ONTARIO JUDGE GIVES MOST IMPORTANT RULING

Says a Man May be His Own Common Carrier

AND THEREFORE MAY

Lawfully be in Possession of Liquor About His Person or in His Grip if He is Taking it to His Home.

Toronto, April 19—Rum running between Montreal and Windsor is now considered a legal industry, according to the following despatch from Windsor, Ont:

"In the opinion of the local authorities the decision handed down by Mr. Justice Middleton in Toronto, Friday, by which it was ruled that a man may act as his own common carrier, will exercise a far-reaching effect upon the rum running industry on this border.

"The decision was made in the case of John Kozak, a foreigner, residing on Marion Avenue here, who brought two suit cases of liquor from Montreal to Windsor, ostensibly for his own use. Kozak was arrested for a violation of the Ontario Temperance Act, his liquor confiscated, and he was fined $500. The higher court now rules that the fine shall be refunded and the liquor returned to him.

"If the ruling be taken as a precedent and local experts say it will, there appears to be nothing to prevent any number of individuals from driving their automobiles to Montreal, loading them to the guards with 'fruit of the vine' and then driving back to Windsor. They will be immune from police interference on the route and, provided they take the car to their homes, the police at present can discern no loophole by which they have authority to interfere. The only chance the whiskey trafficker takes now is that he might be tempted to divert his load to some place other than his own domicile, in which event he would be amenable to the full force of the law.

"However, as a good many men have been doing this very thing, for months and getting away with it, the only difference it may make in their modus operandi is that they can now drive as slowly as they like without looking over their shoulders for the officers of the law."

THE OVERALL CULT HAS REACHED CANADA

Toronto Manufacturers Predict a 50 Per Cent. Rise in Prices as a Result of Demand.

Toronto, April 19.—The first overall suit worn on the streets here was seen today when a young man stepped out of a store wearing overalls and smock. The overalls were creased on the sides, after the fashion recently set by King George.

Local manufacturers of overalls say they anticipate an advance in price from 25 to 50 per cent. in a short time, when the overall epidemic reaches this city, as is anticipated.

Calgary, Alta., April 19.—Seventy employees in P. Burns and Company's office organized an overall brigade this morning.

MONCTON KADI IN GENEROUS MOOD

Provides Several Law-breakers With Free Board and Lodging for Different Periods.

Special to The Standard

Moncton, N. B., April 19—Two tramps who gave their names as Amos Jones and John Smith, who were caught occupying a house at Jones' Siding on Salisbury Road, while the owner was absent were sentenced to six months in the county jail by the magistrate this morning. They were convicted of breaking and entering. Some small articles belonging to the owner of the house were found on the prisoners.

A C. N. R. young man invaded a Queen street residence Saturday night beat up a roomer and smashed furniture. Today he was fined fifty dollars, forty for resisting arrest, and ten for drunkenness. The more serious charges were not pressed.

Two young lads who were convicted of stealing mail belonging to guests at the Brunswick Hotel were sentenced to two months in jail by the police magistrate.

A deputation of Moncton dentists headed by Dr. O. B. Price, President of the local Society left tonight for Fredericton to appear before the Law and Legislation Committee in opposition to a proposed amendment to the N. B. Dental Act.

ANNIVERSARY OF BATTLE OF ST. JULIEN

Ottawa, April 19.—In the Commons this afternoon Sir George Foster reminded the House that Thursday would be the anniversary of the Battle of St. Julien.

"I propose," he said, "with the consent of the House, to ask that after prayers on Thursday, members of this Chamber stand for a minute or two in silent in commemoration of that battle and of the bravery and heroism of the Canadian troops which upheld the honor of Canada and made Canada the admiration, and gave her the respect of the whole world."

Mr. Mackenzie King concurred, and the House agreed to meet the proposal.

BRITISH BUDGET BROUGHT DOWN

Many New and Additional Taxes Levied, Which Will Weigh Heavily on the People.

London, April 19—Continuing his Budget announcements in the House of Commons today, J. Austen Chamberlain, Chancellor of the Exchequer said there would be a further duty on spirits, the price being raised to 12 shillings six pence per bottle for the consumer, as against the present price of ten shillings, six pence. The wine duty would be doubled, he said, and on sparkling wines, the duty would be fifty per cent. ad valorem. The beer duty would be increased to 30 shillings the standard barrel ,and the price to the consumer raised a penny the pint.

The Chancellor announced that the excess profit tax would be raised to 60 per cent.

The National debt on March 31 last was estimated to be £7,835,000,000, Mr. Chamberlain stated.

An ad valorem duty of 50 per cent. on imported cigars was included in the new taxation, the chancellor said. There would be a preferential rebate, he added, in the case of cigars imported from the Dominions or India.

Mr. Chamberlain said a new tax of a shilling in the pound would be levied concurrently with the excess profit tax on the profits of limited liability companies. It would be deducted before the income tax was levied. When the War Wealth Committee made its report, the Chancellor added, Parliament would be asked later to impose a levy on war profits, the proceeds of which would be applied to reduce the excess profits duty.

Pointing out the necessity for a permanent profits tax, Mr. Chamberlain said the result of the visit of the commission sent to Canada and the United States to investigate the method of profits taxation was the discovery that the methods adopted there were not suited to Great Britain. The Chancellor concluded by estimating that, as a result of the new proposals, the revenue for the year will be 1,418,300,000 pounds and the expenditures at 1,184,103,000 pounds, leaving approximately 234,000,000 pounds for debt redemption this year. He declared there was every prospect that there would be the sum of 300,000,000 pounds for the same purpose next year.

GENERAL DENEKINE ARRIVES IN ENGLAND

With His Family and Staff—Says He is Very Tired and Needs a Long Rest.

London, April 19.—"I am very weary and in need of rest," General Denikine, late chief of the anti-Bolshevik force, said upon his arrival at Southampton from Crimea. He is stopping quietly in a small hotel here, with ten other members of his party, which includes Madam Denikine and an infant daughter, an adopted daughter, two Russian woman, two aide-de-camps, and three servants. It is believed that General Kornilloff is with the party, but this is unascertained. The Moujik general, as his followers call the chief, in appearance bears out the statement. He looks tired; his brown eyes, surrounded by deep dark circles, and high forehead, leading to a dome-shaped bald head, covered with wrinkles. The general is wearing civilian clothes, while his aides wear baggy blouses, with no insignia of rank, in accordance with the practices of the volunteer Russian army. He intends visiting the War Office to pay his respects as soon as possible, then going to the south coast of England for a long rest. "I don't want to see any visitors until I have rested myself again, then perhaps yes," said the former leader of the Russian White Army.

BIG FRESHET CAUSES HEAVY PROPERTY LOSS

Michigan River Overflows Its Banks, Doing Over Million and a Half Damage.

Manistique, Mich., April 18.—More than $1,500,000 property damage was caused here when the Manistique river became a raging current, over-ran its banks and buried many main streets beneath from one to four feet of water. The Goodwille factory was completely wiped out, a paper mill was practically destroyed, a lime works, chemical plant and many saw mills badly damaged. Huge piles of timber to be cut into lumber, pulp wood for paper and other wood for chemicals were swept into Lake Michigan and lost. A dozen houses were ruined, while twenty more were under water to the second floor for several days, thereby ruining household effects. Much merchandise in home and store basements were destroyed. Warm rains and sunshine melted the unusual heavy snow in forests north of here, causing the first flood the city has known in fifty years.

LEADING BRITISH BANKER TAKES A PESSIMISTIC VIEW

Of the General Situation in Britain at Present Time.

FEARS THE BUDGET

But Says the Cool, Temperate Minds of the People Are the Greatest Asset the Country Has After All.

Special to The Standard
(By Dryden Copyright)

London, April 19—"Europe is sinking deeper every month into a financial morass. If there is daylight anywhere I cannot see it." This comment was made today on the eve of the introduction of the long awaited Government Budget Bill, by Lore Rothermere, one of Britain's leading bankers and a brother of Lord Northcliffe.

"Western civilization is far more rickety than was the case a year ago, and the treacherous paper money which alone keeps it in being, is now the only bulwark against the crash which now menaces all alike.

"It is true we still have more stability than our neighbors. It is true that in the cool, temperate minds of our people we have assets of greater value than any gold reserves.

"We shall only survive the shock if the government recognizes that for practical purposes Britain is immeasurably poorer than she was six years ago.

"Solvency is the one thing essential to our salvation. Without it we are lost. We must choose between solvency or downfall and choose quickly. Two more Budgets such as the Chamberlain intends to introduce today may mean our extinction as an empire and great power. They would imply famine and ruin for a bankrupt people dependent upon foreign supplies for the bulk of their food."

EXPRESS EMPLOYEES AND THEIR WAGES

Meeting With Management to Revise Schedule.

Winnipeg, Man., April 19—Two committees claiming to represent the employes of the Canadian National Express Company met the management today for the purpose of revising the schedule with a view to an increase in wages and revision of working conditions. The committees are composed of union and non-union men and they refused to amalgamate. The outcome of the day's proceedings was that the management refused to deal with either party until there was an amicable agreement between the two committees. Negotiations were therefore broken off following the decision to apply for a board of arbitration.

THE SUPERVISION OF SOLDIERS' GRAVES

Sir George Perley Wires from London as to Same.

Ottawa, April 19.—(Canadian Press)—A cable has been received by the Acting Premier from Sir George Perley, Canadian High Commissioner in London, stating that he had just returned from France and Belgium, where he attended meetings in connection with questions regarding the graves of men who fell in the war.

Sir George spent three days in the battle area, and from what he saw in many cemeteries he is of the opinion that the army authorities and the Imperial War Graves Commission, are to be congratulated on the progress they are making in concentrating and certain for the graves. He takes occasion to sound a note of warning to those who contemplate a trip to France and Belgium to visit the graves of soldier relatives. He says it is still difficult for visitors to arrange transportation and accommodation in the battle areas, but it is anticipated conditions will doubtless be much improved by next year.

In any case the Canadian High Commissioner emphasizes the fact before attempting to visit graves or cemeteries it is imperative that the latest information should be obtained from the director general of graves registration, Winchester House, St. James Square, London, regarding the exact location of the graves which it is proposed to visit, as otherwise friends and relatives are liable to experience delay and disappointment.

THE TRIAL OF JAMES LARKIN FOR ANARCHY

New York, April 19.—In opening the case today against James L. Larkin, Irish leader, charged with criminal anarchy, Assistant District Attorney Rorke said he would prove the defendant was a member of the Communist party's national council of nine, and that he had participated in a conference at which forceful overthrow of the government was advocated.

"We are not concerned," said Mr. Rorke, "with what kind of government these people may want instead of our own system, we are only concerned in this case of whether or not they urged force, violence or other unlawful means to make the change."

Ninety billion tons of water pass through the straits of Florida every hour.

A wedding takes place every thirteen seconds in New York City.

SPECTACULAR FIRE NEW YORK TERMINAL

Destroyed Ship at Her Berth and Much Other Damage.

New York, April 19.—Bush terminal in Brooklyn, one of the largest steamship terminals in the world, was saved from destruction today when a spectacular fire practically destroyed the Norwegian steamship Haltfried, which was berthed at one pier of the terminal.

Explosions in 2,500 tons of nitrate in the vessel's hold led to fears of a conflagration along the water front. Two piers nearest the ship were damaged. A few firemen were overcome and several terminal employees were removed to hospitals slightly injured.

SIR AUCK. GEDDES ARRIVES NEW YORK

Explains to Interviewers That Irish Problem Would be Sooner Settled if Outsiders Would Not Interfere.

New York, April 19.—Sir Auckland C. Geddes, the new British Ambassador to the United States arrived here late today on the steamer Kaiserin Auguste Victoria from Liverpool. With Lady Geddes, he was taken on board the revenue cutter Calumet at quarantine, and landed at Battery Park.

In an interview granted to newspaper men on his arrival the new British Ambassador expressed appreciation of the honor that had been conferred upon him, and dealt briefly with problems which confront Great Britain. Regarding the Irish question he said:

"In Ireland we are trying to provide political machinery whereby the antagonized sections of the Irish peoples can work out their own internal political salvation without economic ruin to Irish interests. When the new Home Rule Bill becomes operative it will be the duty of all British subjects who are not domiciled in Ireland to stand aside and leave those who live there to solve their problems. I venture to add that it will also be helpful if the many in all parts of the world who are not British subjects but are interested in Ireland, likewise stand aside and leave the Irish in Ireland to grapple with their own political difficulties."

SERIOUS ACCIDENT TO MONCTON LADY

Mrs. H. H. Melanson Run Over by Auto in Toronto, and Sustained a Broken Leg.

Special to The Standard.

Moncton, N. B., April 19.—Word has been received by friends here of a very serious accident met with by Mrs. H. H. Melanson, wife of the General Passenger Agent of the C. N. R. at Toronto, Sunday. Mrs. Melanson, while alighting from her auto to enter a drug store, was hit by a passing auto and sustained a broken leg. Just previous to the accident, Mrs. Melanson's aged aunt, Miss Catherine Hennessey, of Moncton, who was visiting her in Toronto, fell and broke her thighbone. It was in consequence of the mishap to her aunt that Mrs. Melanson was en route to a drug store, when she also fell a victim to a similar serious accident. Both ladies recently went to Toronto from Moncton.

MICHIGAN TIMBER WORKERS TO STRIKE

May 4 Thousands of Men Quit Work—Want Eight Hour Day and Ten Hours' Pay.

Menominee, Mich, April 18.—Paper mills, lumber mills and all other woodworking manufacturing plants of the nation will suffer on May 4 when many thousand timber workers of all kinds throughout the upper peninsula of Michigan go on strike for eight hours work and ten hours' pay. This is the greatest timber producing section in the United States so that when the strike breaks the paper shortage as well as all other products depending upon wood will be greatly augmented. Employers assert that they will close down permanently rather than meet the demands. They are showing fight by shipping out more lumber than has ever been known here. Great lumber piles which have not been depleted for fifty years today stand nearly empty.

BREAD COSTS NEARLY 8 CTS. LB. TO PRODUCE

Ottawa, April 19.—(Canadian Press)—Cost to the bakers of production and delivery of bread throughout the Dominion averaged 7,867 cents per pound, according to returns published by the Board of Commerce of Canada, for the month of February, 1920. This represents an increase in February of one-third of a cent per pound over January cost. A marked increase in the cost of nearly every ingredient, an increase in the cost of labor and a decrease in consumption of bread of about two per cent. over the month of January this year are noted in the report.

PREDICTS THAT IN A FEW YEARS UNITED STATES

Will be Dependent Upon Britain for Oil Supply.

PROMINENT CANADIAN

Now Resident in England Declares Britain is Now in Dominant Position Regarding World's Oil.

Special to The Standard
(By Dryden Copright)

London, April 19—That the United States may find itself within a few years in the position where she will be compelled to import oil in large quantities and payment for that oil find its way largely into British pockets is the statement made by Sir E. MacKay Edgar Read, who is a Canadian by birth, in an article appearing in today's Times. Sir Edgar endeavors to show the dominant position held by British interests in the world's oil supply. "While America has been exhausting her supplies at prodigal speed, we have been getting a firmer grip on the world's reserves of oil. In a very little while America will have to come to us for the petroleum she needs. We shall have to wait for a few years before the full advantages of the situation begin to be reaped. To the tune of many million pounds sterling yearly America before long will have purchased from British companies and will have to pay for in dollar currency in progressively increasing proportion for oil she cannot do without, and is no longer able to furnish from her own stores. If there are any pessimists left in Britian, I confidently invite them to put that in their pipes and smoke it. Sir Edgar states that in sixty years the United States will have run through the legacy of petroleum that, properly conserved, should have lasted at least a century and a half.

AN INSTITUTE FOR NATIONAL RESEARCH

Plans for the Establishment of One Considered.

Ottawa, April 19.—(Canadian Press)—Plans for the establishment of a National Research Institute for Canada were before the Commons committee on scientific research this morning. It was recommended that a site of at least fifty acres would be secured near Ottawa and a building of laboratory type, four storeys in height, to cost $500,000 should be erected. Scientific instruments required would cost approximately $100,000 and salaries would require about $100,000 per annum. This institute would be similar to the bureau af standards at Washington and the Mellon Institute at Pittsburg.

THE ESTABLISHMENT CANADIAN AIR FORCE

Order-in-Council Regarding Same Laid Upon Table of House.

Ottawa, April 19.—The order-in-council authorizing the formation of the Canadian Air Force, was tabled in the House this afternoon by Hon. A. L. Sifton. It issued an invitation to officers and airmen of the Royal Air Force now resident in Canada to join on the footing that they will not, under ordinary peace conditions be called upon to serve for more than five weeks in any two years. They will receive pay only for the time they are actually on duty, and enlistment will be for a period of four years.

The aim is to build up an air force in case of future need and it is pointed out that the cost would be against any attempt to build up a purely professional force. For this reason, the plan is being tried of arranging to have practically one-twenty-fourth of the force on duty at all times.

Negotiations are under way whereby officers who join the Canadian Air Force and are also on the reserve of the R. A. F., will be released from their obligations to the latter insofar as they might interfere with the performance of any C. A. F. duties.

Administration of the force will be under provincial bodies of which the Lieut.-Governor of each province will be asked to act as honorary chairman.

PLENTY OF FOOD IN THE ARCTIC REGIONS

By Lynch.

(Special Cross-Atlantic Cable Services to The Standard. Copyright.)

London, April 16.—Palatable food in "unlimited quantities' to relieve the world shortage, is available in the Arctic regions and may soon be utilized. A plan to tap the Arctic food reserves and bring them here is being urged by Vilhjalmur Steffanson, the noted Arctic explorer, who is endeavoring to organize an expedition to further the project.

There is an unlimited supply available in the polar regions, Steffanson said here today. "It is very palatable and could be killed on the spot and transported to the nearest station on the north shores of Canada, whence it would be available for consumption both in the United States and England."

One objection advanced against the immediate adoption of the plan is said to be the shortage of available shipping. Steffanson leaves Saturday for Canada.

BRITAIN WILL CARRY OUT HER AGREEMENT

In Regard to Palestine, and Will Probably Accept Mandate at San Remo Conference.

London, April 19.—"There is nothing to justify the suggestion that England is attempting to repudiate her word that she will "use her best endeavors to facilitate the establishment of a Jewish National Home in Palestine." Her promise was given solemnly, after mature deliberation, and was officially confirmed by Lord Curson on taking charge of the Foreign Office."

This was comment here today of Lord Rothschild, one of the world's leading Zionists, when interviewed as to persistent reports of the weakening of British support for Palestine Jewish Home programme.

Lord Rothschild considered it probable that England would definitely accept the mandate regarding Palestime at the San Remo Conference of the Supreme Council.

Asked regarding the recent proclamation of Emir Feisul naming himself King of Syria and Palestine, Lord Rothschild said: "Palestine will thrive only through Jewish labor, Jewish capital and Jewish sacrifice. If it is handed over to the Arabs it will sink further into stagnation."

London, April 19. — (Associated Press).—Recent rumors of an alleged change in the policy of the British government, regarding the Jews in Palestine gave rise to another question in the House of Commons today, when the Foreign Secretary was asked to define the government's exact policy with respect to the future position of the Jews in Palestine.

Cecil Hammersworth, Under-Secretary, replied: "The policy of the government remains as defined in Mr. Balfour's declaration on November 2, 1917."

It will be recalled that Mr. Balfour's declaration on that occasion was to the effect that Great Britain was in accord with the Jewish aspirations for the establishment of a national home in Palestine and would give its support to this project.

London, April 19.—The British Government has appointed a commission composed of officials already in Palestine to investicate the recent clashes between Moslems and Jews there.

So far as has been reported to the Government the Arabs are not taking any further steps in their reported plans for the dissolution of the Jewish official bodies in Palestine under threat of massacres.

NEW YORK FUR SALE NOW OPEN

Buyers Present from Many Countries and Sales Reached $900,000 on Opening Day.

Special to The Standard.

New York, April 19.—Sales reached $900,000 at the opening session of the annual spring fur auction in the Masonic Hall here today, despite the fact that the selling schedule was not completed. Buyers were in attendance from London, Paris, Leipzig, Moscow, Omsk and Tokio, and also from leading cities throughout the United States and Canada. Bidding was generally active and compared with the corresponding average figures obtained at the spring auction in 1919 today's average prices showed advances ranging from 10 per cent on white fox to 50 per cent on stone marten. Other percentage advances follow: Fisher 40; baum marten, 35; marten, 30, and cross fox, 15. The sale will run for seven days more and among the chief offerings tomorrow will be blue foxes, silver foxes, nutrias and otters.

DISCUSSION ABOUT HALIFAX TRAWLERS

Some Facts Regarding Them Which Disarms Criticism.

Montreal, April 19.—Replying to criticism in the Halifax papers in regard to the Admiralty trawlers and drifters now lying in Halifax harbor, Mr. Parsons, agent for the Anderson Shipping Company of Canada, selling agents for these vessels today stated that the facts did not support such criticism.

These vessels, one hundred in number, were all built in Canada, of Canadian materials and by Canadian labor. Their construction had given employment to thousands of Canadians all of which was paid for by Great Britain. Last Summer two of them sailed from New York to France under their own steam and are now being used for sardine fishing in the Mediterranean. Several others are operating in the coffee trade in Haiti, while others are being used for various purposes around Newfoundland and at Halifax. One of them was sent to France as an exhibit ship in January by the Anderson Company of Canada, and in spite of the worst weather proved her seaworthiness in the most thorough possible manner. She arrived at Boulogne from Halifax, after facing the worst weather conditions in 14 1-2 days' time and on reaching that port was sold almost immediately.

Mr. Parsons stated that the number of these vessels laid up for repairs in the dockyard was less than one per cent.

VALLEY RAILWAY LOOMED LARGE IN LEGISLATURE

Premier Took up Most of Afternoon on Subject.

BOARD OF DIRECTORS

Will Still be Retained to Draw Their Salaries Even Though the Line Has Been Taken Over by C. N. R.

Special to The Standard

Fredericton, N. B., April 19—Today's session of the Legislature produced some work and a few sensations. A few bills were rushed through with the approval of the House, sitting in committee of the whole. The Water Power Bill was passed practically as drawn. One or two sections were not quite clear and were held over for further consideration. The bill as a whole received the approval of both sides of the House. The sensation of the day was caused when B. Frank Smith read a translation of a letter appearing in L'Evangeline written by Rev. Thomas Albert, of Shippegan, which attacked the honesty of purpose and sincerity of the Minister of Public Works.

The letter attacks Mr. Veniot as of being but little use as a politician, and of no earthly use as a representative of the county of Gloucester. The reverend gentleman informed the Minister through the letter that it would be better for the people if he would step down and out, and give the people a show to get someone who would properly represent them. The Minister seemed somewhat perturbed as the reverend gentleman's onslaught against him and his honesty of purpose was being read in the House. He made an ineffectual attempt to square himself with those of his followers who have confidence and faith in the Rev. Thomas Albert.

During the day the Premier read a lengthy thesis on the Quebec Valley Railway. It told what might have been done, what could be done and what ought to be done in reference to the Grand Falls extension, but, in reality and what concerns the people most, did not say what would be done. At no place during his long recital did he tell what a benefit the Quebec Valley Railway was to E. S. Carter and other heelers of the Government. He failed to mention any part of the $5,000 that the affable "Ned" receives from his various capacities as secretary, track hand and office boy.

(Continued on page 2.)

BORINGS AT COAL BRANCH FIND GAS

But in Addition, Salt Water Was Present in Large Quantities, Which Must be Shut Out.

Special to The Standard.

Moncton, April 19. — The Anglo-Persian Oil Company, who have been boring for oil at Coal Branch, Kent County, for some months, recently struck a moderate flow of gas. The discovery of gas was made after drilling through a thick bed of granite rock and at a depth of about 2,300 feet. Soon after striking gas, salt water made its appearance in the well, much to the surprise of the borers. At the present time repairs are being made to the boring machinery and efforts made to shut out the heavy flow of salt water.

REPORT OF BOARD ON RAILWAY ACCIDENTS

There Were 223 Persons Killed and 1,520 Injured in 9 Months, Ending 31st December.

Ottawa, April 19.—(Canadian Press)—There were 1,347 railway accidents during the nine months ending December 31, 1919, according to the report of the Board of Railway Commissioners, covering that period, which was tabled in the Commons today. In these accidents there were 223 persons killed and 1,520 injured.

The Board deals briefly with the matter of daylight saving and remarks that in view of the decision of the government not to carry the daylight saving law any longer than the end of 1918, it was inadvisable that the Board should take any action.

Fire damage in the neighborhood of railway tracks shows an increase over the previous year, according to the report.

The total area burned over was 251,722 acres with damage estimated at $400,547.

MARRIED AT ST. STEPHEN

St. Stephen, N. B., April 19—The Church of the Holy Rosary was the scene of a pretty wedding this morning when Miss Alice Demonts of St. James, became the bride of Charles Hachey of Milltown, N. B. They were married with a nuptial Mass. The bride was attended by Miss Ethel Burns of Milltown, while James Burns also of that town supported the groom. Rev. J. M. O'Flaherty officiated. The young couple will reside in Milltown, N. B.
