ROAD BUILDING ON VANCOUVER ISLAND

Hon. Thomas Taylor Promises Sympathetic Consideration of Programme Submitted to Government

The provincial government, through the Hon. Thomas Taylor, minister of public works, has promised its sympathetic consideration of a programme of roads and trails which the Vancouver Island Development League has suggested should be constructed on the island. Yesterday morning a deputation of the league, consisting of Mr. A. W. Coburn, of Nanaimo, the president; Mr. J. J. Shallcross, president of the Victoria branch; Mr. A. E. Todd, and Mr. E. McGaffey, secretary, waited on Mr. Taylor. The deputation was received most cordially, and Mr. Taylor stated that he would have government surveyors estimate the cost and feasibility of the various works proposed, after which the government would do all it possibly could in the matter.

The suggestions made by the league arose out of resolutions passed at the annual meeting held in Alberni last July. They include a recommendation for the construction of trunk roads running east and west and north and south through the island, connecting coast points, and so facilitating transportation. Another suggestion is the advisability of placing adequate signposts at all cross roads. The provincial government is urged to appoint a qualified road supervisor for all districts now without the services of such a supervisor, who, in conjunction with the residents of each locality shall lay out plans for all projected roads, and exert a general supervision of the road work.

Roads Specified

Among the specific roads and trails wanted are: One to connect the Alberni district with Clayoquot by way of Ucluelet with a substantial wagon road; to clear a trail from Ladysmith to the Majuba property, and from there brush and log the same to Chemainus river, and thence to Cottonwood river and Cowichan lake; to clear the Sutton trail from Ladysmith to the Reinhart property and to continue the same to connect with Nanaimo via the South Fork road; to continue the Nanaimo river trail from the end of Green lake to Cowichan lake; to clear a trail from Half Way House on Cowichan Lake road to Chemainus river, and thence via Mead Creek, so that the said trail shall connect with the trail from Ladysmith to Cowichan lake; to cut a trail from the trail connecting Ladysmith with Cowichan lake, so as to run to Cowichan lake via Mead creek, thereby shortening the distance from Ladysmith to Cowichan lake; to extend a substantial wagon road up the Millstone river valley along the west side of the Big Lake at Wellington and on to Nanoose bay out on to the main road to Alberni.

The attention of the provincial government was also called to the road between Oyster river and Campbell river, and the government is urgently requested to grade, or corduroy with logs or timber, the sandy stretches on this road, which are now well-nigh impassible. The league states that the tourist travel to these sections fully warrants some outlay on these sand stretches.

Buttle Lake Park

The attention of the government was also called to the fact that the league notes with satisfaction the reserve placed on the Crown lands in the neighborhood of Buttle lake for the purpose of a provincial park. The hope was expressed that early steps would be taken to open up the park with adequate roads and trails connecting all parts of the island, and further that suitable arrangements would be made for the preservation of the timber, game and fish within the park area. The league also urged the government to construct a road into the Buttle Lake reserve from Alberni via Beaver creek road and the Comox lake trail, that route being stated to be the most feasible and inexpensive for approaching the reserve.

The members of the deputation left well satisfied with the manner in which they had been received by the Hon. Thomas Taylor.

PLATE FOR RAINBOW FROM THIS PROVINCE

Design Approved by Agent General in London With the Text of the Inscription

Hon. J. H. Turner, Agent-General for British Columbia, has advised the Premier that a beautiful design for the piece of plate presented by the government and people of this province to H. M. C. S. Rainbow has been completed by the London Goldsmiths' and Silversmiths' Company Limited, the principal workers in such forms of art at the world's metropolis, with whom an order has been placed, to be executed with all consistent haste. The design has been submitted to and heartily approved by Admiral Kingsmill, and provides for a very handsome vase centrepiece, the handles formed respectively of the wapiti and the big horn sheep of British Columbia, emblems of a nautical character being at the base, together with the inscription, which is to be as follows:

"Presented by the Province of British Columbia to H. M. C. S. Rainbow in welcome recognition of this being the first vessel of the Canadian navy to be stationed on the Pacific coast of the Dominion, and with the loyal hope and belief that the Rainbow and her successors may fulfil their part in uniting and strengthening the naval defences of the Empire."

ADVENTURE ALOFT

Mr. J. A. D. McCurdy Makes Daring Flight and Meets With Accident

A Philadelphia despatch of September 23rd says:

"J. A. D. McCurdy, the Canadian aviator, came to grief yesterday in a flight preliminary to making the hazardous trip from Allentown, Pa., to Philadelphia, but he won the plaudits of the crowd for his daring.

"There had been a strong wind all day. The flight was scheduled to start early in the day, and three thousand persons were packed into the fair grounds awaiting the start. They became impatient and finaly at 2 30 McCurdy decided to go up, rather, he said, than become a hooting mark for the persons who had paid their good money for admission.

"He did very well for a few minutes, when suddenly his motor stopped, and at 800 feet from the ground a gust of wind struck the aeroplane, almost capsizing it.

"But McCurdy hung on, and by wonderful presence of mind righted the machine and glided toward the ground at a terrific pace. Fortunately he landed right side up, but the impact smashed one of the wheels of the machine and some of the interior workings. The aviator was not injured."

CAR ON SIDEWALK

Green Auto Driver in Seattle Does Some Damage by Losing Control

SEATTLE, Wash., Oct. 1. — A heavy auto jumped the curb on Third ave. yesterday, plunged at high speed among the pedestrians on the sidewalk, knocked down one of the men and dragged him fifty feet, and crashed into the front of Piper & Taft's store, smashing five windows.

While the car was hurtling along the sidewalk, the owner was seen climbing over the front seat, where he grabbed the steering wheel just in time. He was O. V. Lawson, manager of the State National Institute. When the crash came, the chaffeur, his face all blood from the shattered glass, leaped from the car, ran down Marion street and disappeared.

"He was a new man" Lawson said, "I don't believe he knew a thing about autos."

From under the car came the cries of O. J. Clancy, who was pinned down helpless. The injuries he received while being dragged are considered very serious.

"I was so surprised," said he in his bed at the city hospital last night, "when I saw that auto coming down the sidewalk that I could not get out of the way."

VERY RICH ORE

Value of $1,292 Per Ton Found in Vein on Kenai Peninsula, Alaska

SEWARD, Alaska, Oct. 1.—An average sample taken across the twenty-one inch vein on Crow Creek, Kenai peninsula, gives the extraordinary return of $1,292 per ton. The property is owned by James Barnes of Seattle, and E. J. Barnes, of North Yakima, Wash.

According to Mr. Barnes, who is in the city from the north at this time, the veins show gold from the grass roots down. Mr. Barnes and his son, E. S. Barnes, who is in charge of the property, have several claims under bond and will work all winter doing development work.

"The day of quartz mining in Alaska is dawning," said Mr. Barnes, "and I look for immense development next year."
