least nutritious.

"Onerea lly does not appreciate good food until one is starving," remarked the explorer. "In the very cold regions of the earth beef is a dish fit for the gods. You see, it is something like this. As you go farther and farther south your appetite changes in a perceptible manner. The colder the weather grows the more fat you want, until beef suet becames a dainty to which you look forward with eagerness.

"With the expedition in which I had the honor to be a member were several good cooks. We had a great variety of food, for I scoured the world for my supply before starting, having had some experience in that direction.

"We therefore had a varied bill of fare; but the central item, the piece de resistance, was nearly always beef suit during the two years we were at that point in the Antarctic, where the gales blew with undiminished vigor night and day.

"How did we cook? Why, with great ease; by the use of alcohol stoves when on the sledge journeys. Some of the men became proficient in the preparation of penguin stews and roasts, as well is in the cooking of seal.

"The penguin his streaks of blubber which are distasteful under ordinary conditions, but when ons is cold and hungery enough they make excellent soup. Taken under ordinary conditions, the stomach would throw the mess off. But when one is really hungry one eats almost anything with relish and without the use of sauces."

Speaking about the war, Sir Douglas said: "Twenty-five of our original party or sixty are either on the firing line in France or with the Australian forces, guarding the Suez Canal. I will offer my services and go to the front myself just as soon as I complete my lecturing contracts in America."

POLICE COURT

The case of Edward Redmond, who was arrested some time ago for lying and lurking in Elmore and Mullin's store on the South Wharf, was resumed in the police court yesterday morning and considerable testimony taken, after which the prisoner was remanded.

Daniel Thompson testified that about 4 o'clock in the morning in question as he was going home from his work at The Standard office, he heard a shot from the direction of the South Warf and hastened towards the sound. He met Officer Ward, who told him there was a man in Elmore and Mullin's store. On arriving there they found a board over a broken window in the front door and on looking in saw a man warming himself by the fire. The man was wet, drinking and appeared to be in a stupified condition. He assisted the officer in the window and walted there till he started for Central.

Officer Ward's testimony was similar to that of the previous witness.

Alfred C. Kerrison, an employe of the firm, testified that he had locked the place up securely on that night. He further identified as his own, a coat which the prisoner was wearing and which had been given the defendant by the police officer. When found the prisoner was soaking wet and had only one boot on. The hearing was but preliminary.

Some further evidence in the case of James McIntyre, charged with stealing $30 from Roy Kirkpatrick, was taken yesterday morning and the prisoner was remanded. Officer Gosline testified that on that night he saw five or six men on Main street and that the plaintiff and defendant were in the crowd. About 12.30 o'clock he heard a shout for help and on turning into Elm street saw McIntyre chase Kirkpatrick and grab him round the neck. He investigated and on learning the trouble he asked defendant if he had plaintiff's money, and defendant refused to answer. Officer Briggs testified that he had taken $10 off the prisoner and defendant had said he had no money belonging to anybody. U. J. Sweeney appeared for McIntyre.

George Fogala, a Russian about 18 years of age, arrested for stealing coal from the I.C.R. was remanded. He spoke very poor English.

Kenneth J. McRae, Norwegian vice-consul, appeared in the police court to ask for the release of Siquard August and Edward Swanson, who were sentenced to two months in jail for fighting, and the magistrate agreed to let them go. The men were with the chain-gang yesterday morning and were let go, the captain of the bark on which August worked agreeing to give both of them work.

John Connell, who has been living on the bounty of the city for some time, was brought up for a further hearing on the charges of drunkenness and causing a disturbance in his father's house. His father was cut while endeavoring to take a butcher knife from the defendant, according to the former's testimony yesterday morning. He was drunk at the time and attempted to injure himself. He was let go on a suspended sentence of $8 or two months on condition that he take the pledge.

Twitching of the Nerves Broken-down System

Now Entirely Cured—Never Used Any Medicine With Such Benefit as Dr. Chase's Nerve Food.

Headaches, sleeplessness and nervousness are often very disagreeable, but when your nervous system gets into such a condition that the nerves twitch and jerk, and you have peculiar nervous sensations come over you there is cause for grave alarm.

Everybody dreads the thought of paralysis or locomotor ataxia. Nothing is worse to look forward to than helplessness. Sometimes it is helplessness of body, and at other times the mind is affected, which is far worse.

MRS. M'KELLAR.

The writer of this letter did not know what to expect, but fortunately began the use of Dr. Chase's Nerve Food in time to head off danger, and writes that she was entirely cured of the old trouble. The last paragraph proves that the cure was lasting.

Mrs. John McKellar, 11 Barton street east, Hamilton, Ont., writes:—"I was injured some years ago, and that left me with a broken-down nervous system. I could not sleep, and suffered from twitching of the nerves and disagreeable nervous sensations.

"I then began using Dr. Chase's Nerve Food, and can say that I never used any medicine that did me so much good; in fact, I am entirely cured of my old trouble. The Nerve Food not only strengthened the nerves, but also built up my system in every way."

Under more recent date Mrs. McKellar writes confirming her cure, and states that she has had inquiries from many people who had heard of the great benefits she obtained from Dr. Chase's Nerve Food.

Dr. Chase's Nerve Food, 50c a box, 6 for $2.50. At all dealers.

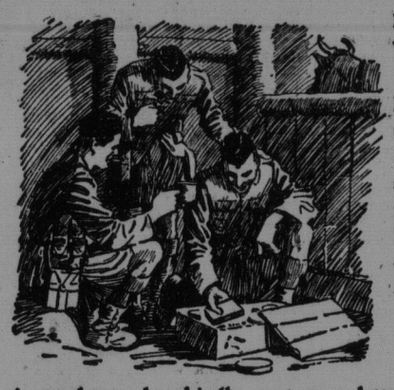
OXO CUBES at the War

Striking Letters Demonstrating the Value of OXO CUBES



From a member of the London Scottish with the British Expeditionary Force.

And so after all these horrors here I am living in a cow byre some way away from the firing line to recuperate. Like manna, however, your glorious box has arrived, coffee and milk, butter, OXO—oh joy! Never was seen a more glorious box, and all my cow byre is interested in it. We start to-night on our feast, and I am to thank you both from all my section for being so generous.

Reprinted from the London "Globe," December 12th, 1914.

A gentleman has kindly sent us a letter from his son in the Army Service Corps in which he says:—

I must tell you how delighted I was to get the OXO CUBES. They are great. You should have seen us preparing them. We made a wood fire by the roadside, and boiled the water in an empty petrol can—enough for three of us. The OXO was made in my dixie can, in which we soaked some biscuits. We then placed the can on the fire to boil; all the time it was raining hard, but we were repaid by the satisfaction we got for our efforts.

I shall be very pleased to get some more when you are sending again, as a good cup of OXO before we turn in at night considerably warms us up.

Follow the example of the men at the front, who have proved in emergencies that OXO CUBES give warmth and nourishment quickly and effectively. OXO CUBES build up strength to resist cold and disease; they increase nutrition; they remove fatigue. Added to stews and hashes they make food more nourishing and save expenditure on meat; they are handy for sleigh journeys and outdoor sports—with hot water they make a quick hot meal in a moment; in fact, they exactly meet the needs of all classes.

OXO CUBES

In 10c. and 25c. Tins.
Also in tins of 50 and 100 Cubes.
