Guide-Advocate

WATFORD, MAY 28, 1920.

NOTE AND COMMENT

The dollar buys only about 45 cents worth of stuff just now, but The Cleveland Plain Dealer points out that when it is saved and invested it draws interest on 100 cents.

Dr. Pasticci, a noted chemist of Rome, has discovered a method of cheaply producing liquid hydrogen. It may be used in driving automobiles, one gallon being sufficient for 250 miles. It may also be utilized in railroad locomotives and in the engines of ocean liners, he declares.

The cancellation of orders in textile mills, and comparative dullness in retail trade in many lines, show that luxury business is declining. It is only when people get back to spending less than they earn that our business future will be assured. The wave of extravagance is slowly passing.

During the last church year Canadian Methodism lost a total of 81 preachers from the active ministry—31 by resignation and 50 by superannution. In the same year there were only 24 young men received as candidates for the ministry. This means a net loss to the church of 57 clergymen.

There are more suits entered in the divorce courts of Michigan than can be disposed of in six months. It is like a barber shop—you have to wait your turn. Still we call our marriage vow "the holy bonds of matrimony." When will the people wake up to the fact that the Bible clearly condemns such immorality?

It is said that United States boots and shoes have been "dumped" into Canada, at prices much less than those obtained at home, but if they have, the consumer in Canada has not seen evidence of it. The feeling against "dumping" is not so strong now as it was when prices were low, and competition keen to get even a few cents a pair profit.

In view of the danger of the European corn borer being brought into Canada from certain sections of the Eastern United States, where it has become established, the Entomological Branch of the Dominion Department of Agriculture has prepared a special circular dealing with this insect and others which bore in corn and may be mistaken for it. Agricultural workers and others specially interested may obtain copies of the circular free of charge on application to the Publications Branch, Department of Agriculture, Ottawa.

The British War Graves Commission has decided unanimously on absolute uniformity of headstones for the graves of every man and woman who was killed or who died in the war. A plain design in Portland stone has been selected, recording the name, regiment and rank, symbol of religious faith and the inscription which Kipling chose: "Their names liveth for evermore," with room at the foot of the stone for an inscription limited to 66 words, to be personally chosen by those nearest to the dead. The principal of equality, whether for Field Marshal or camp follower, has the approval of the Government.

As we have remarked before, you cannot keep boys on the farm—unless you have boys on the farm. The city is to blame for depopulating the country to some extent, the necessity of giving the boy the farm if he is to marry, is to blame to some extent and the fact that rural families so often consist of one or two or none at all is to blame more than anything else. Take, for instance, the neighborhood where one child is attending school. Where is that neighborhood to look for farm help in fifteen years from now? We may be producing wonderful crops but if we fail on the production of man-power then we have failed indeed, and we are decaying as a nation.—Parkhill Gazette.

Small but Potent.—Parmelee's Vegetable Pills are small, but they are effective in action. Their fine qualities as a corrector of stomach troubles are known to thousands and they are in contant demand everywhere by those who know what a sate and simple remedy they are. They need no introduction to those acquainted with them, but to those who may not know them they are presented as the best preparation on the market for disorders of the stomach. m

From Old Subscribers

Mrs. Neal A. Edwards, Thornloe, Ont., —"Spring opened up nice and warm, but has turned cooler again this week (May 11th.) Some here have oats and wheat sown."

Mrs. C. B. Hathaway, Palmerston, Ont., —"Am always pleased to receive the Guide-Advocate, as I feel that I am kept up-to-date with the home town news."

Irrigation.

An interesting sidelight upon crop conditions in Southern Alberta last year, and, at the same time a striking vindication of the principles of irrigation is contained in a despatch from a western point, that the highest wheat yield per acre secured anywhere in the prairie provinces in 1919 was on the Duke of Sutherland's colony farm, not far from Brook, Alberta. This great estate, provides farms for families brought to Canada from the Scottish estates of the Sutherlands, and a great part of the Brook farm is, in the parlance of the irrigator, "under water." The record yield was one of 66 bushels and 30 pounds per acre and the variety the popular "Kitchener" wheat. The Sutherland crop won the second prize given by the Grain Growers' Guide, and it is worthy of note that a large quantity of the prize wheat has been given by the growers to the Alberta Government for distribution in drought-stricken areas of the province.

THIS WOMAN'S MISERY

Ended by Lydia E. Pinkham's Vegetable Compound. Remarkable Recovery of Mrs. Church.

Smiths Falls, Ont.—"I suffered with falling of my organs, pains around my heart and in bowels and down my legs, neuralgia in my face and head, and that terrible sinking feeling. I felt that I could not live and would fix my house in order every night so there would be no trouble if I dropped off in the night. My husband went to the druggist to get the best remedy he had and he gave him Lydia E. Pinkham's Vegetable Compound. I took six bottles and felt a lot better. I will always recommend the Vegetable Compound, and you can use these facts as a testimonial."—Mrs. J. O. CHURCH, Box 845, Smiths Falls, Ont.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

If there are any complications about which you need advice write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

Women and Asthma.—Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kelloggs's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it. m

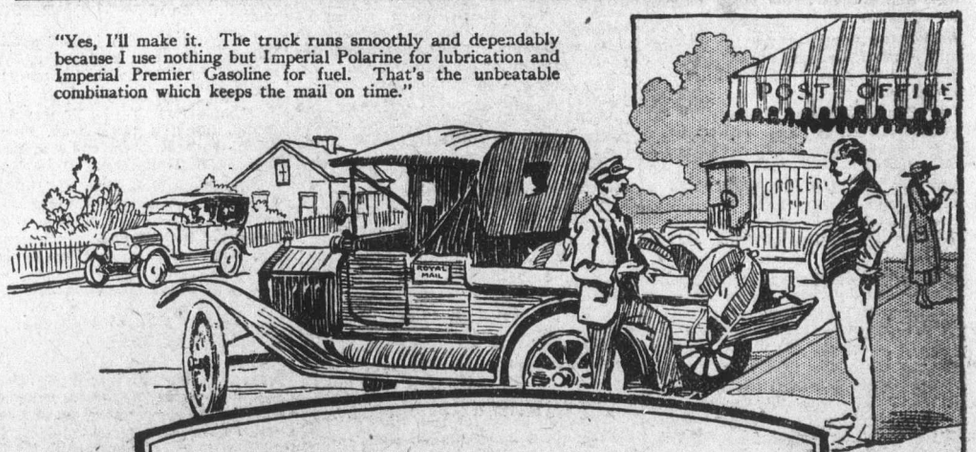
"Yes, I'll make it. The truck runs smoothly and dependably because I use nothing but Imperial Polarine for lubrication and Imperial Premier Gasoline for fuel. That's the unbeatable combination which keeps the mail on time."



Accurate Thorough Lubrication

IMPERIAL Polarine gives thorough lubrication under every operating condition. Cars and trucks give longer, cheaper service when lubricated with Imperial Polarine.

Imperial Polarine will not break up or run thin under continued operation. It reduces friction to a minimum by maintaining a coating of oil on every wearing surface. It seals all the power behind the piston by establishing a perfect piston-to-cylinder seal.

Learn which of the three grades described below is best suited for your car from the Imperial Polarine Chart of Recommendations, which is on display wherever Imperial Polarine is sold.

Sold in one-gallon and four-gallon sealed cans, half-barrels and barrels, also in 12½-gallon steel kegs, by dealers everywhere.
