subscribe in the North who is entitled to proper conditions of this manifesto, there is none in the South authorized to entertain them. Those who control the armis are servants of the people, not their masters, and they have no more inclination than they have a right to subvert social institutions of sovereign States, and to barter away their priceless heritage of self-government."

LATEST.

By the telegrams we learn that fighting has been resumed at Petersburg, and attended with severe loss of life. A mine sprung under one of the forts gave some promise of Federal occupation of the city—but the position thus gained has been retaken by the Confederates. Several thousand have been killed on each side in the late battle. It is feared that the enforcement of the draft in New York and some other places, will lead to riots on a large scale.

European.

An unavoidable delay in our present issue enables us to give a few items of news by the *Africa*.

In House of Lords on 22d, Lord Stratford and Radcliffe called attention to the new Holy Alliance—expressed his belief in it, and urged the Government to take stepsto counteract its influences.

Earl Russel did not believe in revival of Holy Alliance; thought it impossible, and contended there was no cause for alarm. He thought the good understanding existing between France and England would ensure the peace of Europe.

In House of Commons Mr. Osborne gave notice of Bill to repeal Aberdeen Act of '45, relative to Slave trade, &c.

It is announced that Dr. Livingston, after spending about four months in England, will return to Africa on a new expedition, to put in train operations by which the slave trade shall be eventually cooked out. &c.

The surrender of Captain Hammer to the Prussian gunboat bletz took place between Tylt and Amrum, on the 19th. Eight officers, 244 men, 2 steamers, 2 coasting vessels, 10 customs' cutters, and 5 transport ships fell into the hands of the Prussians.

A Prussian force, 6000 strong, entered Rendsburg 21st, and took possession of town from German Federal troops. Federal Diet ordered General Hake to protest against the proceeding.

Diet at Frankfort adopted by large majority, a resolution calling on Duke Augustenburg to substantiate his claims to Schleswig-Holstein.

The Paris *Pays* warns the German Powers against incorporating that part of Schleswig inhabited by Danes; and points out that the law of retaliation exists, and if they set the example of spirit of conquest, others may follow.

Herr Von Bismarck arrived at Vienna to attpeace negotiations.

Reported that Spanish Cabinet have resolved to act energetically in order to obtain entire satisfaction from Peru.

GRAHAM'S PAIN ERADICATOR.

How many Consumptives owe their afflictions to that fatal mistake of "*waiting for a Cough to get well of itself.*" Avoid this error, by availing yourself of that sure remedy for Coughs, Colds, and all pulmonary complaints—"Graham's Pain Eradicator."

Read the following from John Murphy, Esq., Coroner, Petersville, Queens county, N. B.

"In the autumn of 1861, one of my sons was seized with a distressing Cough which rapidly increased in severity, accompanied by pain in the chest, spitting of blood, etc.: under the combined effects of which he became rapidly reduced—Hearing of the astonishing results of Graham's Pain Eradicator in the cure of disease, I procured a bottle, by the use of which, I am happy to say he was restored to perfect health.—From this, and other instances of its efficacy, I can with increasing confidence, recommend it to the afflicted."

The Charleston Courier makes a timely suggestion in recommending the attention of our government to the naturalization and cultivation of Calisaya, for the preservation of the health of our soldiers. This article has a peculiar effect upon the liver, and guards the system against disease by exposure and irregular diet. It is said that the great success of the Plantation Bitters of Dr. Drake, which, previous to our unhappy difficulties was found in most Southern homes, was owing to the extract of Calisaya Bark which it contained as one of its principal ingredients—"In confirmation of this, we have heard one of our most distinguished physicians remark, that whenever he felt unwel from ordinary dietetic or atmospheric causes, he invariably relieved himself by Plantation Bitters. Now that these Bitters cannot be obtained, a substitute should be prepared.—We understand our government has opened negotiations with Dr. Drake' through a secret agent, but with what truth we do not know." * * * * * * * * *

We are exceedingly obliged to the Richmond Whig for its remembrance of "Auld Lang Syne, qui we can assure "Our Government" that the Plantation Bitters are not for sale to any "secre agents," North or South There is propably several other things that "Our Government" will yet want

We know that we have the best and most popular medicine in the world. We are not afraid to show what it is composed of

Physicians are compelled to recommend it.

Calisaya Bark has been celebrated for over two hundred years, and was sold during the reign o Louis XVI, King of France, for the enormous price of its own weight in silver. It is remarkable for Dyspepsia, Fevers, Weakness, Constipation, &c.

S.—T.—1860—X.

Another wonderful ingredient, of Spanish origin imparting beauty to the complexion and brilliancy to the mind, is yet unknown to the commerce of the world, and we withhold its name for the present

MR. EDITOR:

PRESUMING you have heard of the above named material in connection with the practice of Dentistry, without any very definite idea of its uses or merits, I beg to state for your information as well as that of the readers of your valuable paper, that by a process of heat, the soft rubber is rendered as hard as bone, and can be finished and polished as thin and as smooth as the gold plate. Its advantages over metal are—that it takes the form of the mouth in the out-set more readily, and in succeeding operations no chance exists of its being other than an exact fit. It is quite as strong as other work, and perfectly clean and sweet. It is light, it is easy to the gums; and very durable. It is free of taste and can be used in mastication with perfect freedom; while for aged people it is peculiarly adapted in many ways. I do not recommend it as better than gold; yet after using it for four years with entire success, I am prepared to say that is is better than any material which is cheaper than gold; and I have great pleasure in being able to offer so good and beautiful a substitute for gold. It is now being extensively used both in England and America, and in the opinion of the leading Dentists of the day its durability as well as its cheapness, will give it place over any other substance now in use as a base Yours respectfully,

O. P. MACALLESTER, DENTIST.
