The Ring

Mellody and Furey

Worcester appears to be the only place within hailing distance of Boston that is supplying the fans with the real boxing shows. The Lake Shore A. C. has arranged another all-star programme for next Thursday night.

Already one selection has been made and will have Billy Mellody and Tommy Furey in a ten-round bout. Mellody is boxing at a clip fast enough to make Furey travel at a lightning gait and as the Marlboro boxer is known to possess a stinging wallop, not mentioning what Mellody can do when he is going at his top speed, the fans look upon this match as one of those apt to end with a knockout. This is one of the three bouts which are to be decided.

A great many are wondering what Murphy would have done with McFarland had the latter been anywhere near the weight.

Sailor Petroskey, an able seaman of Uncle Sam's navy, is looming up as a formidable entry in the middleweight division. Petroskey surprised the California talent by whipping George Contas, a Chicago Greek, beter known as Chicago K. O. Brown. The sailor has visions of coming along like Tom Sharkey, who made a pot of money out of the fighting game and who is one of the few who has the most of it today. Petroskey has a manager and he has issued a challenge to meet any middleweight in the world.

The long picture at the side shows a man who took advantage of the opportunity to preach what he thought was a timely sermon—read his board.

EXHIBITION SHOWING WOMAN AT HOME AND IN BUSINESS FIELD

Berlin to Be Scene of Interesting Array Descriptive of Woman's Activities in the Present Day

Berlin, Feb. 2—Under the patronage of the Kaiserin and the active leadership of Frau Hedwig Heyl, the millionaire society leader known as the "Mother of Berlin" because of her many philanthropic activities, the women of Germany are engaged in preparations for a women's exhibition, which will be called "Woman in Home and Business." The exhibition will be opened on February 24 in the great salon at the Zoological Gardens, and will last for six or seven weeks.

It will show the accomplishments of woman in every sphere of human activity which she has so far invaded. Music will be provided by a band of lady musicians, who will play, exclusively, compositions writen by women. There is to be a library filled only with books whose authors are women, and the exhibition hall will be decorated with paintings made by feminine hands and works by women sculptors. The role women have played in the world's wars, not only as samaritans but as soldiers, will be graphically illustrated.

The organizers promise to astonish "mere man" by the staggering display of feminine accomplishments in those occupations and professions commonly regarded as the monopoly of the sterner sex. Exhibits will be shown to convince the observer that women have invaded permanently and successfully the fields of manufacture, commerce, banking, law, medicine, journalism, the church, politics, theatre and opera management, to say nothing of the humbler callings wherein women and girls have long competed with men.

Soon after the opening of the exhibition the National Congress of German Women will take place for the purpose of discussing feminine topics of the hour, including the question of the army conscript service for women.
