The French *Charivari* has a cut representing two men leaning against a lamp-post. One has a telescope looking toward America. The other asks—"Is the American war yet ended?" "No, I still see some inhabitants."

Alex. McFadgeon, between fifty and sixty years old, was run over and killed by the cars at Rockwood, Grand Trunk railway, on Friday last. He was intoxicated and was lying or sitting on the track when the accident happened.

RIOT BETWEEN NEGROES AND SOLDIERS AT WASHINGTON.—A Washington despatch of August 4th to the New York *World* says:—This evening a serious riot broke out on Capitol Hill between the soldiers and negroes.—The former attacked the latter with stones, bricks, and everything at hand which they could use. The negroes outnumbered them, and drove them back with axes, iron bars, &c. One negro, with an axe cut indiscriminately among the soldiers, and nearly severed the head of one soldier from his body, killing him instantly. Several were badly wounded. The soldiers fell back and were joined by reinforcements, when they drove the negroes back, and set fire to a long row of dwellings occupied by contrabands. All were detroyed. By this time a large detachment of police arrived, and made several arrests.—The wounded were carried to the Lincoln Hospital. This is the most serious riot which has occurred here in a long time.

THE WEATHER PROPHET DIVULGETH.—Ryan, the last of the ancient and honorable order of prophets, has again opened his mouth for the edification of the people. His extraordinary success in predicting a drouth, after four weeks of cloudless and rainless dog-day weather, has induced him to again touch his hat to our readers, and venture other and wiser prophecies. It will be observed that it is to rain to-day and to-morrow. Hear him: On the 18th and 19th inst., rain is due. (Isn't it dew?) That is the principal change this summer. On the 26th inst. will be the precursory of the change that will take place for the fall. The 1st and 2nd of September will govern the weather for the fall. If the wind is south or south-west on those days, with pleasant weather, we will have an open fall and late corn will perfect. But if the wind should be west or north-west on those days, with a heavy cloud passing off north or south, we will have early frost, and late corn will be nipped. The earlier corn fodder is secured the better.—[Detroit Free Press.
