Potatoes the bushel, Olive Oil in casks the gallon—in jars and bottles the gallon, Linseed Oil raw or boiled the gallon.

Wood, viz:—Pine, White, and in proportion for any smaller quantity thereof, per thousand cubic feet.

Pine, Red, per one thousand cubic feet.

Oak, per one thousand cubic feet.

Birch, per one thousand cubic feet.

Ash, Elm, Tamarac, or Hacmatac, and other woods not herein charged with duty, per one thousand cubic feet.

Staves, standard or measurement, per standard mille; Puncheon or West India:—

White Oak; per standard mille.

Red Oak, per standard mille.

Ash, per standard mille.

Barrel, per standard mille.

Deals, Pine, per Quebec standard hundred.

Spruce, per Quebec standard hundred.

Handspikes per dozen, Oars per pair.

Plank; Boards and all kinds of sawed Lumber not herein charged with duty, per one thousand superficial feet, inch thick, and so on in proportion for any greater thickness.

Eggs, Fruit not enumerated, Poultry and Game, Seeds not enumerated, Vegetables not enumerated.

Ashes of all kinds, Bark, Burr Stones unwrought, Berries, Nuts and Vegetables used principally in dyeing.

Cotton, Wool, Coals, Fur Skins or Peltries undressed or unmanufactured, Hemp, Flax and Tow, Hides raw, Mahogany and Hard Wood unmanufactured for Furniture, Palm Oil, Saw Logs, Soda Ash, Tallow, Lard, Fish Oil, Fish salted or cured, Oysters, Lobsters, and Turtles.

SCHEDULE B.

Each Imperial Quarter of Foreign Wheat not intended for exportation, or to be ground into Flour and the Flour exported.

Each quarter (of four hundred and eighty pounds weight) of Maize or Indian Corn, not intended for exportation.

Some discussion ensued upon this motion, Messrs. Colville, Williams, Gowan, Cauchon and Berthelot speaking for, and Messrs. Smith, Ermatinger, Webster, Aylwin, and Armstrong against it. The Ministry, supported by Mr. Moffatt, urged that the present duties yielded a revenue of £30,000, and they begged to have the decision on the resolution postponed till Monday, in order that they might have time to consider that part of the subject, and ascertain whether the deficiency could be made up in any other way if Mr. Merritt's views were carried out.

At length Mr. DeWitt moved that the Committee do rise, report progress, and ask leave to sit again, which was carried by 29 to 9 notwithstanding Mr. Armstrong's loud call upon agricultural members to negative the proposition at once.

The Annual Meeting of the Shareholders of the Toronto and Lake Huron Railroad Company, for the election of Directors and other business, was held at their office on Monday, July 5, at 12 o'clock.

The Hon. Wm. Allan was called to the chair.

Mr C. Gamble read the notice calling the meeting, and then read the Report, from which we take the following extract:—

Report of the President and Directors of the Toronto and Lake Huron Railroad Company, to the Annual General Meeting, July 5, 1847.

The President and Directors of the City of Toronto and Lake Huron Railroad Company submit to the Annual General Meeting of the Shareholders now assembled, pursuant to the Act of Incorporation, the following Report:—

Disbursements of Company to 14th July, 1846		£3031	2 10
Expenses incurred since, to 30th June, 1847...		281	14 9
		£3312	17 7
Instalments paid in, to 14th July 1846	£3064 10 4		
Instalments received since, to 30th June, 1847.....	125 10 0		
		£3190	0 4
Liabilities of Company.....		£ 122	17 3

Besides which, there is a claim of £111 7s. 6d. for rent for certain water lots, which, the Directors think, under the conditions of the purchase, cannot be recovered from the Company.

THE CHEROKEE.—We have hitherto omitted to notice the arrival in our harbour of H. M. Steamship *Cherokee*, Captain Fowell. She is a beautiful craft, and sits like a swan on the water. Her length is, we believe, 200 feet, and her measurement 200 tons. She is fitted with Maudsley & Field's engines, which are worthy the high reputation this firm has attained throughout Europe. Her armament consists of 2 Paixhan guns placed on traverses, the one forward, the other aft. Each of these fearful instruments of destruction weighs 65 cwt. 34lbs., and carries solid shot, weighing 68lbs., or hollow of 56lbs. weight.

On Wednesday last, her Commander courteously invited the officers of H. M. 81st Regt., and those of the Independent Artillery Company of Toronto, to witness the ball practice.

At the vessel's side they were received by Capt. Fowell, Dr. Forbes and other officers, and conducted over the ship, when her commodious berths and ample accommodation for the transport of troops, was the theme of general remark and commendation.

Leaving the cabins we observed on the deck the Hon. Jas. E. Small, Col. O'Brien, Chas. S. Small, Esq., F. Gzowski, Esq., and a number of ladies. But a short time elapsed before the firing at a long range (1000 yards) commenced.

The practice was excellent, every ball proving a mischievous one.

This over, the visitors were invited by the kind and affable commander to take refreshments in his cabin, whither all retired and enjoyed his hospitality.

On the return of the company to the deck, the short range practice, at 800 yards, commenced, and in this the firing was not less masterly, striking the target (which was erected on the island) several times.

During the practice, the officers of the Volunteer corps and one or two others tried their hands at the range by invitation of Capt. Fowell.

The intended number of shot having been thrown, the shattered remains of the target were then brought from the island to the ship, after inspecting which the visitors returned to the shore delighted with the courteous attention shown them while on board.—*Colonist.*

EMIGRANT HOSPITAL, TORONTO.—Admitted during the week ending July 4th, 146; died, 22; discharged, 45; remaining in Hospital, 248.

TORONTO BUILDING SOCIETY.—TENTH LOAN MEETING.—At the Monthly Meeting of the Society, held last evening, funds to the amount of £500 were sold at an average premium of 35¼ per cent. The particulars are appended. The directors of the society, as appears by their advertisement, have advanced the premium on shares to £3 10s. per share.

Lot No. 1, of	£100,	307	35	£65	0	0

—*Colonist.*

ODD FELLOWS' SOCIETY, M. U.—Last Friday the various Lodges of this Society celebrated their third anniversary in this city. Arrayed in their various paraphernalia, they attended divine service in St. James's Cathedral, where a collection was made in aid of the Widows' and Orphans' Fund, and afterwards paraded the streets in due order. In the evening they dined together in the City Hall, the Hon. the Vice-Chancellor presiding. The dinner, which was provided by Mr. Horwood, was highly praised, and the conduct of the honourable and learned Chairman gave universal satisfaction.—*Patriot, July* 6.

KING'S COLLEGE ENDOWMENT.—By the way, how do the people of Canada pay the Professors of King's College or the other expenses attending it? Do these expenses come out of the revenues of the Province? Does Mr. *Examiner* pay *one farthing* out of the proceeds of his paper or other property either directly or indirectly? HE KNOWS HE DOES NOT. The expenses of that establishment are derived from property granted for the express purpose by the Crown, and on which the same taxes are paid by the College towards the public revenues, as are paid by any private individual. The *Examiner knows* that the college property possesses no exemption from taxation of any kind. *He knows* also that the tenants of the College lands are in the same position, if not in a better, than they would be in regard to any other landlord; and yet the *Examiner* and his clique have the hardihood to say that the people of Upper Canada "pay," in other words *are taxed* for the expenses of that noble establishment. As well might he assert that the people of Lower Canada are taxed for McGill College. These are sufficient illustrations of the *Examiner's* hostility to candour and to SIMPLE TRUTH.—*Patriot.*

CROWN LAND DEPARTMENT.—A Montreal correspondent of the Kingston *Chronicle & Gazette* says, that the office now held by Mr. Bouthillier in the Crown Land Department is to be divided, and that Mr. Gowan and Mr. Bouthillier are henceforth to be colleagues. We have heard nothing of this appointment, and do not think it likely at present.—*Mon. Courier.*

HEALTH OF MONTREAL.—Understanding that there have been, and still are, unfavourable reports respecting the sickness among the Emigrants, and the present health of the city, we deem it but just and proper to give from authentic information an impartial statement of facts. The city at present is unusually healthy in its accustomed population; and while there prevails among the Emigrants the diseases incident to long voyages, and dense and crowded crews, there is no cause for alarm whatever. We were apprehensive that such reports concerning the health of the city might prevent the usual introduction of strangers and travellers from the United States and other places; and feel warranted in stating from the best authority, that there is not the least foundation for such unfavourable rumours. In confirmation of our statement we subjoin the following weekly returns of interments in the City of Montreal:—

Males.

Boys	31
Married Men	3
Widowers	3
Bachelors	7
Total	44

Females.

Girls	28
Married Women	11
Widows	2

Of whom were Emigrants	45
	47
Corresponding week last year	69
Less this year	22
At the Emigrant Sheds	173

—*Montreal Pilot.*

THE WHEAT CROP.—We make the following extracts from our exchanges of the last few days, for the purpose of enabling our readers to form an estimate of the wheat crop in the different parts of Canada West, at the present time:—

We took a ride yesterday a few miles into the country, chiefly for the purpose of examining the crops; and we are sorry to say that they present a very discouraging appearance. There is such damage done by the fly, that some whole fields are rendered quite useless. In no part will there be an average crop.—*Brantford Courier.*

There is too much reason to fear very extensive failures of the autumn wheat crops in the United states and this Province, owing to the ravages of the Hessian fly, of which we hear loud complaints.—*Toronto Canadian.*

We regret that we have to stop the press to say that the Hessian fly has, within the last two or three days, made its appearance in this neighbourhood. So rapid and withal so destructive are its ravages, that our informant saw a field of wheat being ploughed up, in which, a few days ago, not the slightest trace of it could be perceived.—*Woodstock Herald.*

The fall wheat is not generally good, although it is probable we shall fare as well, or perhaps better, than many parts of the Province, except where the worm has done injury, which is only partial. The Spring crops are generally promising, but nothings taken into consideration, we are not justified in expecting so good a season as the last.—*Guelph Advertiser.*

LONDON ELECTION.—On Monday last, according to previous proclamation by W. Horton, Esq., the Returning Officer, the electors assembled at the Court House, to proceed to the nomination. We had before stated that there would be no opposition to Mr. Wilson; but contrary to all expectation that gentleman had not returned from Buffalo—having availed himself of the long interval between the arrival of the writ and the day of nomination to take a journey on family business in order to save time after his election. A telegraph notice had been received by Dr. Salter, the Chairman of his Committee, informing him that he was detained at Buffalo, the steamer not being come in. Dr. Salter having explained the cause of Mr. Wilson's absence, bespoke a suspension of judgment on the part of the electors till he should appear or they receive further information.

As Mr. Wilson's absence could not be further accounted for, in order to secure the return of a Conservative Candidate, as well as to allow Mr. Wilson the opportunity of making a full avowall of his political sentiments, Mr. Beecher was nominated on the Conservative side, which immediately led to the nomination of Dr. Lee on the Reform side, and a poll was demanded for both.

The meeting was addressed by Messrs. Lawrason and Dixon in support of Mr. Beecher, as well as by the latter gentleman as a Candidate; all, however, clearly stating that should Mr. Wilson return in time, and fully satisfy the Conservative party as to his political views, they would support him, and Mr. Beecher would retire. The Returning Officer then appointed Friday and Saturday the 2nd and 3rd of July for the polling to take place.

Mr. Wilson returned during the night, and his Committee next morning issued notices for a public meeting of the electors the following day.

On Wednesday, there was a full attendance of the electors in public meeting, when Dr. Salter was called to the Chair, and C. Monsarrat, Esq., requested to act as Secretary, when Mr. Wilson entered into his political views, as well as explained the cause of his unfortunate detention at Buffalo, to the satisfaction of the persons present. Mr. Wilson occupied from an hour and a half to two hours in the delivery of his political sentiments, and in replying to questions on various topics suggested by the electors present. We have no space for even an outline of his speech; suffice it to say that the leading Conservatives expressed themselves entirely satisfied as to the soundness of Mr. Wilson's political character as a Conservative. Mr. Beecher announced his retirement from the contest, as did also Dr. Lee, which they will do in writing in a formal way at the Polls this day, and Mr. Wilson will be declared duly elected.

Mr. Wilson has the support of the Reformers as well as of his own party; of the latter from the confidence they have in his political integrity, from his views on practical measures, which he most fully and satisfactorily elucidated, and from the conviction impressed on the minds of the electors generally, that when political party cries and party phrases are laid aside, and the state of the province, and the nature of the required business measures in Parliament are taken up practically, there is very little difference between Conservatives and Reformers. There remains only that essential difference which Mr. Wilson so ably pointed out in his speech, to the effect that while it was madness to resist the progress of events belonging to the age in which we live, and true Reformers are conscientiously the instruments in that progression of events; Conservatism does not resist the torrent, but guides its course, and prevents it overflowing its banks. We are happy to notice such harmony existing between both political parties on the present occasion, and such a general confidence that Mr. Wilson will make a useful, diligent and able representative in Parliament for this Town.—*London Times.*

EXECUTION IN GUELPH.—We believe that Cochlin, the murderer of Mr. Oliver underwent the extreme penalty of the law in Guelph, on Thursday last, the 1st inst. We substain from republishing the particulars, as they are given in detail by the *Galt Reporter*. They are perfectly revolting, and no good can possibly result from placing them before the public eye.

DEATH FROM LAUDANUM.—Some eight or ten days since a very respectable woman named Hart, aged 68 years, lost her life in New York under the following circumstances:—Mrs. Hart complained of cold, and feeling rather indisposed sent her grandson to a drug-store for some tincture of rhubarb.—on the boy's arrival at the store, he asked the clerk for what he wanted; the clerk pointed it out to the apprentice and told him to give it; the lad in taking it from the shelf, mistook the bottle and gave instead, laudanum, which stood next, a small vial full. The boy asked the clerk how much was to be taken, whereupon he replied "take it all!" Mrs. Hart accordingly took it, and at 10 o'clock next morning she was found to breathe with difficulty, and before medical aid could be rendered, died. We understand the parties are committed for trial.—We hope that this act of carelessness will serve as a warning to apothecaries generally to be more than ever careful, and not trust their business—wherein peoples' lives are involved—to youngsters who are scarcely old enough to be out of the nursery. —*Brantford Courier.*

We are delighted to perceive from the following announcement that the prosperity of our worthy contemporary of the *Cobourg Star* is on the advance. We rejoice at every thing calculated to promote the increase and dissemination of the principles of that Journal.

The proprietor of the *Cobourg Star & Newcastle District Gazette* having taken into consideration the rapidly increasing enterprise, wealth and intelligence of this district, has come to the conclusion of printing his paper TWICE A-WEEK after the 1st July next. As this project involves a very considerable outlay on the part of the proprietor, and as he intends on the 1st January next, to double the size of the *Farmer*, he trusts that no one will consider FOUR DOLLARS a year for the two papers too much to give. Considering the great fluctuations in the markets the farmers ought, without exception, to patronize the semi-weekly paper.

However, in order that no one may have cause to complain, a weekly paper will be sent to those who desire it, at the heretofore charged price, 15s. a-year in advance.

GREAT WESTERN RAILROAD.—A large and influential meeting was recently held at Carrol's Hotel, Ingersoll, in the Brock District, for the purpose of devising measures to have the Great Western Railway run through, or near the village.—Peter Carroll, Esq., of this city, one of the directors of the Company, was present, and addressed the meeting. He dwelt at large upon the flourishing state of the Company's affairs, and the certainty of an early commencement of the work. C. B. Stuart, Esq., the Company's Chief Engineer, was also present, and imparted some valuable information respecting the survey of the projected line, and the comparative ease with which it could be constructed. Several resolutions were passed expressive of the desire of the inhabitants of the Brock District to obtain a *location* near Ingersoll, and an anxiety to see the work commenced immediately. We are gratified to learn that stock to the amount of £2500 was subscribed for at the close of the proceedings. This is the best evidence that the inhabitants of the Brock District could give of their desire to see the Great Western Railroad go on and prosper.—*Hamilton Spectator.*

THE IMMIGRANTS.—From 1st April to 18th June, 182 patients have been admitted into Hospital. Of these 22 have died and 33 have been discharged. During that time 166 out-patients have been under medical treatment, of whom 38 have died.

Since the 18th June, 53 have been admitted into Hospital, of whom 8 have died, and 6 have been discharged. During the latter period 40 out-patients have been visited, none of whom have died.

It may be remarked that many of those who have died have been brought into the Hospital in a moribund state.

The number now in Hospital is 160.

We have little hesitation in expressing the opinion that the great cause of the malady with which these poor creatures are afflicted is the extreme filthy state in which they have been allowed to embark from their native country; and their subsequent inattention to cleanliness. Most of them are attacked with bowel complaints. To those who consider the necessity which exists for a healthy action of the skin, in such affections, it will not appear strange that medical treatment is too often, in the cases of the Immigrants, unavailing. Until, therefore, some system be established by which cleanliness may be insured it must be considered, by every intelligent medical man, but the enactment of a brutal farce to attempt to dose these unfortunate creatures with drugs. We are glad to perceive that this has attracted the attention of the authorities here, and that means have been adopted to insure cleanliness in all those entering the General Hospital.—*Argus, June* 29.

FIRE IN SYDENHAM.—Early on the morning of Tuesday, the 29th ult., this ill-fated village was again visited with the calamity of fire. It originated in a black-smith's shop, adjoining Mr. Belcher's new tavern, and though every exertion was made to arrest its progress, the devouring element spread with most disasterous rapidity. In a short space of time the smith-shop, the premises of Mr. Johnson, wagon-maker, and 5 dwelling-houses were reduced to a heap of ashes. Several of the inmates of the destroyed tenements managed to save a portion of their furniture, but as no insurance had been effected on any of the property, it is to be feared that several families will suffer serious inconvenience from the catastrophe. It is the general impression that the fire was altogether accidental in its origin. —*Streetsville Review.*

DEATH OF MR. YARWOOD.—It is our painful duty to announce to our readers that Montreal has lost a good citizen and an efficient public servant, by the death of Mr. Yarwood, who was only a few weeks ago appointed the Chief Agent for Emigrants at this port. Mr. Yarwood died of a fever caught while attending to his duties at the Emigrant Sheds—duties which he performed most humanely and efficiently, and in a manner which gained him the respect and confidence of the poor creatures whose wants he attended to, and whom he aided with advice as to their ultimate destination, which, from his knowledge of the country, he was so well able to give. In private life Mr. Yarwood was a most exemplary, amiable, and unaffectedly pious man, and his death will be deeply lamented by all who had the pleasure of his friendship.

EMIGRANT AGENT.—We have great pleasure in stating that His Excellency the Governor General has appointed John Weatherly, Esq., to the office of Emigration Agent at this port, vavant by the death of Mr. Yarwood. A better appointment could not have been made, for all who know Mr. Weatherly are aware that, to the greatest firmness and decision of character, he unites activity, energy, and a most kind and humane disposition. Being himself a Catholic, in this respect also, he will have great advantages in dealing with the Irish Emigrants, who are of the same religion with himself. A better successor to Mr. Yarwood could not have been found.—*Courier.*

EMIGRANTS continue to pour in upon us in great numbers, and they are forwarded without delay to their respective destinations,—the sick being taken to the Hospital. The number of emigrants that arrived by the *City* on Sunday was not far short of 1000 souls, and they appeared to be more healthy, and altogether in better condition than many others that arrived here during the season. We have heard it confidently stated that the emigrants are unnecessarily exposed and delayed on their passage from Montreal to Kingston; the barges in which they are forwarded being detained for days in the canal, instead of being towed without delay by steamers to Kingston We presme that, the Government contract with the forwarders contains some provision, by which the latter are bound to send the emigrant barges through in a given time, so as not to expose the passengers to the unfavourable influence of the weather. The Board of Health at Kingston, in conjunction with the emigrant Agent there, ought to enquire particularly into this business, and see that the emigrants on their upward passage from Montreal, are treated in the manner they deserve, with due regard to health.

A few days ago, two French gentlemen, travellers for pleasure, observing the condition of one or two emigrant families, on the passage from Kingston, gave each a sovereign to the Captain to distribute among them. We believe it was to the same parties that Mr. Charles Robertson, grocer, sent a supply of wine, on witnessing their very reduced state. These are praiseworthy acts of charity.

We are sorry to find that occasional instances of imposture, on the bounty of the Government, are practiced. An Irish family on the passage from Kingston by the *Sovereign*, was so very ragged and filthy, that the Captain insisted on their being washed. While undergoing this process, a belt was observed around the body of the father of the family, which, on examination ,was found to contain 43 sovereigns. These parties were travelling as indigent emigrants, receiving rations and free passages, at the expense of the Government. Capt. Twohy at once made them pay for their passage up, and reported the case to the Emigrant Agent, on arrival in Toronto.—*Colonist.*

The Hon. C. Widmer has returned to Toronto, pretty well tired, we believe, of his parliamentary duties.—*Herald.*

LONDON ELECTION.—J. Willson, Esq., has been elected by acclamation as the representative of the town of London, and is by this time in his place in the House of Assembly.—*Hamilton Spectator, 7th July.*

THE MEMBER FOR DURHAM.—It appears that our information as to Mr. Reid, of Darlington, coming forward on the Conservative interest for Durham was premature. We now earn from the best authority that David Smart, Esq., of Port Hope, is to be the Conservative Candidate, and, as he will receive the support of Col. Reid, the popular Warden of the District, and of the present excellent Member for Durham, J. T. Williams, Esq., there is no doubt as to his running in by an overwhelming majority; indeed, we do not anticipate any opposition whatever.

As to Mr. Smart's qualifications for the duties of a legislator, it is unnecessary to say a single word. Wherever he is known he is respected as a truly honest upright man. Would that our House of Assembly were altogether composed of such as he!—*Cobourg Star.*

THE CROPS.

Extract from a letter, dated Simcoe, (Talbot District,) 29th June, 1847.

In passing through the country from Hamilton, I have been enabled to collect some reliable information respecting the crops. The fall wheat from Dundas to Guelph was so injured by the frost, that not half a crop is expected. A great deal has been ploughed up about Guelph. In Dumfries, Waterloo, Wilmot, and Blenheim, it is generally much destroyed in spots, and about *two-thirds* of a crop is the most that is expected. The Hessian fly has also began to do much injury about Galt, and in the neighbourhood of Brantford. There is also about here a small insect, which bores a hole in the stalk of the wheat just above the ground, and causes it to droop and die. From information I obtained from some gentlemen I saw in Paris, engineers who have lately come from Detroit through the country, I find the fall wheat is about the same west of this. The spring wheat, though backward, is strong and healthy. The oats are generally looking well, but short at present: the warm weather we are now getting will materially assist them. Potatoes are sown in very small patches; a rare thing to see one-quarter or one-half a field sown, and very backward. There have been great quantities of peas sown, and in general are looking healthy; some just beginning to flower. Indian corn and buckwheat have been sown largely about Brantford. The corn looks very small and weakly. The buckwheat in many cases has taken the place of the injured fall wheat. The grass crop is abundant, and if the weather should be fair, hay will be plenty, but the knowing ones say it will be all wanted, before cattle can help themselves in the spring, as there are promises of a long and severe winter.—*Colonist.*

TORONTO AUCTION MART,
155, KING STREET.

GREAT SALE
OF
REAL PROPERTY BY AUCTION,
AT THE ABOVE ROOMS.

Only a Year's Interest in advance required down.

THE Subscriber is instructed to Sell, *Without Reserve*, by Auction, on SATURDAY, the 10th July next, at TWELVE o'clock, noon, a variety of

BUILDING AND PARK LOTS,
OF VARIOUS SIZES,

Upon Lot 29, in the Second Concession of York, as laid out by THOMAS YOUNG, Esq., and J. S. DENNIS, Esq., P. L. S.

The above property is situated back from Queen Street, the depth of one Lot, and is only 300 and odd yards West from the rear of Capt. Strachan's, formerly Crookshank's property, sold last September. The soil is admitted to be of excellent quality, and a never-failing Stream, the same that crosses the Garrison Common, traverses the property. The means of access are various, namely, by Queen Street, by Dundas Street, by the Davenport Road, and by the Concession Road from Yonge Street. When the latter is opened up, which is expected to be done immediately, this property will be accessible by Macadamized Road in ten minutes drive from the City. The terms are so liberal—EIGHT YEAR'S CREDIT—as scarcely to require comment. Lithographs, and any further information touching the property, may be had of Mr. HENRY GREENSHIELD'S, at Macdonald's Hotel, the Agent for the property, or of the Undersigned,

WILLIAM WAKEFIELD.

July 2, 1847. 520-1

IMPORTANT AUCTION SALE
OF UPWARDS OF
200 TOWN AND PARK LOTS,
IN ELORA.

ELORA is situated on the main or Post Road (leading from Guelph to Fergus, Arthur, and to Owen's Sound), in the Township of Nichol, District of Wellington, and twelve miles from the District Town of GUELPH; its position is very beautiful, being upon the banks of, and at the junction of, the GRAND AND IRVINE RIVERS, which, together with the "FALLS OF ELORA," present scenery of a most romantic description.

The Town Plot is well laid out into a variety of Streets, with reservation of squares for Market and other purposes; it already contains about 150 inhabitants, with the great acquisition of Grist, Meal, Barley, Carding, Fulling, and Saw MILLS; Post Office, Crown Lands Office for the District; Episcopal and a Methodist Church, a good School, an excellent Tavern, two Stores, with the various trades; it has also the convenience of the Mail and a Stage three times a-week.

ELORA has likewise the advantage of being in the midst of a fine healthy, well and respectably settled country, (*Fever and Ague unknown*), adjacent to the millions of acres of Government lands, which are rapidly settling, while the proposed Rail Road from Toronto to Goderich will pass within a short distance. The country around is admirably watered by rapid Rivers and Creeks, in which are abundance of TROUT of most delicious flavour; while the lands in the neighbourhood, which are of excellent quality, are open for sale at reasonable prices.

Thus may ELORA be considered as destined shortly to become a place of the highest importance, and therefore a most favourable opportunity is now presented, not only to tradesmen, (who are much required), but to capitalists and others, who may be desirous of settling in a quiet and most eligible section of the country.

☞ Sale to commence at ELORA, on THURSDAY, THE FIFTH DAY OF AUGUST NEXT, at ELEVEN o'clock, forenoon, when Plans may be seen and terms of Sale known, on application to ANDREW GEDDES and CHARLES ALLAN, Esqrs., at *Elora*; and, in the mean time, any other information may be obtained from J. T. GILKISON, Esq., *Hamilton*; D. M. GILKISON, Esq., *Brantford*; or Dr. BOYS and DAVID GILKISON, Esq., *Toronto.*

N.B.—Also two or three excellent FARMS for sale by private bargain, with from 50 to 70 acres cleared.

Elora, 1st July, 1847. 520-4

July 9, 1847. 520-tf

MARKHAM
HYDROPATHIC INSTITUTION.

ROBERT HUNTER, M.D., SURGEON, Graduate of the University of the City of New York; of the Whittakerian School of Medicine and Surgery; Corresponding Member of the Esculapian Society, New York; and Licentiate of the Board of Medicine, Canada;

JAMES J. HUNTER, M.D., SURGEON, Graduate of the University of New York; of the Medical Institution of Geneva College; and Licentiate of the Board of Medicine, Canada; and

NELSON R. REED, M.D., SURGEON, Graduate of the University of Geneva; and of the Whittakerian School of Medicine and Surgery, &c. &c.

RESPECTFULLY announce to the public of Canada, that they have established an Institution for the Relief and Cure of CHRONIC DISEASES, by the modern practice of Hydropathy. The Institution is situated in the VILLAGE OF MARKHAM, in the Home District; a location especially selected on account of the salubrity of the climate, the beauty of the scenery, and the flourishing condition of the surrounding country. No pains have been spared in rendering the Establishment effective in all its departments; and the services of an eminent Hydropathist, from England, having been secured, the most assiduous and unremitting attention will invariably be paid to the comfort and convenience of the inmates.

The utmost confidence is felt in recommending it to persons afflicted with the following diseases, viz.:—

Gout,	Scrofula, or King's Evil,
Rheumatism,	Bilious Complaints,
Nervous Debility,	Tic Doloureux,
Asthma,	Incipient Consumption,
White Swellings,	Salt Rheum,
Liver Complaints,	Chronic Diseases of the Joints,
Ulcers and Fever Sores,	Palpitation of the Heart,
Piles,	Skin Diseases,
Constipation or Costiveness,	Rickets,
Dyspepsia,	&c. &c. &c. &c.

For full particulars address, if by letter, (post-paid), Dr. R. HUNTER, Markham, or Dr. JAMES J. HUNTER, Newmarket, and the most minute and satisfactory information will be promptly and cheerfully accorded.

The Institution will be visited by the Physicians as follows, viz.:—

By Dr. R. HUNTER, daily.
By Dr. JAS. J. HUNTER, Wednesdays and Thursdays; and
By Dr. N. R. REED, Mondays, Tuesdays, Fridays and Saturdays.

Eye and Ear Infirmary.

In connexion with the above establishment, Drs. R. & J. J. HUNTER have established an Infirmary for the Relief and Cure of all diseases of the EYE AND EAR, and confidently hope, from their long experience at the New York Eye and Ear Institution, that they will be able to fill a void which must have been long and severely felt by the Canadian public.

☞ DR. R. HUNTER, of Markham, respectfully announces, that he will receive patients afflicted with the deformities of SQUINT or CROSS-EYE, and CLUB-FOOT, and will in every instance (where the case is favourable for treatment) guarantee a perfect cure.

Markham, 1st July, 1847. 520
