BELL ORGANS AND HALLET & DAVIS PIANOS.

STRAUSS, the celebrated Waltz composer, to Hallet, Davis & Co.:—

GENTLEMEN,—

Having heard your Pianos at the World's Peace Jubilee, and also used them during my stay in Boston, I am free to say that I have never before seen pianos possessing such a combination of truly wonderful quality and quantity of tone, meeting at once the wants of the largest Concert Hall and the drawing room.

I consider them superior to any Pianos that have come under my observation.

JOHANN STRAUSS.

THE FOLLOWING MUSICIANS

Of world wide reputation give these Pianos their hearty commendation:

FRANZ LISZT, the first Pianist in the World.
GOTTSCHALK, the well-known Pianist.

SHOW CARD

MANUFACTURING COMPANY.

For the past century the utmost ingenuity and the greatest artistic skill have been combined to supply a want greatly felt by manufacturers and dealers, in the way of advertising. This want is simply an advertising card, combining novelty and beauty sufficient to command its perusal, and cheap enough to be within the reach of every one. The cards principally in use at the present day are either lithographed or painted and although very elegant and artistically got up, they are far from meeting the requirements of the trade, for the simple reason that the eye meets them at every turn; railroad stations, hotels, stores and saloons are full of them, and even the fences are covered with them; and there is so much of a sameness running through all the designs and the general appearance, that the consequence is—the eye merely glances at them and not one out of every hundred is ever read, and the money thus lavished with unsparing hand is just thrown away. So decided has this conclusion become in Europe, that large rewards have been offered for something entirely novel in the way of advertising cards.

The inventor of

"THE DIXON SHOW CARD"

Has made this want his study for years, and the result is the placing before the manufacturers, merchants, etc., of the Dominion of Canada and the United States of America, an Advertising Card which, for beauty and cheapness, has no equal, and is such a THOROUGH NOVELTY that no matter where it is placed it WILL BE READ, thus gaining the object of the advertiser and bringing him a return for his money.

The letters on these cards are made from the most ornamental fabrics manufactured in the world, consisting of velvets silks, satins, ribbons, tartans, calicoes, damasks, carpets, tweeds, doeskins, furs, etc., etc., so that manufacturers and dealers in fabrics can have their cards manufactured of their specific goods, thereby not only advertising their business, but showing to the public at the same time samples of their choicest goods. This method of advertising is also applicable to milliners, clothiers, grocers, hotel and saloon keepers, livery stables, patent medicines, and in fact to every trade, profession or calling at present extant. To tradesmen and machinists it is an essential to secure success, as their peculiar branch or art can be fully exhibited on the cards by the decorative embellishments of decalcomanie.

Advertisers wishing to have lithographed views of their buildings, machines, etc., placed on their cards, can have them by furnishing us with a photograph of the illustration required.

Several parties have been and are now manufacturing cards from coloured paper, which become worthless by the colours fading after having been exposed to the sun or light.

Another species of signs now universally used are those painted on glass, which are chipped by the heat or moisture of the atmosphere, thereby rendering them worthless for advertising or decorative purposes; whereas, the present invention, being placed on cardboard, is not liable to be broken or defaced in any manner, and the colors are good for all time.

In short we claim for the THE DIXON SHOW CARD its *ENTIRE NOVELTY, EXTREME BEAUTY, ATTRACTIVE AND RICH APPEARANCE*, and its moderate price.

As this card becomes known, there is no doubt it will entirely supersede all other show cards now in use.

All orders by mail or otherwise promptly attended to.

SHOW CARD
MANUFACTURING COMPANY.

For the past century the utmost ingenuity and the greatest artistic skill have been combined to supply a want greatly felt by manufacturers and dealers in the way of advertising. This want is simply an advertising card, combining novelty and beauty sufficient to continue its period, and cheap enough to be within the reach of every one. The cards principally in use at the present day are either lithographed or hand painted and although very elegant and artistically gotup, they are far from meeting the requirements of the trade, for the simple reason that the eye meets them at every turn; railroad stations, hotels, stores and saloons are full of them, and even the fences are covered with them; and there is so much of a sameness running through all the designs and the general appearance, that the consequence is—the eye merely glances at them and not one out of every hundred is ever read, and the money thus lavished with unsparing hand is just thrown away. The inventor of

"THE DIXON SHOW CARD"

Has made this want his study for years, and the result is the placing before the manufacturers, merchants, etc., of the Dominion of Canada and the United States of America, an Advertising Card which, for beauty and cleanness, has no equal, and is such a THOROUGH NOVELTY that no matter where it is placed IT WILL BE READ, thus gaining the object of the advertiser and bringing him a return for his money.

The letters on these cards are made from the most ornamental fancy manufactured in the world, consisting of velvets, silks, satins, ribbons, tartans, calicoes, damasks, carpets, tweeds, doeskins, furs, etc., etc., so that manufacturers and dealers in fabrics can have their cards made similar to their specific goods, thereby not only advertising their business, but showing to the public at the same time samples of their goods. ENTERED according to Act of Parliament of Canada, in the year one thousand eight hundred and seventy-five, by the Proprietors, FISHER & TAYLOR, in the office of the Minister of Agriculture.

PREFACE.

The Publishers take pleasure in presenting to the public, THE TORONTO DIRECTORY for 1875, containing over 500 pages, being one hundred pages more than last year's work. Every effort has been put forth on their part to make the work as accurate as possible. A very large staff of agents were employed taking information, and their work afterwards revised and corrected from door to door. It is in this manner that the publishers endeavour to give to their subscribers and the citizens generally a Directory on which for accuracy they can depend. The sketch of the City and its public institutions will well repay perusal. The map which accompanies the Directory was expressly got up for the work, and will be found exceedingly correct and useful. Hereafter the Directory will be published in the early part of January each year. The publishers, in taking leave until another year, are thankful to all those who have aided in supplying information and in bringing the Directory to a successful issue.

FISHER & TAYLOR.

TORONTO, January 31st, 1875.

TORONTO.

During the past year Toronto has increased proportionately faster than in any previous year, even not excepting the era of the Russian War when bountiful harvests and war prices gave her the command of enormous capital which she invested in making additions to her built area. It is estimated that in the year just past no less than 700 new buildings were erected, at an estimated cost of $3,000,000, and that the population received an increase of 6,000 souls, bringing the aggregate up to 74,000 at least. According to the census of 1871, the population was considerably less than 60,000, so that the city can boast of an average increase of nearly 5,000 souls during the past three years, or an increase of over nine per cent. *per annum*, equal to nearly 100 per cent in a decade.

To the enterprise of her citizens and the rapid development of the Province, Toronto attributes this wonderful rapidity of growth. The new railways with their connections which are piercing and opening up the vast territory to the north; the rise of inland towns; the annual anabasis of immigrants to back settlements and the general prosperity with which Ontario has been blessed—these are the powers which are moving the city like magic. Yet in some respects 1874 was an exceptionally bad year. The financial crisis which fell upon the United States in the fall of 1873, and left them paralysed so far as trade and commerce were concerned for months afterwards, deprived Ontario of no inconsiderable portion of the bulk of her foreign trade. At one time it was feared that the panic would cross the lines and make havoc among the Canadian firms which had dealings with American establishments, but this country fortunately escaped. The only trade in which Toronto is heavily interested which suffered severely was the lumber trade. Owing to oversupply and the scarcity of money, the great lumbering combinations in Albany virtually suspended operations, and the result was seen in the comparatively small lumber import and export of the city.

The principal civic work of the year was the new Waterworks system. The pipe from the Island, two miles and a half in length was successfully laid in October. Hundreds of men were employed in laying nearly 15 miles of piping through the city, and hundreds more in constructing an enormous reservoir in the northern outskirts. It is believed that the works when completed will be capable of supplying a city of 120,000 souls with water necessary for house and fire purposes. Arrangements have been made by which, supposing the pumping machinery to collapse or get out of gear, the usual maximum can be kept up for days, so that the citizens may rest secure in the belief that they are protected from the calamities which have fallen upon other cities by reason of the temporary derangement of their water supply.

An absentee who should pay a flying visit to the city now would be astonished at the extraordinary progress which has been made on the two main streets running immediately parallel with the lake. On Front and Wellington streets warehouses have been erected which are second to none on this continent in capacity and architectural beauty. The Phœnix Block, after undergoing two severe trials by fire, seems to have obtained a long lease of immunity, and the wholesale stores which it contains are among the wealthiest marts in the city. McMaster's Block, the new Custom House, the new Printing Office of Messrs Hunter & Rose, the batch of splendid hotels which have lately sprung up in proximity to the Union Station, and the long range of new stores extending from Yonge street present an appearance to the stranger on landing infinitely more inviting and promising than the dreary sight which struck his gaze three years ago, when the Esplanade and a wide margin on the rear were dotted with here and there a good building, while the gaps between them were occupied by old fashioned stores and tenements which made their modern comrades look ridiculous in their company

The neighbourhoods round about the Grand Trunk and Northern workshops are being filled with stores and dwellings for the accomodation of the large additional force of men employed there and in the foundries, machine shops and factories dotting the whole western area Fifty years ago the site of St. Andrew's Market was an apparently hopeless swamp which the denizens of Little York regarded pretty much as we regard the great Gum Swamp in North York. In a short time, new life will be given to a neighbourhood already of exceeding vitality by the completion of the Credit Valley Railway, which will make the flourishing towns of Galt, St. Thomas and the wealthy section of country intervening, tributary to Toronto, furnishing us at the same time with the most direct route to Chicago and the North West. The importance and value of the benefits which this great undertaking will confer on the city are incalculable. Hard upon the Garrison Commons, which soon must doff whatever of faded military garb they now wear, stands the Central Prison, a magnificent pile of buildings, costing nearly half a million of dollars. This institution was built for the accomodation of prisoners undergoing sentences varying

from three months to two years. It is in fact a school of correction, standing between the common gaols of the Province and the Provincial Penitentiary. The prison labour is employed in the works of the Canada Car Company which pays the Province fifty-five cents a day for adult labour, benefitting the Province and the unfortunate prisoner at the same time. In the north-west, situate on the Commons which divide that portion of the City from Seaton Village, is the new Knox College, now in course of construction. It is a splendid edifice and will be well in keeping with the University, Trinity College, the Normal School, St. Basil's College and other educational institutions, which reflect credit on the taste and intelligence of the people. Seaton Village, like Yorkville, Leslieville, and Brockton, will soon be engulfed in the City. The inhabitants of those suburbs hesitate to cast in their lot with Toronto, in view of the additional taxation which will be entailed upon them; but when the new Waterworks are completed and they find that the growing claws of the City are surrounding them, they will no doubt capitulate with good grace.

Returning to the older portions of the City, the building which, above all others, is most conspicuous is St. James' Cathedral with its new spire and adornments. The spire is the tallest on this continent, 318 feet in height. As it now stands, the Cathedral is undoubtedly one of the finest specimens of Gothic architecture in the world. The internal height of the nave is 70 feet; of the aisles 35 feet; and the width is 115 feet. The Cathedral was destroyed by fire in 1849, and although it was partially rebuilt with incredible rapidity in ten months, yet, like York Minster and other religious edifices, it seemed destined to remain unfinished *in sæcula*. But the efforts of leading members of the congregation and the public spirit of the citizens at large have rescued it from that fate, and a nobler monument of the union of business enterprise and religion could not exist.

Then come a galaxy of other churches. St. Michael's Cathedral, with the Metropolitan Wesleyan Church (said to be the largest edifice owned by that body anywhere), St. Paul's, St. Peter's, St. Andrew's, Knox's, Trinity, and St. George's are all alike worthy of their congregations and city.

During the past year Toronto made herself supremely rich in places of amusement. The Grand Opera House, on Adelaide Street, immediately west of Yonge Street, is one of the handsomest and most capacious structures of the kind on the continent. It is the property of a Joint Stock Company, the management being centered in Mrs. Morrison, whose accomplishments the citizens of Toronto knew and appreciated twenty years ago. The Opera House is capable of containing upwards of 2,000 people, and the stage, boxes, dress circles and galleries give evidence of the finest and most artistic workmanship. In times past the leading "stars" of the stage, operatic or theatrical, could only be brought to Toronto at a loss to the managers of the only institution of the kind which we then possessed; but, with our growing wealth and expanding enterprise we have changed all that. The Royal Opera House, on King Street West, is another gem, a worthy rival of the Grand. The old and dingy Royal Lyceum, wherein the theatregoing people for years labored in travail, having been burnt down, the Royal Opera was erected on the site and at once started on a vigorous career. Nearly opposite the Royal is the Queen's, a Vaudeville theatre, which is also well patronised, while on Colborne Street the Academy of Music supplies a miscellaneous entertainment of "varieties." With three theatres, one variety hall, and the aid of perambulating circuses and troupes, minstrel, ballet, and otherwise, the citizens of Toronto are somewhat ahead of the rest of the world in their means of amusing themselves with every art known to the "profession."

On Church Street, north of King, is the Music Hall, where once the operatic "stars" shone, but since the erection of the new theatres, it has become merely an arena for lectures, balls, bazaars, and public meetings, holding in that respect a higher degree than the St. Lawrence Hall.

The New Post Office on Adelaide Street and the imposing blocks now in course of erection opposite, have beautified what was once a somewhat dreary locality.

The extreme eastern portion of the City is being left behind on the march. The House of Providence and the City Gaol keep up a respectable architectural appearance; while the establishment of Messrs. Gooderham & Worts, Hamilton's Foundry, the Grand Trunk Shops, and the terminus of the Toronto & Nipissing Railway show that there is an abundance of "life in the old dog yet." But, on the whole, there is an ancient and uncouth look about the East which contrasts strangely with the spruce and growing West. The buildings which the old dwellers on the Don, twenty years ago, regarded with feelings of unmixed pride, are being remorselessly dragged down by a stiff-necked generation of railway and foundry and factory magnates who confess to have no liking for the *antique*. The Old Gaol still remains, but its terrors have been stolen by the City Prison on the East and the more terrible Central Prison in the West. But the wharves in the East are growing apace. The Toronto & Nipissing Railway, which is

being rapidly extended as the settler pushes northward, has given a vast impetus to the carrying trade of the city, and the new wharves at the terminus at the corner of Berkeley Street and the Esplanade are crowded in the months of navigation by shipping and immense cargoes of lumber and produce.

Taking leave of the business haunts of the City, its head, hands, and feet, a visit to its lungs, the Queen's Park, is well repaid. The matchless Avenue and the green-sodded acres at the top of it afford to the hard-worked citizen, mouthfuls of Saturday afternoon and Sunday-fresh air, of inestimable value to himself and the city which he is building up. The University in the west of the Park is admired as an architectural masterpiece of the Norman style; and close by is the Observatory, one of the most important stations in the meterological system, which is being extended throughout the North American Continent, under the direction of the Signal Service Bureau at Washington. For some time a statue of Queen Victoria, by Marshall Wood, occupied a position near the Russian guns at the head of the Avenue, but the sculptor and the City Fathers could not agree upon the price, and it was removed. On Queen Street, to the east of the southern end of the Avenue, stands Osgoode Hall, a stone-faced block with two projecting wings. This, named after the first Chief Justice of Upper Canada, is the seat of the chief law courts in Ontario. It possesses an excellent library, the whole institution being controlled by the Benchers of the Law Society. Westward to Simcoe Street and thence southward, are the Parliament Buildings, old-fashioned and altogether out of date and capacity for the present requirements of the Legislature. Fronting them is the Lake and the Island, a convenient summer resort of which a local bard has sung the parody :—

There you may slip in,
To take a dipping;
Ferment the shipping
That at anchor ride;
Or in a wherry
Cross o'er the ferry,
To the Eastern Gap
On the other side.

To him (knowing its metropolitan position and business character) who should be thinking of making Toronto his home, and, as Daniel Webster said, "there is always room upstairs or westward," the excellence of the Water Supply, of the Fire Alarm Telegraph, and of the twelve miles of Street Railway accommodation are points of no mean importance. They, with other features which we have enumerated above, are worthy of the metropolis of Toronto. She has thrown off primeval encumberances and made for herself a 75,000 souls' "clearing in the bush" with a network of tributary railways and an unequalled stretch of water communication, which *must* make her the worthy capital of a vast, prosperous, and incalculably rich Province.

THE MONTREAL TELEGRAPH CO.

This popular Company, which has its wires laid along the line of railways and connections, was incorporated in the year 1847, with a capital of $60,000, and began its operations with 12 or 15 offices between Montreal and Quebec. Its history has been an uninterrupted success from the start; its lines having been extended to the remotest sections of the country wherever they can be maintained, and offices opened in nearly every village and hamlet throughout the country. Its capital stock has been increased to $1,750,000; its miles of lines to 21,000; and its number of offices to 1,200. Extensions are constantly going forward into newer and remoter sections of the country as routes are opened up, and new offices are almost daily being opened.

This Company is apparently unaffected in its prosperity by rival schemes, having outlived several in the course of its history. No country in the world is probably better served in the matter of telegraphic communication than Canada. The great abilities and enterprising spirit of Sir Hugh Allan, the President of the Company, have been as serviceable in developing the organization we are now describing as in founding the magnificent system of Oceanic communication with which his name is so familiarly identified. An enterprizing, but at the same time shrewd and far-seeing policy has, in fact, characterized the Company's operations from the very outset. In this respect, and in all questions demanding liberal and comprehensive action, this Company has been greatly assisted by possessing in Mr. H. P. Dwight, the Superintendent of the Western District, a gentleman who has had regard not so much for an immediate return for the work undertaken as the certain steady expansion of business in a corresponding ratio with the increase of trade or population. Mr. Dwight's management extends over the most important section of the Company's territory.

ALPHABETICAL DIRECTORY.

ABBREVIATIONS USED IN ALPHABETICAL DIRECTORY :—av *avenue* ; cor *corner* ; bdg hse *boarding house* ; e *east* ; h *house* ; l *lane* ; n *near* ; opp *opposite* ; r *rear* ; sq *square* ; w *west* ; wid *widow*.

The names in CAPITALS IN ALPHABETICAL DIRECTORY are those of Subscribers and Advertisers.

When avenue, lane, place, road, square, or any other such word, does not follow the residence, the word *street* is to be understood : for example, Fisher & Taylor, publishers of the "Toronto Directory for 75," 6 Victoria, means 6 Victoria *street*.

FFICE OF THE EAST TORONTO PLANING MILL, CORNER OF QUEEN & GEORGE STREETS,
SSRS. STOCK & WEBSTER.

Toronto, Sept. 3, 1874.

GENTLEMEN,—In answer to your request as to our opinion of your oil as compared with others, we have to that we have decided to use no other so long as we can get yours; and this was brought about by the fact that dealers came round and said that they could give us oil as good as yours for much less money, so we took samples ach. The following is the result of FOUR TESTS OF EACH SAMPLE, in one of Foster's Patent Oil Cups on our :—Cup No. 12 once filled run with sample No. 1, at 25c. per gall., 2 days; sample No. 2, at 45c. per gall., 3 sample No. 3, at 55c. per gall., 6½ days; STOCK'S EXTRA OIL, AT 60c. PER GALL., OUT OF BARREL THAT WE THING, 12 DAYS. The above samples were from *the leading oil dealers of Canada.* I may also say that we ing your oil on our cylinder instead of tallow, and find it does as well and is much cheaper, and better for the . I think we can truly say that we are saving fifty per cent. in oils since we commenced using STOCK'S EXTRA.

Respectfully yours,

WM. H. ESSERY,
Engineer for Messrs. Withrow & Hillock.

YORKVILLE—A thriving, incorporated village on Yonge street, immediately in rear of the city of Toronto, township and county of York. In the course of time it will probably form part of Toronto. There are a large number of brickyards, factories, breweries, &c., in the north part of the village. The Toronto Street Railway Co. has its offices and terminus here. The town hall is situated on Yonge street. A number of the leading citizens of Toronto have handsome private residences here. The prospects of the village are encouraging. Montreal Telegraph Co. has an office here. Distance from the City hall, Toronto, 2 miles, fare 5c. Mail daily. Population about 3,500.

Yorkville Corporation, 1875—John Severn, *Reeve;* Saml. Wickson, *Deputy Reeve. Councillors:* Walter Walker, Edward Crowan, Leonard Pears. *Clerk and Treasurer,* W. H. Archer; *Assessor,* Charles Thom; *Collector,* Andrew Smiley; *Village Inspector and Care-taker of Town Hall,* Richardson Castle; *Chief Constable* and *License Inspector,* Joseph Johnson. Council meets in the Town Hall every Monday evening.

TORONTO FIRE ALARM TELEGRAPH.

DIRECTIONS TO KEY HOLDERS.—Upon positive information of a fire near your signal box, unlock the signal box door, and if you hear a ticking in the box, count the number struck; if the number struck is the number of any box near the fire, you may conclude that the alarm was given by some person before your arrival. If no ticking is heard in the box, pull the brass hook all the way down, about too inches—once only—and let it go; or if it be a brass knob and not a hook pull the brass knob upwards and around as far as it will move, then let it go, then wait a minute, and if you hear no ticking in the box or alarm on the bells, go to the next nearest box to the fire, and pull the hook or knob in that box. On no account should the hook or knob in any box be pulled until after the ticking in the box has ceased for at least fifteen seconds, and no alarm should be given for a chimney only on fire.

Never open the box, or touch the hook or knob, except in case of fire.

Never give an alarm except from the box nearest the fire, unless you have first ascertained that the box nearest the fire will not work.

The key used in opening the box cannot be taken out without another, called a relief key, and do not try to take the key out until a person having a relief key takes it out. Be sure the box is locked before leaving it.

Never let the key go out of your possession unless to some responsible person for the purpose of giving an alarm, or when called for by the Superintendent or Chief Engineer of the Fire Department. The key should be kept in one certain and secure place, out of the reach of children or strangers, but readily and easily got when required.

SPECIAL, FOR ASSISTANT ENGINEER AND FIRE COMPANY.

If the Assistant Engineer and Fire Company are required for any special purpose, Ten blows will be struck on the Alarm Bells and Gongs; whereupon the Assistant Engineer and all members of the Fire Company shall attend as expeditiously as possible at the central station, Bay Street Fire Hall. Should their attendance be required elsewhere, in addition to the ten, as above directed, the number of the Signal Box in the locality where required, will be struck twice, with a pause of about 30 seconds between each time.

PRACTICE COURT AND CHAMBERS.

One of the Common Law Judges (puisne) holds a court during each Term, called the Practice Court, for hearing matters relating to bailing or justifying bail, discharging insolvent debtors, hearing and determining matters of motion, and making rules and orders in cases and business depending in either of said courts. Chambers are held each day in common law by Mr. Dalton, the clerk of the Crown and Pleas, Q. B., and Chancery by Mr. Holmstead, Referee in Chancery Chambers, such business relating to suits therein as may be transacted by them respectively, subject to appeal to a Judge of the respective Court.

Common Law Chambers—W. B. Heward, clerk.
Chancery Chambers—Walter Crofton, clerk.

HEIR AND DEVISEE COURT.

Commissioners—The Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to lands in Ontario, for which no patent has been issued from the Crown, in favor of the proper claimants, whether as heirs, devisees or assignees.

Sittings at Toronto, first Monday in January and July in each year. W. B. Heward, clerk of commissioners.

SURROGATE COURTS.

The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. The County Judges are also Judges of the Surrogate Courts. Sir J. L. Robinson, bart., Surrogate clerk, office Osgoode Hall.

COURTS OF GENERAL SESSIONS.

Chairman, the County Judge in each County, who holds a Court of General Sessions in his County three times a year, (in the County of York four times a year), for trials by jury in cases of felony and misdemeanor; but treason and capital felonies are exempted from their jurisdiction. Terms same as County Courts.

COUNTY JUDGES CRIMINAL COURTS.

By a valuable addition to the administration of criminal law in the Provinces of Ontario and Quebec under an Act of the Dominion of 32 and 33 Vict., cap. 35 and 36, Vict. ch. 8, Ont., any person charged with an offence for which he might be tried at a Court of General Sessions of the Peace, may, with consent, obtain a speedy trial out of Sessions before the judge alone.

INSOLVENT DEBTORS' COURTS

By the Insolvent Acts of 1869, 32 and 33 Vict., cap. xvi., and 34 Vict., cap. xxv., provision is made for the settlement of the estates of insolvent debtors, for the realization and distribution of their assets, and for the punishment of fraud. This enactment applies to traders only. In these Courts, the County Court Judge in each County presides. The appointments of official assignees are made in pursuance of this Act, and are to be nominated by the Board of Trade at any place

provisions of the sections twenty-nine to forty-six, both inclusive, of the Act passed in the thirty-first year of Her Majesty's reign, intituled "*An Act respecting the Customs*," so much of any Act as is inconsistent with this section being hereby repealed.

9. Whereas difficulties have frequently arisen in determining the fair market value for duty of goods imported into Canada, being the manufacture or production of foreign countries or of Great Britain, such as Musical instruments, Sewing machines, Agricultural machines or implements, Medical preparations, commonly called patent medicines or other similar goods, the prices of which are published by the manufacturers or producers, or persons acting in their behalf, it is hereby enacted that the Governor in Council may from time to time fix and determine a certain rate of discount which may be deducted from such published prices of any such manufactures or productions, and the remainder of such published price after deducting such rate of discount, shall be deemed and taken to be the fair market values for duty of any such manufactures or productions as may or shall be specified in such Order in Council, anything in this or any other Act to the contrary thereof notwithstanding.

10. The fourth section of the Act passed in the thirty-fourth year of Her Majesty's reign, intituled "*An Act to amend the Act relating to duties of Customs*," is hereby repealed, and the following is substituted therefor:—

"4. Notwithstanding anything contained in this or any other Act, the Governor may until the first day of January, 1875, authorize the admission free of duty of any machinery to be used in any Canadian manufactory, on satisfactory evidence that like machinery is not then manufactured in Canada."

11. The sub-section numbered 2, of the thirty-first section of the Act, 31 Victoria, chapter 8, intituled "*An Act respecting the Inland Revenue*," as amended by the first section of the Act 31 Victoria, chapter 50, is hereby repealed, and the following substituted therefor:

"2. On every wine gallon of spirits of the strength of proof by Sykes' hydrometer, and so in proportion for any greater or less strength than the strength of proof, and for any less quantity than a gallon, seventy-five cents.

12. The sub-sections, numbered respectively 6, 7 and 8, substituted by the Act 33 Victoria, chapter 9, for the sub-sections so numbered of the said thirty-first section of the said Act 31 Victoria, chapter 8, are hereby repealed, and the following substituted therefor, respectively:

"6. On Cavendish Tobacco and Snuff, and on manufactured Tobacco of all kinds, except cigars and common Canada twist, on every pound or less quantity than a pound, twenty cents."

"7. On common Canada twist, otherwise called *tabac blanc en torquette*, being the unpressed leaf, rolled and twisted, and made wholly from raw tobacco, the growth of Canada; for every pound or less quantity than a pound, ten cents."

"8. On Cigars, for every pound or less quantity than a pound, forty cents: subject to an abatement or allowance for moisture in calculating the weight for duty, to be fixed from time to time by regulations to be made by the Governor in Council."

13. The foregoing section of this Act, and the alterations thereby made in the duties of Customs or of Excise, on any articles or goods, shall be held to have come into force and to have taken effect on the first day of May, in the present year of our Lord one-thousand eight hundred and seventy-four, and to apply to and determine the duty payable on any article or goods imported into Canada or taken out of warehouse for consumption therein, or (as respects duties of Excise) manufactured or made or on which duties of Excise have become payable, on or after said day: but all duties of Customs or of

GRAMMAR SCHOOLS OF ONTARIO.

Each of these schools (which form the intermediate link between the Common schools and the Universities) is managed by a Board of Trustees, appointed jointly by the county and town councils. In cities the trustees are all appointed by the city council, except where there is only one school in the county. The head master must be a graduate of a British or Colonial University, unless certificated and appointed by the 18th of September, 1865. Besides fees, local rates or contributions to the extent of half the Government grant must be raised for the master's salary. The grant is payable to those schools only which attain a certain standard, and is based on the average attendance of pupils in the prescribed studies. An extra grant is pro-
